eye permanently covered with a transparent membrane representing the nictitating membrane, but no movable eyelids. One of the lungs is usually reduced or wanting. Reproduction is ovoviviparous or oviparous. The bite of most snakes is not poisonous, but some have certain of the salivary glands modified into poison glands and some of the upper teeth developed into grooved or even tubular fangs, and are among the most dangerous of animals. Snakes are almost exclusively predaceous, generally refusing all but living prey, which consists of large insects, small mammals, birds, lizards, etc. These they swallow whole, in some cases alive, in others after poisoning them, or strangling them in coils of the body. Though most snakes live on the ground, or in holes or crevices, some are burrowers, some arboreal, and others aquatic or even truly marine in habits. Most of them have the belly covered with broad transverse plates to each of which the ends of a pair of ribs are attached, and movements of the ribs and plates help in locomotion, which is, however, performed chiefly by lateral undulations of the body (pressing against inequalities on the surface, stems of plants, etc.). Most snakes are not only harmless to man, but often useful. None of them can sting with the tail or with the forked tongue. The name is popularly extended to snakelike limbless lizards, as the *glass snake*, and some snakelike amphibians. See also CONGO SNAKE, SERPENT, 1. See FANG, *Illust.*

so (sō; 71), *adv.* [ME. *so, sa, swa,* fr. AS. *swā;* akin to OFris. *sā, sō,* D. *zoo,* OS. & OHG. *sō,* G. *so,* ON. *svā,* Sw. *så,* Dan. *saa,* Goth. *swa* so, *swe* as. Cf. SUCH.] **1.** In that or like manner; specif.: **a** Just as has been done, said, thought, proposed, etc., according to the statement or implication of the expression immediately preceding; — used to avoid repetition and equivalent to the pronoun *that;* as, I shall endeavor *so* to do (archaically, with *so* placed before the finite verb); he thought that they would come and I thought *so* too; also, elliptically after auxiliary verbs; as, he may have if he *so* chooses, that is, chooses to do or have that. "*So* spake the apostate angel." *Milton.* **b** Just as has been said, according to the statement immediately before or one referred to by a noun or one implied or one explaining an expletive *it;* — used after a copula and equivalent to a predicate adjective such as *true, accordant to fact;* as, to find out whether the story be *so;* it certainly seems *so;* is it *so,* that the news is out? Also, elliptically; as, you can be quite agreeable if you *so* please, that is, please to be agreeable; elliptically, forming a question, *So?,* that is, is it true or the fact? do you mean what you say?

To inquire into those matters, whether they be *so* or not. *Tillotson.*

c As described, professed, or named in a preceding word or phrase; in the state or condition previously referred to; by that name; as, he believed the world round and proved it *so;* he was crazy and is *so* still; he was always called *so;* I am sorry to see you *so,* that is, in that condition (unnamed). **d** Elliptically for a clause in various contexts; as: (1) Stating the accordance of the preceding with fact; as, no more but *so,* that is, what you say is precisely true; if *so,* he will succeed, that is, if he does after that manner; not *so;* quite *so;* how or why *so?* (2) Alluding to the doing of an action in the manner demonstrated; as, let me adjust your tie, *so;* now it looks better. (3) Expressing assent (or with *not,* disbelief, refusal, etc.); — equivalent to *it is well, let it be just as it is, let it come to pass;* as, me face him singlehanded? Not *so.*

And if it please you, *so;* if not, why, *so.* *Shak.*

(4) Following a quotation, with the name of the speaker or author; as, *so* Isaiah. **e** In that very manner; according to the aforesaid; in corresponding manner; likewise; just as stated; — used to connect and relate in meaning an expression of corroboration, assent, or assurance to the preceding clause or sentence; as, "But she had a large heart!" — "*So* she had." *Dickens.* **f** In close resemblance, accordance, or agreement as to nature or manner; equally or in the same proportion; likewise; — used with a clause introduced by *as;* as, as in religion, *so* in science.

For as he thinketh in his heart *so* is he. *Prov.* xxiii. 7.

g *Obs.* As indicated in the preceding context; — following a comparative and *than;* as, better undone than *so.*
2. In that degree; specif.: **a** To that extent or degree described in the preceding context; — used chiefly to limit adjectives and adverbs; as, he refused to consider any offer *so* miserly; why they talk *so* guardedly. **b** In or to a high degree; exceedingly; very; — used as a mere intensive with adjectives, adverbs, and verbs without expressed or implied comparison; as, his decisions are *so* biased; *so* patently untrue; his style is *so* boresome; we hated him *so.* With attributive adjectives, *so* is idiomatically used with an indefinite article following the adjective; as, *so* recent a novel; archaically with an article or possessive adjective preceding; as, thy *so* great people; formerly without article. "With *so* full soul"; "In *so* profound abysm." *Shak.* Also, formerly, with an article following *so* and preceding the adjective. "*So* very a known rogue he was." *Pepys.* "*So* new a fashion'd robe." *Shak.* **c** To a certain unspecified or interminate extent or degree; as, he dared come only *so* near; it would burn just *so* long. **d** In the same way or to the same extent or as surely (as the accompanying asseveration or vow proves true or trustworthy); as, I will find him *so* God me speed; — now archaically except in fixed phrases such as "*So* help me!" **e** *Obs.* As; by that much; — used in correlative pairs in expressions of comparison.
3. In such manner or such a manner; to such degree or extent; also, with the end in view, or, *Now Rare,* with the proviso; — used to limit an adjective, adverb, or verb followed by various constructions: **a** By an adverbial clause introduced by *that,* rarely by *but,* or often, and then usually elliptically, without a conjunction; as, to work *so* hard that he won the prize, or hard *so* that he might win it; to get *so* he could not walk; *so* that he was paid in full, he cared not who suffered. Sometimes for different rhetorical force the clause precedes; as, the statue seems of wax, *so* ethereal it is. **b** By a relative clause with *that;* as, nothing *so* mean that he would not say. **c** *Archaic.* By a clause introduced by *as.* **d** By an infinitive with *to* introduced by *as;* formerly, by an infinitive alone.
4. Denoting sequence or consequence; specif.: **a** For this or that reason; and as a consequence; therefore; accordingly; — used colloquially, and infrequently by writers, to join a clause or sentence to a preceding co-ordinate clause or sentence to which it is related, often very loosely, as effect or result; as, he was sick; *so* they were quiet. **b** By reason of that; therefore; on that account. "An intellectual creature, and *so* capable of dominion." *Locke.* **c** In the way of final outcome or conclusion, as one perceives or is given to understand or gives assurance; as, *so* that's that; *so* the work is done, is it? **d** *Archaic.* Thereupon; after that. "Here I played at cards till nine o'clock. *So* home and to bed." *Pepys.* **e** *Obs.* Then; — used after conditional clauses.
5. In the following manner; thus; also, in the manner indicated by an accompanying act or gesture.

I touch, *so,* with my hand. *Amy Lowell.*
He dismissed everybody, *so.* *P. B. Kyne.*

6. Ever; — used as a suffix in composition with relative pronouns and conjunctions, indicating the inclusion of any at all or any to the last one of the possible persons, occasions, places, etc.; as, let him do whatso he will.
7. Thus; — used as a prefix to mean *in the aforesaid manner* or *in accordance with the aforesaid;* as, the *so*-formed crystals.

Syn. — See THEREFORE.

☞ COMBINATIONS (all adjectives) are:

so-caused	**so-formed**	**so-seeming**
so-conditioned	**so-instructed**	**so-styled**
so-considered	**so-named**	**so-termed**
so-designated	**so-regarded**	**so-titled**

☞ These expressions are hyphened only when used attributively (this *so-titled* knight). When used appositively (the Roundheads, *so termed* by the Royalists) or predicatively (they were *so named* by the Royalists), they are properly treated as consisting of two words.
— ***in so far as.*** To the extent that; as fully or widely as; to this extent or in this respect, namely that. — ***so as.*** **a** In the same or such way as. **b** = AS, *conj.,* 9 **a**. **c** *Now Dial.* In such manner or such a manner that; — introducing a clause expressive of result or consequence. **d** As long as; provided that; — now replaced by *so,* or *as, long as.* **e** To the same extent or degree . . as; — commonly used as correlatives in emphasizing the equality or comparison suggested, now chiefly in negative or interrogative expressions (never before *so* useful *as* now; none *so* deaf *as* those who will not hear) and introducing special examples (anything *so* far afield *as* conchology would be a waste of time). In negative assertions and questions implying a negative answer, *so . . . as* and *as . . . as* are now generally used interchangeably but *so . . . as* is preferred by many writers and authorities, esp. when there is no

particular implication of a high degree of the quality in point, in the concluding member of the comparison; as, he is not *so* cruel *as* the average boy (merely less cruel than the average boy); literary merit does not receive *so* much acclaim here *as* in most other countries (where it receives considerable acclaim). — as distinguished from, he will never rise *as* high *as* his brother (who has risen exceedingly or superlatively high). soap (sōp), *n.* [ME. *sope*, fr. AS. *sāpe;* akin to D. *zeep*, G. *seife*, OHG. *seifa*, and prob. to AS. *sīpian* to seep, MHG. *sīfen*, L. *sebum* tallow, AS. *sāp* resin, pomade. Cf. SAPONACEOUS, SEBACEOUS, SUET.] **1.** A cleansing agent, made usually by action of alkali on fat or fat acids, and consisting essentially of sodium or potassium salts of fat acids. Cf. SAPONIFICATION. ***Solid,*** or ***hard, soap,*** is usually made with soda from the harder fats and from nondrying oils (or their acids), and is finished in the form of bars, or tablets, chips, and powder. ***Soft,*** or ***semifluid, soap*** is made chiefly with potash from liquid fats (or their acids). ***Liquid soap*** is usually a solution of potash soap, often made from coconut oil. Fats are treated with lye either at a heat short of boiling (***cold process***), or by boiling in open vessels (***boiling process***), or, occasionally, by heating under pressure. In the boiling process, the most common method for making hard soaps, the chief operations are: (1) *saponifying* (called also *killing, pasting,* the *first change*, or *stock change*), during which the fat (or stock) is mixed with the lye, and the mixture is boiled; (2) *graining*, or *salting out*, during which the soap (called *curd, grain*, or *open, soap*) rises to the top in granular curds, leaving behind an impure, alkaline liquor (called *spent lye, soap lye*, or *glycerin lye*) from which the glycerin is subsequently recovered; (3) *boiling for*, or *on, strength* (called also the *second change* or *strength change*) during which the saponification is completed by adding strong lye and boiling; and (4) *settling* (called also the *fitting, pitching*, or *finishing, change*, or the *finish-stock change*) during which the soap is boiled with water and allowed to stand several days to permit an impure soap solution (called *nigre*) to settle to the bottom. The soap yielded by this process is called ***settled,*** or ***fitted, soap.*** In its molten form it is a crystalline liquid called ***neat soap.*** Sometimes a gummy mass called ***middle soap*** or ***gum soap*** forms during soap making. It usually results from some fault in operation but has a limited use as a special soap (as for washing automobiles). In making common yellow or ***rosin soap,*** the rosin, which is substituted in part for the fat, is added and neutralized (*rosin change*), or is added already neutralized, before boiling for strength. Before framing, soap is often crutched with other substances, as neutralizing materials, perfumes, alkaline salts, or *builders* (as sodium silicate and sodium carbonate), etc. The cleansing action of soap is due esp. to its power to emulsify grease and mechanically held dirt and to wet and penetrate into oily surfaces. See also RESIN SOAP.
2. *Chem.* By extension, any salt of one of the fat acids; as, lead *soap;* — called also *metallic soap*, esp. (as distinguished from ordinary soap) when containing some metal other than sodium or potassium. *Calcium soaps* (*lime soaps*) and *magnesium soaps* form as a curd when ordinary soap is used in hard water. Certain metallic soaps are used in pharmacy, in waterproofing, in lubricants, in driers for paints, etc.
3. A kind or make of soap, esp. as prepared for the trade; as, a full stock of *soaps.*
4. Flattery; — short for SOFT SOAP.
5. Money; esp., *U. S.*, money used for bribery or political corruption. *Slang.*

so'cial·ism (sō'shăl·ĭz'm), *n.* **1.** A political and economic theory of social organization based on collective or governmental ownership and democratic management of the essential means for the production and distribution of goods; also, a policy or practice based on this theory. Socialism aims to replace competition by co-operation and profit seeking by social service, and to distribute income and social opportunity more equitably than they are now believed to be distributed. These aims have given rise to many distinct schools: *Christian Socialism*, promulgated in England by Thomas Hughes, Charles Kingsley, F. D. Maurice, and others; *Owenism* and *Fabianism* in the same country; *collectivism*, *Saint-Simonianism*, and *Fourierism* in France; the *communism* of Brook Farm and the *nationalism* of the followers of Edward Bellamy in America; the *socialism of the chair*, *state socialism*, and the *social democracy* of Germany; the *syndicalism* of France; the *Bolshevism* of Russia. Usually *socialism* denotes the doctrines developed by Ferdinand Lassalle and Karl Marx, especially the *scientific socialism* of the latter and his followers. From the point of view of economic determinism the scientific socialists predict developing antagonism between capitalists and workers as capitalistic control becomes more concentrated and the misery of the working classes increases, the consequent decline of the middle classes, and the final triumph of the proletariat. An anti-utilitarian and aesthetic type of socialism was developed by Ruskin and William Morris and found a few followers in America. On questions of policy, moderate or democratic socialists believe in a slow evolutionary transformation of capitalist into socialist society, while radical or revolutionary socialists believe in class war and the overthrow of capitalism by political uprising or a general strike. The doctrines of the latter are often popularly confused with those of anarchists. *Socialism*, however, favors great extension of governmental action, whereas *anarchism* opposes all government as evil. See SOCIALIST, *Syn.*
2. A state or system in which there is no private property. *Rare.*

socialism of the chair. [G. *kathedersozialismus.*] A term applied about 1872, at first in ridicule, to the doctrines of a group of German political economists who advocated state aid for the betterment of the working classes.

so'cial·ist (sō'shăl·ĭst), *n.* [Cf. F. *socialiste.*] **1.** One who advocates or practices the doctrines of socialism.
2. [*usually cap.*] A member of a Socialist party or political group.
Syn. — COLLECTIVIST, NATIONALIST, NIHILIST, ANARCHIST, SOCIALIST, COMMUNIST, BOLSHEVIST. All of these groups are united in distrusting the present system of capitalist control of industry. The COLLECTIVIST (or NATIONALIST) would transfer much of that control to existing governments. The other groups object to this, the NIHILIST on the ground that existing governments are survivals of a bad political tradition, the ANARCHIST because they are supports of class distinctions and class privileges. The Marxian SOCIALIST, more specifically, emphasizes the economic evils of capitalistic management, holds that labor creates value, that profit is mostly robbery, and that the proletariat must attain political power to remedy the evil. COMMUNIST, in the usual sense of the word, denotes an extreme Marxian socialist, who would abolish property as well as profit. The BOLSHEVISTS, a Russian political rather than economic group, came into power as revolutionary socialists; after victory they changed their name to *communist* and tried to propagandize abroad.

so'cial·ist (sō'shăl·ĭst), *adj.* [*sometimes cap.*] Of or pertaining to socialism or socialists; socialistic.

So·cin'i·an·ism (-ĭz'm), *n.* *Eccl. Hist.* The tenets or doctrinal system of Faustus Socinus (Sozzini), an Italian theologian (1539–1604), originated by him on the basis of hints and suggestions found in the papers left by his uncle Laelius Socinus (1525–62). Socinus denied the Trinity, the divinity of Christ, the personality of the Devil, the native and total depravity of man, the substitutionary atonement, the efficacy of sacraments, and the eternity of future punishment. His tenets were that Christ was a man miraculously conceived by the Virgin Mary; that the Holy Spirit is a power or influence exerted by God; that human sin was the imitation of Adam's sin, and salvation something to be achieved by the imitation of Christ's virtue; that the Bible is to be interpreted by, and as being in accord with, human reason. Vigorously opposed by both Catholics and Protestants, the movement has long since ceased to exist in organized form, but it has remained influential.

sock lamb. [Cf. SUCK.] A cade lamb; also, a spoiled pet.

sock lining. *Shoe Mfg.* A thin piece of leather or fabric cut and inserted in the manner of a sock (sense 5).

sock'mak'er (sŏk'māk'ĕr), *n.* One whose work or business is making socks. — **sock'mak'ing** (-Ĭng), *adj. & n.*

sock suspenders. = SUSPENDER, *n.*, 2 b.

so'cle (sŏk'l; sō'k'l), *n.* [F., fr. It. *zoccolo*, also, wooden shoe, fr. L. *socculus*, dim. of *soccus*. See SOCK shoe; cf. ZOCCO.] **1.** *Arch.* A projecting member, usually molded, at the foot of a wall or pier, or beneath the base of a column, pedestal, or the like. It is distinguished from the base proper, or plinth.
2. *Cookery.* A base, as of rice or bread which allows elaborate garnishing of a made dish.

soc'man (sŏk'măn; sōk'-), *n.; pl.* -MEN (-mĕn). [See SOCAGE.] *A.-S. & Early Eng. Law.* **a** Earlier form of SOKEMAN. **b** Specif., a tenant by socage; a socager.

soc'man·ry (-rĭ), *n.* *A.-S. & Early Eng. Law.* **a** Earlier form of SOKEMANRY. **b** Specif., tenure by socage.

so'co (sō'kō), *n.* [Pg. *socó*, fr. Tupi *soco*, *çoco.*] Any of several Brazilian herons; esp., any of certain night herons and bitterns.

So·co'tran (sō-kō'trăn; sŏk'ō-trăn), *adj.* Also **So·co'trine** (-trĭn; -trīn). Of or pertaining to Socotra, an island in the Indian Ocean, off Cape Guardafui, Africa. — *n.* A native or inhabitant of Socotra, the people of which are mostly Arabs and Negroes, the latter being largely fugitive slaves.

Soc'ra·te'an (sŏk'rȧ·tē'ăn), *adj.* Socratic.

Soc'ra·tic (sō-krăt'ĭk), *adj.* [L. *Socraticus*, fr. Gr. *Sōkratikos.*] Of or pertaining to Socrates, the Grecian sage and teacher (469–399 B.C.), or Socratism, or the Socratics.

So·crat'ic, *n.* A follower of Socrates; esp., any of the Greek philosophers directly influenced by him.

So·crat'i·cal (-ĭ·kăl), *adj.* Socratic.

So·crat'i·cal·ly, *adv.* In the Socratic method.

Socratic induction. = SOCRATIC METHOD.

Socratic irony. Pretended ignorance or willingness to learn from others assumed for the sake of making their errors conspicuous by means of adroit questioning. Socrates is represented by Plato as employing this method in his tilts with the Sophists. Cf. SOCRATIC METHOD.

So·crat'i·cism (sō-krăt'ĭ·sĭz'm), *n.* **a** = SOCRATISM. **b** A Socratic trait.

Socratic method. The method of inquiry and instruction employed by Socrates, esp. as represented in the dialogues of Plato. It consists of a series of questionings the object of which is to elicit a clear and consistent expression of something supposed to be implicitly known by all rational beings.

Socratic philosophy. The philosophy of Socrates and his followers; — often used to denote, esp., the teachings of Socrates, Plato, and Aristotle, which form a consistent development, and sometimes to denote the teachings of all Greek schools directly influenced by Socrates, particularly the Academy, and the Cynic, Cyrenaic, Megarian, and Elian schools, which were founded by his immediate disciples. To Socrates himself are usually ascribed, besides an intense ethical devotion which influenced all later Greek philosophy, the development of the inductive method and the conception of knowledge or insight as the foundation of virtue.

Soc'ra·tism (sŏk'rȧ·tĭz'm), *n.* The philosophy or the method of Socrates.

Soc'ra·tist (sŏk'rȧ·tĭst), *n.* [Gr. *Sokratistēs.*] A Socratic.

Soc'ra·tize (-tīz), *v. i.* To practice the Socratic method.

sod (sŏd). Obs. past tense & past part. of SEETHE.

sod, *adj.* [Past part. of SEETHE.] Boiled, as food; also, sodden; soggy; fermented. *Dial.* — *n.* Boiled meat. *Obs.*

sod, *v. i. & t.* [From SOD, past part.] To soak or become soaked. *Dial. Eng.*

sod (sŏd), *n.* [MD. & MLG. *sode;* appar. akin to E. SEETHE.] **1.** That stratum of the soil filled with the roots of grass, herbs, etc.; turf; sward; also, a piece of such surface cut or pulled off; a turf, or peat.
2. *pl.* A kind of saddle stuffed with straw. *Chiefly Scot.*
3. The ground; grass-covered earth; the soil; as, to lie upon the *sod;* often, figuratively, esp. in *old sod*, one's native country.
4. Something likened to sod, as in heaviness or impermeableness.

> Still wouldst thou sing, and I have ears in vain,
> To thy high requiem become a *sod.* *Keats.*

5. A sodded, or grass-covered, state; as, to keep in *sod.*
☞ COMBINATIONS are:
sod-build, sod-cutting, sod-forming, sod-roofed.
— *under the sod.* Buried.

sod, *v. t.;* SOD'DED; SOD'DING. To cover with sod; — often with *down*, *over*, etc.

sod (sŏd), *n.* The rock dove. *Local, Scot.*

so'da (sō'dȧ), *n.* [It. & ML., fr. ML. *sodanum*, prop., headache remedy, fr. *soda* headache, fr. Ar. *ṣudāʿ* splitting headache.] **1.** Sodium carbonate, esp. the decahydrate, $Na_2CO_3.10H_2O$. See SODIUM CARBONATE.
2. Sodium bicarbonate (which see).
3. Sodium hydroxide (which see).
4. Sodium oxide, Na_2O; — equiv., in *carbonate of soda, soda alum, soda salts*, etc., to *sodium*. Salts of sodium were formerly considered to be compounds of soda. Cf. 1st LIME, 2, *Note.*
5. Short for SODA WATER. Also, a drink of soda water. See WHISKY AND SODA.
6. *Faro.* The card that shows face up in the dealing box before play begins.

so'da, *n.* [ML. See 1st SODA.] Headache; cephalalgia. *Obs.*

soda alum. = SODIUM ALUM.

soda ash. Commercial anhydrous sodium carbonate, Na_2CO_3, obtained as a white powder or in lumps. See SODIUM CARBONATE.

soda ball. See LEBLANC PROCESS.

soda biscuit. **a** A biscuit leavened with soda and sour milk or buttermilk. **b** A soda cracker.

soda bread. Bread leavened with soda and sour milk.

so'da·clase (sō'dȧ·klās), *n.* [*soda* + *-clase.*] Any soda-rich plagioclase feldspar containing from 100 to 90 per cent albite and 0 to 10 per cent anorthite.

soda cracker. A lightly baked crisp cracker made from yeast dough neutralized with soda.

soda crystals. See SODIUM CARBONATE.

soda feldspar. See FELDSPAR.

soda fountain. **1.** An apparatus with delivery tube, faucets, etc., for drawing soda water.
2. Loosely, the equipment necessary for the preparation and serving of sodas, sundaes, etc.; also, the counter at which sodas, etc., are dispensed.

so'da–gran'ite, *n.* *Petrog.* **1.** A granite containing more soda than potash.
2. A granite rock differing from normal granite in containing a soda-plagioclase instead of orthoclase. It is actually an albite-diorite.

so·da'ic (sō-dā'ĭk), *adj.* Pertaining to, or containing, soda.

soda lake. A lake containing dissolved soda (sodium carbonate).

soda lime. A granular mixture of caustic soda (sodium hydroxide) and slaked lime, used to absorb moisture, carbon dioxide, poison gases, etc. For its use in gas masks, other substances, as cement, kieselguhr, and sodium permanganate, are usually added, while the amount of soda may be very small. — **so'da–lime',** *adj.*

so'da·list (sō'dȧ·lĭst), *n.* A member of a sodality.

so'da·lite (sō'dȧ·lĭt), *n.* [*soda* + *-lite.*] *Mineral.* A transparent to translucent mineral of vitreous or greasy luster, in color white, greenish, gray, blue, etc., found in certain igneous rocks. It is a sodium aluminum silicate with some chlorine, $Na_4(AlCl)Al_3(SiO_4)_3$, and occurs commonly in dodecahedrons, also massive. H., 5.5–6. Sp. gr., 2.14–2.30.

so'da·lite–sy'e·nite, *n.* *Petrog.* A granitic rock composed of orthoclase, albite, hornblende, and interstitial sodalite. The latter mineral is regarded as primary.

so'da·lith·ite (sō'dȧ·lĭth·īt), *n.* [*soda* + *lith-* + *-ite.*] *Petrog.* A leucocratic plutonic differentiation rock, composed almost exclusively of sodalite, with small amounts of aegirite, alkali-feldspar, and eudialyte.

so·dal'i·ty (sō-dăl'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). [F. or L.; F. *sodalité*, fr. L. *sodalitas*, fr. *sodalis* a comrade.] **1.** Association; union; fellowship; unity.

> The steadfast *sodality* of affliction and affection and fortitude.
> *Owen Wister.*

2. A fellowship or fraternity; a brotherhood; specif., *R.C.Ch.*, a lay association for devotion or for charitable purposes.
3. A chapel used for sodality meetings and devotions. *NovR.*

soda lye. A solution of sodium hydroxide, as one used in soap making.

soda mesolite. *Mineral.* Natrolite. See MESOTYPE.

soda mica. Paragonite. See MICA.

sod·am'ide (sōd·ăm'īd; -ĭd), *n.* Also **-id.** [*sodium* + *amide.*] *Chem.* A white, waxy, crystalline compound, $NaNH_2$, obtained by passing ammonia over heated sodium. It is used in organic syntheses, esp. of indigo.

soda niter. = SODIUM NITRATE.

soda plant. **a** The saltwort (*Salsola soda*). **b** Any of several saltbushes of the genus *Atriplex.*

soda pop. Flavored soda water sold in tightly capped or corked bottles, as birch, root, or ginger beer.

so'da–pot'ash' feld'spar'. See FELDSPAR.

soda pulp. A wood pulp for papermaking prepared by boiling crushed wood under pressure with a caustic soda solution. Cf. SULPHITE PULP.

soda saleratus. = SODIUM BICARBONATE.

soda soap. A soap made with soda. See SOAP, *n.*, 1.

soda waste. See LEBLANC PROCESS.

soda water. **1.** Orig., and still sometimes, water containing soda, as a beverage consisting of a weak solution of sodium bicarbonate, with some acid to cause effervescence.
2. Now, in common usage, a beverage consisting of water highly charged with carbon dioxide (carbonic acid), to which a flavored sirup is usually added.

sod'–bound', *adj.* Impeded in growth or yield by a crowded condition of the sod; as, *sod-bound* grass or meadows.

sod'bust'er (sŏd'bŭs'tĕr), *n.* A farmer. *Western U. S.*

sod cloth. At the foot of a tent wall, a heavy canvas or duck cloth that extends into the ground and serves to exclude vermin and rain.

sod culture. The culture of fruit trees in sod, with or without supplemental fertilizing.

sod'ded (sŏd'ĕd; -ĭd; 119), *adj.* Covered with or made of sods.

sod'den (sŏd'n), *past part.* of SEETHE.

sod'den (sŏd'n), *adj.* [Past part. of SEETHE. Cf. SUTLER.]
1. Boiled; stewed; steeped. *Now Rare.*
2. As flaccid or as spent as if unduly stewed; heavy or spiritless; dulled, esp. by dissipation; as, *sodden* features.
3. Heavy or soggy because of imperfect baking or boiling; as, *sodden* biscuits.
4. Soaked; heavy with moisture; saturated.
5. Drunk; intoxicated; drunken.
☞ COMBINATIONS are:
sodden-faced, sodden-headed, sodden-minded, sodden-witted.

sod'den, *n.* Boiled meat. *Obs.*

sod'den, *v. t.* To make sodden, as by soaking, dulling, etc. — *v. i.* To become sodden, or, esp., a soggy mass.

sod'ding, *n.* The action of one who sods; also, turfs for use by one who sods.

sod'dite (sŏd'ĭt), *n.* [After F. *Soddy* (b. 1877), Eng. physicist.] *Mineral.* A hydrous uranium silicate, $12UO_3.5SiO_2.14H_2O$, occurring in fine-grained pale-yellow aggregates or orthorhombic crystals.

sod'dy (sŏd'ĭ), *adj.;* SOD'DI·ER (-ĭ·ĕr); SOD'DI·EST. Consisting of, or covered with, sod; abounding in sods; turfy.

sod'dy (sŏd'ĭ), *n.; pl.* SODDIES (-īz). A sod house. *Western U. S.*

sod grass. Any kind of grass that forms good sod. Cf. ST.-AUGUSTINE-GRASS a.

sod house. A house with walls built of sod or turf laid in horizontal layers.

so'dic (sō'dĭk), *adj.* Of, pert. to, or containing, sodium.

so'di·o- (sō'dĭ·ō-), *Chem.* A combining form from *sodium*, denoting *sodic and*, as in:

sodioaluminic	**sodiocitrate**	**sodioplatinic**
sodioaurous	**sodiohydric**	**sodiotartrate**

— **so'di·o** (-ō), *adj.*

so'di·um (sō'dĭ·ŭm; 159), *n.* [NL., fr. SODA.] *Chem.* A soft, waxy, silver-white metallic element of the alkali group, occurring abundantly (always combined), as in common salt, Chile saltpeter, trona, borax, glauberite, albite, etc. Salts of it are found in the animal body, esp. in the fluids, and in most plants. Symbol, *Na* (*natrium*); at. no., 11; at. wt., 22.997. Metallic sodium was first obtained by Davy in 1807 by electrolysis. It is prepared commercially by electrolysis of fused sodium hydroxide or sodium chloride. It is lighter than water (sp. gr. 0.97). Melting point, 97.5° C. (207.5° F.). Sodium is chemically very active, oxidizing readily in air and reacting violently with water to form sodium hydroxide and hydrogen; hence it is kept under kerosene or other hydrocarbon liquid. Sodium is univalent, forming a large and important series of soluble salts. It and its compounds impart an intense yellow color to flames. Metallic sodium is used chiefly in the manufacture of sodium cyanide and in organic synthesis.

sodium acetate. *Chem.* A colorless, crystalline salt, $NaC_2H_3O_2$, used in making mordants, in preserving foods, as a reagent, etc.

sodium alum. *Chem.* A colorless, crystalline salt, $NaAl(SO_4)_2.12H_2O$, a sodium aluminum sulphate. It does not crystallize as readily as ammonium alum or potassium alum.

sodium aluminate. *Chem.* A white amorphous solid, $NaAlO_2$, used as a mordant, water softener, etc.

sodium amide. = SODAMIDE.

sodium arsenate. *Chem.* Any arsenate of sodium; specif., the acid salt Na_2HAsO_4, used in dyeing, in medicine, etc.

so'ci·o·nom'ics (sō'shĭ·ō-nŏm'ĭks), *n.* = SOCIONOMY. See -ICS.

sock'et-and-spig'ot joint. = HUB-AND-SPIGOT JOINT.

sock'et-ful, *n.* See -FUL, 2.

sock'et-less, *adj.* See -LESS.

sockle, socle. † SUCKLE.

sock'less, *adj.* See -LESS. —

sock'less·ness, *n.*

sock'man. † SOCMAN, SOKEMAN.

sockt. Socked. *Ref. Sp.*

sock'y (sŏk'ĭ), *adj.* Soaky, moist. *Dial.* [SOCHO.]

So'coh (sō'kō). *Bib.* Var. of

soc'ome, *n.* [See SOKEN.] *A.-S. & Early Eng. Law.* Soke. *Obs.*

So·co'tri, *pl.* of SOCOTRAN, *n.*

Socotrine dragon's blood. See DRAGON'S BLOOD, 1 b.

socour. † SUCCOR.

so'da-and-acid fire extinguisher. See FIRE EXTINGUISHER, *Illust.*

so'da·less, *adj.* See -LESS.

sod'den. † SUDDEN.

sod'dend. Soddened. *Ref. Sp.*

sod'den·ly, *adv.* of SODDEN.

sod'den·ness, *n.* See -NESS.

sod'der. Dial. var. of SOLDER.

sod'dle. Var. of SODDY.

soden. † SUDDEN.

so'der (sō'dĕr; sŏj'ĕr). Dial. & slang var. of SOLDIER.

So'di (sō'dĭ). *Bib.* [SODIO-.]

so'di·o·sal'i·cyl'ate, *n.* See

sodium arsenite. *Chem.* A salt obtained as a white powder by treating arsenic trioxide with sodium carbonate or hydroxide and used as an insecticide and antiseptic, in dyeing, etc.

sodium arsphenamine. *Pharm.* The sodium salt of arsphenamine, used in the treatment of syphilis.

sodium barbital. = BARBITAL SODIUM.

sodium benzoate. A colorless or white salt, $NaC_7H_5O_2$, used as a food preservative, and in medicine.

sodium biborate. = BORAX.

sodium bicarbonate. A white crystalline salt, $NaHCO_3$, less soluble than sodium carbonate and having only a slight alkaline taste. It is found in many mineral springs, and is produced artificially by treating the normal carbonate with carbon dioxide, and, in the Solvay process, as an intermediate product. It is used in cookery, in baking powders, in medicine, etc. Called also *baking soda, cooking soda, saleratus,* and technically, *acid sodium carbonate, sodium hydrogen carbonate,* etc.

sodium bichromate. = SODIUM DICHROMATE.

sodium bisulphate. *Chem.* A colorless crystalline salt, $NaHSO_4$. When obtained in the form of a caked mass as a by-product in the manufacture of nitric acid it is called *niter cake,* and is used in making sodium sulphate and hydrochloric acid, in cleaning iron and steel, etc., and to prevent oxidation in photographic baths.

sodium bisulphite. *Chem.* In commerce, a white solid, chiefly of sodium metabisulphite, $Na_2S_2O_5$, used as an antiseptic (esp. in the fermentation industries), an antichlor, a reducing and bleaching agent, etc.

sodium borate. A sodium salt of boric acid; specif., borax.

sodium carbonate. Any carbonate of sodium; soda; specif., the normal carbonate, Na_2CO_3, a salt of strong alkaline taste, found in nature, as in soda lakes, but more often made artificially, as by the burning of sea plants, by the Leblanc process, or (now chiefly) by the Solvay process. It is obtained in the anhydrous state (as in soda ash) and with various proportions of water of crystallization. The decahydrate, $Na_2CO_3.10H_2O$ (*sal soda* or *washing soda*), forms transparent crystals (*soda crystals, washing crystals*) easily efflorescing and changing into the monohydrate, $Na_2CO_3.H_2O$, a white crystalline powder sold as *crystal carbonate.* Sodium carbonate is very extensively used in making glass, soap, paper, chemical reagents, etc., in softening water, in scouring and bleaching, and as an alkaline reagent in various other industries, in medicine, photography, etc.

sodium chlorate. *Chem.* A colorless crystalline salt, $NaClO_3$, used as an oxidizing agent, as in dye manufacture, and in explosives, in medicine, etc.

sodium chloride. Common salt. See SALT, *n.*, 1.

sodium citrate. A white crystalline salt, $Na_3C_6H_5O_7$, used as a diuretic, antilithic, and refrigerant.

sodium cyanide. *Chem.* A white, deliquescent, poisonous salt, NaCN, made by heating sodamide with carbon, and otherwise. It is used in the cyanide process, in electroplating, in fumigating, in medicine, etc.

sodium dicarbonate. = SODIUM BICARBONATE.

sodium dichromate. A red crystalline salt, $Na_2Cr_2O_7$, resembling potassium dichromate, but cheaper and more soluble.

sodium dioxide. See SODIUM OXIDE.

sodium ethylate *or* **ethoxide.** *Chem.* An alcoholate, C_2H_5ONa, obtained as a white powder by dissolving sodium in ethyl alcohol and removing the excess of alcohol. On contact with water it forms alcohol and caustic soda. It is used in medicine as a caustic (*caustic alcohol*) and in organic synthesis.

sodium fluoride. *Chem.* A white crystalline salt, NaF, used as an antiseptic, as a poison for vermin, etc.

sodium hydrate. = SODIUM HYDROXIDE.

sodium hydrogen carbonate. = SODIUM BICARBONATE.

sodium hydrosulphide. *Chem.* A colorless crystalline salt, NaSH, used in the manufacture of rayon and for other purposes; — called also *sodium sulphydrate.*

sodium hydrosulphite. = SODIUM HYPOSULPHITE **b.**

sodium hydroxide. A white, brittle, deliquescent solid, NaOH, prepared chiefly by the electrolysis of common salt and by treating sodium carbonate with slaked lime; — called also *caustic soda.* It is a strong alkali and caustic. It is used in making soap, rayon, and paper, in bleaching and mercerizing, in refining oils, etc.

sodium hypochlorite. *Chem.* An unstable salt, NaOCl, known chiefly in aqueous solution. See JAVELLE WATER.

sodium hyposulphite. **a** See SODIUM THIOSULPHATE. **b** A crystalline water-soluble salt, $Na_2S_2O_4$, made by treating sodium carbonate with zinc and sulphur dioxide, and otherwise; — called also *sodium hydrosulphite.* It is a strong reducing agent and is used in dyeing and bleaching, in decolorizing sugar, etc. With formaldehyde it forms compounds which are used as discharges for dyes under various trade names, as *hydrosulphite.*

sodium iodide. *Chem.* A white crystalline salt, NaI, used like potassium iodide.

sodium light. *Physics.* The yellow light of glowing sodium vapor. It consists chiefly of two monochromatic portions of wave length 5890 and 5896 angstroms respectively.

sodium nitrate. *Chem.* A colorless deliquescent salt, $NaNO_3$, much used as a fertilizer and in making potassium nitrate and nitric acid; — called also *soda niter* and (from its almost cubic crystals) *cubic niter.* It occurs in crude form (caliche) in vast natural beds in Chile and is recrystallized and exported as *Chile saltpeter* or *Chilean nitrate.*

sodium nitrite. *Chem.* A colorless, white, or yellowish salt, $NaNO_2$, used for diazotizing (as in dye manufacture), in medicine to lower high blood pressure, etc.

sodium nitroprusside. A red crystalline salt, $Na_2Fe(NO)(CN)_5$, used chiefly in testing for alkaline sulphides, giving a purple color.

sodium oxide. *Chem.* An oxide of sodium; specif., the monoxide, Na_2O, a white hygroscopic solid. *Sodium peroxide* or *dioxide,* Na_2O_2, is a white or yellowish powder, obtained by passing heated air over metallic sodium. It reacts with water to form sodium hydroxide and hydrogen peroxide, which latter, when heated, is decomposed into water and oxygen. It is used as an oxidizing and bleaching agent.

sodium perborate. See PERBORATE.

sodium peroxide. See SODIUM OXIDE.

sodium phosphate. Any phosphate of sodium; specif., *disodium (hydrogen) phosphate,* Na_2HPO_4, a crystalline salt occurring in blood and urine, and made artificially. It is used in dyeing as a fixing agent, in weighting silk, in medicine as a purgative and cholagogue, etc. *Trisodium* (normal, or neutral, sodium) *phosphate,* Na_3PO_4, is a crystalline salt used as a cleaning agent, in softening water, etc.

sodium potassium tartrate. *Chem.* = ROCHELLE SALT.

sodium salicylate. A colorless or white salt, $NaC_7H_5O_3$, with a sweetish saline taste, used in medicine as an antirheumatic.

sodium silicate. Any silicate of sodium. That known as water glass varies in composition from $Na_2O.2SiO_2$ to $Na_2O.4SiO_2$. See WATER GLASS, 6.

sodium sulphate. *Chem.* Either of two colorless salts, Na_2SO_4 (normal sodium sulphate) and $NaHSO_4$ (sodium bisulphate, which see); specif., the normal salt. The anhydrous normal salt, esp. that obtained in crude form as a white caked mass by heating common salt (NaCl) with sulphuric acid or niter cake in the manufacture of hydrochloric acid, is called *salt cake,* and is used in the sulphate process for wood pulp, in making glass and sodium sulphide, in the Leblanc process, etc. Sodium sulphate occurs abundantly in some mineral waters and in many salt deposits. It commonly crystallizes from water as the decahydrate, $Na_2SO_4.10H_2O$, called *Glauber's salt,* or (as a mineral) *mirabilite.* It has a cooling, slightly bitter taste and whitens in the air by loss of water. It is usually made by purifying salt cake and is used as a cathartic, aperient, and diuretic, and also in the textile industry.

sodium sulphide. *Chem.* Any sulphide of sodium; specif., the compound Na_2S, obtained by heating sodium sulphate. It is used in unhairing hides, in the manufacture of sulphur dyes, as a solvent for these dyes, etc.

sodium sulphite. Specif., the normal salt, Na_2SO_3, obtained as colorless crystals or a white powder. It is a reducing agent, and is used in photography (chiefly as a preservative in developers), in medicine, in bleaching, as an antichlor, food preservative, etc.

sodium sulphydrate. = SODIUM HYDROSULPHIDE.

sodium tetraborate. = BORAX.

sodium thiosulphate. A colorless or white salt, $Na_2S_2O_3$, commonly crystallizing with five molecules of water and called less correctly *sodium hyposulphite.* It is the "hypo" of the photographer, and is extensively used as a fixing agent. It is also used as an antichlor, in bleaching, in medicine, in chemical analysis, etc.

sodium tungstate. Specif.: **a** A colorless crystalline salt, Na_2WO_4, used in preparing noninflammable fabrics, as a mordant, in photographic toning, etc. **b** Sodium paratungstate, $Na_{10}W_{12}O_{41}$, a colorless crystalline salt used for the same purposes as the above.

sod mulch (sŏd). Sod culture, in which the grass is cut and piled about the trees and in some cases supplemented with straw or low-grade hay.

sod oil. See DÉGRAS **a.**

so'do·ku (sō′dō·kōō), *n.* [Jap., rat poison.] *Med.* Ratbite fever.

Sod'om (sŏd′ŭm), *n.* **1.** *Bib.* A city or country the account of whose wickedness and consequent destruction, with the neighboring city or country of *Gomorrah,* is given in Genesis xviii and xix. They are thought to have been situated in the plain north of the Dead Sea.
2. A city or country notorious for vice and corruption

Sodom apple. = APPLE OF SODOM.

Sodom fruit. The horse nettle.

Sod'om·ist (sŏd′ŭm·Ĭst), *n.* A Sodomite.

Sod'om·ite (-Īt), *n.* [OF. *Sodomite,* or LL. *Sodomita,* fr. Gr. *Sodomitēs.*] **a** [*not cap.*] One guilty of sodomy. **b** An inhabitant of Sodom.

sod'om·it'ic (-Ĭt′Ĭk), *adj.* Sodomitical. *Rare.*

sod'om·it'i·cal (-Ĭ·kăl), *adj.* **1.** Given to the practice of sodomy; also, *Obs.,* that has intercourse with a sodomite.
2. Of the nature of, characterized by, or defiled by, sodomy. — **sod'om·it'i·cal·ly,** *adv.*

Sod'om·it'ish (sŏd′ŭm·Ĭt′Ĭsh), *adj.* Of or pertaining to Sodom or sodomy.

sod'om·y (sŏd′ŭm·Ĭ), *n.* [OF. *sodomy,* fr. *Sodome* Sodom.] Carnal copulation in any of certain unnatural ways; — in *Law,* variously defined or limited by statutes and often made to include bestiality.

sod plow. *Agric. Mach.* **a** A breaker. See PLOW, **1.** **b** A stirring plow for cultivated grasses. See PLOW, **1.**

sod webworm. The grass webworm.

sod'work' (sŏd′wûrk′), *n.* A construction, as a revetment, made of sods piled up and packed closely together.

soe (sō), *n.* [AS. *sā,* akin to Icel. *sōr* a large cask, Sw. *så* a tub, Dan. *saa.*] A large wooden tub; a milk pail; a cowl. *Now Dial.*

so·ev'er (sō·ĕv′ĕr), *adv.* [*so* + *ever.*] **a** Following an adjective preceded by *how* or in the superlative with *the,* to any possible or known extent; in any conceivable degree or manner; as, how fair *soever* she may be; the most selfish *soever* in this world. **b** Following a noun modified by *all, any, no, what,* etc., at all; of any or every kind that may be specified; as, he gives no information *soever;* to one who is perplexed in any way *soever.*

-so·ev'er (-sō·ĕv′ĕr). An intensive suffix added to *who, what, where, when, how,* etc., and indicating any out of all possible or conceivable persons, things, places, times, ways, etc.
For unto whom*soever* much is given, of him shall be much required. *Luke* xii. 48.

so'fa (sō′fȧ), *n.* [Ar. *ṣuffah;* cf. F. *sofa,* It. *sofà.*] **1.** A raised carpeted and cushioned leewan; a divan. *Now Rare.*
2. A kind of couch, now, esp., one that is upholstered and has a back and arms.

☞ COMBINATIONS and PHRASES are:

sofa bed	**sofa cover**	**sofa pillow**
sofa bedstead	**sofa cushion**	**sofa-ridden**
sofa corner	**sofa maker**	**sofa seat**

so'fane (sō′fān), *adj.* Of or pertaining to a sofa. *Dickens.*

sofa table. A moderate-sized oblong table with small leaves on the ends.

Sol'i·da'go (sŏl'ĭ·dā'gō), *n.* [NL., fr. L. *solidare* to strengthen, unite; in allusion to its reputed healing qualities.] *Bot.* a A very large genus of chiefly North American herbs (family Carduaceae); the goldenrods, adopted as State flowers by Alabama, Kentucky, and Nebraska (see STATE FLOWER, *Plate*). They are distinguished from *Aster* by no definite characters, but may usually be known by the wandlike stems, and small heads with yellow rays (white in a few species). The inflorescence varies from a thyrsoid panicle in the typical goldenrods (as *S. canadensis*) to axillary capitate clusters in *S. caesia* and its allies. b [*not cap.; pl.* -GOES (-gōz).] A plant of this genus.

solid alcohol. Specif., ordinary alcohol solidified usually by means of a soap (as a salt of stearic acid) and used on a small scale as a fuel.

solid angle. *Math.* The angular spread at the vertex of a cone, or the like, measured by the area intercepted on a unit sphere (about the vertex as center) by the cone surface. The measure of the solid angle formed by rotating a plane angle A about one of its sides is $2\pi(1 - \cos A)$ steradians. In a *complete solid angle,* the bounding surface, having a point as a vertex, is a closed surface, as the surface of a sphere having its center as a vertex. A complete solid angle measures 4π steradians. If the measure of the dihedral angle between two half planes is A radians, the measure of the solid angle between the planes is $\frac{A}{2\pi} \cdot 4\pi = 2A$ steradians. Cf. POLYHEDRAL ANGLE. For unit of measure, see STERADIAN. Cf. ALGEBRAIC ANGLE.

sol'i·dare (sŏl'ĭ·dâr; sŏl'ĭ·dãr'), *n.* [ML. *solidus.* See SOU.] A small coin; — prob. for *solidus. Obs. Shak.*

5. A flightless extinct bird (*Pezophaps solitarius*) related to the dodo, but less clumsy, and with a smaller bill. It inhabited the island of Rodriguez.
6. Any of several American fly-catching birds of the genus *Myadestes* of the thrush family, noted for their sweet song and shyness. The best-known is ***Townsend's solitaire*** (*M. townsendi*) of the western United States. Many others inhabit Central America and the West Indies.

sol'i·taire', *adj.* [F.] Solitary; lonely. *Obs.*

sol'i·tar'i·an (sŏl'ĭ·târ'ĭ·ăn), *n.* [See SOLITARY.] A hermit; a solitary. *Rare.*

sol'i·tar'y (sŏl'ĭ·tĕr'ĭ *or, esp. Brit.,* -tĕr·ĭ, -trĭ), *adj.* [L. *solitarius,* fr. *solitas* solitude, fr. *solus* alone. Cf. SOLE, *adj.*, SOLITAIRE.] **1.** Being, living, or going alone or without companions; as, a *solitary* traveler; given to solitude; living the life of a recluse or hermit; as, the *solitary* St. Anthony; also, lonely; suffering from lack of companions; as, often alone but never *solitary.*
2. Characterized by the lack or absence of companions; taken, passed, performed, endured, etc., alone; as, a *solitary* ramble or life; *solitary* tasks or confinement.
3. Of places, characterized by seclusion, solitude, or lack of inhabitants; unfrequented, retired, deserted, desolate, or the like; also, located in such a place; as, a *solitary* mountain camp; *solitary* ruins.
How doth the city sit *solitary,* that was full of people. *Lam.* i. 1.
4. Single; individual; sole; as, a *solitary* example.
5. *Bot.* Not associated with other organs or individuals of the same kind; single; as, a *solitary* flower, pine, etc.
6. *Zool.* **a** Living habitually alone; not gregarious. **b** Simple; not compound. Cf. COMPOUND ANIMAL. **c** Not living in communities or colonies; as, *solitary* bees.
Syn. — SOLITARY, ALONE, LONE, LONELY, LONESOME, DESOLATE. ALONE lays stress upon the objective fact of being entirely by oneself; SOLITARY connotes a sense of isolation or remoteness; as, "*Alone, alone,* all, all *alone, alone* on a wide wide sea" (*Coleridge*); "a mind forever voyaging through strange seas of thought, *alone*" (*Wordsworth*); cf. "I was never less *alone* than when by myself" (*Gibbon*); "The notice . . . has been delayed . . . till I am indifferent, and cannot enjoy it; till I am *solitary,* and cannot impart it" (*Johnson*); "I am to be left . . . with Dora only. That will be rather *solitary.* However, I never am and never can be *alone*" (*T. E. Brown*); "All is bright, and clear, and still, round the *solitary* hill" (*Shelley*). One is LONELY who feels oneself alone and longs for companionship; the word also applies to places which are unfrequented; LONESOME heightens the implication of dreariness; LONE is chiefly poetical; as, "I wandered *lonely* as a cloud" (*Wordsworth*); "This soul hath been *alone* on a wide wide sea: so *lonely* 'twas, that God himself scarce seemed there to be" (*Coleridge*); "like one that on a *lonesome* road doth walk in fear and dread" (*Coleridge*); "a dismal and *lonesome* old woman" (*Hawthorne*); "Her life is *lone;* he sits apart" (*Tennyson*). That is DESOLATE which is deserted or left alone, or (esp.) forlorn or disconsolate; as, "Your house is left unto you *desolate*" (*Matt.* xxiii. 38); "this dim, vast vale of tears, vacant and *desolate*" (*Shelley*). Cf. SINGLE, SOLITUDE.
Ant. — Joint, associate; social, convivial; frequented, peopled.

sol'i·tar'y, *n.; pl.* -TARIES (-ĭz). **1.** One who lives or seeks to live a solitary life; a recluse; specif., a hermit.
2. *Rare.* **a** *Obs.* A solitude; desert. **b** = SOLITAIRE, 3.
3. = SOLITARY CONFINEMENT.

Whosoever is delighted with *solitude* is either a wild beast or a god. *Bacon.*
2. A solitary or lonely place, as a desert or wilderness.
3. *Rare.* **a** Soleness; uniqueness. **b** Complete lack; dearth.
Syn. — SOLITUDE, ISOLATION. SOLITUDE is the state of being alone, esp. in its subjective aspects; ISOLATION suggests esp. the objective fact of detachment; as, "One of the reasons of the rarity of great imaginative works is that in very few cases is this capacity for musing *solitude* combined with that of observing mankind" (*Bagehot*); "the solemn *isolation* of a man against the sea and sky" (*Stevenson*). Cf. SOLITARY.
Ant. — Association, fellowship, companionship.

sol'·lu'nar (sŏl'lū'nĕr), *adj.* [See SOLAR; LUNAR.] Relating to, or due to, the combined influence of sun and moon, as at conjunction.

‖**Soll' und Ha'ben** (zŏl' ŏŏnt hä'bĕn). [G., debit and credit.] A novel (1855) of German bourgeois life of the early 19th century, by Gustav Freytag.

Sol'ly·a (sŏl'ĭ·ă), *n.* [NL., after Richard *Solly,* Eng. botanist.] *Bot.* A small genus of Australian woody vines (family Pittosporaceae), with evergreen entire leaves, nodding blue flowers in loose cymes, and oblong, many-seeded capsules. *S. heterophylla,* the Australian bluebell creeper, is cultivated for ornament.

sol'mi·zate (sŏl'mĭ·zāt), *v. t. & i.* To sing or represent by the syllables of solmization; to sol-fa.

sol'mi·za'tion (sŏl'mĭ·zā'shŭn), *n.* [F. *solmisation,* fr. *solmiser* to sol-fa; — so called from the musical notes *sol, mi.* See SOL-FA.] *Music.* Act, practice, or system of using a set of syllables to denote the tones of a scale; sol-fa notation; solfeggio. A system of solmization, based on the syllables *tō, ta, tē, te,* for the four notes of the tetrachord, was used by the Greeks of the Roman Empire and perhaps earlier. The most important system is that ascribed to Guido d'Arezzo, an 11th-century monk. The following first six phrases of an ancient hymn to St. John the Baptist began on the ascending tones of the major scale:

Ut queant laxis *Resonare* fibris,
Mira gestorum *Fa*muli tuorum,
Solve polluti *Labii* reatum,
Sancte Joannes.

The six initial syllables, accordingly, were applied to the tones of the hexachord. When a melody exceeded the compass of one hexachord, the syllables were changed for the new hexachord by "mutation." See GAMUT, *Illust.* When the medieval hexachord was supplanted by the octave, the syllable *si* (perhaps from the initial letters of the last line) was added for the seventh tone. Except in France, *do* has supplanted *ut* as more sonorous. In France and Italy the syllables *ut* (or *do*), *re,* etc., have become identified with the notes C, D, etc., by what is called the ***fixed-do system.*** In England and America they are used as a transposable scale pattern by the ***movable-do system,*** *do* being used for any tone taken as a keynote.

so'lo (sō'lō), *n.; pl.* SOLOS (-lōz), SOLI (-lē). [It., lit., alone, fr. L. *solus* alone. Cf. SOLE, *adj.*] **1.** An air, strain, or a whole piece, played by a single person or sung by a single voice, with or without accompaniment; also, a piece of music written for performance by one person.
2. Any performance in which the performer has no partner or associate, as a dance, flight in an airplane, etc.
3. *Card Playing.* Any of a number of games in which one plays alone against the others or without a partner; esp.: **a** A variety of omber played with thirty-two cards, the queen of clubs (spadilla), seven of trumps (manilla), and queen of spades (basta) being the first, second, and third best trumps. **b** In skat, a game or task in which the player makes the trump without the skat. **c** In solo whist, a playing against the table to win 5 of the 13 tricks.

Sol'o·mon'ic (-mŏn'ĭk), *adj.* Of, pertaining to, or characteristic of Solomon; wise like Solomon.

Sol'o·mon's lil'y (sŏl'ŏ·mŭnz). The black calla.

Sol'o·mon's seal (sŏl'ŏ·mŭnz). **1.** A mystic symbol consisting of two interlaced triangles forming a star with six points, often with one triangle dark and one light, symbolic of the union of soul and body. It was used as an amulet to guard against fever and other diseases.
2. In ancient legend, a talismanic ring set with a jewel by which, as in a mirror, Solomon could see distant persons and places.

Solomon's Seal.

Sol'o·mon's-seal', *n.* **a** Any plant of the genus *Polygonatum;* — so called from the scars on the thick rootstock. See POLYGONATUM. **b** = TURQUOISE BERRY

Solomon's Temple. See TEMPLAR, 1.

So'lon (sō'lŏn; -lŭn), *n.* [See SOLONIAN.] **1.** [*sometimes not cap.*] A legislator; publicist; wise man; sage; — often humorous.
2. Used as masculine proper name.

So·lo'ni·an (sō·lō'nĭ·ăn), *adj.* Of, pertaining to, or characteristic of, Solon, the Athenian lawgiver, or his legislation following the authority vested in him 594–593 B.C. to revise the constitution. From his sweeping changes, the term **Solonian law** sometimes implies drastic measures.

So·lon'ic (-lŏn'ĭk), *adj.* Solonian.

so'lon·ist (sō'lŏn·ĭst), *n.* A wiseacre.

solo organ. *Music.* See ORGAN, 1 **c.**

solo stop. *Music.* An organ stop of individual tone quality suitable for solo effects. It may be in the solo organ or in some other division.

solo whist. A card game played with the full pack ranking as at whist, each player declaring for which of seven different points he proposes to play.

Sol·pu'gi·da (sŏl·pū'jĭ·dă), *n. pl.* [NL., fr. L. *solpuga* (also *solipuga, salpuga*) a kind of venomous ant, or spider. Cf. SOLIFUGAE.] *Zool.* An order of hairy spiderlike arachnids having a segmented thorax and abdomen, slender leglike pedipalpi, and strong chelate chelicerae. In structure they show close relationship to the scorpions, but they breathe by means of tracheae and have no book lungs. They occur in most warm countries except Madagascar and Australia. — **sol·pu'gid** (-jĭd), *adj. & n.*

One of the Solpugida (*Galeodes araneoides*).

sol'stice (sŏl'stĭs), *n.* [OF., fr. L. *solstitium,* fr. *sol* sun + *sistere, statum,* to stand still, cause to stand; akin to L. *stare* to stand. See SOLAR; STAND. Cf. ARMISTICE, INTERSTICE.] **1.** *Astron.* **a** The point in the ecliptic at which the sun is farthest from the equator, north or south, namely: the first point of the sign Cancer and the first point of the sign Capricorn, the former being the ***summer solstice,*** the latter the ***winter solstice,*** in northern latitudes; — so called because the sun then apparently stands still in its northward or southward motion. **b** The time of the sun's passing the solstices, or solstitial points, namely, about June 22 and December 22.
2. Hence, furthest or highest point; limit.
3. *Obs.* **a** The summer solstice or its heat. **b** A stopping or standing still of the sun.

sol·sti'cion (sŏl·stĭsh'ŭn), *n.* Solstice. *Chaucer.*

sol·sti'tial (sŏl·stĭsh'ăl), *adj.* [From MF. *solstitial* (F. *solstitial*) or L. *solstitialis.*] Of, or characteristic of, a solstice, esp. the summer solstice; happening, appearing, etc., at a solstice; also, of as brief duration as a solstice.

sol·sti'tial·ly (sŏl·stĭsh'ăl·ĭ), *adv.* At or toward the solstice or a solstice.

sol'u·bil'i·ty (sŏl'ū·bĭl'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). **1.** Quality or state of being soluble.
2. The amount of a substance which will dissolve in a given amount of another substance. Solubility is expressed as the number of parts (by weight) dissolved by 100 parts of solvent, as per cent by weight or by volume, and in other ways.

solubility product. *Physical Chem.* The maximum product of the ionic concentrations of an electrolyte which at one temperature can continue in equilibrium with the undissolved phase.

sol'u·bil·ize (sŏl'ū·bĭ·lĭz), *v. t.* To render soluble. — **sol'u·bil'i·za'tion** (-bĭl'ĭ·zā'shŭn; -ĭ·zā'-), *n.*

sol'u·ble (sŏl'ū·b'l), *adj.* [OF., fr. LL. *solubilis,* fr. *solvere, solutum,* to loosen, to dissolve. See SOLVE; cf. SOLVABLE.] **1.** Not constipated; evacuating normally; also, of drugs, etc., laxative. *Now Rare.*
2. Susceptible of being dissolved in a fluid; capable of solution. See SOLUTION, 9.
3. That can be solved, as a problem; susceptible of being disentangled or explained, as a mystery; solvable.
4. That can be resolved or reduced; reducible. *Rare.*
☞ For some *soluble* phrases, see the second word.
Ant. — Insoluble, indissoluble, insolvable.
— **sol'u·ble·ness,** *n.* — **sol'u·bly,** *adv.*

sol'u·ble, *n.* Something soluble; a soluble substance, problem, etc.

soluble barbital. = BARBITAL SODIUM.

soluble blue. **a** Any of several water-soluble dyes derived from triphenylmethane, often distinguished by symbols, as 8B, 10B, 3R. **b** See PRUSSIAN BLUE, 1 **a.**

soluble cellulose nitrate. = PYROXYLIN.

soluble cotton. = PYROXYLIN.

soluble glass. = WATER GLASS.

soluble gluside. = CRYSTALLOSE.

soluble group. *Math.* = SOLVABLE GROUP.

soluble guncotton. = PYROXYLIN.

soluble meat. Comminuted meat partly predigested by treatment with hydrochloric acid.

soluble nitrocellulose *or* **nitrocotton.** = PYROXYLIN.

soluble oil. **a** = SULPHONATED OIL. **b** See CUTTING OIL.

soluble saccharin. = CRYSTALLOSE.

soluble starch. See STARCH, *n.*, 1.

‖**so'lum** (sō'lŭm), *n.; pl.* SOLA (-lă). [L.] *Law.* The soil; land; parcel of ground.

‖**so'lus** (sō'lŭs), *masc. adj.,* **so'la** (sō'lă), *fem.* [L. Cf. SOLE, *adj.*] Alone; — chiefly used in stage directions, and the like.

sol'ute (sŏl'ūt; sō'lūt), *adj.* [L. *solutus,* past part. of *solvere* to loosen. See SOLVE.] *Now Rare.* **a** Loose; free; not bound; separate. **b** Dissolved; disintegrated. **c** Soluble; as, a *solute* salt.

sol'ute, *v. t.* To solve; arrange; dissolve. *Obs.*

sol'ute, *n. Physical Chem.* A dissolved substance.

Sol In·vic'tus. See 1st SOL, 4.

so·li·se'qui·ous (sō·lĭ·sē'kwĭ·ŭs), *adj.* [L. *sol* sun + *sequi* to follow.] Following the sun. *Obs.*

So'lis La'cus (sō'lĭs lā'kŭs). [L., lake of the sun.] *Astron.* = EYE OF MARS.

sol'list, *n.* = SOLOIST.

sol'i·tar'i·ly (sŏl'ĭ·tĕr'ĭ·lĭ *or, esp. Brit.* -tĕr·ĭ; 68), *adv.* of SOLITARY. See -LY.

sol'i·tar'i·ness, *n.* See -NESS.

sol'i·tar'i·ty (-tĭr'ĭ·tĭ), *n.* Solitariness. *Obs.*

sollempne. † SOLEMN.

sol'len. † SULLEN.

sol'ler. Var. of SOLAR, SOLLAR.

sol'le·vate, *v. t.* [It. *sollevare.*] To stir up; excite. *Obs.* — **sol'le·va'tion,** *n. Obs.*

sol'oe·cism. Var. of SOLECISM.

sol'o·mon·gun'dy, *n.* = SALMAGUNDI. *Rare.*

Sol'o·mo'ni·an (sŏl'ŏ·mō'nĭ·ăn), *adj.* = SOLOMONIC.

Sol'o·mon'i·cal, *adj.* = SOLOMONIC. *Rare.*

Sol'o·mon·ic'ic, *adj.* = SOLOMONIC. *Rare.*

Solomon Pross. See PROSS, SOLOMON.

sol'o·tink', **sol'ot·nik',** Vars. of SOLOTNIK.

Sol'pu·gid'e·a (sŏl'pū·jĭd'ē·ă), **Sol·pu'gi·des** (sŏl·pū'jĭ·dēz), *n. pl.* [NL.] *Zool.* = SOLPUGIDA.

sols, *n.* [MF.] A SOU. *Obs.*

sol'sti·cy, *n.* = SOLSTICE. *Obs.*

soistitial armil. See ARMIL, 2.

soistitial colure. See COLURE.

soistitial point. = SOLSTICE, 1 **a.**

sol·sti'ti·um (sŏl·stĭsh'ĭ·ŭm), *n.; pl.* -TIA (-ă). [L.] = SOLSTICE.

sol'tan. † SULTAN.

N O P Q R S

so·lu′tion (sō·lū′shŭn), *n.* [ME. *solucion*, fr. OF. *solucion* (F. *solution*), fr. L. *solutio*, fr. *solvere*, *solutum*, to loosen, dissolve. See SOLVE.] **1.** Act or process of solving a problem, etc., or the fact or state of its being solved; also, a means by which a problem, etc., may be solved; explanation; clearing up; denouement.

A drama, not untragical, crowding toward *solution*. *Carlyle.*

2. A releasing; deliverance; discharge. *Obs.*
3. A breaking; a disruption; a breach; — chiefly in phrases ***solution of continuity, connection***, or the like.
4. A breaking up or dispersion; disintegration.
5. The condition of being dissolved, or reduced to a liquid or held suspended in a solvent; a state of fluidity, diffusion, of the like. See sense 9. Also, a liquid containing a dissolved substance. Cf. sense 8 c.
6. *Alchemy.* The process of dissolving or fusing materials through the agency of liquids or heat.
7. *Math.* The process or result of loosing or dissolving connections formed by mathematical operations among symbols, so as to exhibit these symbols freed from such connections and operations. Thus, to solve $ay^2 + 2by + c = 0$ (as to y) means to exhibit y as one side of an equation, unconnected with other symbols; to solve the differential equation $A\frac{d^2y}{dx^2} + 2B\frac{dy}{dx} + C = 0$ means to exhibit x and y connected by an equivalent equation freed from differentiations. A ***general solution*** of an ordinary differential equation contains arbitrary constants equal in number to the order of the equation. ***Particular solutions*** result from giving particular values to these arbitrary constants. A ***singular solution*** is neither general nor particular but may be the envelope of the general solution.
8. *Med.* **a** The termination of a disease; resolution. **b** A crisis. **c** A liquid medicine or preparation (usually aqueous) with the solid ingredients soluble.
9. *Physical Chem.* **a** The act or process by which a substance, whether solid, liquid, or gaseous, is homogeneously mixed with a liquid (or, by extension, a solid or gas) called the *solvent;* also, the state of being so mixed. Solution may be accompanied by evolution or absorption of heat. So-called ***chemical solution*** is that accompanied by clearly marked chemical change, as when silver is dissolved in nitric acid; in this case the substance in solution is not silver, but silver nitrate. **b** A homogeneous mixture formed by the above process. It is typically liquid but may be solid, as in an alloy, or gaseous. (Gaseous solutions are usually called mixtures of gases.) In true solutions the molecules of the dissolved substance (called the *solute*) are dispersed among those of the solvent. The concentration can undergo continuous variation within certain limits. Solutions have special properties. See OSMOSIS, FREEZING POINT. In so-called colloidal solutions the dispersed particles are larger. See COLLOID, *n.*, 1.
10. *Rom. & Civil Law.* Discharge of a contract by performance, esp. payment; performance of an obligation.
Syn. — Analysis, disentanglement, answer.

so·lu′tion (sō·lū′shŭn), *v. t.* To apply a solution to; esp., to cement by rubber solution.

so·lu′tion·al (-ăl; -′l), *adj.* Of or pertaining to a solution.

so·lu′tion·er (-ĕr), *n.* A workman who solutions; esp., a cementer.

so·lu′tion·ist (-ĭst), *n.* **a** = SOLUTIONER. **b** One who works out solutions of problems.

solution of connection. See SOLUTION, 3.

solution of continuity. **a** See SOLUTION, 3. **b** *Surg.* A fracture or laceration.

solution plane. *Cryst.* A direction in a crystal of relatively easy solubility, as when the substance is under great pressure. Chemical action along solution planes in minerals in rocks has often resulted in schillerization.

solution pressure. *Physics & Chem.* The pressure or tension by virtue of which the particles of a dissolving substance are driven into solution. When solution pressure and osmotic pressure are equal, equilibrium is established and the concentration of the solution becomes constant. The solution pressure of metals is a cause of the electric current from a primary battery.

solution tension. = SOLUTION PRESSURE.

So·lu′tre·an (sō·lū′trē·ăn), *adj.* Designating, or pertaining to, an epoch of paleolithic culture named from the type station, Solutré, Department of Saône-et-Loire, France, where characteristic remains were discovered. In age it follows the Aurignacian. It is distinguished by beautifully chipped stone implements. See PALEOLITHIC.

solv′a·ble (sŏl′vä·b'l), *adj.* [Cf. F. *solvable*. See SOLVE; cf. SOLUBLE, SOLVIBLE.] **1.** Susceptible of solution, or of being solved, resolved, or explained.
2. Able to pay one's debts; solvent. *Obs.*
3. *Rare.* **a** Payable. **b** Soluble. **c** Reducible.
— **solv′a·bil′i·ty** (-bĭl′ĭ·tĭ), **solv′a·ble·ness,** *n.*

solvable group. *Math.* A finite group containing a series of invariant subgroups such that the last of the series is the identity and the index of each of these subgroups under the next larger subgroup is a prime number.

sol′vate (sŏl′vāt), *n.* [*solve* + *-ate.*] *Physical Chem.* A compound of a dissolved substance with the solvent.

solvate theory. *Physical Chem.* The theory that when a substance dissolves, the molecules associate with one or more of the solvent molecules.

sol·va′tion (sŏl·vā′shŭn), *n.* *Physical Chem.* Formation of a solvate.

Sol′vay proc′ess (sŏl′vā). [After Ernest *Solvay* of Couillet, near Charleroi, Belgium, the inventor.] A process for making soda from common salt, based on the sparing solubility of sodium bicarbonate, which is precipitated when carbon dioxide is passed into strongly ammoniacal brine, leaving ammonium chloride solution. The bicarbonate is converted into carbonate by calcining. Cf. LEBLANC PROCESS.

Solvay tower. In the Solvay process, a tower with shelves, down which the ammoniacal brine flows to meet the carbon dioxide rising from the base.

solve (sŏlv), *v.;* SOLVED (sŏlvd); SOLV′ING. [L. *solvere, solutum*, fr. a prefix *so-* expressing separation (cf. SOBER) + *luere* to loosen. See LOSE; cf. ABSOLVE, DISSOLVE, RESOLVE.] *Transitive:* **1.** To break; to set loose or free. *Obs.*
2. To clear up (what is obscure, or difficult to understand); to unfold; explain; resolve; to work out to a result or conclusion; to find the solution of; as, to *solve* a mystery, a difficulty, a problem.
3. To pay (as a debt); to free oneself of (an obligation).
4. To dissolve as by dispersing or melting. *Now Rare.*
—, *Intransitive:* To solve, esp. to dissolve, something.
Syn. — Unravel, disentangle. **Ant.** — Complicate, involve.

Sol′veig (sŏl′vāg), *n.* A character in Ibsen's poem *Peer Gynt.* She is the woman through whom salvation for the hero is possible.

sol′ven·cy (sŏl′vĕn·sĭ), *n.;* *pl.* -CIES (-sĭz). [See SOLVENT.] Quality or state of being solvent.

sol′vend (sŏl′vĕnd), *n.* [L. *solvendus* to be loosened or dissolved, fr. *solvere.* See SOLUTION.] A dissolved substance in a solution. Cf. SOLVENT. *Now Rare.*

sol′vent (sŏl′vĕnt), *adj.* [L. *solvens, -entis*, pres. part. of *solvere*, to loosen, discharge, pay. See SOLVABLE.] **1.** Able or sufficient to pay all legal debts; as, a *solvent* merchant; the estate is *solvent*.
2. That dissolves or can dissolve; producing a solution or homogeneous mixture; fusing; as, *solvent* fluids; the *solvent* action of water or of certain ideas.
3. That explains or offers a solution; clarifying.
— **sol′vent·ly,** *adv.*

sol′vent (sŏl′vĕnt), *n.* **1.** A substance (usually liquid) capable of, or used in, dissolving something; as, water is the appropriate *solvent* of most salts, alcohol of resins, ether of fats. See SOLUTION, 9.
2. Something which solves; a solution; as, no *solvent* has been found for the industrial stagnation.
3. Something that dissipates, disintegrates, etc.; as, ridicule as a *solvent* of prejudice.

solv′er (sŏl′vĕr), *n.* One who or that which solves.

sol·vol′y·sis (sŏl·vŏl′ĭ·sĭs), *n.* [See SOLVENT; -LYSIS.] *Physical Chem.* Decomposition of a dissolved substance, involving addition of the elements of the solvent. Cf. HYDROLYSIS. — **sol′vo·lyt′ic** (sŏl′vō·lĭt′ĭk), *adj.*

sol′vo·lyze (sŏl′vō·līz), *v. t.;* -LYZED (-līzd); -LYZ′ING (-lĭz′ĭng). *Chem.* To subject to solvolysis.

solvs′berg·ite (sŭlvz′bĕrg·īt), *n.* [G. *sölvsbergit*, fr. name of a mountain in Norway.] *Petrog.* A dike rock composed of alkali feldspars and aegirite and intermediate between grorudite and tinguaite.

Sol′y·ma (sŏl′ĭ·mä), *n.* [Gr.] Jerusalem.

Sol′y·mae′an (-mē′ăn), *adj.* Of or pertaining to Jerusalem.

so′ma (sō′mä), *n.* [Skr.; akin to Av. *haoma.*] **1.** *Bot.* An East Indian leafless vine (*Sarcostemma acidum*), family Asclepiadaceae, yielding a somewhat acidulous milky juice.
2. *Hinduism.* **a** An intoxicating drink of ancient India, thought to be prepared from the juice of the above plant, and used in sacrificial rites, esp. in honor of Indra and other gods; homa. **b** [*cap.*] This liquor personified and worshiped as a god. **c** In Vedic ritual, the sacrificial rite of offering clarified butter (ghee) in the sacred fire.

so′ma (sō′mä), *n.;* *pl.* SOMATA (-tä). [NL., fr. Gr. *sōma* body.] *Anat. & Zool.* **a** The whole axial portion of an animal — head, neck, trunk, and tail. **b** All of any organism except the germ cells.

-so′ma. [NL.] A combining form from Greek *sōma*, meaning *body*, used to denote: **a** *Biol.* = 3d -SOME. **b** *Med. Size or form of body, or a monster fetus, of a* (specified) *type*, as in meso*soma*. **c** *Zool. Creatures having a* (specified) *type of body;* — in classificational names, as in Chaeto*soma*, phyllo*soma*.

so′ma·cule (sō′mä·kūl), *n.* *Biol.* A pangen

so′mal (sō′măl), *adj.* Somatic.

So·mal′ (sō·mäl′), *n.* = SOMALI.

So·ma′li (sō·mä′lē), *n.;* *pl.* SOMALIS (-lēz). **1.** One of a Hamitic race of Somaliland, many tribes of which are intermixed with Negro and Arab blood. They are very tall and dark, with well-formed features and martial carriage. Nearly all are fanatical Mohammedans.
2. The language of the Somalis. See HAMITIC LANGUAGES **b.**

so′ma·plasm (sō′mä·plăz′m), *n.* *Biol.* Somatoplasm.

So·mas′chi·an (sō·măs′kĭ·ăn), *n.* *R.C.Ch.* A member of a religious order established in 1532 at Somascha, Italy, and engaged in charitable work. — **So·mas′chi·an,** *adj.*

so′ma·tas·the′ni·a (sō′mä·tăs·thĕ′nĭ·ä; -tăs′thē·nī′ä), *n.* [NL., fr. *somat-* + *asthenia.*] *Med.* Chronic bodily weakness, esp. that associated with low blood pressure.

‖**so′ma·tén′** (sō′mä·tān′), *n.;* *pl.* -TENES (-tā′nās). [Sp.] *Sp. Hist.* A nonmilitary body of armed townsmen for local defense and for maintenance of order.

So′ma·te′ri·a (sō′mä·tē′rĭ·ä), *n.* [NL., fr. Gr. *sōma* body + *erion* wool (taken in the sense of down).] *Zool.* The principal genus of eider ducks.

so·mat′ic (sō·măt′ĭk), *adj.* [Gr. *sōmatikos*, fr. *sōma* the body.] **1.** Of, pertaining to, or affecting the body or, esp., the soma; physical; corporeal; as, *somatic* posture, attitudes, or cells.
2. *Anat. & Embryol.* **a** Of or pertaining to the wall of the body, esp. as distinguished from the viscera; somatopleuric; parietal. **b** Of or pertaining to the body, or trunk.
3. *Psychol.* Of or pertaining to the body, as distinguished from the mind, the brain, or the central nervous system; as, *somatic* vs. psychical reactions.

so·mat′i·cal (sō·măt′ĭ·kăl), *adj.* Somatic. — **so·mat′i·cal·ly,** *adv.*

somatic cavity. *Zool.* The coelom; the body cavity.

somatic cell. One of the cells of the body of an individual which become differentiated and compose the tissues, organs, and parts of that individual; — disting. from *germ cell.* When the individual dies, its somatic cells must sooner or later die, but the substance of some germ cells must have continuous life as long as the race exists.

somatic death. See DEATH, *n.*, 1. *Citation.*

so·mat′i·co- (sō·măt′ĭ·kō-). A combining form for *somatic*, denoting *somatic* and, as in **so·mat′i·co-splanch′nic, so·mat′i·co-vis′cer·al.**

so′ma·tism (sō′mä·tĭz′m), *n.* Materialism.

so′ma·tist (-tĭst), *n.* **1.** A materialist.
2. *Psychiatry.* One who seeks the causes of mental disorders in brain lesions and other physical conditions.

so′ma·to- (sō′mä·tō-), **somat-.** A combining form, Greek *somato-, somat-*, from *sōma, sōmatos*, meaning *body*, as in *somat*ology; specif., *soma, somatic*, as in *somat*ocyst, *somat*oderm.

so′ma·to·chrome′ (-krōm′), *n.* [*somato-* + *-chrome.*] Any nerve cell having a distinct cytoplasm around its nucleus, and taking a deep stain with basic aniline dyes.

so′ma·to·cyst′ (-sĭst′), *n.* [*somato-* + *-cyst.*] An air cavity in the float of a siphonophoran. — **so′ma·to·cys′tic** (-sĭs′tĭk), *adj.*

so′ma·to·derm′ (sō′mä·tō′dûrm′), *n.* [*somato-* + *-derm.*] *Embryol.* The somatic stratum of the mesoderm.

so′ma·to·ge·net′ic (-jē·nĕt′ĭk), *adj.* *Zool.* Somatogenic.

so′ma·to·gen′ic (-jĕn′ĭk), *adj.* [*somato-* + *-genic.*] *Biol.* Originating in the somatic cells.

so′ma·tog·no′sis (-tŏg·nō′sĭs), *n.* Perception or diagnosis of bodily conditions. — **so′ma·tog·nos′tic** (-nŏs′tĭk), *adj.*

so′ma·tol′o·gy (-tŏl′ō·jĭ), *n.* [*somato-* + *-logy.*] **1.** Doctrine or science of general properties of material substances.
2. *Anthropol.* The comparative study of the structure, functions, and development of the human body; — practically restricted to statistical treatments of bodily measurements and to comparative descriptions of those traits which chiefly distinguish races and populations. Cf. CRANIOMETRY. — **so′ma·to·log′ic** (-tō·lŏj′ĭk), **-i·cal** (-ĭ·kăl), *adj.* — **so′ma·to·log′i·cal·ly,** *adv.* — **so′ma·tol′o·gist** (-tŏl′ō·jĭst), *n.*

so′ma·tome (sō′mä·tōm), *n.* [Gr. *sōma* body + *-tome.*] A somite. — **so′ma·tom′ic** (-tŏm′ĭk), *adj.*

so′ma·to·phyte′ (sō′mä·tō·fīt′), *n.* [*somato-* + *-phyte.*] *Bot.* A plant composed of somatic cells which develop chiefly into adult tissue. All higher plants are of this type. Cf. ASOMATOPHYTE. — **so′ma·to·phyt′ic** (-fĭt′ĭk), *adj.*

so′ma·to·plasm (-plăz′m), *n.* [*somato-* + *-plasm.*] *Biol.* Protoplasm of somatic cells. Cf. GERM PLASM.

so′ma·to·pleure′ (-plŏŏr′; 242), *n.* [*somato-* + Gr. *pleura* side.] *Embryol.* In the embryos of craniate vertebrates, the outer, or parietal, of the two layers into which the lateral plate of the mesoblast splits, together with the epiblast investing it externally. The inner, or visceral, layer of mesoblast formed at the same time, together with the underlying hypoblast, is called the *splanchnopleure;* the cleft between them forms the true body cavity, or coelom. The somatopleure forms the body wall (and in amniote vertebrates the true and false amnion); the splanchnopleure, the walls of most of the alimentary canal. The terms *somatopleure* and *splanchnopleure* are extended to similar structures in the embryos of certain other animals, as insects and some other arthropods. — **so′ma·to·pleu′ral** (-plŏŏr′ăl; 242), *adj.* — **so′ma·to·pleu′ric** (-rĭk), *adj.*

so′ma·to·psy′chic (-sī′kĭk), *adj.* [*somato-* + *psychic.*] *Psychol.* Concerned with the individual's notions regarding his own body; as, a *somatopsychic* delusion. Cf. ALLOPSYCHIC.

so′ma·to·splanch′nic (-splăngk′nĭk), *adj.* [*somato-* + *splanchnic.*] *Anat.* **a** Pertaining to or involving the somatic and splanchnic layers of the mesoderm. **b** Of or pertaining to the body and the viscera.

so′ma·tot′ro·pism (-tŏt′rō·pĭz′m), *n.* [*somato-* + *-tropism.*] *Bacteriol.* Selective localization of parasitic organisms in the somatic, or body, cells. Cf. NEUROTROPISM. — **so′ma·to·trop′ic** (-tō·trŏp′ĭk), *adj.* — **so′ma·to·trop′i·cal·ly** (-ĭ·kăl·ĭ), *adv.*

-som′a·tous (-sŏm′ä·tŭs; -sō′mä-). [See SOMATO-.] *Zool.* A combining form, Greek *-sōmatos*, from *sōma*, body, meaning *-bodied*, as in hetero*somatous*. Corresponding classificational names are formed in *-somata*, as in Hetero*somata*.

som′ber, som′bre (sŏm′bĕr), *adj.* [F. *sombre*, prob. fr. VL. *subumbrare* to put in the shade, fr. L. *sub* under + *umbra* shade; cf. Sp. *sombra* shade. See UMBRAGE.] **1.** So shaded or full of shadows as to be dark and gloomy; without light or brightness; as, a *somber* forest, sky, room, or morning.
2. Melancholy; grave; depressing; as, *somber* thoughts, expressions, or music; a *somber* beauty.
3. Of color or a color, soberly dark; of a dull or heavy cast or shade; dark-colored; as, a *somber* brown; *somber* silks.
☞ COMBINATIONS (all adjectives) are:
somber-clad **somber-looking** **somber-seeming**
somber-colored **somber-minded** **somber-toned**
— **som′ber·ly, som′bre·ly,** *adv.* — **som′ber·ness, som′bre·ness,** *n.*

som′ber, som′bre, *v. t. & i.* To make or become somber.

som′ber, som′bre, *n.* Gloom. *Rare.*

See SONANT.] *Music.* Orig., an instrumental composition as distinguished from a *cantata*, or vocal composition; later, an instrumental composition in more than one movement. Specif.: **a** *Hist.* An early form of instrumental composition in movements, but without characteristic structure. Of this form of sonata, two types were recognized: the ***so·na'ta da chie'sa*** (dä kyā'zȧ), or church sonata, of which one or more movements were in fugato style; and the ***so·na'ta da ca'mera*** (dä kä'mȧ·rȧ), or chamber sonata, consisting chiefly of dance movements. **b** An extended composition for one or two instruments, usually in three or four movements, which are contrasted in rhythm and mood but related in tonality and which, properly, have an organic unity of sentiment and style. The movements are typically as follows: (1) an allegro, or quick movement in the distinctive sonata form (see SONATA FORM **b**), which may have a short slow introduction; (2) an adagio, largo, andante, or other slow movement, frequently in song or variation form; (3) the lighter minuet or (the more modern) scherzo, usually in ternary form; (4) the quick finale, often in rondo form but sometimes another sonata form or a fugue, theme and variations, etc. See SONATA FORM.

2. A fixed verse form of Italian origin, consisting of fourteen lines, typically five-foot iambics, rhyming according to a prescribed scheme; also, a poem in this pattern, or more or less conforming to it. Two standard types of sonnet are recognized: **a** The ***Italian sonnet***, also called the ***Petrarchan***, or ***regular, sonnet***, in which the lines are grouped (normally by a full pause) into an octave of two quatrains running on two rhymes (thus, *abba, abba*) and a *sestet* of two tercets on two or three rhymes, having more freedom of arrangement, but commonly running *cdc, dcd*, or *cde, cde*. The ***Miltonic sonnet*** belongs to this type, but has, usually, no marked division between octave and sestet. **b** The ***English, Elizabethan***, or ***Shakespearean, sonnet***, in which the lines are grouped into three quatrains and a couplet, with rhyme scheme as follows: *abab, cdcd, efef, gg*. The ***Spenserian sonnet*** unites the quatrains by interlacing the rhymes: *abab, bcbc, cdcd, ee*. The sonnet form has been used chiefly for the treatment of a single emotion, sentiment, or reflection, because its octave and sestet divisions lend themselves to passing from the general to the personal or from the particular to the universal in such ways that artistic contrast in tone or mood, the reinforcement of an impression from another point of view, and increased pointedness or poignancy are made possible. The couplet ending of the English sonnet is often epigrammatic or climactic in character. Cf. TAILED SONNET.

Soph'ist (sŏf'ĭst), *n.* [F. *sophiste*, fr. L. *sophista*, *sophistes*, fr. Gr. *sophistēs*. See SOPHISM.] **1.** One of a class of teachers of rhetoric, philosophy, and the art of successful living, in ancient Greece, who became prominent about the middle of the 5th century B.C. They were the first to offer anything approaching systematic education beyond the elementary branches; and the best of them were undoubtedly among the most learned men of their period. The ill repute of the Sophists is due in part to the fact that our knowledge of them is chiefly from their opponents, esp. Plato and Aristophanes, and in part to their violation of the then prevailing code of the gentleman by receiving pay for their instruction. But they were undoubtedly iconoclastic in temper, often adroit and specious in their reasoning, and some of the lesser ones boasted their ability to "make the worst appear the better reason." The most important were Protagoras of Abdera, Gorgias of Leontini, and Hippias of Elis. In philosophy they were inclined to skepticism; Protagoras taught the relativity of all things to our subjective apprehension, "Man is the measure of all things"; and Gorgias that "Nothing is; or if anything is, it cannot be known; or if anything is and can be known, it cannot be communicated." The profession of Sophist, or public teacher of high learning, persisted for several centuries.

Throughout historic time and among most peoples, have persisted the contrasting conceptions, one, that soul is intrinsically and exclusively individual, the other, that it is a generic stuff or principle, no more individual than is the substance of the body. On the whole, however, the first of these views has prevailed, especially in Occidental civilization. The use of such terms as "breath" (Heb. *nephesh,* Gr. *pneuma,* Lat. *anima, spiritus*) and "shadow," or "shade" (Egypt. *ba,* Gr. *skia,* Lat. *umbra*), shows the nature of the earliest conceptions of the soul. The Egyptian distinction of *ba* and *knu* (see BA), *soul* and *spirit* (Gr. and Biblical *psychē* and *pneuma*) dates from the earliest times, and the characteristic Egyptian conception of the divine origin of the soul, of its earthly life as a warfare between good and evil,

and of its future state as determined by a divine judgment, outlines also the main belief of all Western peoples. Among the ancient Greeks, the prevailing conception was of the soul as that principle which enables a thing to initiate motion or change, or develop from inner forces instead of being affected exclusively from without. Thus the possession of a soul is the distinguishing character of that which lives. To this general conception must be added the esoteric doctrines of the mystery cults, mostly concerned with immortality, and contrasting the soul with the body and the merely natural. The Christian conception of the soul derives from the Greek, especially as modified by the mystery cults, as well as from the Bible. "Soul is throughout a great part of the Bible simply the equivalent of 'life' embodied in living creatures. In the earlier usage of the Old Testament it has no reference to the later philosophical meaning — the animating principle, still less to the idea of an 'immaterial nature' which will survive the body." — *Dict. of the Bible* (*Hastings*). The more exact determination of the Christian conception was reserved for the Church Fathers, especially St. Augustine, who taught that it is simple, immaterial, and spiritual, devoid of quantity and spatial extension. He argued its immortality from the fact that it is the repository of imperishable truth; and he distinguished its lower, appetitive and sensuous, from its higher, or spiritual, volitional, and cognitive, nature. Descartes, with his theory of bodily automatism and his doctrine that the essential nature of the soul is rational thinking, which the brutes cannot share, gave a new form to the problem of the soul's nature. Three types of conception have been formulated in answer. First, the soul has been treated as an entity or subject manifested especially in man's volitional and thinking activities; it is the subject of the experience mediated by the body; it is not the mind, but that which thinks and wills. Second, the soul is identified with the totality of conscious experience; this is the general conception of idealists. Third, the soul is treated as a function, or the sum of the functions of the brain: thus Pierre J. G. Cabanis (1757–1808) taught that the brain secretes thought as the stomach digests food. Some conceptions, such as that of Fechner that the soul is the whole unitary spiritual process in conjunction with the whole unitary bodily process, appear to stand midway between the idealistic and materialistic views. Recent psychology, for the most part, dispenses with the concept of the soul as an entity or explanatory principle. Cf. ANIMISM, TRANSMIGRATION. See GHOST, *n.*, 1; SPIRIT.

2. The psychical or spiritual principle in general, conceived as shared by or embodied in individual human beings, or all beings having a rational and spiritual nature; the oversoul; also, the psychical or spiritual nature of the universe, conceived as related to the physical world as the human soul to the human body; the world soul. Cf. LOGOS.

3. Man's moral and emotional nature as distinguished from his intellect; as, a man with more *soul* than brains; hence, expression which effectively presents or arouses emotion and sentiment.

4. The seat of real life, vitality, or action; the animating or essential part; the vital principle actuating anything. See PSYCHE, 2. "The hidden *soul* of harmony." *Milton.*

5. The leader; inspirer; moving spirit; the heart; as, the *soul* of an enterprise; the *soul* of kindness; esp., a person conspicuous for spiritual or intellectual qualities.

6. Courage; spirit; fervor; spiritual force; as, he had the *soul* to challenge the evil influences in the community; affection, generosity, charity, or any other noble manifestation of the heart or moral nature; as, to have no *soul*.

7. A human being; a person; — a familiar appellation, usually with a qualifying epithet; as, poor *soul*; kind *soul*; dear *soul*; a community of some ten thousand *souls*.

8. A disembodied spirit, or a spiritual being.

> That to his only Son . . . every *soul* in heaven
> Shall bend the knee. *Milton.*

9. [*cap.*] *Christian Science.* A synonym for God.

> *Soul* or Spirit signifies Deity and nothing else; *Soul* is the substance, Life, and intelligence of man, which is individualized, but not in matter. *Mary Baker Eddy.*

10. Exemplification or personification (of); — esp. in the phrase, he is the *soul* of honor, loyalty, or the like.

11. The shriveled lungs of a duck, chicken, or other fowl, used as food.

12. *Ordnance.* In a cannon, the bore. *Obs.*

Syn. — SOUL, SPIRIT are often convertible terms, esp. in their denotation. But in ordinary usage (for technical distinctions see defs.) SOUL is apt to connote greater depth of feeling or sentiment than SPIRIT, which suggests more strongly vital energy or (often) independence of bodily form; as, "God is *soul*, *souls* I and thou: with *souls* should *souls* have place" (*R. Browning*); "Speak to Him, thou, for He hears, and *spirit* with *spirit* can meet" (*Tennyson*); "Call the world, if you please, 'the vale of *Soul* making' . . . I say '*Soul* making' — *Soul* as distinguished from Intelligence" (*Keats*); "Difficulties nerve the *spirit* of a man" (*id.*); "When my lips just touched your cheek — touch which let my *soul* come through" (*R. Browning*); "And our *spirits* rushed together at the touching of the lips" (*Tennyson*); "There is some *soul* of goodness in things evil" (*Shak.*); "the inmost purple *spirit* of light" (*Shelley*). Cf. GHOST.

> And by that offer meant to *sound* your breast. *Dryden.*

3. *Med.* **a** To explore or examine, as the bladder or urethra, with a sound. **b** *Rare.* To examine by auscultation or percussion.

4. To remove the sound, and other organs, from (fish).

—, *Intransitive:* **1.** To ascertain the depth of water with a sounding line or other device.

2. To dive suddenly straight toward the bottom; — said of fish, whales, etc., esp. when hooked or harpooned.

Syn. — Plumb; scrutinize, test.

sound a line. *Whaling.* To carry down the towline of the boat when sounding; — said of a whale.

sound, *n.* [F. *sonde.* See SOUND to fathom.] **1.** Act of sounding, esp. with the lead; also, a sounding taken.

2. A sounding line, or sounding lead.

3. *Med.* Any elongated instrument or probe, usually metallic, by which cavities of the body are sounded or explored, esp. the bladder for stone, or the urethra for a stricture.

sound (sound; 111), *n.* [ME. *soun*, fr. OF. *son*, fr. L. *sonus*; akin to Skr. *svana* a sound, *svanati* it sounds, resounds, and to E. SWAN. Cf. ASSONANT, CONSONANT, RESONANT, SONATA, SONNET, SONOROUS.] **1.** The sensation of hearing; that which is heard; specif.: **a** *Psychophysics.* Sensation due to stimulation of the auditory nerves and auditory centers of the brain, usually by vibrations transmitted in a material medium, commonly air, affecting the organ of hearing (see EAR), esp. through the tympanic membrane, or sometimes by internal disturbances affecting the nerves or centers directly; as, the *sound* of thunder; the *sound* of a ringing in the ears; a hallucinatory *sound*. A musical sound, or tone, is due to regularly recurring vibrations, a noise to irregular or confused impulses. To be audible, vibrations must have a rate of at least 12–15 per second. Tones of musical instruments range from near this lower limit up to about 5,000 vibrations per second, and shrill tones of still higher pitch are audible up to about 20,000 vibrations per second (varying with the individual); beyond this upper limit physical vibrations are inaudible. See TONE, PITCH. **b** *Physics.* That form of vibrational energy which occasions the above sensation. It is usually transmitted to the ear by air. Sound is propagated by progressive longitudinal vibratory disturbances (***sound waves***) each including an area of condensation and rarefaction. The velocity of sound is the velocity of compressional waves in any medium; in dry air at a temperature of 32° F. the velocity is about 1,087 feet a second; in glass, 18,000 feet per second; in steel, 16,400; in water, 4,708 (at 8° C.). Sound waves may exhibit reflection, refraction, dispersion, and interference. The intensity of sound varies inversely as the square of the distance from the sounding body and directly as the square of the amplitude of the vibrations. It is also modified by the density or motion of the medium, and by the neighborhood of a sonorous body. There is no sound in an empty room.

2. A tone or noise of a special quality or expressive of a special feeling; as, a mournful *sound*; a *sound* of rejoicing. "Make of your truth neither boast nor *sound*." *Chaucer.*

3. **a** The mental impression conveyed by a certain sound or expression; the quality of evoking inferences in a hearer's mind; an attendant implication; import; portent; as, that confession has a suspicious *sound* to me; I don't like the *sound* of that vibration. **b** Meaning; significance; as, his words had no *sound* for me. *Obs.*

4. Rumor; report; tidings; as, the *sound* of your deeds has spread afar. *Archaic.*

5. Noise without meaning; mere noise.

> Sense and not *sound* . . . must be the principle. *Locke.*

6. Distance within which a certain noise may be heard; earshot; hearing; as, within *sound* of his voice.

7. *Phonet.* A speech sound.

Syn. — SOUND, NOISE. SOUND is the general term; NOISE, in present usage, suggests esp. meaningless, confused, or discordant sound.

sound pendulum. *Acous.* An apparatus for regulating the intensity of sound. It consists of a pendulum tipped with a hard rubber ball which strikes against a block when the pendulum is released, the intensity of the sound produced being calculated from the length of the arc through which the pendulum falls.

sound perimeter. *Psychol.* An apparatus for testing ability to localize sounds, consisting of a skeleton sphere with arrangements for producing a sound at any part of its surface.

sound picture. A sound motion picture.

sound post. *Music.* A small post, in a viol instrument, set nearly under the bridge as a support and as a transmitter of vibrations to the back.

sound projector. *Motion Pictures.* A projector equipped to project pictures synchronously with a sound record.

Sound Projector. Diagrammatic view of mechanism for reproducing sound from a sound track (which see). Light from a Lamp (1) is focused, by a system of Lenses (2), through an aperture in Plate (4), sound track on Film (3), and Light Gate (5), on a Photoelectric Cell (6). The Light falling on the photoelectric cell (which see) produces an electric current which fluctuates according to the intensity or amount of light passing through the sound track, and which when amplified reproduces, with the aid of a loud speaker, the sound recorded on the sound track. The movement of the film is continuous. After passing from the upper magazine (see MOTION-PICTURE PROJECTOR) and through the picture projector, the film enters the Sound Projector Head (8), a Loop (7) in the film permitting change from intermittent to continuous movement. The film passes over the Guide Roller (9), between the aperture Plate (4) and a Tension, or Pressure, Pad (10), to a Sprocket (11) and Guide Roller (12), and finally to the Lower Film Magazine (13).

sound'proof' (sound'prōōfʼ; 66), *adj.* Impervious to sound.

space (spās), *n.* [ME., fr. OF. *espace*, fr. L. *spatium.* See SPEED; EXPATIATE.] **1.** That which is characterized by extension in all directions, boundlessness, and indefinite divisibility; that in which all physical things are ordered and related at one time (or apart from time); the subject of determinations of position and direction. *Actual* space has long been regarded as being of three dimensions according to the ordinary or Euclidean geometry, but experiment supports the theory of Einstein that it is non-Euclidean and that the presence of matter gives it a slight warp in a fourth dimension. According to this, space (like the earth's surface) is boundless but not infinite in extent and a ray of light traveling a sufficiently long time (estimated by Einstein as 500 billion years) would return to its starting point. In recent physical and philosophical theories the conception of space cannot be separated from that of time. See SPACE TIME. Since the advent of the relativity theory many physicists attribute to space such properties as would enable it to transmit gravitational and electric forces, light, etc., without the need of an ether. See ETHER, *n.*, 3.

The question whether *space* is real apart from space-filling objects, that is, whether it is a receptacle for things or an attribute of them, dates from early times. The antithesis of these two views is complicated in modern discussions by the question of the subjective (ideal) or objective (noumenal) reality of space. Many theories have been advanced. First, according to common thought, space is a real (noumenal) receptacle, intrinsically void; this was Newton's view. Second, space is the essence of bodily substance (Descartes's conception) or an attribute of substance (Spinoza). Third, space is a mental construction due to the gradual co-ordination of sensations, especially of sight and motion; this was Berkeley's view and the usual conception of many 19th-century psychologists. It is held in two forms, some authorities maintaining that space is merely a product of the co-ordination of sense experience, others that it is a quality of sensations themselves. Fourth, space is an a priori form into which sensuous experience necessarily falls; this was the Kantian view. A fifth view maintains the existence of two kinds, distinguishing the *ideal*, or a priori, form of space from *real*, or physical, space and admitting both. *Mathematical* space is to be distinguished from the foregoing (see sense 2 a below). Aristotle (*Physics*, Book IV) held the view commonly accepted in modern times of space as the logical condition of the existence of bodies; space being "that without which bodies could not exist, but itself (space) continuing to exist when bodies cease to exist"; space possesses magnitude or extension, though itself is not a body — "for in case it were a body then two bodies would exist in the same place." He urged that enclosed places may be contained and moved in larger including places — a ball in a box, the box in a house, the house in a town, the town on the earth, etc.; but all places are in one continuous space, an ultimate environment, *peras*, which contains all movable things and is not movable itself. *W. T. Harris.*

2. *Math.* **a** The aggregate of points, or ordered sets of n numbers $(x_1, \ldots x_n)$. When the co-ordinates x are restricted to be real the space is called *real*, and when they may be complex, *complex.* Various types of spaces are distinguished by certain postulates; thus the different kinds of metric spaces (see POINT SET) are distinguished from one another by the nature of the postulated distance between two points. See EUCLIDEAN GEOMETRY, RIEMANNIAN GEOMETRY, ELLIPTIC SPACE, HYPERBOLIC SPACE, RIEMANNIAN MEASURE OF CURVATURE. **b** In hyperbolic geometry, the part of the complete spatial manifold within the absolute, which is a real, closed quadric.

3. A limited extension in one, two, or three dimensions; a part marked off or bounded in some way; distance, area, or volume; as, the *space* between two stars or two hills; *space* on a blackboard; *space* in a trunk, in a freight car; *space* on a printed page.

4. Specif., reservation; accommodations, as on a train or steamer; as, he reserved his *space* two weeks ago.

5. An empty place; a void.

6. Quantity of time; an interval between two points of time; duration; time. "Long *space.*" *R. of Brunne.*

Nine times the *space* that measures day and night. *Milton.*

7. Specif., time free for any special purpose; opportunity; chance. "To have *space* to speak," *Piers Plowman.*

8. A short time; a while. *Archaic.* *Spenser.*

9. Walk; track; path; course. *Obs.* *Chaucer.*

10. *Advertising.* The page or part of a page of a periodical used for advertising, or the number of agate lines so used in a newspaper. *Trade Slang, U. S.*

11. *Music.* One of the degrees, or parallel open places, between or above or below the lines of the staff.

12. *Print.* A small piece of type used to separate words (or letters) in a line of type. It is cast lower than the face of the type, so as not to receive the ink in printing, and is usually made in one of three widths, *3-em* (three to an em), *4-em*, and *5-em.* *Hair spaces* (which see) are thinner than 5-em spaces. A *justifying space* is one automatically cast on the monotype machine between the words, of such width that, with other similar spaces, it will fill out the line of type in which it occurs.

13. *Teleg.* The interval during which the key is open, or not in contact, in operation.

☞ COMBINATIONS (all adjectives) are:

space-cramped	space-occupying	space-piercing
space-embosomed	space-penetrating	space-spread
space-filling	space-pervading	space-thick

— *in space.* After a while. *Obs.* — *in the mean space.* Meanwhile. *Obs.*

space (spās), *adj.* **1.** Used for spacing.

2. Of or pertaining to space.

3. Paid or estimated by the amount of space occupied.

space (spās), *v. t.;* SPACED (spāst); SPAC'ING (spās'ĭng). [Cf. F. *espacer.* See SPACE, *n.*] **1.** To bound in space; to determine the spatial limits of.

2. To place at intervals; to arrange with spaces between; as, to *space* words, lines, or letters, in writing, printing, or typewriting.

3. To mark out into sizes, as compartments in a box.

4. To pace for measurement. *Scot. & N. of Eng.*

5. *Print.* In composition, to increase the spaces between words so as to fill a line; to extend the length of a page or job by inserting leads or furniture; to blank out, as with quads or furniture; — often with *out.*

Syn. — Range, rank, arrange.

space (spās), *n. & v.* [Cf. SPACE room; PACE.] Pace (in measuring ground). *Scot. & Dial. Eng.*

space, *v. i.* [Cf. OF. *espacier*, L. *spatiari.* See SPACE, *n.*] To walk; rove; roam. *Obs.*

space'band' (spās'bănd'), *n. Print.* A device consisting of a pair of thin, reciprocally tapered steel wedges, placed between words in setting matrices on certain kinds of typesetting machines, to automatically justify and space the line before it is cast.

space bar *or* **key.** *Mach.* A bar or key in a typewriter or typesetting machine, used for spacing between letters.

space centrode. See CENTRODE.

space charge. *Elec.* The electrons in the space between the filament and the plate in an electron tube.

space'-charge' ef-fect'. *Elec.* In an electron tube, the limitation of flow of plate current produced by repulsion exerted on electrons leaving the filament by the other electrons present in the tube.

space curvature. The curvature of a Riemannian space of any number of dimensions as specified by the Riemann-Christoffel curvature tensor; when the space curvature is everywhere zero, the space is called *flat* or *Euclidean* and when it is constant, but not zero, the space is said to be of *constant curvature.* Called also *curvature of space.*

space curve. *Math.* A locus of points in three-dimensional space whose co-ordinates are continuous functions of single independent variable, as the helix whose equations are $x = a \cos t$; $y = a \sin t$; $z = ht$.

spaced payment (spāst). *Com.* The payment of parts of a purchase price at stated intervals; payment by installments.

space error. *Psychol.* A constant error in the comparison of magnitudes, resulting from the differing locations of the magnitudes compared.

space factor. *Elec.* The ratio of the space occupied by a bare conductor to that space occupied by the conductor with its insulation.

space formula. *Chem.* See FORMULA, 5.

space'ful (spās'fo͝ol; -fĭ), *adj.* Wide; extensive.

space isomerism. *Chem.* See ISOMERIC, *adj.*, 1.

space key. A space bar.

space'-lat'tice, *n. Physical Chem.* The geometrical arrangement of the atoms in a crystal, as determined by X-ray analysis. It is the sum total of the points of intersection of any three sets of equidistant parallel planes. Most metals crystallize in the *body-centered, face-centered,* or *hexagonal close-packed, lattice.*

space line. *Print.* A lead. *Rare.*

space motion. See STAR MOTION C.

space of discission. See DISCISSION.

space of dissolution. See DISSOLUTION, 5.

space of Fon-ta'na (fŏn-tä'nä). [After Felice *Fontana* (1730–1805), It. anatomist.] *Anat.* Any one of the spaces between trabeculae of the posterior elastic lamina of the cornea through which the anterior chamber of the eye communicates with Schlemm's canal.

space of Ret'zi-us (rĕt'sĭ-ŭs). [After A. A. *Retzius* (1796–1860), Sw. anatomist.] *Anat.* A space between the bladder and the symphysis pubis, occupied by fatty tissue.

space perception. *Psychol.* The perception of direction, distance, size, and other spatial facts.

space quadrature. See QUADRATURE.

spac'er (spās'ĕr), *n.* One who or that which spaces; as: **a** One who attends to spacing. **b** A device for holding two members at a given distance from each other. **c** *Mach.* A space bar. **d** *Teleg.* A current-reversing device, used esp. in cable telegraphy, to increase speed of transmission.

space ratio. *Astron.* The ratio of numbers of stars increasing in space nearly in the theoretic proportion of their diminishing light; star ratio.

space rule. *Print.* Single rule in short regular lengths, used chiefly in tables.

space telegraphy. Radiotelegraphy.

space telephony. Radiotelephony.

space time. **1.** The four-dimensional order within which every physical existent may be determined or "located" by specifying its four co-ordinates, three spatial and one temporal; also, the characteristic quality, or set of properties, of such an order.

2. The whole of physical reality, or any circumscribed portion, conceived as a four-dimensional array of perduring, extended things, or of events or event-particles.

3. *Philos.* According to S. Alexander and others, the primordial reality, conceived as having no qualities beyond the spatial and temporal, from which further qualities and higher levels of existence evolutionally emerge. See EMERGENT EVOLUTION.

— **space'-time',** *adj.*

space'-time' con-tin'u-um. *Physics.* A space of four dimensions, which if described would have three space axes and one axis indicating variations in time. See FOURTH DIMENSION, 1.

space variation. *Math.* The rate of change of a scalar point function in a space of any number of dimensions with respect to the co-ordinates of the points of this space.

space velocity. *Astron.* The velocity of a star's motion in space, as determined from its proper motion, distance, and velocity in the line of sight. Cf. STAR MOTION.

space washer. *Mach.* A washer used for a distance piece.

space'-world', *n.* The physical world viewed in relations of three-dimensional space; the world of common sense.

space writer. *Journalism.* A writer paid according to the space his matter fills in print.

spac'ing (spās'ĭng), *n.* Spatial arrangement; arrangement of spaces, or intervals. Specif., of a lock, the distance from the center of the keyhole to the center of the knob hub. *spacing strip.* = POLE STRIP.

spa'ci-os'i-ty (spā'shĭ-ŏs'ĭ-tĭ), *n.* = SPACIOUSNESS. *Rare.*

spa'ci-o-tem'po-ral (spā'shĭ-ō-tĕm'pō-răl), *adj.* = SPATIOTEMPORAL.

spa'cious (spā'shŭs), *adj.* [OF. *spacieux*, fr. L. *spatiosus.* See SPACE, *n.*] **1.** Vast in extent; of great space; not contracted or narrow; roomy; as, *spacious* bounds; a *spacious* hall. "A *spacious* plain." *Milton.*

2. Fashioned on a large or magnificent scale; not petty or mean; ample; also, comprehensive; expansive; as, Gibbon wrote a *spacious* history of the Roman Empire.

The *spacious* times of Great Elizabeth. *Tennyson.*

3. Extending over a long period of time; of long duration; as, *spacious* antiquity.

4. Of broad understanding; wise.

He wrote for cool and *spacious* people like himself. *W. J. Locke.*

Syn. — See CAPACIOUS.

Ant. — Cramped, crowded, narrow, circumscribed.

— **spa'cious-ly,** *adv.* — **spa'cious-ness,** *n.*

spack (spăk), *adj.* [ON. *spakr* wise, quiet.] Intelligent; knowing; also, forward. *Obs. exc. Dial. Eng.*

spack (spăk; spăk). Scot. & N. of Eng. past tense of SPEAK.

spac'y (spās'ĭ), *adj.* Characterized by space; roomy. — **spac'i-ness** (-ĭ-nĕs; -nĭs; 119), *n.*

spad (spăd), *n. Mining.* A kind of nail, one or two inches long, of iron, brass, tin, or tinned iron, with an aperture at the head, used to mark stations in underground surveying.

‖**spa'das'sin'** (spä'dä'sĭn'; *Angl.* spăd'ä-sĭn), *n.* [F., fr. It. *spadaccino* swordsman.] A swordsman; duelist; bravo.

sparhauk. † SPARHAWK.

4. Operator of a wireless telegraph instrument, as on a ship. *Brit. Slang.*
5. *Elec.* A spark arrester.

spark frequency. *Radio.* The number of spark discharges per second. It is always a lower frequency than that of the radio current produced.

spark gap. *Elec.* **a** The space filled with air or other dielectric between high potential terminals (as of an electrostatic machine, induction coil, or condenser), through which the discharge passes; the air gap of a jump spark. **b** A device consisting of electrodes arranged to permit the passage of disruptive discharges and having insulation that is self-restoring after the discharge has passed; — called also *discharger*. Cf. SPHERE GAP, HORN GAP.

spark generator. A generator of alternating current which utilizes the discharge of a condenser through a spark gap as the source of its alternating-current power.

spark'i·ness (spär'kĭ·nĕs; -nĭs; 119), *n.* Quality or condition of sparkling, or of sending out sparks; brightness.

spark'ing, *pres. part. & verbal n.* of SPARK. Specif., *Dial. U. S.*, love-making; courtship.

sparking lamp. A small open oil lamp with floating wick; — so called because courters measured their stay by the duration of its light.

sparking plug. = SPARK PLUG.

sparking points. See IGNITER **a**.

spark instant. The instant at which the spark jumps the gap between the electric terminals in the cylinders of an internal-combustion engine, for the ignition of the combustible mixture.

spark'ish, *adj.* **1.** Like a spark, or beau; airy; gay.
2. Gaily dressed; showy; dapper.
— **spark'ish·ly,** *adv.* — **spark'ish·ness,** *n.*

spark knock. The sound produced in an internal-combustion engine by operation with the spark too far advanced.

spar'kle (spär'k'l), *n.* [Dim. of *spark*, or fr. *sparkle*, v.]
1. A little spark; a scintillation; also, quality of sparkling; as, the *sparkle* of a diamond.

— **spar'kling·ly,** *adv.* — **spar'kling·ness,** *n.*

sparkling plug. = SPARK PLUG.

sparkling synchysis. *Med.* A state in which the vitreous humor softens and contains sparkling scales of cholesterol.

sparkling water. Water charged with carbon dioxide.

spark'ly (spär'klĭ), *adv.* Scintillatingly; animatedly; sprightly.
— **spark'li·ness** (-klĭ·nĕs; -nĭs; 119), *n.*

spark micrometer. *Elec.* **a** An electric resonator or a conductor with an air gap adjustable by a micrometer screw. **b** A device for measuring the length of the electric spark by an air gap.

spark'-o'ver, *adj.* Of, pertaining to, or designating the passage of a spark over a gap.

Spark Micrometer b.

spark plug. In an internal-combustion engine, a part fitting into the cylinder head, carrying two electrodes separated by an air gap across which the current from the ignition system discharges, forming the spark for combustion.

A Typical Spark Plug; *B* Spark Plug for Aeronautical Engines. 1 Spark Gap; 2 Ground Electrode; 3 Center Electrode; 4 Steel Shell; 5 Copper Gaskets; 6 Steel Bushing; 7 Porcelain Insulator; 8 Brass Cap; 9 Center Electrode Terminal; 10 Mica Washers (stacked); 11 Mica Strips wound around center electrode; 12 Brass Bushing.

spark potential. *Elec.* The potential necessary to produce a spark.

sparks (spärks), *n.* A ship's wireless operator. *Slang.*

spark spectrum. See SPECTRUM, 2.

spark transmitter. *Radio.* A transmitting set using a spark generator. — **spark transmission.**

spark'y (spär'kĭ), *adj.;* SPARK'I·ER (-kĭ·ẽr); SPARK'I·EST. Characterized by, or emitting, sparks; marked by sparks; also, animated, lively; vivacious.

spark'y, *n.* = SPARK, a gallant. *Rare.*

spar'ling (spär'lĭng), *n.* [ME. *sperling*, fr. OF., *esperlinge, esperlenc* (F. *éperlan*), of Teut. origin; cf. MD. *spirling.*] The European smelt (*Osmerus eperlanus*).

spar'ling (spär'lĭng), *n.* A tern. *Local, Brit.*

sparling fowl. The common merganser. *Local, Eng.*

Spar·man'ni·a (spär·măn'ĭ ·ä), *n.* [NL., after A. *Sparmann* (1747–1820), Sw. naturalist.] *Bot.* A small genus of African shrubs or trees (family Tiliaceae), having cordate, more or less lobed leaves, and silky white flowers with imperfect outer stamens, succeeded by echinate capsules. *S. africana*, often cultivated, is the African hemp.

speak'er (spēk'ĕr), *n.* **1.** One who speaks; an utterer. Specif.: **a** One who utters or pronounces a discourse or address; usually, one who makes a public address, as, a good or bad *speaker.* **b** One who is the mouthpiece of others; esp., one who presides over a deliberative assembly, preserving order and regulating debate; a chairman; as a specific title [*cap.*], that of the presiding officer of various legislative bodies, usually the lower or popular house; as, the *Speaker* of the House of Commons, orig., the mouthpiece of the House to address the king; the *Speaker* of the House of Representatives. The Speaker of the British House of Commons is elected from the members by themselves, and ceases to be a party man, serving as a moderator, neutral in thought and act. His functions are now limited to the keeping of order and the regulation of debate under the rules, the casting of the deciding vote in case of an equal division, and speaking in general committee. A similar officer with the same title and similar functions presides over the lower house in the legislatures of the various British dominions and colonies. The Speaker of the Canadian Senate is appointed by the Governor General. The Speaker (the name is borrowed from English usage) of the American House of Representatives is elected also by the members, but is a strong party man chosen by the dominant party. He presides over sessions of the House and signs all acts, warrants, etc., issued by its authority; he makes rulings on points of order, recognizes members who may wish to speak, refers bills to committees, and, as a member, may speak and vote on all questions. Since 1911 standing committees have been elected by the House, and the Speaker cannot serve on the Committee on Rules. The lower houses of the State legislatures are presided over by Speakers elected by the members and having the power of appointing the committees on legislation. Cf. PROLOCUTOR **b**; see PRESIDENTIAL SUCCESSION, PRECEDENCE; also *Forms of Address,* in Appendix.

—, *Intransitive:* To pursue a special mode of action or development; as: **a** To concentrate one's efforts on a special subject, business, line of investigation, etc. **b** To go into detail; to enter into particulars. **c** *Biol.* To undergo specialization.
spe'cial·ized (-īzd), *adj.* **1.** Designed or fitted for use or employment in one special line, as of occupation, so that change to another involves a loss in utility, other things being equal.
2. *Biol.* Characterized by, or exhibiting, specialization.
specialized property. *Real Estate.* A building which can be used only for a single purpose, as a theater; — contrasted with buildings which with minor alterations can be used for a number of purposes, as retail or wholesale stores, or a loft building suitable for light manufacturing or storage.
spe'cial·iz'er (spĕsh'ăl·īz'ĕr), *n.* A specialist.
special jury. *Law.* At common law a jury composed of persons of higher rank than ordinary called to try causes of exceptional importance. Special juries were ordered by the court on motion of a party and the jurors were selected by striking names from a prepared list. In the United States there are often statutory provisions for such juries. Cf. STRUCK JURY.
special language. A language spoken under special circumstances or by a particular group in a speech community, as the language of law, or the more or less distinct language of women in various parts of the world.
special law. A private law.
special lease. *Law.* A lease for certain special purposes, which may, under certain conditions, be acquired under the provisions of sections 89, 90, & 92 of the Crown Lands Act of 1884. *Australia.*
special license. *Law.* A license granting exceptional privileges; specif., *Eng. Eccl. Law,* a license from the Archbishop of Canterbury to marry at any time or place.
special lien. A specific lien. See LIEN.
special orders. *Mil.* Routine orders, issued by an authorized military headquarters, which include matter concerning individuals or relating to the personnel of the army, but which are not usually of general or widespread interest.
special partner. See PARTNER, 5.
special partnership. See PARTNERSHIP, 3.
special plea. *Law.* See PLEA, 5 **c.**
special pleader. *Law.* Originally, a counsel who devoted himself to drawing special counts and pleas; hence, a lawyer whose occupation is to draw pleadings, give opinions on matters submitted to him, and prepare the papers in various proceedings out of the usual course. In Great Britain, he may or may not be admitted to the bar; if not he must (under 33 & 34 Vict. c. 97) take out an annual certificate.
special pleading. **a** *Law.* The allegation of special or new matter to avoid the effect of matter pleaded by the opposite side and admitted, as distinguished from a direct denial of the matter. **b** Popularly sophistical or misleading argumentation, esp. argument that presents one point or phase as if it covered the entire question at issue.
special plea in bar. *Law.* A plea in bar admitting the facts alleged but avoiding the action by setting forth particular and new matter; — distinguished from the general issue. See ISSUE, 11.
special power. *Law.* See POWER, *n.*, 12.
special privilege. Privilege (sense 1); also, a person or class enjoying power or advantages through wealth or social status; specif., the capitalist class.
special proceeding. A judicial proceeding other than an action; — used chiefly of such procedure under codes.
spe'cial-proc'ess pho·tog'ra·phy. *Motion Pictures.* The production of special photographic effects; specif.: **a** Trick work, showing ghosts, visions, etc. **b** Pictures which appear normal but may have been made as by inserting action into backgrounds.
special property *Law.* See PROPERTY, *n.*, 4.
special reserve. See MILITIA, 3.
special retainer. See 1st RETAINER, 1 **c.**
special rule. See RULE, *n.*, 13.
special school. A school for pupils who differ from the average so noticeably that they are not suited to ordinary schools; a school for children of retarded development.
special service school. *Mil.* In the United States Army, a unit in the system of military education at which officers and enlisted men of the interested branch receive instruction in methods of training, in professional and technical duties, and in the details of the tactics and technique of their arm. The *special service schools* were formerly (in peacetime): Infantry School, Fort Benning, Ga.; Tank School, Fort Meade, Md.; Field Artillery School, Fort Sill, Okla.; Coast Artillery School, Fort Monroe, Va.; Cavalry School, Fort Riley, Kans.; Air Corps Primary Flying School, Brooks Field, Tex.; Air Corps Advanced Flying School, Kelly Field, Tex.; Air Corps Balloon and Airship School, Scott Field, Ill.; Air Corps Tactical School, Langley Field, Va.; Air Corps Technical School, Chanute Field, Ill.; School of Aviation Medicine, Brooks Field, Tex.; Engineer School, Fort Humphreys, Va.; Signal School, Fort Monmouth, N. J.; Quartermaster Corps School, Philadelphia, Pa.; Quartermaster Corps Subsistence School, Chicago, Ill.; Quartermaster Corps Motor Transport School, Camp Holabird, Md.; Finance School, Washington, D.C.; Army Medical School, Army Dental School, and Army Veterinary School, Washington, D.C.; Medical Field Service School, Carlisle Barracks, Pa.; Ordnance School, Watertown Arsenal, Mass.; Ordnance Specialists' School, Raritan Arsenal, N. J.; Chemical Warfare School, Edgewood Arsenal, Md.; Chaplains' School, Fort Leavenworth, Kans.; and Army Music School, Washington, D. C.
special service tariff. *Railroads.* A tariff containing regulations and charges for certain kinds of special service, as storage and demurrage.
special session. An extraordinary session, as of a legislative body.
special sessions. See SESSION, *n.*, 8 **a.**
special settlement. *London Stock Exchange.* A settling of bargains, usually for new issues, at a time other than the regular fortnightly settlement.
special student. A school or college student not pursuing prescribed courses and not a candidate for a degree or diploma.
special term. *Law.* A term held by a single judge, or for a special purpose; — used in reference to courts composed of several judges, to describe the term at which one alone presides, whose judgment may thereafter be reviewed by all or others sitting together.
special theory of relativity. See RELATIVITY, *n.*, 3.
special traverse. See 2d TRAVERSE, 12.
special troops. See DIVISION, *n.*, 12 **a.**
special trust. An active trust.
spe'cial·ty (spĕsh'ăl·tĭ), *n.*; *pl.* -TIES (-tĭz). [OF. *especialté.* Cf. SPECIALITY.] **1.** A special feeling; esp., a fondness; a partiality. *Obs.*
2. State of being special; possession of peculiar or particular characteristics.
3. A particular, peculiar, or individual circumstance, detail, or characteristic, a distinctive, sometimes a restrictive, mark or quality; as, the *specialties* of one's lot in life.
4. Attentiveness to detail; circumstantiality; particularity, as in narration or description; — esp. in the phrase *in specialty.* *Obs.*
5. An object or class of objects distinguished by some special characteristic, individual quality, or the like; esp., a product, usually manufactured, of a special kind, made under a special patent, serving one special purpose, etc.; as, a manufacturer of, or dealer in, *specialties;* also, an article to which special attention is devoted; as, athletic goods are a *specialty* in this store.
6. That in which one specializes or has special knowledge; a branch of knowledge, art, science, or business, to which one especially devotes himself; as, to make a *specialty* of philology; retailing is his *specialty.*
7. A contract or obligation under seal; a contract by deed.
8. *Stock Exch.* A security having some unusual character such as to make it comparatively free from the influence of general market conditions. *Cant, U. S.*
specialty contract. See CONTRACT.
special verdict. See VERDICT, *n.*, 1.
special vert. See 1st VERT, 1 **b.**
special warranty. See WARRANTY, 1.
spe'ci·a'tion (spē'shĭ·ā'shŭn), *n.* [See SPECIES; -ATION.] *Biol.* The evolutionary process by which species are formed; the process by which variations become fixed.
‖**spe'ci·e** (spē'shĭ·ē; -shē), *abl.* of L. *species* sort, kind. Used in the phrase *in specie,* as: **a** In sort, in kind; in (its own or a specified) form. "A return in *specie.*" *Dryden.* **b** In coin. **c** *Obs.* In like manner.
spe'cie (spē'shĭ), *n.* Coin, usually of gold or silver; hard money. — *adj.* Consisting of coin; as, *specie* payments.
spe'cie (spē'shĭ), *n.* = SPECIES. *Now Rare.*
specie-. = SPECIO-.
Spe'cie Cir'cu·lar (spē'shĭ). *U. S. Hist.* A circular caused to be issued by President Jackson in July, 1836, ordering the agents of the government to receive only gold or silver in payment for public lands.
spe'cie pay'ment (spē'shĭ). Payment in specie, or coin, esp. in the redemption of paper money at its face value.
specie point. = GOLD POINT.
spe'cies (spē'shĭz *or, esp. in the pl.,* spē'shēz; *L.* spē'shĭ·ēz, *as in the phrases below*), *n. sing. & pl.* [L., a sight, outward appearance, shape, form, a particular sort, kind, or quality, a species. See SPICE; cf. SPECIE, SPECIAL.] **1.** A mental image, phantasm, or sensuous presentation; an idea or object of thought considered as the similitude of an object in nature, whether in the guise of a modification of sense or of a purely intellectual correlative of the natural object; in loose usage, form; aspect; appearance. Scholastic epistemology, as developed by Thomas Aquinas, is a doctrine of intentional species. According to this view, the *species* is first the ‖***spe'ci·es sen·si'bi·lis*** [spē'shĭ·ēz sĕn·sĭb'ĭ·lĭs] (*sensible species*) operating in sense knowledge. It originates as sense action (conceived as physical motion and psychical affection), in which form it is called the ‖***spe'ci·es im·prĕs'sa*** [ĭm·prĕs'ä] (*impressed species*), while the translation of this activity or affection by the mind, that is the sensuous construction or representation, is termed the ‖***spe'ci·es ex·pres'sa*** (*expressed species*). But the sensible species ends in sense knowledge; intellectual cognition is obtained only through the ‖***spe'ci·es in·tel'li·gi'bi·lis*** [ĭn·tĕl'ĭ·jĭb'ĭ·lĭs] (*intelligible species*). In so far as this is conceived as an affection of the active intellect abstracting the intelligible element of the sensible species, it is termed the ‖***spe'ci·es in·tel'li·gi'bi·lis im·pres'sa,*** while the product or mental translation of the process is the true image or conception of the original object, and is termed the ‖***spe'ci·es in·tel'li·gi'bi·lis ex·pres'sa.*** Thus the processes leading to sense knowledge and to intellectual knowledge precisely correspond. Many writers, however, have used *species* as equivalent to effluvium or to phantasm.

The *species* of the letters illuminated with indigo and violet. *Sir I. Newton.*

Wit . . . searches over all the memory for the *species* or ideas of those things which it designs to represent. *Dryden.*

2. Specif., *R.C.Ch.,* the appearance of bread or of wine which the respective transubstantiated Eucharistic elements have; hence, the consecrated elements so appearing.
3. *Obs.* **a** A public spectacle or exhibition. *Bacon.* **b** Reflected image; reflection. **c** An illusory image; a phantom.
4. The essential quality of a thing; characteristic. *Obs.*
5. A sort; distinct class; particular kind; variety; as, a *species* of low cunning.
6. Mankind; humanity; the human race; as, the progress of the *species* in the arts and sciences.
7. Money of silver, gold, or other metal; specie. *Obs.*
8. *Biol.* A category of classification lower than a genus or subgenus and above a subspecies or variety; a group of animals or plants which possess in common one or more characters distinguishing them from other similar groups, and do or may interbreed and reproduce their characters in their offspring, exhibiting between each other only minor differences bridged over by intermediate forms (see SUBSPECIES) and differences ascribable to age, sex, polymorphism, individual peculiarity or accident, or to selective breeding by man; a distinct kind or sort of animal or plant. Until the acceptance of the theory of evolution a species was regarded as being the offspring of a single specially created ancestor or pair; hence, each species was considered definitely separated from other species, and usually as unchanging from one generation to another. Individuals intergrading between two supposedly distinct species were commonly considered as hybrids or as abnormal individuals whose peculiarities approached the normal characters of the other species. The theory of evolution, however, involves the conception that species are not unchanging, but that they have developed and are developing from preexisting and different species, also that this process is in many cases still going on. With the abandonment of the doctrine of separate creation of species, the term *species* loses much of its theoretical importance. In the case of closely allied groups, the prevailing practice is to recognize those as distinct species whose members are not known to, or are assumed not to, intergrade with some other species, even if the characters distinguishing them be very slight. Groups which intergrade are regarded as only subspecies. Cf. EVOLUTION, 4 **b;** MUTATION, 3; SUBSPECIES; NOMENCLATURE, 3; CLASSIFICATION, 3.

The *species* is the union of individuals descending one from the other or from common parents, and of those who resemble them as much as they resemble each other. *Cuvier.*

A *species* is the smallest group to which distinctive and invariable characters can be assigned. *Huxley.*

A *species* is the abstract central point around which a group of variations oscillate. *Encyc. Brit.*

A coherent group of interbreeding individuals is the unit of evolutionary biology to which the term *species* finds its most proper application. *O. F. Cook.*

9. *Logic.* A class of individuals having common attributes and designated by a common name; specif., a logical division of a genus or more comprehensive class; a subclass designated by adding to the name or connotation of a genus some qualification, called the "specific difference," which limits its application to a restricted group.

Every class which is a real kind, that is, which is distinguished from all other classes by an indeterminate multitude of properties not derivable from one another, is either a genus or a *species.* *J. S. Mill.*

10. *Pharm.* **a** A component part of a compound medicine; a simple. **b** A mixture of chopped or coarsely powdered vegetable drugs, esp. one to prepare an aromatic tea or tisane; as, a pectoral *species;* an emollient *species.*
‖**Spe'ci·es Plan·ta'rum.** A work by Carolus Linnaeus, published 1753, upon which the binomial system of botanical nomenclature is founded. See AMERICAN CODE; INTERNATIONAL CODE OF BOTANICAL NOMENCLATURE; NOMENCLATURE.
spec'i·fi'a·ble (spĕs'ĭ·fī'ä·b'l), *adj.* Capable of being specified.
spe·cif'ic (spĭ·sĭf'ĭk), *adj.* [ML. *specificus,* fr. L. *species* a particular sort or kind; cf. F. *spécifique.* See SPECIES; -FIC.] **1.** Of, pertaining to, characterizing, or constituting, a species; possessing the peculiar property or properties of a thing which constitute its species; as, the *specific* form of an animal or a plant; the *specific* qualities of a drug; the *specific* distinction between virtue and vice.
2. Precisely formulated or restricted; specifying; definite, or making definite; explicit; of an exact or particular nature; as, a *specific* statement.
3. Restricted by nature to a special person, thing, time, etc.; peculiar; as, vices *specific* to a certain century. *Rare.*

4. *Med.* **a** Exerting a peculiar influence over any part of the body; preventing or curing disease by a peculiar adaptation; as, quinine is a *specific* medicine in malaria. **b** Due to a particular microorganism or virus; — of a disease.
5. *Physics.* Designating any of various arbitrary physical constants, as the ratio of the amount of a physical quantity of a substance to that of the same volume of a standard substance, or the amount of a physical quantity possessed by unit volume (usually a cubic centimeter) of a substance. It is often used to designate a quantity per unit area; as, *specific* luminous intensity (luminous intensity per unit area of source); *specific* irradiation.
Syn. — See SPECIAL, EXPLICIT.
Ant. — Indefinite, unrestricted, vague, general.

spe·cif'ic (spē·sĭf'ĭk), *n.* **1.** Anything peculiarly adapted to its purpose.
2. A specific or characteristic quality, trait, mark, or the like; a particular feature; also, collectively, particulars; precise details or distinctions; as, music frees us from the *specific* and stirs the unconscious depths of our being.
3. *Biol.* An infectious principle; a virus.
4. *Med.* A specific remedy. See SPECIFIC, *adj.*, **4 a.**

specific absorptive index. Absorbency per unit thickness of layer and concentration of solution.

spe·cif'i·cal (spē·sĭf'ĭ·kăl), *adj.* Specific. — **spe·cif'i·cal·i·ty** (-kăl'ĭ·tĭ), *n.*

spe·cif'i·cal·ly, *adv.* **a** From the aspect of species; in relation to or with reference to species. **b** With exactness and precision; in a definite manner.

spe·cif'i·cate (-kāt), *v. t.* [See SPECIFY.] To specify. — *n.* A specified object, or statement. *Rare.*

spec'i·fi·ca'tion (spĕs'ĭ·fĭ·kā'shŭn), *n.* [F. or L.; F. *spécification*, fr. ML. *specificatio.*] **1.** Act of specifying or determining by a mark or limit; notation of limits.
This *specification* or limitation of the question hinders the disputers from wandering. *I. Watts.*
2. Act or process of making or becoming specific (sense 1); state of being specific or related to a species; also, specific character or quality.
3. The designation of particulars; particular mention; as, the *specification* of a charge against an officer; esp., a written statement containing a minute description or enumeration of particulars, as of charges against a public officer or of the terms of a contract; also, a single article, item, or particular, or an allegation of a specific act.
4. Usually *pl.* *Arch. & Engin.* A written or printed description of work to be done, forming part of the contract and describing qualities of material and mode of construction, and also giving dimension and other information not shown in the drawings.
5. *Patent Law.* A written description of the invention or discovery and of the manner and process of making, constructing, compounding, and using the same, concluding with a specific and distinct claim or claims of the part, improvement, or combination which the applicant regards as his discovery or invention, this latter part being often called the *claim.* When the term *specification* is used alone, it includes the claim.
6. *Rom. & Civil Law.* The working up of material so that it becomes of a different character, as where one person so treats material belonging to another; acquisition of property by so changing its character. In general when any part of the new product belonged to the workman the product belonged to him; where he had supplied no material the product belonged to him unless it could be reduced to its original form. In any case the owner had to be compensated for his material or the workman for his work, as the case might be. Cf. ACCESSION, 6 **a.**

spe·cif'i·ca'tive (spē·sĭf'ĭ·kā'tĭv), *adj.* Tending or serving to specify. — **spe·cif'i·ca'tive·ly,** *adv.*

specific brightness. In the Hering theory of color, the degree of brightness inherent in a given color apart from any admixture of white or black.

specific capacity. The amount of water furnished under a standard unit head, or the amount of water furnished under unit lowering of the surface of the water in a well by pumping.

specific character. *Biol.* A character distinguishing one species from another or from every other species of the same genus.

specific color. A color having hue and saturation. See COLOR, *n.*, 2.

specific conductivity. *Elec.* The reciprocal of specific resistance. See RESISTIVITY, 4.

specific consumption. *Elec. Eng.* The watt consumption of an electric lamp per lumen or per mean horizontal candle power.

specific cost. See COST, *n.*, 6.

specific curvature. *Math.* = MEASURE OF CURVATURE **b.**

specific deposit. *Banking.* A deposit made for a specified purpose, as to pay a note or mortgage.

specific difference. See DIFFERENTIA.

specific disease. *Med.* **a** A disease producing a determinate definite effect on the blood and tissues or on some special tissue. **b** A disease uniformly due to a definite and peculiar poison or organism; often applied specif. to syphilis.

specific duty. *Econ.* A duty of a certain sum assessed on an article of a given kind, or on a given quantity of an article, without reference to its value or market price.

specific energy. *Physiol.* The specific character of a response, as dependent upon the responding organ rather than upon the nature of the stimulus received. The concept was introduced by J. Müller to account for the fact that any sort of stimulus, as mechanical or electrical, applied to the optic nerve, gives rise to sensations of light, and for similar facts in the other senses. The specificity is now believed to inhere, not in the sensory nerves, but in the cerebral mechanisms with which they are connected, just as, in the case of the motor nerves, it inheres in the motor organs innervated.

specific form. = PRINCIPAL FORM.

specific gravity. The ratio of the weight of any volume of a substance to the weight of an equal volume of some other substance taken as the standard or unit, the measurements being made at the same temperature or, as is sometimes the case, at stated temperatures; relative density. The standard is usually water for solids and liquids, and air or hydrogen for gases. Thus, 19, the *specific gravity* of gold, expresses the fact that, bulk for bulk, gold is nineteen times as heavy as water. In the case of gases usually the weights of equal volumes at 0° and 760 mm. are compared. Solids and liquids are usually compared with water of the same temperature or with water of maximum density (at 4° C.). The ***absolute specific gravity*** of solids and liquids is the ratio of the weight, referred to a vacuum, of a given volume of the material at a stated temperature to the weight, referred to a vacuum, of an equal volume of gas-free distilled water at a stated temperature. The ***apparent specific gravity*** of solids is the ratio of the weight in air of a given volume of the impermeable portion of a permeable material (that is, the solid matter including its impermeable pores or voids) at a stated temperature to the weight in air of an equal volume of distilled water at a stated temperature. The ***bulk specific gravity*** of solids is the ratio of the weight in air of a given volume of a permeable material (including both permeable and impermeable voids normal to the material) at a stated temperature to the weight in air of an equal volume of distilled water at a stated temperature.

spe·ci'fic·grav'i·ty bal'ance. A balance to determine the specific gravity of liquids or solids, by the use of the Archimedean principle

specific-gravity bottle. See PYCNOMETER.

specific-gravity bulbs. Marked hollow bulbs of glass, of different specific gravities, arranged in a series to determine the specific gravity of liquids.

specific heat. *Physics.* The ratio of the quantity of heat required to raise the temperature of a body one degree to that required to raise an equal mass of water one degree. Also, the heat in calories required to raise the temperature of one gram of a substance one degree centigrade. Since the thermal capacity of water is not the same at all temperatures, the latter of these two definitions is to be preferred, because it expresses the thermal capacity of the substance per unit mass in terms definitely related to units of energy. Specific heat of a gas at constant pressure is equal to the specific heat at constant volume plus the work done in the former case by the expanding gas.

specific illumination. See ILLUMINATION.

specific inductive capacity. *Elec.* The ratio of the dielectric constant of a dielectric to that of some standard medium, as a vacuum. It is numerically equal, when C. G. S. electrostatic units are used, to the dielectric constant.

specific irradiation. See IRRADIATION, *n.*, 9.

spec'i·fic'i·ty (spĕs'ĭ·fĭs'ĭ·tĭ), *n.* **1.** State or quality of being specific.
2. *Biol.* The condition of being specific or peculiar to a particular individual or group of organisms.

spe·cif'i·cize (spē·sĭf'ĭ·sīz), *v. t.* To render specific.

specific legacy. *Law.* A bequest of a particular thing or part out of the testator's estate, as of a specified animal or piece of furniture.

specific lien. See LIEN.

specific luminous intensity. Luminous intensity (candle power) per unit area of source. Its unit is the candle per unit area.

spe·cif'ic·ly (spē·sĭf'ĭk·lĭ), *adv.* In a specific manner; precisely; exactly; statedly.

specific magnetic rotation. See MAGNETIC ROTATION.

specific name. See NOMENCLATURE, 3.

specific performance. *Law.* The performance of a contract according to its terms, or substantially so; — used chiefly with reference to such performance as decreed by a court of equity, where the common-law remedy of damages would be substantially inadequate and the specific performance not unjust to the defendant. Also, a decree ordering specific performance.

specific policy. See POLICY.

specific radiant intensity. = RADIANCE, 3.

specific rate. See RATE, 11.

specific refraction. = SPECIFIC REFRACTIVE POWER.

specific refractive power. A value which takes into account the relation between the refractive index (n) of a substance and its density (d), as expressed either by the empirical formula $\frac{n-1}{d}$ or by the theoretically derived formula $\frac{n^2-1}{(n^2+2)d}$; — called also *constant of refraction.*

specific refractivity. See REFRACTIVITY.

specific reluctance. *Elec.* The reluctance of a centimeter cube of a substance; reluctivity.

specific resistance. *Elec.* = RESISTIVITY, 4.

specific rotation *or* **rotatory power.** The optical rotation or power to turn the plane of polarization of light exhibited by a substance, as expressed by the formula $\frac{100a}{lpd}$, where a is the observed angle of rotation, l the length through which the light passes, p the per cent by weight of the substance present, and d the density of the substance or solution.

specific security. See SECURITY, 4.

specific speed. = CHARACTERISTIC SPEED.

specific stain. *Microscopy.* A pigment, used in histology and microchemistry, having a peculiar affinity for certain structural elements or chemical compounds.

specific surface. *Physical Chem.* The ratio of the total surface of an adsorbent to its volume.

specific volume. *Physics & Chem.* The reciprocal of the specific gravity. It is equal (when the specific gravity is referred to water at 4° C. as a standard) to the number of cubic centimeters occupied by one gram of a substance.

spec'i·fi'er (spĕs'ĭ·fī'ĕr), *n.* One who specifies, or gives the details or particulars; esp., one who draws up specifications, as for obtaining a patent.

spec'i·fist (spĕs'ĭ·fĭst), *n.* One who specifies; one who states matters in detail.

spec'i·fy (spĕs'ĭ·fī), *v.*; SPEC'I·FIED (-fīd); SPEC'I·FY'ING (-fī'ĭng). [OF. *specifier*, fr. ML. *specificare.* See SPECIES; -FY.] *Transitive:* **1.** To mention or name in a specific or explicit manner; to tell or state precisely or in detail; as, to *specify* the uses of a plant; to *specify* articles.
2. Specif., to include as an item in a specification; as, to *specify* Portland cement; also, *Rare,* to draw specifications of.
3. To render specific. *Rare.*
—, *Intransitive:* To speak precisely or in detail; to give full particulars.

spec'i·men (spĕs'ĭ·mĕn), *n.* [L., fr. *specere* to look, to behold. See SPY.] **1.** A part of anything, or one of a number of things, intended to show the kind and quality of the whole; a sample; as, a *specimen* of one's handwriting.
2. Specif., such a part of anything, or unit from a number of things, as of rocks, or plant or animal life, selected for study to determine the characteristics of its class or kind.
3. An individual; person; as, a tough *specimen.* *Colloq. or Slang.*
4. *Print.* **a** A printed sheet showing different styles and sizes of type. **b** A sample copy of a printed work of any kind; specif., a condensed sample containing enough of the typography, illustrations, maps, binding, etc., to give an adequate idea of the complete work.
Syn. — Model, pattern. See EXAMPLE.

spec'i·men·ize (-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'ĭng). To study or classify as a specimen; to collect or exhibit for examination and study.

specimen plant. *Hort.* A plant grown for exhibition or in the open to display its full development, as distinguished from one in a border or other planting.

specio-. A combining form for *species,* as in **spe'ci·ol'o·gy.** See -LOGY.

spe'ci·os'i·ty (spē'shĭ·ŏs'ĭ·tĭ), *n.*; *pl.* -ITIES (-tĭz). [LL. *speciositas.*] **1.** Quality or state of being specious.
2. That which is pleasing or specious in form or look.

spe'cious (spē'shŭs), *adj.* [L. *speciosus* good-looking, beautiful, specious, fr. *species* look, show, appearance; cf. F. *spécieux.* See SPECIES.] **1.** Presenting a pleasing appearance; pleasing in form or look; showy. *Obs.*
[Serpents] *specious* and beautiful to the eye. *Bp. Richardson.*
2. Superficially beautiful or attractive, but not so in reality; deceptively beautiful.
3. Apparently right; superficially fair, just, or correct, but not so in reality; appearing well at first view; plausible; as, *specious* reasoning; a *specious* claim.
4. Existing to our senses; actually known or experienced. *Rare.*
Syn. — SPECIOUS, PLAUSIBLE, COLORABLE, OSTENSIBLE. SPECIOUS implies a fair appearance assumed with intent to deceive; that is PLAUSIBLE which is superficially reasonable or pleasing, with or without deceit; *specious* emphasizes purpose, *plausible* emphasizes effect; as, "All was colored with a smooth pretense of *specious* love and duty" (*Dryden*); "the flaw to which Berkeley's paradox owed its *plausibility*" (*Stewart*); "He bids them . . . to listen . . . neither to this *specious* persuasion nor to that *plausible* argument" (*Paley*); "furnishing the world with a *plausible* excuse to worry each other, while they sanctified the worse cause with the *specious* pretext of zeal for the furtherance of the best" (*Cowper*). That is COLORABLE for which some justification may be alleged; as, "They gathered together many of her maladministrations, for which they might the more *colorably* put her out of office" (*Burnet*); a *colorable* pretext. That is OSTENSIBLE (frequently opposed to *real, actual*) which is avowed or apparent; the word often implies pretense; as, his *ostensible* motive, errand.
Ant. — Downright, forthright, honest.
— **spe'cious·ly,** *adv.* — **spe'cious·ness,** *n.*

specious present. *Psychol.* The time span of immediate consciousness; that interval within which what is earlier may be distinguished from what is later, though both are directly present to consciousness.

speck (spĕk), *n.* [ME. *spekke,* fr. AS. *specca;* cf. LG. *spaak,* D. *spikkel.* Cf. SPECKLE.] **1.** A small discoloration in or on anything; a spot; stain; as, a *speck* on paper or cloth.
2. A small discoloration revealing decay, as in fruit; a blemish; hence, a fruit, as an orange, having a speck.
3. A small piece or object; a bit; a particle; a mite; as, *specks* of dust; he has not a *speck* of money.
4. A small sand darter (*Ulocentra stigmaea*) common in the southeastern United States.
5. *Plant Pathol.* Any disease of rice characterized by shriveled or specked grains, caused by bacteria or saprophytic fungi.

-speck (-spĕk). A combining form of the noun *speck,* as in *fly speck.*

speck, *v. t.*; SPECKED (spĕkt); SPECK'ING. To produce specks on or in, esp. specks regarded as blemishes; to spot; speckle. "Purple, azure, or *specked* with gold." *Milton.*

speck, *n.* [ME. *spekke;* akin to SPICK blubber.] A strip of undressed hide; a paring or piece of leather; a patch of leather or cloth; the sole of a shoe. *Obs. exc. Dial. Eng.*

speck, *v. i.* To prospect for gold. *Slang.*

speck (spĕk), *n.* [From D. *spek* & G. *speck.* See SPICK.] **a** Fat meat; also bacon. *Local, U. S.* **b** (1) *Whaling.* The blubber of whales or other marine mammals. (2) *Africa.* The fat of the hippopotamus.

specked (spĕkt), *adj.* Spotted; speckled. — **speck'ed·ness** (spĕk'ĕd·nĕs; -ĭd·nĭs; 119), *n.*

speck'fall' (spĕk'fôl'), *n.* *Whaling.* A fall rove through a block (**speck block**) for hoisting blubber and bone.

speck'ing, *n.* Searching for gold on the surface of rich alluvial deposits. *Australia.*

speck'le (spĕk'l), *n.* [Cf. MD. *speckel,* and E. SPECK spot.] **1.** A little speck or spot in or on anything.
2. Hence, a color or kind; a sort. *Scot.*
☞ COMBINATIONS (all adjectives) are:

speckle-backed	**speckle-breasted**	**speckle-marked**
speckle-bellied	**speckle-coated**	**speckle-skinned**
speckle-billed	**speckle-faced**	**speckle-starred**

speck'le, *v. t.*; SPECK'LED (-'ld); SPECK'LING (-lĭng). To mark with small spots or specks; to speck; spot.
Six-room cottages would swiftly *speckle* the open green spaces. *Tarkington.*

speck'le-bel'ly (-bĕl'ĭ), *n.*; *pl.* -BELLIES (-īz). **a** White-fronted goose. **b** Gadwall duck. *Both Local, U. S.*

speck'le-breast' (-brĕst'), *n.* Also **speck'le-brea·st'ed brant** *or* **goose** (-brĕs'tĕd; -tĭd; 119). The white-fronted goose. *Local, U. S.*

speck'led al'der (spĕk''ld). The hoary alder.

speckled bass. The calico bass. *Local, U. S.*

spec'kled·bill' (-bĭl'), *n.* Surf scoter. *Local, U. S.*

speckled brant. The white-fronted goose. *Local, U. S.*

speckled hen. The smallmouthed black bass. See BLACK BASS, 1.

speckled hind. A large grouper (*Epinephelus drummondhayi*), a common food fish on the Florida coast. It is umber brown densely covered with small pearly-white or bluish dots.

speckled Indian. = 2d PINTO, 2.

speckled loon. The black-throated loon. See LOON. *Local, Brit.*

speckled moray. = 2d HAMLET **b.**

speckled perch. The crappie. *Local, U. S.*

speckled trout. **a** The common American brook trout. **b** The rainbow trout. Also applied to other trout of the western United States.

speckled turtle *or* **tortoise.** The spotted turtle.

speckled wood. **a** = LEOPARDWOOD **a.** **b** Palmyra wood cut transversely, giving a mottled effect.

speck'led·y (spĕk''l·dĭ), *adj.* Marked with spots, or speckles; spotted.

speck'le·head' (spĕk''l·hĕd'), *n.* The baldpate. *Local, U.S.*

speckle loon. = SPECKLED LOON.

speckle perch. = SPECKLED PERCH.

speck'less, *adj.* Spotless; clean. — **speck'less·ly,** *adv.* — **speck'less·ness,** *n.*

speckle trout. = SPECKLED TROUT.

speck'ling (spĕk'lĭng), *n.* Speckled marking.

speck'ly (-lĭ), *adj.* Marked with speckles; speckled.

speck'sion·eer' (spĕk'shŭn·ēr'), *n.* *Whaling.* An inspectioneer.

speck'y (spĕk'ĭ), *adj.*; SPECK'I·ER (-ĭ·ĕr); SPECK'I·EST. Marked with specks or spots; spotted.

spe·cif'i·cal·ness, *n.* See -NESS.
spe·cif'ic·ness, *n.* See -NESS.
spec·il'lum (spĕ·sĭl'ŭm), *n.* [L.] = STYLET, 3 **a.**
speck'eld·y. Var. of SPECKLEDY.
speck'i·ness, *n.* See -NESS.
speck'l. Speckle. *Ref. Sp.*
speck'ld. Speckled. *Ref. Sp.*
speck'led·ness, *n.* See -NESS.
speck'proof' (66), *adj.* See -PROOF.
specks. Short for *spectacles. Colloq.*

spec'ta·cle (spĕk'tȧ·k'l; -tĭ·k'l), *n.* [OF., fr. L. *spectaculum*, fr. *spectare* to look at, to behold, v. intens. fr. *specere*. See SPY.] **1.** Something exhibited to view; usually, something exhibited as unusual and notable; a remarkable or noteworthy sight; impressive display, esp. for entertainment.
To add *spectacle* and music to action. *Cibber.*
2. Specif., a public display appealing, or intended to appeal, to the eye by its mass, proportions, color, etc.; as, a great dramatic *spectacle*; a naval *spectacle*.
3. *Obs.* **a** A spyglass; a glass for seeing; also, a mirror. *Chaucer.* **b** A pattern; example; model.
4. *pl.* A device to aid vision or protect the eyes from glare, dust, etc., consisting usually of two lenses supported by a bridge resting on, or fastened to, the nose, and by curved sidepieces (bows) passing over the ears. Cf. EYEGLASS, 1.
5. *pl.* Hence, figuratively, an aid to the intellectual sight; also, sometimes, a bias; a view colored by prejudice; as, to see events through rosy *spectacles*.
6. *sing. or pl.* Any of various things suggesting a pair of spectacles in shape, as the frame containing the red and green glasses in a semaphore (see SEMAPHORE, *Illust.*).
7. *pl. Naut.* A spectacle iron.
Syn. — Show, sight, exhibition, representation, pageant.
spec'ta·cle, *v. t.* To look at or examine through spectacles.
spectacle coot. Surf scoter. *U. S.*
spec'ta·cled (spĕk'tȧ·k'ld; -tĭ·k'ld), *adj.* **1.** Having or wearing spectacles.
2. *Paleog.* Suggesting spectacles; — applied to the first form of Glagolitic, characterized by a tendency to round loops.
3. *Zool.* Having on the face color markings, or patches of naked skin, suggesting a pair of spectacles.
spectacled bear. A bear (*Tremarctos ornatus*) of the Andes Mountains.
spectacled cobra. Cobra de capello.
spectacled coot *or* **duck.** The surf scoter. *U. S.*
spectacled eider. See EIDER, 1.
spectacled goose. The common gannet. *Eng.*
spectacled pelican. See PELICAN, 1 **a**.
spectacle frame. *Shipbuilding.* In twin-screw vessels having the stern bossed out to surround both shafts, a frame at or near the sternposts through which both shafts pass.
spectacle furnace. A German shaft furnace with two tapholes.
spectacle iron. *Naut.* An iron clew. See CLEW, *n.*, 4 **b**.
spec'ta·cles (spĕk'tȧ·k'lz; -tĭ·k'lz), *n. pl.* = SPECTACLE, *n.*, 4.
spectacle stone. *Archaeol.* Any of the ancient monumental stones of Scotland ornamented with connected or overlapping disks, or rude spirals, probably of Celtic origin.
spec·tac'u·lar (spĕk·tăk'ū·lĕr), *adj.* **1.** Of, pertaining to, or of the nature of, a spectacle or show; adapted or intended to excite wonder and admiration by unusual display, as of pomp or scenic effects; as, a *spectacular* play.
2. Pertaining to spectacles for the eyes. *Rare.*
—spec·tac'u·lar'i·ty (-lăr'ĭ·tĭ), *n.*— **spec·tac'u·lar·ly,** *adv.*
spec·tac'u·lar, *n.* That which appeals to the eye as a spectacle; an unusual display, as of pomp or scenery; an action or a sight of a sensational nature; as, he was ever a lover of the *spectacular*.
spec·tac'u·lar·ism (spĕk·tăk'ū·lĕr·ĭz'm), *n.* Quality or state of being spectacular; spectacularity.
spec·ta'tor (spĕk·tā'tĕr; spĕk'tā·tĕr), *n.* [L.; cf. F. *spectateur*. See SPECTACLE.] One who looks on or beholds; a beholder; esp., one witnessing any exhibition, as a play; — often [*cap.*] used in titles of periodicals.
Syn. — Observer, witness. See LOOKER-ON.
Spec·ta'tor, The. A periodical, composed chiefly of short essays, published daily by Steele and Addison from March 1, 1711, till Dec. 6, 1712, and revived briefly in 1714. Its chief imaginary author was ***Mr. Spectator***. See SIR ROGER DE COVERLEY.
Spectator Club. The imaginary club which professed to edit *The Spectator*. The members are Mr. Spectator, Sir Roger de Coverley, a member of the Inner Temple, Sir Andrew Freeport, Captain Sentry, Will Honeycomb, and a clergyman, "a very philosophic man, of general learning, great sanctity of life, and the most exact good breeding."
spec'ta·to'ri·al (spĕk'tȧ·tō'rĭ·ăl; 181), *adj.* Of or pertaining to a spectator, esp. to *The Spectator*; also, having to do with a spectacle, or showy display.
spec·ta'to·ry (spĕk·tā'tō·rĭ), *n.* A part of a building set apart for spectators; also, a body of spectators.
spec·ta'tress (spĕk·tā'trĕs; -trĭs; 119), *n.* Also **spec·ta'trix** (-trĭks). [L. *spectatrix*.] A female spectator.
spec'ter, **spec'tre** (spĕk'tĕr), *n.* [F. *spectre*, fr. L. *spectrum* an appearance, image, specter, fr. *specere* to look. See SPY; cf. SPECTRUM.] **1.** A visible disembodied spirit; an apparition; ghost; phantom. *Dryden.*
2. Hence, a vision of the imagination suggesting a ghost, esp. as inspiring fear; a phantasm.
3. a A walking stick (insect). **b** A specter crab or specter shrimp.
Syn. — See GHOST.
☞ COMBINATIONS (all adjectives) are:

specter-fighting	specter-looking	specter-staring
specter-haunted	specter-mongering	specter-thin
specterlike	specter-pallid	specter-wan

specter bat. Any phyllostome bat; esp., *Vampyrum spectrum*. See VAMPIRE.
specter candle. A belemnite.
specter crab. A glass crab.
spec'tered, **spec'tred** (spĕk'tĕrd), *adj.* Peopled with specters. *Rare.*
specter lemur. The tarsier.
specter of the Brocken. = BROCKEN SPECTER.
specter shrimp. A skeleton shrimp.
spec'tral (spĕk'trăl), *adj.* **1.** Of, like, or pertaining to, a specter; ghostly; insubstantial; phantom. "The *spectral* form of evil." *F. W. Robertson.*
2. Of or pertaining to a spectrum; made by the spectrum; as, *spectral* analysis.
—spec·tral'i·ty (spĕk·trăl'ĭ·tĭ), **spec'tral·ness,** *n.*— **spec'tral·ly,** *adv.*
spectral bat. A specter bat.
spectral centroid. *Colorimetry.* The wave length of the center of gravity of the area under the luminosity curve. Mathematically, it is the integral of the product of energy by visibility by wave length divided by the integral of the product of energy by visibility.
spectral color. A color of spectral hue; a color which can be matched by one evoked by a mixture of homogeneous spectral light and neutral light. Cf. COLOR, *n.*, 2.
spectral distribution. *Colorimetry.* A function expressing, analytically or graphically, the relation between radiant energy (or light, etc.) and wave length or frequency.

spec'tral·ism (spĕk'trăl·ĭz'm), *n.* A ghostly sight; a phantasm. *Rare.*
spectral lemur. The tarsier.
spectral owl. The great gray owl. See GRAY OWL.
spectral series. *Physics.* A group of lines in the spectrum of a substance whose wave lengths (or frequencies) are related mathematically. The spectrum of any element may contain a number of series, all the lines of any one series having the same general physical properties. Thus, the spectrum of an alkali, as sodium, contains a principal, first subordinate, and second subordinate series. The principal series contains the prominent lines, mostly in the visible spectrum; the first subordinate series contains diffused lines; the second subordinate series contains the sharp lines. Cf. BALMER'S FORMULA.
spectral shift. See RED SHIFT.
spectral type. *Astrophysics.* A type of star determined by the similarities of the spectra of its members. Older spectral classifications, such as Lockyer's, which divided stars into those of rising and those of falling temperature, and Secchi's, which classified them roughly, according to the predominant color of their spectra, as blue, white, yellow, and red stars, have been superseded by the more accurate system developed at Harvard University since 1885. The Harvard classification, based on variations in the relative intensity of certain selected lines of the spectra, designates the various spectral types by the letters O, B, A, F, G, K, M, R, N, most stars falling in one of the types given in the table below. Within each type, the stars are graded by adding numbers decimally; — thus, the sun is spectral type G0. The spectrum of giant stars is designated by prefixing "g" to the type letter; of dwarfs, by prefixing "d"; of supergiants, by prefixing "c"; — thus, Arcturus is type gK0; Procyon, type dF5. Cf. 1st STAR, 1; DRAPER CATALOGUE.

TABLE OF COMMONEST SPECTRAL TYPES

Type	Temperature	Color	Spectrum	Average Radial Velocity
B	16,000° C.	Blue	H and He	6 miles per second
A	11,000° C.	White	Hydrogen	6 " " "
F	8,000° C.	Pale yellow	Metals	8 " " "
G	6,000° C.	Yellow	Metals	9 " " "
K	3,500° C.	Reddish	Metals & compounds	9 " " "
M	2,700° C.	Red	Bands & compounds	10 " " "

spec'tro- (spĕk'trō-). A combining form for *spectrum*, denoting, *pertaining to radiant energy* or *the analysis of radiation in a spectrum*, as in **spec'tro·chem'i·cal, spec'tro·chem'is·try, spec'tro·pho'to·graph, spec'tro·photog'ra·phy, spec'tro·tel'e·scope.**
spec'tro-. Combining form for *specter*, as in *spectro*phobia.
spec'tro·bo'lo·graph (-bō'lō·grăf; 83), *n.* [1st *spectro-* + *bolograph*.] A photographic registration of the bands, or lines, in the infrared spectrum. — **spec'tro·bo'lo·graph'ic** (-grăf'ĭk), *adj.*
spec'tro·bo·lom'e·ter (-bō·lŏm'ĕ·tĕr), *n.* [1st *spectro-* + *bolometer*.] *Physics.* A combination of spectroscope and bolometer for determining the distribution of energy in a spectrum. — **spec'tro·bo'lo·met'ric** (-bō'lō·mĕt'rĭk), *adj.*
spec'tro·chem'i·cal a·nal'y·sis (-kĕm'ĭ·kăl). *Physics.* An analysis of a mixture of substances or of a complex substance by a spectroscopic study of the light emitted when the former is placed in an arc or used as an electrode in a spark.
spec'tro·col'or·im'e·try (-kŭl'ĕr·ĭm'ĕ·trĭ), *n.* *Physics.* Quantitative study or color, usually for chemical analysis, by means of the spectrophotometer.
spec'tro·com'pa·ra'tor (-kŏm'pȧ·rā'tĕr), *n.* [1st *spectro-* + *comparator*.] *Astrophysics.* An instrument employing the optical arrangement of the stereocomparator (which see), but used for the comparison and measurement of spectra.
spec'tro·e·lec'tric (-ē·lĕk'trĭk), *adj.* Pertaining to or designating any form of spark tube the electric discharge within which is used in spectroscopic observations.
spec'tro·gram (spĕk'trō·grăm), *n.* [1st *spectro-* + *-gram*.] *Physics.* A photograph, map, or diagram of a spectrum.
spec'tro·graph (-grăf; 83), *n.* [1st *spectro-* + *-graph*.] *Physics.* **a** An apparatus for photographing or mapping a spectrum. **b** A photograph or picture of a spectrum.—**spec'tro·graph'ic** (-grăf'ĭk), *adj.* — **spec'tro·graph'i·cal·ly** (-ĭ·kăl·ĭ), *adv.* — **spec·trog'ra·phy** (spĕk·trŏg'rȧ·fĭ), *n.*
spec'tro·he'li·o·gram' (-hē'lĭ·ō·grăm'), *n.* [1st *spectro-* + *helio-* + *-gram*.] *Astrophysics.* A photograph of the sun made by monochromatic light, usually of the calcium line K, and showing the sun's faculae and prominences.
spec'tro·he'li·o·graph' (-grăf'; 83), *n.* *Astrophysics.* An apparatus for making spectroheliograms, consisting of a spectroscopic camera used in combination with a telescope, and provided with clockwork for moving the sun's image across the slit. — **spec'tro·he'li·o·graph'ic** (-grăf'ĭk), *adj.*
spec'tro·he'li·o·scope' (-hē'lĭ·ō·skōp'), *n.* [1st *spectro-* + *helio-* + *-scope*.] *Astrophysics.* Usually, the spectroheliograph; more properly, a similar instrument used for visual, as distinguished from photographic, observations.
spec·trol'o·gy (spĕk·trŏl'ō·jĭ), *n.* [1st *spectro-* + *-logy*.] The science of spectrum analysis. — **spec'tro·log'i·cal** (spĕk'trō·lŏj'ĭ·kăl), *adj.* — **spec'tro·log'i·cal·ly,** *adv.*
spec·trol'o·gy (spĕk·trŏl'ō·jĭ), *n.* [2d *spectro-* + *-logy*.] The study of specters. *Irving.*
spec·trom'e·ter (spĕk·trŏm'ĕ·tĕr), *n.* [1st *spectro-* + *-meter*.] *Physics.* **a** An instrument, resembling the reflection goniometer, used in determining the index of refraction by measuring the external angle of a prism of the substance and also its angle of minimum deviation for light of a given kind. **b** A spectroscope fitted for measurements of the spectra observed with it.

Spectrometer. 1 Prism; 2 Telescope; 3 Eyepiece; 4 Collimator; 5, 5 Magnifying Glasses for reading verniers.

spec·trom'e·try (-trĭ), *n.* *Physics.* Art or process of using the spectrometer, or of measuring wave lengths of rays of a spectrum. — **spec'tro·met'ric** (spĕk'trō·mĕt'rĭk), *adj.*
spec'tro·mi'cro·scope (spĕk'trō·mī'krō·skōp), *n.* A microscope with a spectroscopic attachment. Cf. MICROSPECTROSCOPE. — **spec'tro·mi'cro·scop'i·cal** (-skŏp'ĭ·kăl), *adj.*

spec'tro·pho'bi·a (spĕk'trō·fō'bĭ·ȧ), *n.* Also **spec'tro·pho'by** (spĕk'trō·fō'bĭ). [NL. *spectrophobia*, fr. 2d *spectro-* + *-phobia*.] Fear of specters, or phantoms.
spec'tro·phone (spĕk'trō·fōn), *n.* [1st *spectro-* + *-phone*.] An instrument constructed on the principle of the photophone and used in spectrum analysis as an adjunct to the spectroscope. — **spec'tro·phon'ic** (-fŏn'ĭk), *adj.*
spec'tro·pho'to·e·lec'tric (spĕk'trō·fō'tō·ē·lĕk'trĭk), *adj.* [1st *spectro-* + *photoelectric*.] *Physics.* Varying in photoelectric sensitiveness according to the wave length of the exciting light.
spec'tro·pho·tom'e·ter (-fō·tŏm'ĕ·tĕr), *n.* *Optics.* An instrument for comparing the intensities of the corresponding colors of two spectra.
spec'tro·pho·tom'e·try (-trĭ), *n.* **a** The art of comparing, photometrically, the brightness of two spectra, wave length by wave length; the use of the spectrophotometer. **b** The visual measurement of relative radiant energy as a function of wave length. — **spec'tro·pho'to·met'ric** (-fō'tō·mĕt'rĭk), *adj.* — **-pho'to·met'ri·cal·ly** (-rĭ·kăl·ĭ), *adv.*
spec'tro·po'lar·im'e·ter (-pō'lĕr·ĭm'ĕ·tĕr), *n.* *Optics.* A combined spectroscope and polarimeter for determining the rotatory power of solutions.
spec'tro·po·lar'i·scope (-pō·lăr'ĭ·skōp), *n.* A combined spectroscope and polariscope; a spectropolarimeter.
spec'tro·pyr·he'li·om'e·ter (-pĭr·hē'lĭ·ŏm'ĕ·tĕr; -pīr-), *n.* [1st *spectro-* + *pyrheliometer*.] *Physics.* A form of instrument for measuring the energy distribution in the visible and ultraviolet spectrum of emitted radiation from the sun.
spec'tro·py·rom'e·ter (-pĭ·rŏm'ĕ·tĕr), *n.* *Optics.* An instrument for optical or spectrophotometric estimation of the temperature of incandescent substances.
spec'tro·ra'di·om'e·ter (-rā'dĭ·ŏm'ĕ·tĕr), *n.* [1st *spectro-* + *radiometer*.] *Physics.* A form of instrument for measuring the energy distribution of emitted radiation. It is a combination of a spectroscope and radiometer.
spec'tro·ra'di·om'e·try (-trĭ), *n.* *Physics.* The use of the spectroradiometer in the study of radiant energy. — **spec'tro·ra'di·o·met'ric** (-ō·mĕt'rĭk), *adj.*
spec'tro·scope (spĕk'trō·skōp), *n.* [1st *spectro-* + *-scope*.] *Physics.* An optical instrument, variously used, for forming spectra, as that of solar light, or those produced by flames in which different substances are volatilized. The three essential parts of the spectroscope are: (1) a dispersive instrument, as a prism or grating; (2) a narrow rectangular slit parallel to the edge of the prism, or to the rulings of the grating; (3) a lens or concave mirror to focus the dispersed images of the slit on a photographic plate or in the eyepiece of the instrument. In a common form (***prism spectroscope***) the light is decomposed by a single prism (see *Illust.*). In the ***direct-vision spectroscope*** three or more prisms are combined so as to obtain dispersion without deviation. The earliest spectroscope was a prism and observations of the sun's spectrum were made by Newton in 1672. Real advance in spectroscopy only dates from the invention (1814) of the diffraction grating by Joseph von Fraunhofer (1787–1826) by means of which he measured wave lengths of light. The concave grating was invented later by Henry Augustus Rowland (1848–1901), American physicist. See GRATING, 3; ECHELON, 3.

spec'tro·scope, *v. t.* To investigate by means of a spectroscope.
spec'tro·scop'ic (-skŏp'ĭk), *adj.* Also **spec'tro·scop'i·cal** (-ĭ·kăl). Of or pertaining to, or produced by, a spectroscope, or spectroscopy; treating of, or concerned with, spectroscopy. — **spec'tro·scop'i·cal·ly,** *adv.*
spectroscopic binary. *Astron.* A star appearing single in a telescope, but shown spectroscopically to be binary, through periodic changes in its radial velocity. See BINARY STAR.
spectroscopic resolving power. *Optics.* The power of a grating or prism to resolve two beams of light of nearly the same wave length so that, when focused, they will produce two images which may be recognized as distinct.
spec·tros'co·py (spĕk·trŏs'kō·pĭ; spĕk'trō·skŏ'pĭ), *n.* The production and investigation of spectra; the use of the spectroscope; also, the science of spectroscopic phenomena. — **spec·tros'co·pist** (-pĭst), *n.*
spec'trum (spĕk'trŭm), *n.*; *pl.* -TRA (-trȧ), -TRUMS (-trŭmz). [L. See SPECTER.] **1.** An apparition; specter.
2. *Physics.* The series of images formed when a beam of radiant energy is subjected to dispersion and then brought to focus, so that the component waves are arranged in the order of their wave lengths (see SPECTROSCOPE); hence, any series of radiant energies arranged in order of wave length (***physical spectrum***). A ***gamma-ray spectrum*** has wave lengths of 0.07 to 1.03 angstroms or less; an ***X-ray spectrum***, wave lengths of 0.1 to 1.50 or slightly greater; an ***ultraviolet spectrum***, wave lengths much greater than the latter but less than 3,800; a ***visible***, or ***ocular, spectrum***, wave lengths between 3,800 and 8,000; an ***infrared spectrum***, wave lengths greater than 8,000 angstroms but not more than 0.03 centi-

Spectrum, 2. Solar Ray of Light, separated by a Prism into the seven principal colors of Newton. *a* Incident Ray of Light; *p* Prism; *cd* Spectrum; *n* Violet; *i* Indigo; *b* Blue; *g* Green; *y* Yellow; *o* Orange; *r* Red.

specs (spĕks). Short for *spectacles*. *Colloq.*

meters; an ***electro magnetic-wave spectrum***, wave lengths from a fraction of a centimeter to many thousands of meters. The *visible spectrum*, when of sufficient intensity, evokes in the normal human eye a series of colors, the ***color spectrum***, or ***chromatic spectrum***, ranging from red (evoked by waves 760 mμ in length) to violet (385 mμ). The order of hues is the same as that of the psychological color cycle, except that there is in the physical spectrum nothing corresponding to the purples. (See COLOR, *n.*, 1.) The ultraviolet, visible, and infrared spectra are formed by the analysis of ordinary light (see LIGHT, *n.*, 18), and together constitute the ***optical spectrum***. The ***thermal spectrum***, or ***heat spectrum***, is chiefly composed of dark, infrared rays. Spectra are detected by various means, depending upon the wave length. The waves in the visible spectrum and all those of shorter wave length produce chemical and fluorescent actions; all those in the visible spectrum and in the infrared spectrum produce thermal actions when absorbed properly. The electric waves, the longest of all, are most easily detected by means of electrical effects, as resonance. Spectra are classified also as *continuous* or *discontinuous*. ***Continuous spectra*** may be limited in extent, but they have no gaps, all wave lengths in the interval being represented. ***Discontinuous spectra*** consist of isolated lines corresponding to distinct wave lengths, and are divided into two classes: ***band, banded, fluted***, or ***channeled, spectra***, in which the distinct lines form groups or bands, that often present a fluted appearance (characteristic of emission by a molecule rather than by an atom); and ***line spectra***, in which the lines do not appear so grouped, although such spectra may often be analyzed mathematically into a number of series of lines, each line in a given series being related to the other lines by a definite mathematical formula. Another classification of spectra is into ***emission spectra*** and ***absorption spectra***; the former are spectra of the radiation emitted by a source, the latter the dark lines or gaps produced in a continuous spectrum by absorption of certain rays by some absorbing material. See KIRCHHOFF'S LAW. Emission spectra are further subdivided according to the mode of excitation of the radiation; the commonest divisions are *arc spectra, spark spectra, fluorescent spectra*, and *resonance spectra*. An ***arc spectrum*** of a metal is a spectrum of the light emitted when the metal is placed in an electric arc or when it is one of the poles of the arc. It results from the recombination of an electron with an atom that has already lost one electron. Arc spectra are designated by the atomic symbol and the Roman numeral I as *Cu* I. In general, arc spectra are produced when the atomic disturbances are not sufficiently severe to produce spark spectra. A ***spark spectrum*** of a metal is the spectrum of the light emitted when an electric spark passes between it and another metal. It depends upon the nature of the metals and the gas between them, and results from the recombination of an electron with an atom that has already lost two or more of its outer electrons. Spark spectra are designated by the atomic symbol and a Roman numeral indicating the number of outer electrons lost by the atom, as *Cu* II, *Cu* III. A ***fluorescent spectrum*** is that of radiation excited by fluorescence. A ***resonance spectrum*** is the fluorescent spectrum of a substance in which the emitted light contains waves of the same wave length as those of the incident radiation which excited the fluorescence. Still other classifications depend upon the instrument used to produce the analysis of the radiation as a ***prismatic spectrum***, if a prism or train of prisms is used, a ***diffraction spectrum***, if a grating is used, ***interference spectrum***, etc., and upon the source of the radiation, as ***solar spectrum, stellar spectrum, flame spectrum***, etc. A ***pure spectrum*** is one which at each point is sensibly homogeneous because the successive homogeneous images of the spectroscopic slit do not overlap appreciably. The purity of the spectrum increases as the width of the slit is diminished. A ***normal spectrum*** is one in which the dispersion is practically constant so that equal distances correspond to equal wave-length intervals. It may be formed by a diffraction grating. In prismatic spectra the dispersion at the violet end is greater than at the red end.

Line Spectrum.

3. An afterimage; ocular spectrum. See AFTERIMAGE.

4. Figuratively, range, as of colors revealed by a spectrum.

The whole *spectrum* of fear is bad, from panic fear at one extremity down to that mere disinclination for enterprise which is the lowest phase. *H. G. Wells.*

spectrum analysis. The investigation of substances or bodies by means of their spectra; specif., chemical analysis effected in this way.

spectrum color. A spectral color of unit purity; a pure color; — distinguished from *spectral color*.

spectrum locus. See COLOR, *n.*, 2.

spec'try (spĕk'trĭ), *adj.* Spectral. *Rare.*

spec'u·lar (spĕk'ū·lẽr), *adj.* [L. *specularis* (cf. *specula* a lookout, watchtower); cf. F. *spéculaire*. See SPECULUM.] **1.** Of, pertaining to, or having the qualities of, a speculum, or mirror; having a smooth, reflecting surface; as, a *specular* metal; a *specular* surface.

2. Reflected; seen as through a glass, or in a mirror. *Obs.*

3. Assisting sight, as a lens or the like. *Obs.*

4. Affording view. *Rare.* "This *specular* mount." *Milton.*

5. *Med.* Of, pertaining to, or conducted with the aid of, a speculum; as, a *specular* examination.

— **spec'u·lar·ly**, *adv.*

Spec'u·la'ri·a (spĕk'ū·lā'rĭ·ȧ; 79), *n.* [NL., fr. L. *speculum Veneris* Venus's-looking-glass, the medieval name in England of the campanula.] *Bot.* A small genus of annual herbs distinguished from *Campanula* by the rotate corolla and narrowly oblong ovary. The European *S. speculum-veneris* and the American *S. perfoliata* are both called *Venus's-looking-glass*, the former being also known as *corn violet*.

specular iron *or* **iron ore.** Hematite; — so called when it exhibits metallic luster.

specular pig iron. Spiegeleisen.

specular reflection. See REFLECTION, 1.

specular schist. *Petrog.* = itabirite.

spec'u·late (spĕk'ū·lāt), *v.*; -LAT'ED (-lāt'ĕd; -ĭd; 119); -LAT'ING (-lāt'ĭng). [L. *speculatus*, past part. of *speculari* to spy out, observe, fr. *specula* a lookout, fr. *specere* to look. See SPY.] *Intransitive*: **1.** To ponder a subject in its different aspects and relations; to meditate; contemplate; theorize; as, to *speculate* on religion; esp., to theorize about a matter in which evidence is not sufficient for certain knowledge; as, to *speculate* about other universes; sometimes, specif., in philosophy, to reason a priori.

He [Keats] must have *speculated* on, and fiercely combated with, death. *Amy Lowell.*

2. *Com.* To enter into a business transaction or venture from which the profits or returns are conjectural because the undertaking is out of the ordinary course of business; to purchase or sell with the expectation of profiting by anticipated, but conjectural, fluctuations in price; often, in a somewhat speculative sense, to engage in hazardous business transactions for the chance of an unusually large profit; as, to *speculate* in coffee, in sugar, or in bank stock.

—, *Transitive*: To consider attentively; to inspect or examine carefully. *Rare.*

Syn. — Ruminate, deliberate, ponder. Cf. CONSIDER.

speculate for differences. *London Stock Exchange.* To deal in stocks merely for a gambling profit to be made from temporary changes in price.

spec'u·la'tion (spĕk'ū·lā'shŭn), *n.* [L. *speculatio*; cf. F. *spéculation*.] **1.** Intuition; vision; direct apprehension or visual perception; primarily, mental or spiritual vision; secondarily, physical vision. *Archaic.*

Thou hast no *speculation* in those eyes. *Shak.*

2. One who observes; an observer. *Obs.* *Shak.*

3. The faculty, act, process, or product of intellectual examination or search; a conclusion, opinion, or decision reached as a result of thought and reasoning; esp., reasoning taking the form of prolonged and systematic analysis; also, reasoning about what transcends experience; theorizing on what does not admit of demonstration.

Thenceforth to *speculations* high or deep
I turned my thoughts. *Milton.*

4. Loosely, conjecture; guesswork; surmise; as, his statement was mere *speculation*.

5. A game at cards in which the players buy trumps from one another on a chance of getting the highest trump dealt, which entitles the holder to the pool.

6. *Com.* **a** Act of speculating, as by engaging in business out of the ordinary, or by dealing with a view to making a profit from conjectural fluctuations in the price rather than from earnings of the ordinary profit of trade, or by entering into a business venture involving unusual risks for a chance of an unusually large gain or profit. See SPECULATE, *v. i.*

Speculation, while confined within moderate limits, is the agent for equalizing supply and demand, and rendering the fluctuations of price less sudden and abrupt than they would otherwise be. *F. A. Walker.*

b Any individual transaction so entered into.

7. *Philos.* **a** Act or process of reasoning a priori. **b** With Hegel, reason which apprehends the unity of opposing categories and synthesizes them in a broader comprehension. It is the thinking which explains objects of experience by their relation to the absolute personal reason.

spec'u·la'tist (spĕk'ū·lā'tĭst), *n.* **1.** One who speculates, or forms theories; a theorist.

2. One who engages in speculation (sense 6); a speculator.

spec'u·la'tive (-lā'tĭv; -lȧ·tĭv), *adj.* [OF. *speculatif*, fr. L. *speculativus*.] **1.** Of or pertaining to vision; esp., giving a wide prospect or view; suitable for observation; also, prying; inquisitive; curious. *Obs.*

2. Given to speculation; contemplative.

The mind of man being by nature *speculative*. *Hooker.*

3. Involving, or formed by, speculation; theoretical; not established by demonstration.

4. Of, pertaining to, or engaged in, speculation in land, shares, etc.; as, a *speculative* dealer; accompanied by unusual risk; subject to dealings by speculators; as, a *speculative* enterprise; a *speculative* security, stock, or bond.

— **spec'u·la'tive·ly**, *adv.* — **spec'u·la'tive·ness**, *n.*

spec'u·la'tive, *n.* **1.** Abstract reasoning; theory. *Obs.*

2. *pl.* Those sciences based upon abstract reasoning, as metaphysics, philosophy. *Obs.*

speculative credit. *Finance.* Credit furnished to finance speculative transactions.

speculative damages. *Law.* Anticipated or prospective loss depending upon conjectural contingencies.

speculative geometry. Geometry proper, as resulting from a certain set of axioms, postulates, or conventions, and not based on experience.

speculative issue. *Philately.* An issue of postage stamps unnecessary for postal requirements and prepared chiefly for sale to collectors.

speculative Masonry. *Freemasonry.* An application of moral principles to the implements and emblems of operative Masonry.

speculative philosophy. A philosophy founded upon intuitive or a priori insight, esp. insight into the nature of the Absolute or Divine; more widely, a philosophy of the transcendent or one lacking empirical bases; theoretical as opposed to demonstrative philosophy.

speculative reason. See REASON, *n.*, 3.

speculative theology. Theology as founded on, or fundamentally influenced by, speculation or metaphysical philosophy.

spec'u·la'tor (spĕk'ū·lā'tẽr), *n.* [L., a spy, explorer, investigator; cf. F. *spéculateur*.] One who speculates; specif.: **a** One who devotes himself to contemplation and abstract reasoning; a contemplator; a theorist. **b** *Obs.* An observer; lookout; also, a spy. **c** *Com.* One who speculates in business; one who engages in speculation, as in stocks, bonds, real estate.

spec'u·la·to'ry (spĕk'ū·lȧ·tō'rĭ; -tẽr·ĭ), *adj.* [L. *speculatorius*.] **1.** Exercising mental speculation; speculative.

2. Intended or adapted for viewing or espying; inspective.

spec'u·la·to'ry, *n.* Speculation; observation, study, and theorizing on phenomena.

spec'u·la'trix (spĕk'ū·lā'trĭks), *n.*; *pl.* -LATRICES (-lȧ·trĭ'sēz). [L.] A female speculator.

spec'u·list (spĕk'ū·lĭst), *n.* One who observes or considers. *Rare.*

spec'u·lum (-lŭm), *n.*; *pl.* SPECULA (-lȧ), SPECULUMS (-lŭmz). [L., fr. *specere* to look, behold. See SPY.] **1.** *a Rom. Antiq.* A mirror. The usual material of ancient mirrors was bronze or silver. **b** Hence, a mirror, or looking glass; esp., a metal mirror.

2. A reflector of polished metal or of glass with a film of metal, used in optical instruments. See SPECULUM METAL; cf. OBJECT SPECULUM.

3. In medieval usage, a common title for surveys of life, or of philosophy, history, and theology; a comprehensive, encyclopaedic presentation of a subject, such as the *Speculum Majus* of Vincent of Beauvais (about 1190–1264) which aims to be a compendium of all knowledge. Such treatises usually begin with the Biblical account of creation, give an outline of history, and thence pass, chiefly, to theology and scholastic philosophy.

4. *Astrol.* A drawing or table showing the relative positions of all the planets, as in a nativity.

5. *Med. & Surg.* An instrument for dilating certain passages of the body, so as to make them visible.

6. *Zool.* A patch of color covering the distal portion (exposed in the closed wing) of the secondaries of most ducks and some other birds, as domestic fowls. It is variously colored (often iridescent greenish or bluish in ducks) and framed in other colors. It is more brilliant in the adult male than in the female. In poultry, called *wing bay*.

speculum metal. An alloy capable of taking a brilliant polish, used for making speculums (reflectors). It is commonly a hard, brittle alloy of copper and tin in various proportions, as tin 33 to copper 67, with often a little arsenic, antimony, or zinc added to improve the whiteness.

spe'cus (spē'kŭs), *n.* [L.] *Rom. Antiq.* The roofed channel in which the water of an aqueduct was carried, sometimes underground, sometimes on embankments or arches.

sped (spĕd), *past tense & past part.* of SPEED. Hence: *adj.* Let fly; discharged; as, a *sped* bolt; hence, brought to or on one's way toward a desired goal or condition.

-sped (-spĕd). A combining form of *sped*, as in well-*sped*.

speech (spēch), *n.* [ME. *speche*, fr. AS. *spǣc, spēc, sprǣc, sprēc*; akin to D. *spraak*, G. *sprache*, and AS. *specan, sprecan*, to speak. See SPEAK.] **1.** The faculty of uttering articulate sounds or words; the faculty of expressing thoughts by words or articulate sounds; the power of speaking.

2. Act or manner of speaking; communication or expression of thoughts in spoken words. Acoustically and organically, speech is breath or voice articulated, or formed into speech sounds, transition sounds, syllables, and breath groups, with word stress, sense stress, and intonation, by definite configurations and movements of the vocal organs.

3. That which is spoken; a spoken sentence, phrase, remark, etc.; uttered words expressive of thought; also, an interchange of spoken words; talk; conversation.

4. Specif., a formal public discourse; an oration; harangue.

5. A particular language; a tongue; a dialect; an idiom.

People of a strange *speech*. *Ezek.* iii. 6.

6. Talk; mention; common saying; report. *Archaic.*

What was the *speech* among the Londoners
Concerning the French journey. *Shak.*

7. The sounding of a musical instrument. See SPEAK, *v. i.*, 6.

8. *Law.* A cause; suit. *Obs.*

Syn. — SPEECH, ADDRESS, ORATION, HARANGUE. SPEECH is the general term; an ADDRESS is a formal speech; an ORATION is an elaborate or rhetorical address, esp. one delivered on a notable occasion; a HARANGUE is a vehement or noisy speech. See LANGUAGE.

☞ COMBINATIONS and PHRASES are:

speech-bereaving, *adj.*	**speech-flooded**	**speech-reading**, *adj.*
speech-bereft	**speech form**	**speech-reporting**, *adj.*
speech-bound	**speechmaker**	**speech-shunning**, *adj.*
speech-famed	**speechmaking**	**speech-writing**, *adj.*

speech (spēch), *adj.* Of or pertaining to speech; occurring or used in speech.

speech, *v. i. & t.* To speak; address; harangue.

He 's been preached about and *speeched* about ever since he was lucky enough to be hauled out of the surf. *Joseph Lincoln.*

speech, *n.* [Appar. fr. an old form of SPOKE.] The part of a wheel consisting of the hub and spokes before the fellies and rim are put on.

speech center. *Physiol.* A brain center which controls the power of speech, commonly in the cortex at the third left frontal convolution.

speech'craft' (spēch'krȧft'; 83), *n.* Skill in speech; also, linguistics; grammar.

Take the bare meaning of rhetoric to be *speechcraft*. *Saintsbury.*

speech curve. A mechanical or photographic record of the vibrations and other phenomena of speech, made by means of various projecting and recording devices, such as the phonodeik, the kymograph, the phonograph, etc.

Speech day. See 1st APPOSITION.

speech defect. A defect in oral speech, as lisping or stuttering.

speech'er (spēch'ẽr), *n.* One who makes speeches; a speaker.

speech'ful (-fo͝ol; -fĭ), *adj.* [Cf. AS. *sprǣcful*.] Full of speech; voluble; expressive. — **speech'ful·ness**, *n.*

speech house. A room or hall of audience. *Hist.*

speech'i·fy (spēch'ĭ·fī), *v. i.*; -FIED (-fīd); -FY'ING (-fī'ĭng). [*speech* + *-fy*.] To make a speech; to harangue; — used derisively or humorously. — **speech'i·fi·ca'tion** (-fĭ·kā'shŭn), *n.* — **speech'i·fier** (spēch'ĭ·fī'ẽr), *n.*

speech'ing, *n.* Delivery of a speech; speaking; a speech. — **speech'ing,** *adj.*

speech'less, *adj.* [AS. *spǣclēas*.] **1.** Destitute or deprived of the faculty of speech.

2. Not speaking for a time; dumb; mute; silent.

Speechless with wonder, and half dead with fear. *Addison.*

3. Not expressed in, or conveyed by, words; wanting oral expression; as, *speechless* grief; *speechless* thoughts.

Syn. — See DUMB. **Ant.** — Vocal, voiced, oral.

— **speech'less·ly**, *adv.* — **speech'less·ness**, *n.*

speech'lore' (spēch'lōr'), *n.* Philology. *Rare.*

speech map. A map showing the regions or localities where given languages, dialects, words, or forms are spoken.

speech melody. *Phonet.* The intonation of connected speech; the continual rise and fall in pitch of the voice in speech. See *Pron.*, § 74.

speech'ment (spēch'mĕnt), *n.* [See -MENT.] A speech. *R.*

speech reading. = LIP READING.

speech rhythm. *Pros.* The (or a) rhythm of language as spoken, esp. with reference to normal syllabic and word accents, distinguished from, and, in poetry, often contrasted with, rhythm produced by meter.

A question arises whether . . . if *speech rhythm* be the beauty of the verse, it may not be a sufficient rule for it. *R. Bridges.*

speech sound. *Phonet.* One of the simplest elements of speech; a significant sound made by a definite position or movement of the vocal organs; a phone; also, any of a group of organically similar sounds, commonly regarded as the same sound, and usually spelled with the same or equivalent letter; as, "short *a*" is an English *speech sound*. Cf. GLIDE, *n.*, 8; PHONEME, 1; and see *Pron.*, § 23.

speech tune. *Phonet.* Speech melody or an instance of it.

speed (spēd), *n.* [AS. *spēd* success, swiftness; akin to AS. *spōwan* to succeed, D. *spoed* speed, OHG. *spuot* success, *spuon* to succeed, L. *spatium* space, G. *spät* late, Lith. *spėtas* leisure, Skr. *sphāra* extensive, *sphāyati* increases, grows fat. See SPARE; cf. SPACE.] **1.** Prosperity in an undertaking; favorable issue; success. *Archaic.*

O Lord God, . . . send me good *speed* this day. *Gen.* xxiv. 12.

2. Help; succor; also, advantage; profit. *Obs.*

3. One who, or something that, promotes success or favorable conditions. *Obs.* *Shak.*

4. Act or state of moving swiftly; swiftness; rapidity; dispatch. Speed is a scalar quantity equal to the magnitude of velocity; it is always relative to a stated frame of reference. As distinguished from velocity, a *speed* of 20 miles per hour means rate of motion in any direction, whereas *velocity* would be used if direction were also involved; as, at a *velocity* of 20 miles per hour east of a particular point.

spec'u·la, *n.*, *pl.* of SPECULUM. **spec'u·la'tiv.** Speculative. *R. S.*	**spec'u·la'tiv·ism** (spĕk'ū·lā'tĭv·ĭz'm), *n.* See -ISM.	**sped.** † SPADE, SPEED. **spede.** † SPEED.	**speece.** † SPECE. **speech'man** (spēch'mȧn), *n.*; *pl.* -MEN (-mĕn). A speaker; spokesman. *Obs.*	**speech room.** = SPEECH HOUSE. *Hist.*

In either case, 20 miles per hour is the rate of motion at any given time that would, if continued, result in traveling 20 miles in an hour. Hence, in general, rate of motion.
6. Rate of performance, as indicated by the amount accomplished in a given time or by the time required to accomplish a given amount; as, *speed* of reading or of adding.
6. Character or standard of activity; ability or capacity for action. *Slang.* "They need a new night watchman at the dam; that's about your *speed*." *Elmer Davis.*
7. In automotive vehicles, a transmission gear; as, to shift to low *speed*.
8. *Optics.* **a** Of a lens, its maximum relative aperture. **b** Of a shutter, its minimum exposing time.
9. *Photog.* The sensitivity of a film, plate, or paper, often expressed numerically according to one of several systems (see SENSITOMETRY).
10. *Surv.* A nail driven into something for a mark.
11. *Veter.* A kind of rapidly spreading, often fatal, inflammatory disease among cattle, esp. young cattle.
Syn. — Celerity, quickness, expedition, hurry. See HASTE.
Ant. — Slowness, sluggishness.
☞ PHRASES are **speed maniac, speed record.**

speed (spēd), *v.; past tense & past part.* SPED (spĕd), SPEED'ED; *pres. part. & verbal n.* SPEED'ING. [AS. *spēdan;* akin to MD. *spoeden,* OS. *spōdian.* See SPEED, *n.*] *Intransitive:* **1.** To go; to fare. *Obs.*
2. *Archaic.* **a** To experience any fortune, good or ill; to fare. "Impossible I should *speed* amiss." *Shak.* **b** To fare well; to have success; to prosper.
I told ye then he should prevail, and *speed*
On his bad errand. *Milton.*
3. To be expedient. *Obs.* *Wycliffe* (2 *Cor.* xii. 1).
4. To make haste; to move with celerity; specif., to go or drive at an excessive speed, or at a speed beyond that usual or permissible; as, to be arrested for *speeding.*
——, *Transitive:* **1.** To cause to be successful, or to prosper; to promote; further; advance; hence, to aid; help; favor.
With rising gales that *sped* their happy flight. *Dryden.*
2. To wish Godspeed to.
Welcome the coming, *speed* the parting guest. *Pope.*
3. To furnish; provide; equip. *Obs.*
4. To cause to make haste; to dispatch with celerity; to drive at high speed, as to force a worker to increase his normal production; hence, to hasten; to hurry; to race.
The principles which *speeded* the *Mayflower* to Plymouth Rock. *Agnes Repplier.*
5. To increase the speed, or rate of motion, of, as a machine; as, he *speeded* the engine.
6. To hurry to destruction; to ruin; undo; kill. *Archaic.*
7. *Mach., etc.* To set, adjust, or design, to or for a definite speed or speeds.
Syn. — Assist, facilitate, dispatch, expedite, accelerate.
Ant. — Delay, hinder. See SLOW.

speed up. To accelerate.

speed (spēd), *adj.* Of or pertaining to speed; denoting something which regulates, indicates, or attains speed; as, a *speed* clock, gear, boat.

Speed (spēd), *n.* A clownish servant of Valentine, and an inveterate punster, in Shakespeare's *Two Gentlemen of Verona.*

speed'boat' (spēd'bōt'), *n.* A launch or powerboat designed for high speed. — **speed'boat'ing** (-ĭng). — **speed'boat'man** (-măn), *n.*

speed boss. A foreman, or instructor, having supervision solely over the proper method of performing work to obtain the most efficient results.

speed box. *Mach.* A box containing a speed-changing device for the main drive of a lathe or similar machine.

speed cone. **1.** *Mach.* **a** A stepped cone pulley. See CONE PULLEY, *Illust.* **b** One of a pair of conical pulleys connected by a short belt, by adjusting whose position a fine adjustment of speed may be obtained; in *pl.,* **speed cones,** = BELT SPEEDER.
2. *Nav.* See SPEED INDICATOR **c.**

speed control. *Railroads.* Equipment designed to operate automatically under certain conditions to keep the speed of a train within a predetermined rate.

speed controller. See CONTROLLER, *n.,* 6.

speed cop. A police officer, usually on a motorcycle, whose duty is to prevent excessive speeding of traffic, esp. on the highways. *Slang.*

speed counter. *Mach.* A device for automatically counting the revolutions or pulsations of an engine or other machine;—called also simply *counter.*

Speed Counter.

speed'er (spēd'ĕr), *n.* **1.** One who or that which speeds; specif.: **a** *Obs.* One that gains success or speedy advancement. **b** In a workshop, one who sets the pace for other workers. **c** *Mach.* Any of various devices for regulating the speed of a machine or part, as an attachment to a governor. **d** *Railroading.* A kind of three-wheeled hand-propelled velocipede with one or two seats. *U.S.* **e** *Ropemaking.* A worker who speeds by hand. **f** *Spinning.* A machine for drawing and twisting slivers to form rovings; also, its tender.
2. A small light vehicle with flanged wheels or solid rubber tires for operation on railroad tracks. It may have four wheels or three, one in the front and two in the rear. It was formerly propelled by pedals, but is now usually propelled by an internal-combustion engine.
3. One who drives too fast or who exceeds the legal speed limit.

speed flag. See SPEED INDICATOR **c.**

speed frame. *Spinning.* = SPEEDER **f.**

speed'ful (spēd'fŏol; -fl), *adj.* Full of speed; as: **a** Favorable; successful. **b** Rapid; speedy. **c** Expert; efficient. — **speed'ful·ly,** *adv.* — **speed'ful·ness,** *n.*

speed gauge. = SPEED INDICATOR.

speed gear. = CHANGE GEAR.

speed'i·ly (spēd'ĭ·lĭ), *adv.* Rapidly; quickly; also, soon; promptly.

speed indicator. **a** = TACHOMETER. **b** = SPEED COUNTER. **c** *Nav.* A device for showing to other vessels the speed of a ship in formation. Devices in use include: ***speed cones,*** cones of canvas showing by their position, apex up or down, and the height of hoist, the direction of the engines and the fractional part of standard speed; ***speed lights,*** flashing or steady displays of white or red lights giving the same data as speed cones; ***speed flags,*** special flags showing the speed in knots.

speed'i·ness (spēd'Ĭ·nĕs; -nĭs; 119), *n.* Quality of being speedy, or fast; quickness; promptness.

speed'ing, *adj.* That speeds. — **speed'ing·ly,** *adv.*

speed lathe. *Mach.* See 2d LATHE, 1.

speed'-length' ra'tio. *Naval Arch.* The ratio of a vessel's speed in knots divided by the square root of her length in feet.

speed light. See SPEED INDICATOR **c.**

speed limit. The maximum of speed permitted.

speed'ly, *adv.* = SPEEDILY. *Obs.*

speed·om'e·ter (spēd·ŏm'ē·tĕr), *n.* [*speed* + *-meter.*] **a** An instrument for indicating speed or velocity; a tachometer. **b** A device, as that on an automobile, which measures distance as well as speed; an odometer.

speed pulley. *Mach.* A cone pulley with steps; a speed cone.

speed recorder. A speed indicator; also, a device for plotting a record of the speed of a machine during a given period.

speed reducer. An apparatus for reducing speed.

speed rigger. A speed pulley.

speed road. A speedway.

speed sheet. *Horse Racing.* A published record of horses' performances in speed.

speed sight. *Nav. Ordn.* A sight used in training a gun on a moving target, the rear sight being adjusted according to the speed of the target relative to that of the vessel firing. In a form used in the British Navy, the rear sight is adjusted according to the speed of the target and the bead of the fore sight according to that of the vessel. Called also formerly *sliding leaf.*

speed'ster (spēd'stĕr), *n.* [See -STER.] **1.** A speeder; one who or that which excels in speed in any line.
2. *Automobiles.* A high-speed roadster, usually with a low seat for two persons seated side by side.

speed test. *Psychol.* A test for the maximum speed of performing a task which lies well within the subject's power.

speed the plow. An English country-dance for an indefinite number. See COUNTRY-DANCE.

speed trap. A trap to catch motorists who exceed speed limits, often consisting of two concealed stations a measured distance apart, connected by telephone, and occupied by officers who time the speed of vehicles with stop watches.

speed truck. A motor truck in which engine, transmission, and final drive are designed specifically for high speed.

speed'-up', *n.* **1.** An increase in the rate of production.
2. A severe system of production, beyond the bounds of reason.
3. Acceleration. *Colloq.*

Speed Wagon. A trade-mark for a kind of light motor truck designed for high-speed operation.

speed'way' (spēd'wā'), *n.* **a** A public course on which speeding, esp. of harness horses, is allowed. **b** A highway reserved for high-speed vehicles.

speed'well (-wĕl), *n.* Any herb of the genus *Veronica.* The common speedwell is *V. officinalis.*

speed'y (spēd'ĭ), *adj.;* SPEED'I·ER (-Y·ĕr); SPEED'I·EST. [Cf. AS. *spēdig* prosperous.] Marked by speed; specif.: **a** *Obs.* Helpful; advantageous. **b** Active; prompt. **c** Rapid in motion or performance; quick; swift; as, a *speedy* flight.
Syn. and **Ant.** — See FAST.

speedy cut *or* **cutting.** *Veter.* An injury to a horse's foreleg below the knee, caused by the shoe of the opposite foot in running.

speel (spēl), *v. t. & i.* [Cf. D. *spil* spindle (of a winding staircase).] To climb; mount. *Scot.* — *n.* Act of climbing or ascending.

sper'ma·tan'gi·um (spûr'mȧ·tăn'jĭ·ŭm), *n.* [NL., fr. Gr. *sperma, -atos*, seed + *angeion* vessel.] *Bot.* The multicellular antheridium in certain algae. Cf. SPERMATOCYST **b**.

sper'ma·the'ca (spûr'mȧ·thē'kȧ), *n.;* *pl.* -THECAE (-sē). [NL., fr. *sperma-* + *-theca*.] *Zool.* A sac connected with the female reproductive organs of most insects and many other invertebrates, which receives and retains the spermatozoa, often for a long period, until the time for fertilizing the eggs. — **sper'ma·the'cal** (-kăl), *adj.*

sper'ma·the'cal gland (-kăl). A gland in some insects connected with the spermatheca.

sper·mat'ic (spĕr·măt'Ĭk), *adj.* [F. *spermatique*, fr. LL. *spermaticus*, fr. Gr. *spermatikos*. See 1st SPERM.] **1.** *Anat. & Zool.* Pertaining to sperm or a spermary, or testis; carrying, or abounding in, sperm; like sperm; seminal; testicular.

2. Figuratively, reproductive; originative; generative.

sper·mat'ic, *n.* **a** Short for SPERMATIC ARTERY, SPERMATIC CANAL, etc. **b** *pl.* = SPERMATIC VEINS.

spermatic animalcule. A spermatozoon. *Obs.*

spermatic artery. *Anat. & Zool.* An artery which supplies blood to a spermary, or testicle. In man the spermatic arteries arise from the front of the aorta a little below the renal arteries and each passes downward to the spermatic cord of the same side and along it to the testicle.

spermatic canal. *Anat.* The inguinal canal.

spermatic capsule. *Zool.* In certain mites of the family Parasitidae, a transparent globular sac produced by the male, containing the spermatozoa and serving to convey them to the female genital tract.

spermatic cord. *Anat.* The cord which suspends the testicle within the scrotum and contains the vas deferens and vessels and nerves of the testicle. It extends from the internal abdominal ring, through the inguinal canal and external abdominal ring, downward into the scrotum.

spermatic duct. *Zool.* Any efferent duct of a spermary or testis; a duct conveying sperm.

spermatic filament. A spermatozoon. *Obs.*

spermatic fluid. *Physiol.* Sperm; semen.

spermatic funiculus. = SPERMATIC CORD.

Sper·mat'i·cos Lo'gos (spĕr·măt'Ĭ·kŏs lō'gŏs). [Gr. *spermatikos logos*.] In Stoic philosophy (usually *pl.*) a generative principle in matter; seminal reason.

spermatic plexus (of veins). The pampiniform plexus of the spermatic cord.

spermatic veins. *Anat. & Zool.* The veins leading from the testes. In man they are numerous, and form (with tributaries from the epididymis) the pampiniform plexus in the spermatic cord. From this they accompany the spermatic artery, eventually uniting to form a single trunk, which on the right side opens into the vena cava, on the left into the renal vein.

sper'ma·tid (spûr'mȧ·tĭd), *n.* [Gr. *sperma, -atos*, seed.] *Biol.* One of the cells which arise by division of the secondary spermatocytes and become spermatozoa.

sper'ma·tif'er·ous (spûr'mȧ·tĭf'ĕr·ŭs), *adj.* [*spermatium* + *-ferous*.] Bearing spermatia.

sper'ma·tin (spûr'mȧ·tĭn), *n. Biochem.* A constituent of semen similar to alkali albuminate, and said to impart to semen its mucilaginous character.

spermatio-. A combining form for *spermatium*, as in **sper·ma'ti·o·g'e·nous.**

sper·ma'ti·o·phore' (spĕr·mā'shĭ·ō·fōr'; 181), *n. Bot.* A sporophore which gives rise to spermatia.

sper'ma·tism (spûr'mȧ·tĭz'm), *n.* **a** *Physiol.* Emission of sperm, or semen. **b** *Biol.* Spermism.

sper'ma·tist (-tĭst), *n.* Spermist.

sper'ma·ti'tis (spûr'mȧ·tī'tĭs), *n.* [NL., fr. *spermato-* + *-itis*.] Inflammation of a vas deferens.

sper·ma'ti·um (spĕr·mā'shĭ·ŭm), *n.;* *pl.* -TIA (-ȧ). [NL.] *Bot.* **a** In the red algae (Rhodophyceae), a nonmotile male gamete, which develops a cell wall after its liberation from the antheridium, and conjugates with the carpogonium. See CARPOGONIUM. **b** In certain fungi and lichens, any of certain similar cells, developed by abstriction from sterigmata within spermogonia, and apparently functioning as male gametes, though by many regarded as a form of conidia.

sper'ma·tize (spûr'mȧ·tīz), *v. i. & t.* [Gr. *spermatizein*.] To emit, or impregnate with, sperm.

sper'ma·to- (spûr'mȧ·tō-), **spermat-.** A combining form, Greek *spermato-*, *spermat-*, from *sperma, spermatos*, seed, equivalent to *spermo-*, as in *spermat*ophore, *sperm*atangium.

sper'ma·to·blast' (-blăst'), *n.* [*spermato-* + *-blast*.] *Biol.* A spermatoblastic cell or structure; sometimes, specif., a spermatid.

sper'ma·to·blas'tic (spûr'mȧ·tō·blăs'tĭk), *adj. Biol.* Producing sperm or spermatozoa.

sper'ma·to·cele' (spûr'mȧ·tō·sēl'), *n.* [*spermato-* + *cele*.] *Med.* A cystic swelling of the epididymis or testicle containing spermatozoa.

sper'ma·to·cyst' (-sĭst'), *n.* [*spermato-* + *-cyst*.] **a** *Zool.* A seminal vesicle. **b** *Bot.* A unicellular antheridium in certain algae and fungi. Cf. SPERMATANGIUM. — **sper'ma·to·cys'tic** (-sĭs'tĭk), *adj.*

sper′ma·to·go′ni·um (-tō·gō′nĭ·ŭm), *n.; pl.* -GONIA (-ȧ). [NL., fr. *spermato-* + Gr. *gonē* offspring.] *Biol.* **a** *Zool.* One of the primitive male germ cells. From the final generation of spermatogonia the spermatocytes develop. **b** *Bot.* A spermogonium. — **sper′ma·to·go′ni·al** (-ăl), *adj.*

sper′ma·toid (spûr′mȧ·toid), *adj.* [*spermato-* + *-oid.*] *Biol.* Resembling sperm or a sperm cell.

sper′ma·tol′y·sis (spûr′mȧ·tŏl′ĭ·sĭs), *n.* [NL., fr. *spermato-* + *-lysis.*] *Biol.* Dissolution, or lysis, of sperms. — **sper′ma·to·lyt′ic** (-tō·lĭt′ĭk), *adj.*

sper′ma·to·phore′ (spûr′mȧ·tō·fōr′; 181), *n.* [*spermato-* + *-phore.*] **1.** **a** *Biol. & Physiol.* A spermospore. *Obs.* **b** *Bot.* = SPERMATIOPHORE.

2. *Zool.* A special capsule, packet, or mass, enclosing a number of spermatozoa extruded by the male of various animals. Such structures occur in many different groups, as annelids, mollusks, arthropods, and some vertebrates. In cephalopods they are very highly specialized.

Spermatophores of *Octopus bairdii*, nat. size. *B* Spermatophore before alteration; *a, b* Terminal Filaments. *A* Spermatophore in the act of extruding the Chain of Spermatozoa (*ir*); *s* Everted End.

— **sper′ma·toph′o·ral** (-tŏf′ō·rŭl), *adj.* — **sper′ma·toph′o·rous** (-rŭs), *adj.*

spermatophore sac. In cephalopods, a terminal sac which retains the spermatophores until ready for fertilization; called also *Needham's sac.*

Sper′ma·toph′y·ta (-tŏf′ĭ·tȧ), *n. pl.* [NL., fr. *spermato-* + Gr. *phyton* plant.] *Bot.* A phylum embracing the highest plants, or those that produce seeds; the seed plants, or flowering plants. They form the most numerous group, including over 126,000 species. In general, the group is characterized by the marked development of the sporophyte, with great differentiation of its parts (root, stem, leaves, flowers, etc.); by the extreme reduction of the gametophyte; and by the development of seeds. All the Spermatophyta are heterosporous; fertilization of the egg cell is either through a pollen tube emitted by the microspore or (in a few gymnosperms) by spermatozoids. The phrase "flowering plants" is less distinctive than "seed plants," since the conifers, grasses, sedges, oaks, etc., do not produce flowers in the popular sense. For this reason the terms *Anthophyta, Phaenogamia,* and *Phanerogamia* have been superseded as names of the phylum by *Spermatophyta.*

sper′ma·to·phyte′ (spûr′mȧ·tō·fīt′), *n.* Any plant of the phylum Spermatophyta. — **sper′ma·to·phyt′ic** (-fĭt′ĭk), *adj.*

sper′ma·to·plasm (-tō·plăz′m), *n.* Protoplasm of a sperm cell. — **sper′ma·to·plas′mic** (-plăz′mĭk), *adj.*

sper′ma·to·plast′ (-plăst′), *n. Bot.* A spermatozoid.

sper′ma·tor·rhe′a, sper′ma·tor·rhoe′a (-tō·rē′ȧ), *n.* [NL., fr. *spermato-* + *-rhea.*] *Med.* Abnormally frequent involuntary emission of the semen without orgasm.

sper′ma·to·the′ca (-thē′kȧ), *n.* [NL.] *Zool.* A spermatheca.

-sper′ma·tous (-spûr′mȧ·tŭs). [Gr. *-spermatos.* See SPERM.] = -SPERMOUS.

sper′ma·to′vum (spûr′mȧ·tō′vŭm), *n.; pl.* -TOVA (-vȧ). [NL., fr. *spermato-* + L. *ovum* egg.] *Biol.* A fertilized egg. *Rare.*

sper′ma·to·zo′al (-tō·zō′ăl), *adj. Biol.* Of or pertaining to a spermatozoon or spermatozoa.

sper′ma·to·zo′an (-tō·zō′ăn), *adj. Biol.* Spermatozoal. — *n.* A spermatozoon.

sper′ma·to·zo′ic (-ĭk), *adj. Biol.* Spermatozoal.

sper′ma·to·zo′id (-tō·zō′ĭd), *n.* [*spermatozoon* + Gr. *eidos* form.] **1.** *Bot.* A motile male gamete or male sexual cell, usually developed within an antheridium, and liberated in the presence of water, in which it swims freely by means of cilia, being conducted or attracted by various devices to the egg, or oösphere, with which it ultimately fuses. This type of gamete occurs among oögamous algae, throughout the mosses, hepatics, and ferns, and in certain gymnosperms. It is rounded in the lower plants, club-shaped or filamentous in the higher, and bears two or more cilia at the anterior end, thus differing from the functionally similar spermatozoon of animals. See GAMETE.

Spermatozoon of a Mammal greatly enlarged. 1 Acrosome; 2 Nucleus; 3 Middle Piece; 4 Axial Filament of Tail or Flagellum; 5 Envelope of same; 6 Terminal Filament.

2. *Zool.* A spermatozoon. *Rare.*

sper′ma·to·zo′oid (-oid), *n. Biol.* A spermatozoid.

sper′ma·to·zo′on (-ŏn), *n.; pl.* -ZOA (-ȧ). [NL., fr. *spermato-* + *-zoon.*] *Zool.* A male sexual cell or sperm cell of an animal, whose function is the fertilization of the egg. See FERTILIZATION, 2. The spermatozoa of different animals vary much in form, but are commonly very minute relatively to the eggs, and capable of more or less active spontaneous movement by which they approach and enter, or fuse with, the egg. They are discharged in a fluid (semen) or in gelatinous masses or capsules (spermatophores). Most frequently they have an oval or elongated head consisting of a nucleus with but little cytoplasm, and a long tail, or flagellum, with which they swim, which is connected to the head by a structure called the **middle piece.** They are produced in the male reproductive gland (testis or spermary), usually in enormous numbers. See SPERMATOGENESIS, SPERMATID.

sper′ma·tu′ri·a (spûr′mȧ·tū′rĭ·ȧ), *n.* [NL., fr. *spermato-* + *-uria.*] *Med.* Discharge of semen in the urine.

sperm candle. A candle made of spermaceti.

sperm cell. *Biol.* A male sexual cell; a sperm, spermatozoon, or spermatozoid.

sperm center *or* **centrosome.** *Biol.* The centrosome presumably derived from the sperm cell during fertilization of the egg.

sper′mi- (spûr′mĭ-). A combining form from Latin *sperma,* sperm, as in *spermi*duct.

-sper′mi·a (-spûr′mĭ·ȧ). [NL.] **a** *Med.* A combining form from Greek *sperma,* seed, germ, denoting *an abnormality of the semen,* as in azoo*spermia,* pyo*spermia.* **b** *Bot. & Zool.* = -SPERMY.

sper′mic (spûr′mĭk), *adj.* Pertaining to sperm.

-sper′mic. = -SPERMOUS, as in gymno*spermic.*

sper′mi·dine (spûr′mĭ·dēn; -dĭn), *n.* Also **-din.** [*sperm* + *-idine.*] *Biochem.* A crystalline aliphatic base, $C_7H_{19}N_3$, found in semen in association with spermine, and structurally related to it.

sper′mi·du′cal (spûr′mĭ·dū′kăl), *adj.* [See SPERM; DUCT.] *Zool.* Pertaining to certain glands associated with the sperm ducts in oligochaetes.

sper′mi·duct (spûr′mĭ·dŭkt), *n. Zool.* A spermatic duct.

sper·mig′er·ous (spĕr·mĭj′ĕr·ŭs), *adj.* [*spermi-* + *-gerous.*] Carrying sperm.

sperm′ine (spûr′mēn; -mĭn), *n.* Also **-in.** [See SPERM.] a *Biochem.* A crystalline aliphatic base, $C_{10}H_{26}N_4$, found in semen (in combination with phosphoric acid), in various tissues of the body, and in yeast. It has been prepared synthetically. **b** [*cap.*] A trade-mark applied to a 2 per cent solution of the hydrochloride of the base; hence [*sometimes not cap.*], the solution bearing this trade-mark. — **sper′mic** (spûr′mĭk), *adj.*

sper′mi·o·gen′e·sis (spûr′mĭ·ō·jĕn′ē·sĭs), *n.* [NL.] *Biol.* Spermatogenesis.

sperm′ism (spûr′mĭz′m), *n.* [*spermo-* + *-ism.*] *Biol.* The theory, formerly held by many, that the sperm or spermatozoon contains the germ of the future embryo; animalculism. — **sperm′ist** (spûr′mĭst), *n. & adj.*

sperm nucleus. The nucleus of the sperm cell or spermatozoon, called the *male pronucleus* after it has entered the egg.

sper′mo- (spûr′mō-), **sperm-.** A combining form, Greek *spermo-, sperm-,* from *sperma,* meaning *seed, germ,* as in *spermophile, spermangium.*

sper′mo·blast (-blăst), *n.* [*spermo-* + *-blast.*] A spermatoblast. — **sper′mo·blas′tic** (-blăs′tĭk), *adj.*

sper′mo·carp (spûr′mō·kärp), *n.* [*spermo-* + *-carp.*] *Bot.* In the Characeae, the fertilized oögonium. *Rare.*

sper′mo·derm (-dûrm), *n.* [*spermo-* + *-derm.*] *Bot.* The testa.

sper′mo·duct (-dŭkt), *n. Zool. & Anat.* A spermatic duct.

sper·mog′e·nous (spĕr·mŏj′ē·nŭs), *adj.* [*spermo-* + *-genous.*] *Biol.* Giving rise to sperms.

sper′mo·gone (spûr′mō·gōn), *n.* A spermogonium.

sper′mo·go·nif′er·ous (-gō·nĭf′ĕr·ŭs), *adj.* [*spermogonium* + *-ferous.*] *Bot.* Bearing spermogonia.

sper′mo·go′ni·um (spûr′mō·gō′nĭ·ŭm), *n.; pl.* -NIA (-nĭ·ȧ). [NL., fr. *spermo-* + Gr. *gonē* offspring.] *Bot.* A flask-shaped or depressed receptacle in which spermatia are produced in certain ascocarpus fungi and lichens. See SPERMATIUM **b**; PYCNIUM. Cf. CONCEPTACLE.

sper·mog′o·nous (spĕr·mŏg′ō·nŭs), *adj. Bot.* Pertaining to or resembling spermogonia.

sperm oil. A pale-yellow oil found, with spermaceti, in the head cavities and blubber of the sperm whale, and often classed as a liquid wax. See WAX, 2 **a.** It is a valuable lubricant for light machinery.

sper·mol′o·ger (spĕr·mŏl′ō·jĕr), *n.* Seed gatherer. *Rare.*

sper·mol′o·gy (-jĭ), *n.* [*spermo-* + *-logy.*] Botany which deals with seeds. — **sper′mo·log′i·cal** (spûr′mō·lŏj′ĭ·kăl), *adj.* — **sper·mol′o·gist** (spĕr·mŏl′ō·jĭst), *n.*

sper′mo·phile (spûr′mō·fīl; -fĭl), *n.* [Gr. *sperma* a seed + *-phile.*] Any of numerous burrowing rodents of the genus *Citellus* (syn. *Spermophilus*) and allied genera of northern Europe, Asia, and North America, called also *gopher* and *ground squirrel.* They are related to the marmots and the true squirrels, but are much smaller than the marmots and mostly have shorter, coarser fur than the squirrels. They inhabit open prairies, arid regions, and mountains, living in colonies and doing great damage to crops. Most of them hibernate, and all have internal cheek pouches for carrying food. The best-known Old World species is the *suslik.* A common species of the Great Plains of the United States is the striped spermophile (*C. tridecemlineatus*), striped with reddish brown and buff. A species (*C. franklini*) of the Mississippi Valley and another (*C. beecheyi*) of California are larger and grayish.

sper′mo·phore (spûr′mō·fōr; 181), **sper′mo·pho′ri·um** (-fō′rĭ·ŭm; 181), *n.* [NL. *spermophorium.*] *Rare.* **a** A spermatophore. **b** A seminal vesicle.

sper′mo·phore. Var. of SPERMAPHORE.

sper′mo·the′ca (spûr′mō·thē′kȧ), *n.* [NL., fr. *spermo-* + *-theca.*] *Anat.* The orifice of the vagina.

sper′mo·tox′in (-tŏk′sĭn), *n.* [*spermo-* + *-toxin.*] *Biochem.* A cytotoxin active against spermatozoa.

sper′mous (spûr′mŭs), *adj.* Resembling, or of the nature of, sperm.

-sper′mous (-spûr′mŭs). Also **-sper′mal** (-mŭl), **-sper′mic** (-mĭk). [See SPERM.] Combining forms, Greek *-spermos,* used, chiefly in botany, to signify *having* (such or so many) *seeds* or *germs; seeded;* as in poly*spermous,* pterospermous, mono*spermous,* mono*spermal,* peri*spermic,* etc.

sperm receptor. *Biol.* In Lillie's theory of fertilization, a substance present in sperm cells which acts in conjunction with fertilizin and egg receptor in the process of fertilization.

sperm sac. A spermatheca.

sperm whale. A large whale (*Physeter catodon,* syn. *macrocephalus*) of the warmer parts of all oceans; — called also *cachalot.* Its head has a large closed cavity, called the *case,* containing a fluid mixture of spermaceti and oil; its blubber produces oil of fine quality. Its lower jaw is provided with a series of large conical teeth, but the upper

Sperm Whale.

jaw has no functional teeth and no whalebone. It attains a length of about 60 feet, and is the only whale having a throat large enough to admit a man. Ambergris is a pathological secretion of its intestines. Several related whales of the genus *Kogia,* also of southern seas, are only nine to twelve feet in length, and hence are called *pygmy sperm whales.*

sperm′-whale′ por′poise. The beaked whale *Hyperoodon ampullatum,* syn. *rostratum.*

sperm whaling. The search for and capture of sperm whales. — **sperm whaler.**

sperm′y (spûr′mĭ), *adj.* Spermous.

-spermy. *Bot. & Zool.* A suffix denoting *state,* forming nouns to accompany adjectives in *-spermous,* as in gymnospermy, monospermy. See -Y.

spe′ro·na′ro (spā′rō·nä′rō), *n.; pl.* -NAROS, -NAROES (-rōz). Also **spe′ro·na′ra** (-rä); *pl.* -NARAS (-räz), -NARES (-rēz). [It. *speronara.*] A kind of large open boat, rowed with oars but also having a lateen sail, used in southern Italian waters.

spe·ro′ne (spä·rō′nä), *n.* [It., spur.] **1.** A building stone quarried near the site of ancient Gabii.

2. *Petrog.* A porous or scoriaceous leucitite with aegirite instead of augite. Some varieties contain melanite.

sper′ry·lite (spĕr′ĭ·līt), *n.* [After F. L. *Sperry,* Sudbury, Ontario.] *Mineral.* A platinum arsenide, $PtAs_2$, occurring in grains and minute isometric crystals of a tin-white color. H., 6–7. Sp. gr., 10.60. It is found near Sudbury, Ontario, Canada, and is the only compound of platinum known to occur in nature.

sperse (spûrs), *v. t. & i.* To disperse. *Archaic.*

‖**spes** (spēz), *n.* [L.] **1.** Hope.

2. [*cap.*] *Rom. Relig.* The goddess of hope, originally worshiped as a goddess propitious to the hope of abundant harvests, and of animal and human offspring. Through Greek influence she came to be associated with Fortuna.

‖**spes bo′na** (bō′nȧ). [L.] Good hope; — motto of Cape Province.

‖**spes me′a Chris′tus** (mē′ȧ krĭs′tŭs). [L.] Christ (is) my hope.

‖**spes re·cu′pe·ran′di** (rē·kū′pĕ·răn′dī). [L.] *Law.* Hope of recovery (of captured goods).

spes′sart·ite (spĕs′ĕr·tīt), *n.* Also **spes′sart·ine** (-tĭn). [From *Spessart,* Germany.] **a** A manganesian variety of garnet. See GARNET, 1. **b** A lamprophyric dike rock consisting chiefly of common green hornblende and plagioclase.

‖**spes suc·ces′si·o′nis** (sŭk·sĕsh′ĭ·ō′nĭs). [L.] Hope of succession (as of an heir apparent).

spet (spĕt), *v. & n.* [ME. *spetten, speten,* v., fr. AS. *spætan.*] Spit. *Now Dial.*

spet (spĕt), *n.* [F. & It. dial. *spet,* Sp. *espeto, espetón,* prop., a spit, of Teut. origin. See 1st SPIT.] A small barracuda (*Sphyraena sphyraena*) of southern Europe; — called also *sennet.*

Spet (*Sphyraena sphyraena*).

spetch (spĕch), *n.; pl.* SPETCHES (-ĕz; -ĭz; 119). [Akin to SPECK a patch.] **a** *Dial.* A patch of any kind. **b** *pl.* Parings and refuse of leather hides, skins, etc., used as a by-product, as for making glue.

spetch, *v. t.* To mend; patch. *Dial. Eng.*

spey′chan (spē′kăn), *n.* Spleuchan. *Scot.*

spew (spū), *v.;* SPEWED (spūd); SPEW′ING. [ME. *spewen, speowen, spiwen,* fr. AS. *spīwian* (weak v.), *spīwan* (strong v.); akin to D. *spuwen* to spit, OS. & OHG. *spīwan,* G. *speien,* ON. *spýja* to spew, Sw. *spy,* Goth. *spiwan,* Lith. *spjauti* to spit, L. *spuere,* Gr. *ptyein,* Skr. *ṣṭhīvati* he spits. Cf. CUSPIDOR, SPIT to eject, SPOUT, SPUTUM.] *Transitive:* **1.** To eject from the stomach; to vomit.

2. To cast forth, as with disgust; to eject violently; as, volcanos *spewing* their lava in red-hot masses.

3. To force out; to extrude, as rubber in seamless tubes. Also, *Dial.,* to force up in ruts or ridges, as ground by frost.

4. Loosely, to scatter; strew. *Local, U. S.*

—, *Intransitive:* **1.** To vomit; figuratively, to pour forth.

2. To slip, as wet land swollen with frost.

3. To come out or exude, as oilseed meal from a press; to ooze forth.

spew (spū), *n.* **1.** **a** That which is vomited; vomit. **b** *Dial.* Spewy soil; a bog.

2. *Beekeeping.* An afterswarm, esp. the third. *Dial.*

spew′er (spū′ĕr), *n.* One who spews.

spew′ing, *pres. part. & verbal n.* of SPEW. Specif.: **a** An exudation of soft material through gravelly or broken stuff bedded on mud, soft wet clay, or the like. **b** A sweating of oily matter from curried leather. — *adj.* Of ground, wet; oozing. *Now Rare.*

spewing sickness. *Veter.* A disease of sheep and cattle caused by eating the sneezeweed *Helenium hoopesii,* characterized by extreme weakness, rapid, irregular pulse, nausea, and vomiting.

spew′y (spū′ĭ), *adj.;* SPEW′I·ER (-ĕr); SPEW′I·EST. Wet; boggy; foggy; also, frothy; pulpy. *Eng.* — **spew′i·ness** (-ĭ·nĕs; -nĭs; 119), *n. Eng.*

spex (spĕks), *n.* Spectacles. *Slang & Cant.*

Spey′side′ pine (spā′sīd′). [*Spey,* river of Scotland + *-side.*] A variety (*Pinus sylvestris horizontalis*) of the Scotch pine, having horizontal branches and red wood.

sphac′el (sfăs′ĕl), *n.* [MF.] *Med.* Gangrene.

Sphac′e·la′ri·a (sfăs′ē·lā′rĭ·ȧ; 79), *n.* [NL. See SPHACELUS.] *Bot.* A genus of small feathery brown algae similar to *Ectocarpus,* having the area of growth restricted to the (often extremely large) apical cells. It typifies a family

sper′ma·to·fite′. Spermatophyte. *Ref. Sp.*

sper′ma·to·gem′ma (spûr′mȧ·tō·jĕm′ȧ), *n.* [NL.] *Biol.* A mass of developing spermatocytes. *Obs.*

sper′ma·to·gone′ (spûr′mȧ·tō·gōn′), *n.* [See SPERMATOGONIUM.] In certain Protozoa, a cell whose offspring are sperms. *Obs.*

sper′ma·to·spore′ (-spōr′; 181), *n.* A spermospore. *Obs.*

sper′ma·tox′in (-tŏk′sĭn), *n.* = SPERMOTOXIN.

-sper′me·ae. See -SPERM.

sper′mi·fi·ca′tion (spûr′mĭ·fĭ·kā′shŭn), *n.* [*sperm* + *-fication.*] Secretion of sperm. *Obs.*

sper′mo·ven′ter (spûr′mō·vĕn′tĕr), *n.* [See SPERMATOGONIUM.] **a** *Bot.* = SPERM CENTER.

sper′mo·gen′e·sis (-jĕn′ē·sĭs), *n.* [NL.] = SPERMATOGENESIS.

spermo·mol′y·sis (spĕr·mŏl′ĭ·sĭs), *n.* [NL.] = SPERMATOLYSIS. — **sper′mo·lyt′ic** (spûr′mō·lĭt′ĭk), *adj.*

Sper·moph′i·lus (-mŏf′ĭ·lŭs), *n.* [NL.] *Zool.* Syn. of CITELLUS, the chief genus of spermophiles. — **sper·moph′i·line** (-lĭn; -līn; 156), *adj. & n.*

Sper·moph′y·ta (spĕr·mŏf′ĭ·tȧ), *n. pl.* Syn. of SPERMATOPHYTA.

sper′mo·phyte (spûr′mō·fīt), *n. Bot.* = SPERMATOPHYTE. — **sper′mo·phyt′ic** (-fĭt′ĭk), *adj.*

sper′mo·plasm (-plăz′m), *n. Biol.* Spermatoplasm. *Obs.*

sper′mo·sphere, *n.* [*spermo-* + *sphere.*] Spermatogemma. *Obs.*

sper′mo·spore, *n.* [*spermo-* + *spore.*] *Biol., Obs.* **a** A cell that divides and forms spermatoblasts. **b** A spermatogemma.

sperm·o′vi·duct (spûr·mō′vĭ·dŭkt), *n.* [*sperm-* + *oviduct.*] = HERMAPHRODITE DUCT.

sperm′ule (spûr′mŭl), *n.* [Dim. fr. *sperm.*] *Zool.* A sperm cell. *Obs.*

-sper′mum. See -SPERM.

sper′on, *n.* [It. *sperone,* or OF. *esperon.*] Literally, spur; the beak of a ship. *Obs.*

sperple. † SPARPLE.

sperr. † SPAR.

sperrable. † SPARABLE.

sperre. † SPAR, SPHERE, SPUR.

sper′rit. Var. of SPIRIT. *Obs. exc. Dial.*

sperth. Var. of SPARTH.

sper′ver. Var. of SPARVER.

‖**spes tu·tis′si·ma cae′lis.** [L.] The safest hope is in heaven.

spet. † SPEED.

spet′tle, *n. Obs.* = SPITTLE.

‖**spet′de bra·de′os** (spŭ′dē brăd′ē·ōs). [Gr. *speudē bradeōs.*] Make haste slowly; — attributed to Augustus. Cf. festina lente. *Suetonius* (II. 25).

spewd. Spewed. *Ref. Sp.*

spey (spā). Var. of SPAR.

spey cast. = SWITCH CAST.

Sphac'e-la'ri-a'ce-ae (-ā'sē-ē), which is commonly made a separate order, **Sphac'e-la'ri-a'les** (-lēz). — **sphac'e-lar'i-a'ceous** (-lär'ĭ-ā'shŭs), *adj.*

sphac'e-late (sfăs'ĕ-lāt), *v. i.;* SPHAC'E-LAT'ED (-lāt'ĕd; -ĭd; 119); SPHAC'E-LAT'ING (-lāt'ĭng). [NL. *sphacelare, sphacelatum,* to mortify. See SPHACELUS.] *Med.* To become gangrenous, as flesh or bone; to mortify. — *v. t. Med.* To affect with gangrene. — **sphac'e-la'tion** (-lā'shŭn), *n.*

sphac'e-late (sfăs'ĕ-lāt), *adj.* **1.** *Med.* Affected with gangrene; mortified.
2. *Bot.* Withered or decayed.

spha-ce'li-a (sfā-sē'lĭ-ȧ), *n.* [NL., fr. Gr. *sphakelos* gangrene.] *Bot.* The conidial stage of ergot (*Claviceps purpurea*), orig. described as a distinct genus of fungi; — now commonly called **sphacelial stage.** — **spha-ce'li-al** (-ăl), *adj.*

sphac'el-ism (sfăs'ĕl-ĭz'm), *n. Med.* Sphacelate condition.

sphac'e-lo-der'ma (sfăs'ĕ-lō-dûr'mȧ), *n.* [NL. See SPHACELUS; -DERM.] Gangrene of the skin.

Sphac'e-lo'ma (sfăs'ĕ-lō'mȧ), *n.* [NL. See SPHACELUS.] *Bot.* A form genus of imperfect fungi regarded as distinct from *Gloeosporium* by some authorities. *S. ampelina* (syn. *Gloeosporium ampelophagum*) causes bird's-eye rot of grapes.

sphac'e-lo-tox'in (-lō-tŏk'sĭn), *n.* [Gr. *sphakelos* gangrene + *toxin.*] *Chem.* A yellow crystalline substance said to be the active principle of ergot.

sphac'e-lous (sfăs'ĕ-lŭs), *adj.* [See SPHACELUS.] *Med.* Gangrenous; of or pertaining to gangrene.

sphac'e-lus (sfăs'ĕ-lŭs), *n.* [NL., fr. Gr. *sphakelos* gangrene.] *Med.* Gangrene; mortification; necrosis; also, a gangrenous or necrosed part or mass; slough.

sphaer —. = SPHAERO —.

-sphaera. [NL.] *Bot. & Zool.* A combining form from Greek *sphaira,* ball, sphere, used chiefly in classificational names, as in Micro*sphaera.*

Sphae-ral'ce-a (sfē-răl'sē-ȧ), *n.* [NL., fr. *sphaer-* + Gr. *alkea* a malvaceous plant.] *Bot.* A large genus of chiefly tropical herbs (family Malvaceae) some of which are cultivated for their showy pink or scarlet flowers; the globe mallows.

sphae-raph'i-des (sfē-räf'ĭ-dēz), *n. pl.* [NL., fr. *sphaer-* + Gr. *rhaphis* needle.] *Bot.* Spherical aggregations of raphides in certain plant cells.

sphae-ren'chy-ma (sfē-rĕng'kĭ-mȧ), *n.* [NL., fr. *Sphaer-* + *enchyma.*] *Bot.* Spheroidal parenchyma.

Sphae'ri-a'ce-ae (sfē'rĭ-ā'sē-ē), *n. pl.* [NL.] *Bot.* The type family of Sphaeriales. — **sphae'ri-a'ceous** (-shŭs), *adj.*

Sphae'ri-a'les (sfē'rĭ-ā'lēz), *n. pl.* [NL., fr. *Sphaeria* a genus of fungi, fr. Gr. *sphaira* globe.] *Bot.* One of the largest orders of sac fungi (group Pyrenomycetes), the sphere fungi, embracing some 2,000 species parasitic on leaves, wood, or stems, and having globose, sometimes beaked or necked perithecia, usually with ostioles. With related orders they comprise the group called *Pyrenomycetes.*

sphae-rid'i-um (sfē-rĭd'ĭ-ŭm), *n.;* *pl.* -RIDIA (-ȧ). [NL. dim. fr. Gr. *sphaira* sphere.] *Zool.* One of the peculiar organs on the exterior of most sea urchins, consisting of an oval or spherical head surmounting a short pedicel. Their function is perhaps that of balancing organs. — **sphae-rid'i-al** (-ĭ-ăl), *adj.*

Sphaeridia of various Sea Urchins, much enlarged.

Sphae'ri-oi-da'ce-ae (sfē'rĭ-oi-dā'sē-ē), *n. pl.* [NL.] *Bot.* A family of imperfect fungi (order Sphaeropsidales) including numerous parasitic species. They have globose, conic, or lenticular, black pycnidia.

sphae'ris-te'ri-um (sfē'rĭs-tē'rĭ-ŭm), *n.* [L., fr. Gr. *spharistērion,* fr. *sphairizein* to play at ball.] *Gr. & Rom. Antiq.* A room or enclosure for ball playing.

sphae'rite (sfē'rĭt), *n.* [G. *sphärit,* fr. Gr. *sphaira* ball.] *Mineral.* A light-gray or bluish hydrous aluminum phosphate, in globular concretions.

Sphae'ri-um (sfē'rĭ-ŭm), *n.* [NL., fr. Gr. *sphairion,* dim. of *sphaira* sphere.] *Zool.* A widely distributed genus of small viviparous fresh-water bivalves (Eulamellibranchia) having a thin, light-colored shell and the siphons separate. It is the type of a family, **Sphae-ri'i-dae** (sfē-rĭ'ĭ-dē).

sphaero-, sphaer-. A combining form, Greek *sphairo-, sphair-,* from *sphaira,* meaning *ball, sphere,* used to denote *sphere, spherical,* esp. in natural sciences, as in *sphaero*cobaltite, *sphaer*enchyma.

sphae'ro-blast (sfē'rō-blăst), *n.* [*sphaero-* + *-blast.*] *Bot.* A nodule of wood separated from the central woody cylinder and enclosed by bark.

Sphae-rob'o-la'ce-ae (sfē-rŏb'ō-lā'sē-ē), *n. pl.* [NL., fr. *sphaero-* + Gr. *bolos* a throw.] *Bot.* A family of fungi (group Gasteromycetes) in which the more or less spherical gleba is forcibly ejected. The family includes the single genus **Sphae-rob'o-lus** (-rŏb'ō-lŭs).

Sphae'ro-car'pus (sfē'rō-kär'pŭs), *n.* [NL., fr. *sphaero-* + *-carpus.*] *Bot.* A small genus of anacrogynous liverworts, having a small, many-lobed, usually orbicular, thallus and with the spores nearly always in permanent tetrads. It typifies a family, **Sphae'ro-car-pa'ce-ae** (-kär-pā'sē-ē), classed in a separate order, **Sphae'ro-car-pa'les** (-lēz), or sometimes included in the group Anacrogynae of the order Jungermanniales. Cf. JUNGERMANNIACEAE.

sphae'ro-co-bal'tite (sfē'rō-kō-bôl'tĭt; -kō'bôlt-ĭt), *n.* [*sphaero-* + *cobaltite.*] *Mineral.* Native cobaltous carbonate, $CoCO_3$, occurring usually in small, rose-red, spherical masses. Sp. gr., 4.02–4.13.

Sphae'ro-coc-ca'ce-ae (sfē'rō-kŏ-kā'sē-ē), *n. pl.* [NL. fr. *Sphaerococcus,* type genus (*sphaero-* + *-coccus*) + *-aceae.*] *Bot.* A family of red algae (order Rhodymeniales), having a much branched thallus with the cystocarps enclosed in semiglobular swellings of the peripheral tissues. **Sphae'ro-coc'cus** (-kŏk'ŭs) is the type genus. See GRACILARIA. — **sphae'ro-coc-ca'ceous** (-kō-kā'shŭs), *adj.*

Sphae-ro'ma (sfē-rō'mȧ), *n.* [NL. See SPHERE.] *Zool.* A genus of marine isopod crustaceans with short oval bodies which in many cases can be rolled into a ball. It typifies a family, **Sphae-rom'i-dae** (-rŏm'ĭ-dē).

Sphae-roph'o-rus (sfē-rŏf'ō-rŭs), *n.* [NL., fr. *sphaero-* + *-phorus.*] *Bot.* A genus of gymnocarpous lichens typifying a family, **Sphae-roph'o-ra'ce-ae** (-rā'sē-ē), characterized by a foliaceous or fruticose thallus, with terminal globose apothecia bearing continuous, dark-colored ascospores.

Sphae-rop'si-da'les (sfē-rŏp'sĭ-dā'lēz), *n. pl.* [NL., fr. *Sphaeropsis.*] *Bot.* An order of four families of the Fungi Imperfecti, the conidia occurring in pycnidia or cavities resembling perithecia in form. The most important family is Sphaerioidaceae.

Sphae-rop'sis (sfē-rŏp'sĭs), *n.* [NL., fr. *sphaer-* + *-opsis.*] *Bot.* A form genus of imperfect fungi (family Sphaerioidaceae) with large, unicellular, dark pycnospores. Certain fungi formerly included in this genus have, since the discovery of their perfect stages, been placed in various other genera, as *Physalospora.*

sphae'ro-sid'er-ite (sfē'rō-sĭd'ĕr-īt), *n.* Siderite occurring in spheroidal masses.

sphae'ro-spore (sfē'rō-spōr; 181), *n.* [*sphaero-* + *spore.*] *Bot.* A tetraspore. *Rare.*

Sphae'ro-stil'be (sfē'rō-stĭl'bē), *n.* [NL., fr. *sphaero-* + Gr. *stilbein* to shine.] *Bot.* A genus of fungi (family Hypocreaceae) characterized by red perithecia borne on slender stromatic stalks, and 2-celled ascospores. *S. repens* is connected with a root disease of tea, rubber, and other tropical plants, while *S. musarum* causes a similar root disease of banana.

Sphae'ro-the'ca (sfē'rō-thē'kȧ), *n.* [NL., fr. *sphaero-* + *-theca.*] *Bot.* A genus of powdery mildews (family Erysiphaceae) having perithecia with one ascus and hyphalike unbranched appendages. *S. humili* causes the destructive hop mildew, and *S. mors-uvae,* the gooseberry mildew.

Sphae-rot'i-lus (sfē-rŏt'ĭ-lŭs), *n.* [NL., fr. *sphaero-* + Gr. *tilos* fiber.] *Bacteriol.* A genus of rod-shaped bacteria of the family Chlamydobacteriaceae.

spha'gi-on (sfā'jĭ-ŏn; sfăg'ĭ-ŏn), *n.;* *pl.* -GIA (-ȧ). [Gr.] *Gr. Relig.* An animal sacrifice; also the victim of a sacrifice. Sphagia are distinguished from propitiatory sacrifices, which are called *hiera.*

Sphag-na'ce-ae (sfăg-nā'sē-ē), *n. pl.* [NL.] *Bot.* A family constituting the Sphagnales. — **sphag-na'ceous** (-shŭs), *adj.*

Sphag-na'les (sfăg-nā'lēz), *n. pl.* [NL. See SPHAGNUM.] *Bot.* An order of mosses (Musci) constituted by the peat mosses. See SPHAGNUM.

sphag-nic'o-lous (sfăg-nĭk'ō-lŭs), *adj.* [*Sphagnum* + L. *colere* to inhabit.] *Bot.* Inhabiting, or growing in, sphagnum moss.

sphag-nol'o-gy (sfăg-nŏl'ō-jĭ), *n.* [*Sphagnum* + *-logy.*] *Bot.* The branch of bryology which treats of the Sphagnales, or peat mosses. — **sphag-nol'o-gist** (-nŏl'ō-jĭst), *n.*

sphag'nous (sfăg'nŭs), *adj. Bot.* Pertaining to mosses of the genus *Sphagnum;* abounding in peat or bog moss.

Sphag'num (sfăg'nŭm), *n.* [NL., fr. Gr. *sphagnos* a kind of moss.] **1.** *Bot.* A large genus of mosses, type and sole representative of the family Sphagnaceae; the peat, or bog, mosses. They form a remarkably distinct group, having a protonema not filamentous, but like the prothallium of a fern; the pseudopodium is an outgrowth of the gametophyte, and not a part of the sporogonium, as in other mosses. The leaves contain abundant aqueous tissue composed of colorless cells, interspersed with those containing chloroplasts. The plants grow only in swamps or in water, where by annual decay they build up layers of peat. Some of the species, esp. *S. papillosum,* are highly absorptive and soft, and are used for surgical dressings.

Sporogonium of Sphagnum (*S. cymbifolium*). 1 Operculum; 2 Calyptra; 3 Vaginula; 4 Stalk, or Pseudopodium.

2. [*not cap.*] Any plant of the genus *Sphagnum;* also, collectively, a mass of these plants used by florists in packing, potting, etc.
3. A dried mass of these plants made into pads for use as an absorbent dressing in surgery and for the manufacture of sanitary napkins.

sphagnum bog. A bog containing sphagnum and also usually other characteristic and acid-tolerant plants, such as the pitcher plant (*Sarracenia*), sundew (*Drosera*), and often, heaths.

sphagnum frog. A moderately small American frog (*Rana virgatipes*) ranging from New Jersey to Georgia, distinguished by four long, narrow, brown stripes above.

Spha'ki-ot (sfā'kĭ-ŏt), *n.* One of the natives of the province of Sphakia on the south coast of Crete.

sphal'er-ite (sfăl'ĕr-īt; sfā'lĕr-), *n.* [Gr. *sphaleros* treacherous, uncertain.] *Mineral.* A widely distributed ore of zinc, composed essentially of zinc sulphide, ZnS, but often containing iron, manganese, etc. It occurs in isometric crystals or cleavable masses of resinous to adamantine luster and (commonly) yellow, brown, or black color. H., 3.5–4. Sp. gr., 3.9–4.1. It has a highly perfect dodecahedral cleavage. Called also *blende* or *zinc blende, mock lead, false galena, blackjack.*

Sphec'i-dae (sfĕs'ĭ-dē), *n. pl.* [NL., fr. Gr. *sphēx, sphēkos,* wasp + *-idae.*] *Zool.* A family of solitary wasps (superfamily Sphecoidea) having the first segment of the abdomen generally prolonged into a long, smooth, cylindrical petiole, as in the mud daubers and some digger wasps. — **sphec'id** (-ĭd), *n. & adj.*

Sphe-ci'na (sfē-sī'nȧ), *n. pl.* [NL., fr. Gr. *sphēx, sphēkos,* wasp + *-ina.*] *Zool.* A group of wasps nearly equivalent to Fossores. See DIGGER WASP.

Sphe-coi'de-a (sfē-koi'dē-ȧ), *n. pl.* [NL. See SPHECIDAE; -OIDEA.] *Zool.* A superfamily of Hymenoptera, more or less equiv. to the Fossores (see DIGGER WASP) and comprising the Sphecidae and related families. In some classifications it also includes the bees, now usually placed in the separate superfamily Apoidea.

sphen —. = SPHENO —.

sphen'do-ne (sfĕn'dō-nē), *n.* [Gr. *sphendonē.*] *Gr. Antiq.* **a** A kind of woman's headband or fillet. **b** A semicircular part or place, as at the end of a stadium.

sphene (sfēn), *n.* [F. *sphène,* fr. Gr. *sphēn* wedge; from a form of its crystals.] *Mineral.* Titanite, esp. when light-colored.

sphe-neth'moid (sfē-nĕth'moid), *adj.* [*sphen*oid + *eth*moid.] *Zool.* Designating, or pertaining to, a bone of the skull which surrounds the anterior end of the brain in many amphibia. — *n.* The sphenethmoid bone; the girdle bone.

sphe'nic (sfē'nĭk), *adj.* [Gr. *sphēn* wedge.] Wedge-shaped; as, a *sphenic* number, or one having for its factors three unequal prime integers.

sphe'ni-on (-nĭ-ŏn), *n.* [NL., fr. Gr. *sphēn* a wedge.] *Craniol.* The lower frontal apex of the parietal bone. See CRANIOMETRY, *Illust.*

Sphe-nis'ci (sfē-nĭs'ī), *n. pl.* [NL.] *Zool.* A suborder coextensive with Sphenisciformes.

Sphe-nis'ci-dae (sfē-nĭs'ĭ-dē), *n. pl.* [NL. See SPHENISCUS.] *Zool.* A family containing all the existing penguins. See PENGUIN, 2. — **sphe-nis'cine** (-īn; -ĭn), *adj.*

Sphe-nis'ci-for'mes (-ĭ-fôr'mēz), *n. pl.* [NL.] *Zool.* The order of flightless aquatic birds comprising the penguins. See PENGUIN, 2.

Sphe-nis'co-mor'phae (sfē-nĭs'kō-môr'fē), *n. pl.* [NL.] See SPHENISCUS; -MORPH.] *Zool.* In Huxley's classification, a group equivalent to Sphenisciformes. — **sphe-nis'co-morph** (-nĭs'kō-môrf), *n.* — **sphe-nis'co-mor'phic** (-môr'fĭk), *adj.*

Sphe-nis'cus (sfē-nĭs'kŭs), *n.* [NL., fr. Gr. *sphēniskos* a small wedge, fr. *sphēn* wedge; — from the shortness of the bird's wings.] *Zool.* The genus containing the jackass penguin.

sphe'no- (sfē'nō-), **sphen-.** A combining form, Greek *sphēno, sphēn-,* from *sphēn,* wedge, meaning *wedge, wedge-shaped,* as in *sphen*ogram, *Sphen*odon; specif., *Anat.,* denoting *connection with,* or *relation to, the sphenoid bone,* as in *sphen*otribe. *Spheno-* in adjectives denotes also *sphenoid and,* as in *sphen*opalatine. The meaning of the following can be understood from the definitions of their elements.

sphenethmoid	**sphenomandibular**	**sphenosquamosal**
sphenoethmoid	**sphenomaxillary**	**sphenotemporal**
sphenoethmoidal	**spheno-occipital**	**sphenotripsy**
sphenofrontal	**sphenoparietal**	**sphenovomerine**
sphenomalar	**sphenopetrosal**	**sphenozygomatic**

sphe'no-bas'i-lar (-băs'ĭ-lĕr), *adj.* [*spheno-* + *basilar.*] Of or pertaining to the sphenoid and the basilar part of the occipital bone. — **sphe'no-ba-sil'ic** (-bȧ-sĭl'ĭk), *adj.*

sphe'no-ceph'a-ly (sfē'nō-sĕf'ȧ-lĭ), *n.* [*spheno-* + Gr. *kephalē* head.] *Craniol.* Wedge shape of the head due to synosteosis of the sagittal suture with compensatory growth in the region of the anterior fontanel. — **sphe'no-ceph'a-lous** (-lŭs), **sphe'no-ce-phal'ic** (-sē-făl'ĭk), *adj.*

Sphe'no-don (sfē'nō-dŏn), *n.* [NL., fr. *sphen-* + *-odon.*] *Zool.* **a** The genus containing the tuatara (which see); — syn. *Hatteria.* It constitutes a family, **Sphe'no-don'ti-dae** (-dŏn'tĭ-dē) included in a suborder, **Sphe'no-don'ti-a** (-shĭ-ȧ). **b** [*not cap.*] Any animal of this genus. — **sphe'no-dont** (sfē'nō-dŏnt), *adj. & n.*

sphe'no-gram (sfē'nō-grăm), *n.* [*spheno-* + *-gram.*] A cuneiform, or arrowheaded, character. See CUNEIFORM.

sphe-nog'ra-phy (sfē-nŏg'rȧ-fĭ), *n.* [*spheno-* + *-graphy.*] Art of writing in or deciphering cuneiform characters. — **sphe-nog'ra-pher** (-fĕr), *n.* — **sphe'no-graph'ic** (sfē'nō-grăf'ĭk), *adj.* — **sphe-nog'ra-phist** (sfē-nŏg'rȧ-fĭst), *n.*

sphe'noid (sfē'noid), *adj.* [Gr. *sphēnoeidēs,* fr. *sphēn* a wedge + *eidos* form.] **1.** Wedge-shaped; as, a *sphenoid* crystal.
2. *Anat. & Zool.* Designating, pertaining to, or in the region of, a compound bone of the base of the cranium of various vertebrates, formed by the fusion of several bony elements with the basisphenoid (the element of the basicranial axis next in front of the basioccipital). The extent and manner of fusion of the different elements varies in different animals, and in comparative anatomy the elements are commonly treated separately. In man the sphenoid bone consists of a median body, from whose sides extend a pair of broad, curved, winglike expansions, the *greater wings.* In front of these is another pair of much smaller triangular lateral processes, the *lesser wings.* From the lower surface two large deeply cleft processes, the *pterygoid processes* (which see), extend downward. The body of the sphenoid is chiefly formed of the basisphenoid, but its anterior part represents the presphenoid. The greater wings and external plate of the pterygoid processes are formed of the alisphenoids, and the lesser wings of the orbitosphenoids. The inner plate of the pterygoid processes represents the pterygoids of the lower vertebrates. See SPHENOTURBINAL.

sphe'noid (sfē'noid), *n.* **1.** *Cryst.* A wedge-shaped crystal form of the tetragonal system having four like isosceles faces, often observed with chalcopyrite. It may be regarded as a hemihedral form of the double square pyramid, that is, the form which results by suppressing alternate faces of the double pyramid and extending the remaining faces till they intersect. Some, however, call this a *bisphenoid,* and define a sphenoid as a form having two faces only, meeting in a wedge-shaped edge, which form can exist, on crystals, in combination only. See FORM, *n.,* 22.

Tetragonal Sphenoid.

2. The sphenoid bone.

sphe-noi'dal (sfē-noi'dăl; -d'l), *adj.* **1.** Sphenoid.
2. *Cryst.* Pertaining to, or resembling, a sphenoid.

sphenoidal fissure. *Anat.* The fissure between the greater and lesser wing of the sphenoid bone.

sphenoidal group. See SYMMETRY, 3.

sphenoidal process. *Anat.* **a** A process on the superior border of the vertical plate of the palatine bone articulating with the sphenoid. **b** A backward prolongation of the cartilage of the nasal septum between the vomer and the perpendicular plate of the ethmoid.

sphenoidal sinus. *Anat.* Either of two irregular cavities in the body of the sphenoid bone. They communicate with the nasal cavities.

sphenoidal spongy bones, sphenoidal turbinated bones. *Anat.* The sphenoturbinal bones.

sphe'noi-di'tis (sfē'noi-dĭ'tĭs), *n.* [NL. See SPHENOID; -ITIS.] *Med.* Inflammation of the sphenoidal sinus.

sphe'no-lith (sfē'nō-lĭth), *n.* [*spheno-* + *-lith.*] *Geol.* A wedge-shaped intrusive mass of igneous rock.

sphenomaxillary fissure. The inferior orbital fissure.

sphenomaxillary fossa. The pterygopalatine fossa.

sphe'no—oc-cip'i-tal suture. *Anat.* The junction between the basisphenoid and basioccipital bones of the mammalian skull, in man usually closed by the age of twenty-five. In early life the two bones are held together by cartilage, and the junction is called the **spheno—occipital synchondrosis.**

sphe'no-pal'a-tine (sfē'nō-păl'ȧ-tĭn; -tīn), *adj. Anat.* Pertaining to the sphenoid and palatine bones.

sphenopalatine foramen. *Anat.* A foramen, or more often a deep notch (***sphenopalatine notch***) between the sphenoidal and orbital parts of the vertical plate of the palatine bone which by articulation with the sphenoid bone is converted into a foramen.

sphenopalatine ganglion. An autonomic ganglion on the maxillary nerve in the pterygopalatine fossa, receiving preganglionic fibers from the facial nerve by way of the greater superficial petrosal nerve (see VIDIAN NERVE) and sending postganglionic fibers to the nasal mucosa, palate, pharynx, and orbit. Sympathetic fibers from the carotid plexus pass through the ganglion.

sphenoparietal index. *Craniom.* The ratio of the breadth of the skull from stenion to stenion to its greatest breadth.

Sphe-noph'o-rus (sfē-nŏf'ō-rŭs), *n.* [NL., fr. *spheno-* + *-phorus.*] *Zool.* A genus of weevils known as *billbugs* whose larvae bore in the roots and stems of grains, as corn, and grasses.

---

sphac'e-lat'ed (sfăs'ĕ-lāt'ĕd; -ĭd; 119), *adj.* = SPHACELATE.

Sphae-rel'la (sfē-rĕl'ȧ), *n.* [NL., dim. fr. L. *sphaera* sphere; — in allusion to the spherical asci.] Syn. of MYCOSPHAERELLA.

Sphae-ri'i-dae, *n. pl.* See SPHAERIUM.

Sphae'ro-car'pos (sfē'rō-kär'pŏs). Var. of SPHAEROCARPUS.

sphae'roid, sphae-roi'dal. Vars. of SPHEROID, SPHEROIDAL.

sphae'ro-lite, *n.* = SPHERULITE.

sphae'ro-lit'ic, *adj.* = SPHERULITIC.

sphae-rom'e-ter. Var. of SPHEROMETER.

Sphae-rop'si-da'ce-ae (sfē-rŏp'sĭ-dā'sē-ē), *n. pl.* [NL. See -ACEAE.] = SPHAEROPSIDALES. — **sphae-rop'si-da'ceous** (-shŭs), *adj.*

sphaer'u-le (sfĕr'ŭ-lē; sfē'rŭ-lē), **sphaer'u-lite** (sfĕr'ŭ-līt; sfē'rŭ-). Vars. of SPHERULE, etc.

sphalm (sfăm), *n.* Also **sphal'ma** (sfăl'mȧ); *pl.* -MATA (-mȧ-tȧ). [Gr. *sphalma.*] False step; error. *Obs.* [Syn. of DERMOCHELYS.]

Sphar'gis (sfär'jĭs), *n.* [NL.] Var. of SPHECIDAE.

sphe'ges (sfē'jēz), *n.,* *pl.* of SPHEX.

Sphe'g'i-dae (sfĕj'ĭ-dē), *n. pl.* [NL.] Var. of SPHECIDAE.

sphegʼid (-ĭd), *n. & adj.*

Sphe-goi'de-a (sfē-goi'dē-ȧ), *n. pl.* Var. of SPHECOIDEA.

sphe'no-ce-pha'lĭ-a, *n.* = SPHENOCEPHALY.

Sphe'no·phyl·la'ce·ae (sfē'nō·fĭ·lā'sē·ē), *n. pl.* [NL.] See SPHENOPHYLLUM. — **sphe'no·phyl·la'ceous** (-shŭs), *adj.*

Sphe'no·phyl'lum (sfē'nō·fĭl'ŭm), *n.* [NL., fr. *spheno-* + Gr. *phyllon* leaf.] *Paleontol.* A genus of Paleozoic fossil plants allied to the club mosses and horsetails, but usually considered as typifying a distinct family (Sphenophyllaceae) and order (Sphenophyllales). They have jointed stems, whorls of cuneate leaves, and terminal cones or sporophylls. They occur from the Devonian to the Permian.

Sphe·nop'ter·is (sfē·nŏp'tĕr·ĭs), *n.* [NL., fr. *spheno-* + Gr. *pteris* fern.] *Paleontol.* A genus of Paleozoic fossil pteridosperms, having cuneate pinnules.

sphe·not'ic (sfē·nŏt'ĭk), *adj.* [*spheno-* + Gr. *ous, ōtos,* the ear.] Designating, or pert. to, a bone of the skull of many fishes, situated above the pro-otic and often forming part of the boundary of the orbit. — *n.* A sphenotic bone.

sphe'no·tribe (sfē'nō·trīb), *n.* [*spheno-* + Gr. *tribein* to rub, bruise.] *Obstetrics.* An instrument for crushing the fetal head to facilitate delivery, when normal delivery is not possible.

sphe'no·tur'bi·nal (sfē'nō·tûr'bĭ·năl; -n'l), *adj. Anat.* Pertaining to or designating a pair of small curved plates of bone at the anterior and inferior part of the body of the sphenoid bone. In man they are attached to the sphenoid until the age of puberty. — *n.* A sphenoturbinal bone.

spher'a·ble (sfĕr'ȧ·b'l), *adj.* That may be made spherical.

spher'al (sfĕr'ăl), *adj.* **1.** Of or pertaining to a sphere. **2.** Rounded like a sphere; sphere-shaped; hence, symmetrical; complete; perfect. **3.** Of or pert. to the spheres of ancient astronomy; hence, *Poetic,* in allusion to their supposed music, harmonious.

sphe·ral'i·ty (sfē·răl'ĭ·tĭ), *n.* Quality or state of being spheral, or spherical.

sphe·ras'ter (sfē·răs'tĕr), *n.* [See SPHERE; 1st -ASTER.] *Zool.* A many-rayed sponge spicule with a spherical central body.

sphe·ra'tion (sfē·rā'shŭn), *n.* [*sphere* + *-ation.*] Act or process of taking the form of a sphere.

sphere (sfēr), *n.* [ME. *spere,* fr. OF. *espere* (F. *sphère*), fr. L. *sphaera,* fr. Gr. *sphaira* sphere, ball, of uncert. origin.] **1.** *Geom.* **a** A body or space bounded by one surface all points of which are equally distant from a point within called its *center.* The volume of a sphere may be found by multiplying the cube of its radius by $4\pi/3$. **b** The bounding surface itself, the area of which may be found by multiplying the square of the radius by 4π. **2.** Hence, any globe or globular body, esp. a celestial one. **3.** A globe representing the earth or heavens. **4.** *Astron.* **a** The apparent surface of the heavens (half of which forms the dome of the visible sky, which is assumed to be spherical and everywhere infinitely distant from the earth) on which the celestial bodies seem to have their places, and on which the various astronomical circles, as of right ascension and declination, the equator, ecliptic, etc., are conceived to be drawn; an ideal geometric sphere, with the astronomical circles in their proper positions on it. **b** In ancient astronomy, one of the concentric and eccentric revolving spherical transparent shells in which stars, sun, planets, and moon were supposed to be set, and by which they were carried, in such manner as to produce their apparent motions. Cf. MUSIC OF THE SPHERES. **5.** Circuit or range of action, knowledge, or influence; compass; province; place or scene of action or existence.

> Taking her out of the ordinary relations with humanity, and inclosing her in a *sphere* by herself. *Hawthorne.*

6. Rank; order of society; social position or class. **7.** An orbit, as of a star; a circuit. *Obs.* *Shak.* **8.** The atmosphere; the upper air; the heavens. *Poetic.* **9.** *Bot. & Cytol.* An idiosome; an idioblast. **10.** *Logic.* = EXTENSION, 8. *Rare.*

Syn. — Globe, orb, ball; field, jurisdiction, scope.

☞ COMBINATIONS are:

sphere-born	sphere-filled	sphere-headed
sphere-descended	sphere-found	sphere-tuned

sphere (sfēr), *v.* SPHERED (sfērd); SPHER'ING (sfēr'ĭng). *Transitive:* **1.** To place in or as in a sphere or among the spheres; to ensphere; to raise aloft. **2.** To form into a sphere; to make round, or spheral; hence, to make complete; to perfect. **3.** To enclose as in a sphere; to surround. *Rare.* **4.** To send in a circuit; to circulate; to turn round. *Obs.* —, *Intransitive:* To revolve. *Obs.*

sphere, *adj.* Of, pertaining to, or like a sphere or the celestial spheres.

-sphere. A combining form, Latin *-sphaerium,* Greek *-sphairion,* from *sphaira,* meaning *sphere,* used to denote: **a** *A representation of spherical lines or bodies,* as in cosmo*sphere,* planio*sphere.* **b** *Astron. & Geol. A spherical enveloping layer,* as in atmo*sphere,* chromo*sphere,* and the following:

aerosphere	hydrosphere	pyrosphere
barysphere	leucosphere	stenosphere
centrosphere	lithosphere	stratosphere
chromatosphere	petrosphere	troposphere
chromosphere	photosphere	
geosphere	planisphere	

c *Biol. & Bot. A spherical mass forming a body,* as in oö*sphere,* and the following:

archisphere	chondriosphere	sorosphere
astrosphere	coccosphere	spermosphere
biosphere	entosphere	trophosphere
blastosphere	gonosphere	zoosphere
centrosphere	oncosphere	zygosphere

sphere circle. *Math.* The imaginary circle in which all spheres meet the plane at infinity.

sphere crystals. Sphaerophides.

sphere fungus. Any fungus of the order Sphaeriales.

sphere gap. *Elec.* A spark gap between spheres of definite sizes, suitably mounted. It is used in measuring flash-over voltages and the like.

sphere geometry. That geometry in which the sphere is taken as the element.

sphere'less, *adj.* Having no sphere, or orbit; wandering.

sphere of influence. *Internat. Law.* A territory within which the political influence or the interests of one nation are permitted by other nations to be more or less exclusive. The term is loosely used, esp. of regions more or less under the control of a nation, but not constituting a formally recognized protectorate or suzerainty. ***Sphere of action, sphere of interest, zone of influence, field of operations,*** are similarly used.

sphere of life and death. *Astrol.* A circle or other plane figure divided into sections containing numbers grouped under the labels "Life" or "Death," and used in divination.

sphere of osculation. *Math.* The limit approached by a sphere through four neighboring points of a space curve as these points are brought to coincidence.

sphere tracks. *Physics.* The paths of electrons having a range of a few tenths of a millimeter emitted from gases under the action of very high-frequency X rays. These electrons do not satisfy the quantum relation.

sphe'ric (sfĕr'ĭk), *adj.* Of or pertaining to a sphere or the spheres; resembling a sphere; spherical; orbital; as, *spheric* shape; *spheric* geometry; *spheric* trigonometry.

-spher'ic, -spher'i·cal. Combining forms of *spheric, spherical,* as in heli*spheric,* penta*spherical;* — distinguished from adjectives derived from nouns ending in *-sphere,* as photo*spheric.*

sphe'ri·cal (sfĕr'ĭ·kăl), *adj.* [F. *sphérique,* fr. LL. *sphaericus,* fr. Gr. *sphairikos.*] **1.** Having the form of a sphere, or of one of its segments; like a sphere; globular; orbicular; as, a *spherical* body. **2.** Of or pertaining to a sphere or spheres; having to do with a sphere, or with the properties of a sphere; as, *spherical* angle; *spherical* geometry. **3.** Of or pertaining to the celestial bodies, or their spheres (sense **4 b**).

> Thieves, and treachers by *spherical* predominance. *Shak.*

— **spher'i·cal·ly,** *adv.*

spherical aberration. See ABERRATION, 5.

spherical angle. *Math.* The angle between two intersecting arcs of great circles of a sphere, measured by the plane angle formed by the tangents to the arcs at the point of intersection.

spherical astronomy. That branch of the science which treats chiefly of astronomical problems relating to the celestial sphere.

spherical conic. Also **spherical conic section.** *Math.* A curve which is the intersection of a cone of the second degree with a sphere concentric with the vertex of the cone; — called also *spheroconic.*

spherical co-ordinates. See CO-ORDINATE, *n.*, 2.

spherical curvature. *Math.* **a** The curvature of an osculating sphere. **b** Plane curvature in any part of a twisted curve. **c** Surface curvature where the osculating quadric is a sphere.

spherical cyclic curve. See CYCLIC CURVE.

spherical excess. *Geom.* The amount by which the sum of the three angles of a spherical triangle exceeds two right angles; its product by the square of the radius of the sphere on which the triangle is drawn is equal to the area of the triangle.

spherical function. *Math.* A spherical harmonic.

spherical geometry. *Math.* That branch of geometry which treats of spherical magnitudes; the doctrine of the sphere, esp. of circles described on it.

spherical harmonic (of the nth degree). *Math.* Any homogeneous polynomial, V_n, of x, y, z, of nth degree, that satisfies Laplace's equation $\nabla^2 V = 0$. Ordinarily, however, this equation is first transformed to spherical coordinates r, θ, ϕ, and its solution then is called a ***solid spherical harmonic,*** U_n. This divided by r^n yields a function of θ and ϕ only, a ***surface spherical harmonic.*** The quotient of U_n by r^{2n+1} is a solid spherical harmonic of degree $-(n+1)$. A ***sectorial harmonic*** is the spherical surface harmonic $\sin^n\theta \cos n\phi$ or $\sin^n\theta \sin^n\phi$; — so called because the curves along which a sectorial harmonic vanishes are equally spaced meridians. A ***tesseral harmonic*** is a spherical surface harmonic $P_n^m(\cos\theta)\cos m\phi$ or $P_n^m(\cos\theta)\sin m\phi$ where m has one of the $n-1$ values $1, 2, \ldots n-1$; — so called because the curves along which it vanishes are equally spaced meridians and unequally spaced parallels of latitude. A ***zonal harmonic*** (called also *Legendre function* and *Legendre polynomial*), is a solution of ***Legendre's equation,*** which is the linear second-order differential equation $(1-z^2)\frac{d^2u}{dz^2} - 2z\frac{du}{dz} + n(n+1)u = 0$. This equation is satisfied by the Legendre functions $P_n(z)$ and $Q_n(z)$, u being the independent variable, n a given constant, and z a real or complex variable. When n, in this equation, is an integer, a polynomial solution, denoted by $P_n(z)$ $\left(= \frac{1}{2^n n!}\frac{d^n}{dx^n}(x^2-1)^n.\right)$ exists as also does a solution, denoted by $Q_n(z)$, which becomes infinite when $z = \pm 1$. So called because when z is put equal to $\cos\theta$ the resulting function of θ is a surface spherical harmonic not involving the longitude angle ϕ. A ***solid zonal harmonic*** is a solid spherical harmonic which is symmetrical around an axis. It is the product of a solution of Legendre's equation by r^n or $\frac{1}{r^{n+1}}$ where $r^2 = x^2 + y^2 + z^2$.

spherical harmonic analysis. A method which is widely used in physical, esp. in potential, problems, in order to determine a function that shall satisfy Laplace's equation for a certain region of space and assume specified values over a given boundary, often a sphere surface, whence the name **spherical harmonics** (*Kelvin*).

spherical inversion. See INVERSE FIGURES.

spher'i·cal'i·ty (sfĕr'ĭ·kăl'ĭ·tĭ), *n.* Roundness; sphericity.

spherical lemniscate. *Astron.* The "figure eight" lemniscate when described on the celestial sphere; — Schiaparelli's name.

spherical lune. A portion of a sphere surface, bounded by two great semicircles.

spherical pendulum. *Physics.* A simple pendulum whose bob moves on the surface of a sphere whose center is at the point of suspension of the pendulum; also, a heavy smooth particle moving on the inside of a spherical surface.

spherical perspective. See PERSPECTIVE, 2.

spherical polygon. *Geom.* A figure analogous to a plane polygon, formed on a sphere by arcs of great circles.

spherical projection. The projection of a sphere surface, esp. upon a plane. See PROJECT, *v. t.*, 7.

spherical reduction factor. *Photom.* In electric lighting, the ratio of the mean spherical candlepower of a lamp to its mean horizontal candlepower. In a uniform point source, the factor is unity; for a straight cylindrical filament that obeys the cosine law of emission, it is $\frac{\pi}{4}$.

spherical sailing. See SAILING.

spherical sector. *Math.* = SECTOR OF A SPHERE.

spherical segment. *Math.* The segment of a sphere; if h is the distance between the parallel planes, the area of the spherical surface of the segment is $2\pi rh$, where r is the radius of the sphere. The volume of the segment is given by the prismoidal formula. See SEGMENT, 6 **b**.

spherical triangle. *Math.* A figure on a sphere, formed by the arcs of three great circles that intersect each other.

spherical trigonometry. *Math.* Trigonometry applied to spherical triangles and polygons.

spherical ungula. *Geom.* A spherical wedge

spherical vault. *Arch.* A vault having approximately the form of part of a sphere; a cupola of circular plan.

spherical wedge. The portion of a sphere included between two half planes that intersect in a diameter.

spher'i·cist (sfĕr'ĭ·sĭst), *n.* One who holds that the earth is a sphere.

sphe·ric'i·ty (sfē·rĭs'ĭ·tĭ), *n.*; *pl.* -TIES (-tĭz). [NL. *sphaericitas.*] Quality or state of being spherical; roundness.

spher'i·cle (sfĕr'ĭ·k'l), *n.* A small sphere.

spher'i·co- (sfĕr'ĭ·kō-). A combining form for *spheric,* denoting *spherical and,* as in **spher'i·co·cy·lin'dri·cal, spher'i·co·tet'ra·he'dral, spher'i·co·tri·an'gu·lar.**

spher'ics (sfĕr'ĭks), *n. Math.* The doctrine of the sphere; the science of the properties and relations of the circles, figures, and other magnitudes of a sphere produced by planes intersecting it; spherical geometry and spherical trigonometry. See -ICS.

sphe'ri·form (sfē'rĭ·fôrm), *adj.* [L. *sphaera* sphere + E. *form.*] Spherical.

spher'i·fy (sfĕr'ĭ·fī), *v. t.* [See -FY.] To make spherical, round, or circular.

sphero-. = SPHAERO-, as in *spheroid.*

sphe'ro·crys'tal (sfē'rō·krĭs'tăl), *n.* A spherical crystal aggregate.

sphe'ro·graph (sfē'rō·grăf; sfĕr'ō-), *n.* [*sphero-* + *-graph.*] **1.** *Navig. & Astron.* Two cardboards containing various circles, and turning upon each other in such a manner that any possible spherical triangle may be readily found, and the measure of the parts read off by inspection. **2.** A disk ruled with meridians and parallels in stereographic projection, for the solution of problems in spherics.

sphe'roid (sfē'roid), *n.* [L. *sphaeroides* ball-like, spherical, fr. Gr. *spharoeidēs,* fr. *sphaira* sphere + *eidos* form.] A figure like a sphere, but not spherical; esp., an ellipsoid of revolution. — *adj.* = SPHEROIDAL.

sphe·roi'dal (sfē·roi'dăl; -d'l), *adj.* Having the form of a spheroid; consisting of, or characterized by, spheroids. — **sphe·roi'dal·ly,** *adv.*

spheroidal epithelium. *Anat.* Glandular epithelium.

spheroidal recovery. *Geol.* The hypothetical, more or less complete resumption by the earth of spheroidal form after distortion, such as is supposed by some to follow periods of collapse to tetrahedral shape.

spheroidal state. *Physics.* The state of a liquid, as water, when, on being thrown on a surface of highly heated metal, it gathers in spheroidal drops or masses, at a temperature several degrees below ebullition, and without actual contact with the heated surface, owing to a cushion of nonconducting vapor.

sphe·roi'dic (sfē·roi'dĭk), *adj.* Also **sphe·roi'di·cal** (-dĭ·kăl). Spheroidal. — **sphe·roi'di·cal·ly,** *adv.*

sphe'roi·dic'i·ty (sfē'rŏi·dĭs'ĭ·tĭ), *n.* Quality or state of being spheroidal.

sphe'roid·ism (sfē'roid·ĭz'm), *n.* State, quality, or fact of being a spheroid.

sphe·roi'di·ty (sfē·roi'dĭ·tĭ), *n.* Spheroidicity. *Rare.*

sphe'roid·ize (sfē'roid·īz), *v. t.* [*spheroid* + *-ize.*] To subject (an iron-base alloy) to prolonged heating near the critical temperature, then to slow cooling, thus causing the iron carbide to assume a globular form. Cf. ANNEAL, HEAT-TREAT.

sphe'ro·mere (sfē'rō·mēr), *n.* [*sphero-* + *-mere.*] *Zool.* Any of the symmetrical segments of the body of a radiate animal.

sphe·rom'e·ter (sfē·rŏm'ĕ·tĕr), *n.* [F. *sphéromètre.*] *Physics.* An instrument for measuring the curvature of spherical and other surfaces.

Spherometer.

spherometer caliper. *Astron.* An instrument for measuring the inequalities and irregularities of the pivots of transit instruments.

sphe'ro·quar'tic (sfē'rō·kwôr'tĭk), *n.* [*sphero-* + *quartic.*] *Math.* The curve of intersection of a sphere and a quadric.

spher'u·lar (sfĕr'ōō·lĕr), *adj.* Of the form of, or like, a spherule.

spher'u·late (sfĕr'ōō·lāt), *adj.* Covered or set with spherules.

spher'ule (sfĕr'ōōl), *n.* [LL. *sphaerula.*] **1.** A little sphere or spherical body. **2.** *Zool.* One of the calcareous bodies forming the skeleton in certain sponges.

spher'u·lite (sfĕr'ōō·līt), *n.* [See SPHERULE.] *Petrog.* A spherical crystalline body made up of radiating crystal fibers, often found in vitreous volcanic rocks, as obsidian and perlite. It is commonly an intergrowth of quartz and feldspar. — **spher'u·lit'ic** (-lĭt'ĭk), *adj.*

spher'u·lit'ize (sfĕr'ōō·lĭt'īz), *v. t.* To render spherulitic.

spher'y (sfēr'ĭ), *adj.*; SPHER'I·ER (-ĭ·ĕr); SPHER'I·EST. *Poetic & Rare.* **1.** Round; spherical; starlike.

> Hermia's *sphery* eyne. *Shak.*

2. Of or pertaining to the spheres. *Milton.*

sphet'er·ize (sfĕt'ĕr·īz), *v. t.* [Gr. *spheterizein,* fr. *spheteros* their, his, or her own, fr. *spheis* they.] To make one's own; to appropriate. *Rare.*

Sphex (sfĕks), *n.* [NL., fr. Gr. *sphēx, sphēkos,* wasp.] **1.** *Zool.* a The typical genus of wasps of the family Sphecidae; — called also *Ammophila.* **b** Syn. of CHLORION. **2.** [*not cap.*] *pl.* SPHEGES (sfē'jēz). A wasp of the genus *Sphex.*

sphex'ide (sfĕk'sĭd), *n.* A sphex.

sphinc'ter (sfĭngk'tĕr), *n.* [LL., fr. Gr. *sphinktēr;* akin to Gr. *sphingein* to bind tight, *sphinx* sphinx.] *Anat. & Zool.* A ringlike muscle surrounding, and able to contract or close, a natural opening or passage.

sphinc'ter (sfĭngk'tĕr), *adj. Anat. & Zool.* Serving to contract or close an orifice.

sphincter-. = SPHINCTERO-.

sphinc'ter·al (sfĭngk'tĕr·ăl), *adj. Anat. & Zool.* Pertaining to, or of the nature of, a sphincter.

‖**sphinc'ter a'ni** (ā'nĭ). [NL.] *Anat.* Either of two sphincters of the anus. The *external* is a layer of striated muscle extending from the coccyx to the central tendinous part of the perineum, and surrounding the anus just beneath the integument. The *internal* is a ring of unstriated muscle formed by a thickening of the circular muscle of the rectum.

sphinc'ter·ate (-āt), *adj. Anat. & Zool.* **a** Provided with, or contracted by, a sphincter. **b** Constricted in the middle as if by a sphincter.

‖**sphinc'ter clo·a'cae** (sfĭngk'tĕr klō·ā'sē). [NL.] *Zool.* A series of muscles surrounding the cloaca.

sphinc·te'ri·al (sfĭngk·tēr'ĭ·ăl), *adj.* Also **sphinc·ter'ic** (-tĕr'ĭk). Sphincteral.

Sphe'no·phyl·la'les (sfē'nō·fĭ·lā'·lēz), *n. pl.* [NL.] See SPHENOPHYLLUM.

sphere·om'e·ter. Var. of SPHEROMETER.

spher'i·cal·ness, *n.* See -NESS.

sphe'ro·blast. Var. of SPHAEROBLAST. [SPHAEROCOBALTITE.

sphe'ro·co·bal'tite. Var. of

sphe'ro·con'ic (-kŏn'ĭk), *n.* = SPHERICAL CONIC. [ROSIDERITE.

sphe'ro·sid'er·ite. Var. of SPHAE-

sphe·ros'i·ty, *n.* Sphericity. *R.*

sphe'ro·spore. Var. of SPHAEROSPORE.

spher'u·la (sfĕr'ōō·lȧ), *n.*; *pl.* -LAE (-lē). [NL.] *Zool.* A small spherical sponge spicule.

sphinc'ter·is'mus (sfĭngk'tĕr·ĭz'mŭs), *n.* [NL.] *Med.* Spasm of the sphincter of the anus.

sphinc'ter·o- (sfĭngk'tĕr·ō-), **sphinc'ter-.** A combining form from Greek *sphynkter*, sphincter, denoting specif. *the sphincter ani*, as in **sphinc'ter·al'gi·a, sphinc'ter·ec'to·my, sphinc'ter·o·scope', sphinc'ter·os'co·py.** See -ALGIA, etc.

‖**sphinc'ter o'cu·li** (ŏk'ū·lī). [NL.] *Anat.* The orbicularis oculi.

sphinc'ter·ot'o·my (sfĭngk'tĕr·ŏt'ō·mĭ), *n.* [*sphincter* + *-tomy.*] *Surg.* The cutting of a sphincter.

‖**sphinc'ter pal'pe·bra'rum** (sfĭngk'tĕr păl'pē·brā'rŭm). [NL. See PALPEBRA.] = ORBICULARIS OCULI.

‖**sphinc'ter pu·pil'lae** (pū·pĭl'ē). [NL.] *Anat.* A broad flat band of smooth muscle in the iris, surrounding the pupil of the eye.

‖**sphinc'ter rec'ti** (rĕk'tī). [NL. See RECTUM.] The internal sphincter ani.

‖**sphinc'ter u·re'thrae** (ū·rē'thrē). [NL.] *Anat.* A bundle of striated circular muscle surrounding the urethra (in the male, the membranous portion).

‖**sphinc'ter va·gi'nae** (vă·jĭ'nē). [NL. See VAGINA.] *Anat.* In female mammals, the bulbocavernosus.

‖**sphinc'ter ve·si'cae** (vē·sī'sē). [NL., fr. L. *vesica* bladder.] *Anat.* A thick layer of circularly arranged unstriated muscle fiber surrounding the neck of the urinary bladder.

Sphin'di·dae (sfĭn'dĭ·dē), *n. pl.* [NL., fr. *Sphindus*, type genus (arbitrarily formed) + *-idae.*] *Zool.* A family of small clavicorn beetles (division Heteromera) living in dry fungi on trees. The type genus is **Sphin'dus** (-dŭs). — **sphin'did** (-dĭd), *adj. & n.*

sphin'gal (sfĭng'găl), *adj.* [See SPHINX; -AL.] Of, pertaining to, or resembling a sphinx.

Sphin'gi·dae (sfĭn'jĭ·dē), *n. pl.* [NL. See SPHINX; -IDAE.] *Zool.* The family constituted by the hawk moths. — **sphin'gid** (-jĭd), *adj. & n.* — **sphin'gi·form** (-jĭ·fôrm), **sphin'gine** (-jĭn; -jīn), *adj.*

sphin'gine (sfĭn'jĭn; -jīn), *adj.* Resembling a sphinx; sphingal.

My most *sphingine* smile. *Aldous Huxley.*

sphin·gom'e·ter (sfĭng·gŏm'ĕ·tĕr), *n.* [Gr. *sphingein* to bind tight + *-meter.*] *Mech.* An instrument for measuring the bending of a strut, as by deflection of beams of light.

sphin'go·my'e·lin (sfĭng'gō·mī'ĕ·lĭn), *n.* [Gr. *sphingein* to bind tight + *myelin.*] *Biochem.* A crystalline phosphoaminolipide extracted from the white substance of the brain.

sphin'go·sine (sfĭng'gō·sēn; -sĭn), *n.* Also **-sin.** [*sphingomyelin* + *-ine.*] *Biochem.* A base, $C_{17}H_{39}NO_2$, obtained as a decomposition product of sphingomyelin and certain cerebrosides. It is an amino alcohol.

Sphin'gu·ri'nae (sfĭng'gū·rī'nē), *n. pl.* [NL.] *Zool.* A subfamily of the Hystricidae, equivalent to the family Erethizontidae.

sphinx (sfĭngks), *n.; pl.* SPHINXES (sfĭngk'sĕz; -sĭz; 119), SPHINGES (sfĭn'jēz). [L., fr. Gr. *sphinx.* See SPHINCTER.] **1.** *Gr. Art. & Myth.* A monster having typically a lion's body, wings, and the head and bust of a woman. The most famous Greek sphinx (specif., *the Sphinx*) was that of Thebes, whose habit was to propose a riddle to all passers and upon their failure to guess it to destroy them. The Thebans offered the hand of Jocasta and the throne of Thebes to the man who would rid them of the monster; Oedipus (which see) guessed the riddle, the Sphinx slew herself, and he thus became king. The riddle is said to have been: What creature walks in the morning upon four feet, at noon upon two, at evening upon three? The answer is: Man, as a baby on hands and knees, later on his feet, and in old age with a staff.

The *Sphinx* was mainly a local Theban bogy, but she became the symbol of oracular divinity. *J. E. Harrison.*

2. Hence, any monster conceived of as resembling the sphinx in shape or in nature.

3. A sphinxlike person; one of enigmatical or inscrutable character and purposes; one who speaks enigmatically.

4. A brown, yellowish red-yellow in hue, of low saturation and low brilliance; — called also *mustang.* Cf. COLOR.

5. *Egypt. Archaeol.* An image in the form of a recumbent lion having a man's head (***androsphinx***), a ram's head (***criosphinx***), or a hawk's head (***hieracosphinx***). The man-headed sphinx is a representation of Harmachis, the morning sun, the notion that it typifies enigmatical wisdom being derived from the Greeks. The huge sphinx (often "the Sphinx") near the pyramids of Giza has a man's head and the recumbent body of a lion. It is 172 ft. long and 66 ft. high; is partly hewn from the solid limestone, and partly built up; and had a small temple built against the breast between the forepaws. It was built by Khafre (var. Khephren or Chephren) of the IVth dynasty, and the face is supposed to be a likeness of him.

The Great Sphinx at Giza.

6. a [*cap.*] *Zool.* The typical genus of hawk moths, originally coextensive with the family Sphingidae, but now including only a very small part. 6. To fish with spinning bait, as spoon bait; to troll.
7. To fail to pass an examination. *Slang, Brit.*

spin a yarn. *Orig. Naut.* To tell a story, esp. a long one.

spin (spĭn), *n.* **1.** Act of spinning; as, the decision rested on the *spin* of a coin; the movement imparted by spinning, or whirling; specif.: **a** A revolving or whirling motion; a whirl or twirl; as, the *spin* of a top; the *spin* on a cricket ball as bowled by an expert bowler. **b** *Colloq.* Act of moving swiftly, esp. on wheels.
2. Rapid movement, as in riding, driving, sailing, etc., for a period of time; as, we took a *spin* in the country.
3. Something made by a spinning or whirling process.
She went to get Annie a *spin* of toffee. *D. H. Lawrence.*
4. *Aviation.* An aerial maneuver consisting of a combination of roll and yaw, with the longitudinal axis of the airplane inclined steeply downward. The airplane descends in a helix of large pitch and very small radius, its upper side being on the inside of the helix, and the angle of attack on the inner wing being maintained at an extremely large value. See AUTOROTATION.
5. *Card Playing.* A game the same as newmarket, except that the player holding the ace of diamonds may play it to get the privilege of stopping one suit and opening another.
6. *Mech.* A system of velocities of any number of points, all due to one and the same definite angular velocity about one and the same axis.

spi'na (spī'nȧ), *n.;* *pl.* SPINAE (-nē). [L. See SPINE.] Literally, a spine; specif., *Rom. Antiq.*, a low wall which made a longitudinal division in the arena of a circus.

‖**spi'na bi'fi·da** (spī'nȧ bĭf'ĭ·dȧ). *Med.* [L., cleft spine.] A congenital malformation in which the spinal column is cleft at its lower portion, and the membranes of the spinal cord project as an elastic swelling from the gap thus formed.

spi·na'ceous (spĭ·nā'shŭs), *adj.* [See SPINACIA.] *Bot.* Pertaining to or resembling spinach or its family.

spin'ach (spĭn'ĭch; -ĭj; 104; *see note*), *n.* [OF. *espinache, espinage* (F. *épinard*), fr. ML. *spinac(h)ia, spinac(h)ium*, fr. Sp. *espinaca*, fr. Ar. *isbānakh, isfānākh*, fr. Per. *isfānākh, isfānāj*, of unknown origin.] **a** A potherb (*Spinacia oleracea*) of southwestern Asia, cultivated for its edible leaves. **b** With attributive, any of various other plants more or less resembling spinach or used in like manner. See NEW ZEALAND SPINACH. **c** A dish of the boiled and seasoned leaves of this herb.
☞ Investigation appears to show that the pron. spĭn'ĭch prevails in America, though -ĭj is historically correct, as in *cabbage, knowledge;* cf. SPINAGE. See *Pron.*, § 104 (2).

spinach beet. = 1st CHARD, 2.

spinach blight. *Plant Pathol.* A virus disease of spinach resembling mosaic.

spin'ach–col'ored, *adj.* Of the color of spinach.

spin'ach, *or* **spin'age** (spĭn'ĭj), **dock.** = 1st PATIENCE, 4 **b.**

spinach flea beetle. A small, glossy, bluish-black beetle (*Disonycha zanthomelaena*) with a reddish or yellowish abdomen. It feeds on spinach and beet leaves.

spinach green. = AUTUMN GREEN. — **spin'ach–green'** (66), *adj.*

spin'ach·like' (-līk'), *adj.* Like or suggesting spinach.

spinach yellows. = SPINACH BLIGHT.

Spi·na'ci·a (spĭ·nā'shĭ·ȧ), *n.* [ML. See SPINACH.] *Bot.* A small genus of Asiatic annual herbs (family Chenopodiaceae) having dioecious flowers without bracts, the pistillate calyx becoming indurated over the one-seeded perianth. See SPINACH.

‖**spi'na ex·ter'na** (spī'nȧ ĕks·tûr'nȧ). [NL., external spine.] *Zool.* In birds, a median bony point projecting from the anteroventral margin of the sternum.

‖**spi'na in·ter'na** (ĭn·tûr'nȧ). [NL., internal spine.] *Zool.* In birds, a median bony point projecting from the anterodorsal edge of the sternum and sometimes uniting with the spina externa.

spi'nal (spī'nȧl; -nĭ), *adj.* [LL. *spinalis*, fr. *spina;* cf. F. *spinal.* See SPINE.] **1.** *Anat.* **a** Of, pertaining to, or near, the backbone, or spine. **b** Pertaining to a spine (pointed process) or spines.
2. *Physiol.* Of, pertaining to, or dependent upon the spinal cord; involving in its central nervous path only the spinal cord; as, a *spinal* reflex; having the spinal cord isolated in its functioning from the brain, as by surgical section; as, experiments with *spinal* animals; located in, or affecting, the spine, as *spinal* diseases.
3. Resembling or likened to a spine, as in shape or nature.
4. Made for, or fitted to, the spine; as, a *spinal* brace.

spinal accessory nerve. = ACCESSORY NERVE.

spinal anesthesia. See ANESTHESIA.

spinal animal. *Exper. Physiol.* An animal prepared for the demonstration of reflexes through the spinal cord by destroying or cutting off the brain.

spinal arteries. *Anat.* Branches of the vertibral artery which supply the spinal cord and its membranes and adjacent structures. They arise as branches of the vertebral artery, but anastomose and are reinforced or continued by branches of intercostal and lumbar arteries which enter the intervertebral foramina.

spinal canal. The canal (containing the spinal cord) formed by the series of neural arches of the vertebrae.

spi'na·cene (spī'nȧ·sēn), *n.* = ‖SQUALENE.

spi'nae, *n.,* *pl.* of SPINA.

spin'age. Var. of SPINACH.

spinal column. *Anat. & Zool.* The articulated series of vertebrae (connected by ligaments and separated by more or less elastic intervertebral fibrocartilages) which in nearly all vertebrates forms the supporting axis of the body and a protection for the spinal cord, extending from the hind end of the skull through the median dorsal part of the body, and to the end of the tail; the backbone or spine; in a broad sense, the axial skeleton of the trunk and tail of a vertebrate. In the lowest vertebrates and in the embryos of all higher forms, the spinal column is represented by an elastic rod of cellular tissue (the *notochord*). This is enclosed in a fibrous sheath which forms a sheath for the spinal cord. In this sheath cartilaginous or bony pieces develop, and commonly unite (in various ways in the different groups) to form a longitudinal series of bones, the vertebrae (cf. ARCUALE). The notochord in the higher vertebrates becomes almost completely obliterated in the adult. In the higher vertebrates five regions (differing in the character of their vertebrae) are usually recognizable in the spinal column. These (with the number of vertebrae normally present in each in man) are as follows: cervical (7); thoracic (12); lumbar (5); sacral (5 fused together); coccygeal, or caudal (4 fused together).

spinal cord. *Anat.* In vertebrates, the thick longitudinal cord of nervous tissue which extends along the back, dorsal to the bodies of the vertebrae enclosed in a canal (the *spinal canal*) formed by their neural arches. In front it is continuous with the medulla oblongata of the brain, and it gives off at intervals pairs of nerves, the *spinal nerves* (which see), to the various parts of the trunk and limbs. It serves not only as a pathway for nervous impulses to and from the brain, but as a center for carrying out and coordinating many reflex actions independently of the brain, the importance of the brain relatively to the spinal cord being less in the lower than in the higher vertebrates. In

cross section the spinal cord is more or less elliptical, with a deep median fissure on the ventral side. It is composed largely of white matter, consisting of more or less distinct groups (*columns* and *tracts*) of longitudinal fibers; but there is a large central core of gray matter (containing nerve cells), somewhat H-shaped in cross section, the branches of the lateral masses of gray matter being called the *gray columns*, *horns*, or *cornua*. The center of the gray matter is pierced by a small longitudinal canal continuous with the ventricles of the brain.

spinal fluid. = CEREBROSPINAL FLUID.

spinal foramen. *Anat.* The opening (forming a part of the spinal canal when the vertebrae are articulated) under the neural arch of a vertebra.

spinal ganglion. *Anat.* Any of a series of ganglia, one on the dorsal root of each spinal nerve, lodging cell bodies of sensory neurons.

spinal hemiplegia. See HEMIPLEGIA.

spi·na'lis (spī·nā'lĭs), *n.; pl.* -LES (-lēz). [NL., fr. LL. *spinalis* spinal.] *Anat.* Any of three muscles of the spinal column.

‖**spi·na'lis ca'pi·tis** (kăp'ĭ·tĭs). [NL. See CAPUT.] *Anat.* A small inconstant muscle sometimes forming part of the semispinalis capitis, arising from two or more upper thoracic vertebrae and inserted into the occipital bone.

‖**spi·na'lis cer·vi'cis** (sûr·vī'sĭs) *or* **spi·na'lis col'li** (kŏl'ī). [NL.] *Anat.* An inconstant muscle, arising from the sixth and seventh cervical vertebrae and inserted into the second and third. It extends the neck.

‖**spi·na'lis dor'si** (dôr'sī). [NL. See DORSUM.] *Anat.* A muscle connecting the spinous processes of the upper lumbar and the thoracic vertebrae together by a series of muscular and tendinous slips blended with the longissimus dorsi.

spi'nal·ly (spī'năl·ĭ), *adv.* With respect to the spine; along the spine.

spinal marrow. *Anat.* The spinal cord.

spinal nerves. *Anat. & Zool.* The pairs of nerves which leave the spinal cord and, passing out by the intervertebral foramina, supply the muscles and skin of the trunk and limbs and connect with the nerves of the sympathetic system. In man there are normally 31 pairs (distinguished as *cervical*, *thoracic*, etc., according to their location), each nerve arising from the cord, as in other craniate vertebrates, by two short roots, a *ventral* (*anterior* in man), which is exclusively motor, and a *dorsal* (*posterior* in man), which bears a ganglion (*spinal ganglion*) close to the cord, and is sensory in function. They unite just beyond the ganglion to form a nerve of mixed function, which, after passing out through the foramen, divides in an anterior and a posterior division (both mixed nerves) to supply the dorsal and ventral regions.

spinal puncture. *Med.* Puncture of the subarachnoid space in the lumbar region of the spinal cord with a hypodermic needle to withdraw cerebrospinal fluid.

spinal segment. *Anat.* A segment of the spinal cord including one, and only one, pair of spinal nerves.

spinal shock. *Physiol.* Temporary stoppage or reduction of the activities of the spinal cord, as from severing the brain from it.

spi'nate (spī'nāt), *adj.* Bearing a spine; spiniform.

spin'der (spĭn'dĕr), *n.* A large Madagascan silk spider (*Nephila madagascariensis*) which spins a large amount of strong silk.

spin'dle (spĭn'd'l), *n.* [AS. *spinel;* akin to D. & G. *spindel*, MD. *spille*, OHG. *spinela*, *spinnila*, MHG. *spinel*, *spinle*, *spille*, and to AS. *spinnan* to spin. See SPIN.] **1.** **a** In hand spinning, a round stick tapering toward each end, with a notch or catch at one end to hold the yarn. In using, the spindle is twirled around, usually by a movement against the right leg, to twist the yarn. See DISTAFF, *Illust.* **b** The long, round, slender rod or pin in spinning wheels by which the thread is twisted, and on which, when twisted, it is wound; also, the pin holding the bobbin in a spinning machine, or in the shuttle of a loom.
2. Something shaped like a spindle; a fusiform piece or figure; specif.: **a** The fusee of a watch. **b** A long stalk or stem of a plant. **c** *Anat.* A sensory nerve ending. Cf. MUSCLE SPINDLE. **d** *Biol.* The spindle-shaped figure of fibers of achromatic substance formed during mitosis. **e** *Bot.* A rachis. **f** *Zool.* Short for SPINDLE SHELL.
3. Any more or less slender pin or rod, suggestive of a spinning-machine spindle; esp., one which turns, or on which something turns; specif.: **a** In a lock, the bar or shaft, usually of square section, that carries the knobs and actuates the latch or bolt. **b** *Carp., etc.* A short decorative turned piece, as in a baluster; also, a newel. **c** *Founding.* A perforated pipe on which hay or straw rope is wound to hold the loam used in striking up a large circular core. **d** *Mach.* (1) An arbor, mandrel, axle, or shaft; esp., a revolving piece less in size than a shaft; an axle, horizontal or vertical, revolving on pin or pivot ends; as, the live **spindle** of a lathe, that imparts motion to the work; the dead **spindle** of a lathe, that carries the dead center; the *spindle* of a vane; the (vertical) *spindle* of a capstan, on which it revolves. (2) A rod attached to a valve to move or guide it. **e** *Vehicles.* Either end of an axletree, forming an axle for a wheel to revolve on.
4. A hydrometer.
5. A yarn measure. See MEASURE, *Table.*
6. *Naut.* **a** The upper main piece of a made mast. **b** A round, usually iron, pile or pipe placed on a rock or shoal as an aid to navigation.

spin'dle (spĭn'd'l), *adj.* **1.** Of or pert. to spindles, esp. as used in spinning; like a spindle, esp. in shape; fusiform.
2. Pertaining to the mother or belonging to the mother's side in descent; as, the *spindle* side (opposed to the *spear* side); a *spindle* cousin; *spindle* kin.

spin'dle, *v.;* SPIN'DLED (-d'ld); SPIN'DLING (-dlĭng). *Intransitive:* **1.** To shoot or grow into a long slender stalk or body; to become disproportionately tall and slender.

It has begun to *spindle* into overintellectuality. *Lowell.*

2. To grow to stalk or stem rather than flower or fruit; hence, to become thin and useless.

—, *Transitive:* To shape like a spindle; to make fusiform.

spin'dle·age (spĭn'd'l·ĭj), *n.* Also **spin'dlage** (spĭn'dlĭj). [See -AGE.] The spindles, collectively, in a given mill, district, region, or the like.

spindle bander. See BANDER.

spin'dle-cell' sar·co'ma. *Med.* A sarcoma made up of fusiform cells resembling fibroblasts, but less differentiated.

spin'dled (spĭn'd'ld), *adj.* **a** Long and slender, like the stalk of a plant. **b** Set on a spindle; wound, as yarn, on a spindle.

spindle fiber. *Biol.* One of the fibers of the mitotic spindle.

spindle file. *Com.* A device with a projecting spike, nail, or hook on which to stick papers.

spin'dle·head' (spĭn'd'l·hĕd'), *n.* *Mach.* A headstock or tailstock for a spindle or boring bar.

spin'dle-leg'ged (-lĕg'ĕd; -lĭd; -lĕgd'; 119), *adj.* Having long slender legs; spindle-shanked.

spin'dle·legs' (-lĕgz'), *n. pl.* **1.** Long slender legs.
2. Construed as a *sing.* A spindleshanks. *Colloq.*

spindle oil. A relatively light fluid lubricating oil from petroleum, suitable for oiling the spindles of spinning machinery and used also for sewing machines, typewriters, etc.

spindle pointer. See POINTER, 2.

spin'dler (spĭn'dlĕr), *n.* One who turns or assembles spindles of bicycles, etc.; also, in printing, a reel hand.

spindle sander. A sanding machine that carries the sand or sandpaper on its spindle; — opposed to *belt sander.*

spin'dle-shanked' (spĭn'd'l·shăngkt'), *adj.* Having long slender legs; spindle-legged; of legs, long and slender.

spin'dle·shanks' (-shăngks'), *n. pl.* **1.** Long slender shanks or legs.
2. Construed as a *sing.* A person with slender shanks, or legs. *Colloq.*

spindle shell. **a** Any marine univalve mollusk of the genus *Rostellaria* (suborder Taenioglossa), having a shell with a long, conical, many-whorled spire and a long, slender anterior canal; — called also **spindle stromb.** **b** Any of numerous marine univalve mollusks (*Rachiglossa*) of *Fusus* and allied genera, having a shell with a many-whorled spire and a very long, straight canal.

Spindle Shell a (*Rostellaria fusus*).

spin'dle, *or* **spin'dling** (spĭn'dlĭng), **sprout.** *Plant Pathol.* The production of slender sickly shoots by potato tubers which accompanies certain diseases, esp. leaf roll.

spindle step. *Mach.* Step bearing. *Rare.*

spindle stone. See TEMALACATL.

spindle stretcher. See STRETCHER.

spin'dle·tail' (spĭn'd'l·tāl'), *n.* = 1st PINTAIL **a.** *Local, U. S.*

spindle temper. See TEMPER, *n.*, 7.

spindle tree. Any shrub or tree of the genus *Evonymus.* The hard wood of *E. europaeus* has been used for spindles and skewers.

spindle tuber. *Plant Pathol.* **a** A virus disease of the potato characterized by spindliness and uprightness of tops and by the formation of spindle-shaped tubers. **b** = POTATO MOSAIC.

spindle whorl. A perforated disk-shaped weight, as of stone, wood, or porcelain, usually thicker at the center than at the edge, used upon primitive spindles as an aid in the manipulation of the thread.

spin'dle·wood' (spĭn'd'l·wŏŏd'), *n.* The wood of the spindle tree, esp. that of *Evonymus europaeus.*

Spindle and Spindle Whorl.

spindle worm. The larva of a noctuid moth (*Achatodes zeae*) which feeds inside the stalks of corn (maize). It is smooth, with a black head and tail and a row of black dots across each segment.

spin'dling (spĭn'dlĭng), *n.* **a** Act or process of growing in a spindling manner; of plants, growth to stalk rather than to flowers or fruit. **b** A spindling person, plant, or object.

spin'dling (spĭn'dlĭng), *adj.* **a** Long and slender, or disproportionately tall and slender; as, a *spindling* tree or boy. **b** Hence, attenuated; slender and weak; ineffectual.

spin'dly (spĭn'dlĭ), *adj.* Spindling. — **spin'dli·ness** (-dlĭ·nĕs; -nĭs; 119), *n.*

spin'drift' (spĭn'drĭft'), *n.* Sea spray; spoondrift.

spine (spīn), *n.* [ME., fr. OF. and L.; OF. *espine* (F. *épine*), fr. L. *spina* thorn, spine; akin to L. *pinna* feather, wing, fin, battlement, pinnacle, *Lith. spitna* pin of a hackle, and ult. to E. SPIKE nail. Cf. FIN, PINNACLE, PORCUPINE; SPINNEY, SPIT rod.] **1.** *Bot.* Any stiff, sharp-pointed process, distinguished from a *thorn* by the absence of vascular tissue. Spines are frequently found on leaf margins, as in the holly and thistle; occasionally a whole leaf may be modified into a spine. Cf. 1st PRICKLE, 1; THORN.
2. *Anat. & Zool.* A stiff sharp process; specif.: **a** One of the sharp-pointed protective outgrowths (in reality enlarged and modified hairs) of some mammals, as porcupines and hedgehogs. **b** One of the processes which cover most parts of the body of a sea urchin, serving for defense, or in some forms for locomotion. They are borne on rounded tubercles to which they are movably articulated. **c** *Zool.* A radiolarian spicule. **d** A spiny fin ray of a fish. See SPINY RAY. **e** Any of certain processes, esp. of bones; a spinous process, as of a vertebra, or of the ilium. See also NASAL SPINE, PUBIC SPINE. **f** The prominent ridge on the back of the scapula. See SCAPULA, 1.
3. The backbone, or spinal column. See SPINAL COLUMN.
4. Anything resembling the spine, or backbone; a part having the appearance, place, or function of a backbone; a ridge; hence, figuratively, that which gives support; loosely, backbone; spirit; courage. "Do they so want peace . . . that they've lost their *spine?*" *Walter Hines Page.*
5. Heartwood of a tree.
6. *Dial. Eng.* **a** The surface layer or rind of meat. **b** Sward; turf.
7. *Archery.* A quality in arrows resulting from firmness combined with springiness.
8. *Bookbinding.* The back of a book.
9. *Geol.* A pointed mass of viscous or frothy lava that is occasionally protruded from the throat of a volcano.

spine'bone' (-bōn'), *n.* The spinal column; backbone.

spine cell. = PRICKLE CELL.

spined (spīnd), *adj.* Furnished with a spine or spines; spiny.

spine'-finned' (spīn'fĭnd'), *adj.* Spiny-finned.

spin'el (spĭn'ĕl; -ĕl), *n.* [G. *spinal;* cf. D. *spinaal.*] Bleached yarn used in making the linen tape called *inkle;* unwrought inkle.

spi·nel' (spĭ·nĕl'; spĭn'ĕl), *n.* Also **spi·nelle'.** [F. *spinelle,* fr. It. *spinella, spinello,* fr. L. *spina* thorn, prickle; from its pointed crystals. See SPINE.] *Mineral.* A mineral occurring in octahedrons of great hardness (H., 8) and various colors, as red, green, blue, brown, and black, the red variety being the gem spinel ruby. It consists essentially of magnesium aluminate, $MgAl_2O_4$, but iron, manganese, and chromium may be present by replacement. Sp. gr., 3.5–4.1. The **spinel group** includes spinel proper, also magnetite, chromite, franklinite, gahnite, etc., all of which are of analogous composition and crystallize in hard octahedrons.

spine'less (spīn'lĕs; -lĭs; 119), *adj.* **1.** Having no spine, or spinal column; invertebrate; also, having a flexible, limp, or limber spinal column; figuratively, without backbone, force, or courage; limp.
2. Having no spines, thorns, or prickles.
— **spine'less·ly,** *adv.* — **spine'less·ness,** *n.*

spine'let (spīn'lĕt; -lĭt; 119), *n.* A small spine.

spinel pink. A color, bluish-red in hue, of high saturation and medium brilliance. Cf. COLOR. — **spi·nel'-pink',** *adj.*

spinel red. A color, red in hue, of high saturation and medium brilliance. Cf. COLOR. — **spi·nel'-red',** *adj.*

spinel ruby. A deep-red ruby spinel, used as a gem.

spine of the helix. *Anat.* A small nodule extending from the upper anterior part of the helix downward just in front of the external auditory meatus.

spine'-rayed' (spīn'rād'), *adj.* Spiny-rayed.

spi·nes'cence (spī·nĕs'ĕns; -'ns), *n.* **a** State or quality of being spinescent or spiny. **b** A spiny growth or covering.

spi·nes'cent (spī·nĕs'ĕnt; -'nt), *adj.* [LL. *spinescens, -entis,* pres. part. of *spinescere* to grow thorny, fr. *spina* a thorn.] Becoming spiny; tapering to a sharp, rigid point; spinose; also, tending toward spininess; spinulose.

spin'et (spĭn'ĕt; -ĭt; spĭ·nĕt'; 277), *n.* [F. *espinette* (now *épinette*), fr. It. *spinetta,* prob. after Giovanni *Spinetti* (fl. 1500), of Venice.] *Music.* An obsolete small form of harpsichord; — called also *couched harp* and *virginal.*

2. [*not cap.*] Any of several Australian grasses of the genus *Triodia*, which often form dense, almost impassable growths, their leaves being stiff and sharp-pointed.

spink (spĭngk), *n.* [Of Scand. origin; cf. Sw. dial. *spink* a kind of small bird; akin to Gr. *spingos*. See FINCH.] The chaffinch. *Local, Eng. & Scot.*

spink, *n.* [From or confused with PINK the flower.] *Scot. or Dial. Eng.* **a** The common primrose. **b** = CUCKOO-FLOWER **a**. **c** The maiden pink.

spin'na·ble (spĭn'ȧ·b'l), *adj.* Suitable for spinning.

spin'na·ker (spĭn'ȧ·kĕr), *n.* [Said to be fr. *Sphinx*, name of a yacht (1866).] *Naut.* A large triangular sail set upon a long light pole (**spinnaker boom**) on the side opposite the mainsail on fore-and-aft-rigged yachts, used when running before the wind. See SLOOP, *Illust.*

spin'ner (spĭn'ĕr), *n.* **1.** One who or that which spins; as: **a** One who does, or who is skilled in, spinning; a manufacturer engaged in spinning. **b** A spinning machine; also, its tender. **c** A top.

2. a *Now Dial.* A spider; also, a daddy longlegs. **b** A May fly. **c** The European goatsucker, which makes a whirring noise when darting through the air.

3. A paddled iron disk revolving for use in polishing stone, etc.

4. One whose work is to spin a (specified) thing, or in a (specified) way, as in:

brass spinner, gut spinner, rope spinner, silk spinner.

5. One who spins a story; a narrator or writer of fiction.

6. *Aeronautics.* A fairing, usually one made of sheet metal and roughly conical or paraboloid in form, which is attached to the propeller boss and revolves with it. See AIRPLANE, *Illust.*

7. *Angling.* **a** Any artificial fly tied to represent one of the Ephemeridae in the imago stage. **b** A spoon, blade, wings, or the like which revolve when drawn through the water; also, a fisherman who uses such tackle.

8. *Sports.* **a** A ball, as in cricket, delivered with a spin on it. **b** *Football.* A play in which the ball carrier spins around in the attempt to deceive the opponents as to where he plans to strike the line.

9. *Zool.* A spinneret. *Rare.*

spin'ner·et (spĭn'ĕr·ĕt), *n.* [Dim. of *spinner.*] **1.** *Zool.* An organ for producing a thread or threads of silk from the secretion of the silk glands; a spinning organ; specif.: **a** In spiders, one of the nipplelike, often distinctly jointed, processes, near the end of the abdomen, on each of which are a number of minute orifices, by which the ducts of the silk glands open. There are usually three (but sometimes only two or rarely one) pairs of spinnerets. Ordinarily, in spinning a web, the tips of the spinnerets are brought together so that the streams of secretion unite in a single thread. **b** In certain insect larvae, an organ of analogous function; esp., in many caterpillars, a tubule on the labium by which the thread of silk (of two united parts, one from each gland) is extruded.

2. Also **spin'ner·ette'** (spĭn'ĕr·ĕt'). *Rayon Mfg.* A small, usually platinum, plate with fine holes through which the cellulose solution passes into the solidifying medium, thus spinning filaments.

spin'ner·ule (spĭn'ĕr·ōōl; 242), *n.* *Zool.* One of many small tubes on the spinnerets of spiders for discharging the secretion of the silk glands. — **spin·ner'u·lar** (spĭ·nĕr'ōō·lĕr), *adj.*

spin'ner·y (-ĭ), *n.*; *pl.* -NERIES (-ĭz). A spinning mill.

spin'ney (spĭn'ĭ), *n.*; *pl.* SPINNEYS (-ĭz). [OF. *espinei* (F. *épinaie*), fr. (assumed) VL. *spineta*, for L. *spinetum*, fr. *spina* thorn. See SPINE.] A small wood with undergrowth; a copse; a thicket. *Eng.*

spin'ning, *n.* **1.** The operation or business of making fibrous materials into yarn or thread; also, the yarn or thread spun.

2. *pl.* Metallic trimmings from a spinning lathe.

spin'ning, *adj.* **1.** That spins, in various senses: **a** That spins thread. **b** Revolving; whirling. **c** Speedy; fast.

2. Of, pertaining to, or used in spinning.

— **spin'ning·ly,** *adv.*

spinning axis. See GYROSCOPE.

spinning electron. *Physics.* See ELECTRON, 2.

spinning frame. *Spinning.* A machine that finally draws, twists, and spools the yarn. Cf. 1st MULE, 8; THROSTLE.

spinning gland. *Zool.* A silk gland.

spinning house. A house of correction for prostitutes; — so called because inmates were made to work at spinning. *Eng.*

spinning jenny. *Mach.* An engine or machine for spinning wool or cotton, by means of many spindles.

spinning lathe. *Mach.* See 2d LATHE, 1; SPIN, *v. t.*, 12.

spinning machine. **a** A machine for spinning wool, cotton, flax, silk, etc. **b** *Elec.* A machine for winding insulated covering on wires.

spinning mammilla. A spinneret.

spinning mite. The red spider.

spinning tube. A spinnerule.

spinning wheel. A machine for spinning yarn or thread, in which a wheel drives a single spindle, and is itself driven by hand or by foot.

Spinning Wheel.

spi'no- (spī'nō-), **spin-.** A combining form from Latin *spina*, spine, used to denote: **a** *Bot. & Zool.* = SPINI-, as in **spi'no·car'pous, spi'no·tu·ber'cu·lous.** See -CARPOUS, TUBERCULOUS. **b** *Med.* (1) *The spinal cord*, as in **spi'no·g a l'v a·n i·z a'tion, spi·ni'tis.** (2) *Pertaining to the spine and*; — in adjectives, as in **spi'no·bul'bar, spi'no·gle'noid, spi'no·mus'cular, spi'no·neu'ral, spi'no·pe·ri'ph'er·al, spi'no·sym'pa·th e t'ic, spi'no·tec'tal, spi'no·tha·lam'ic.** See BULBAR, etc.

spi'no·cer'e·bel'lar (-sĕr'ē·bĕl'ĕr), *adj.* *Anat.* Of or pertaining to the spinal cord and cerebellum.

spinocerebellar tract. *Anat.* Any one of four nerve tracts from the spinal cord to the cerebellum, two on each side, arising from the column of Clarke. The *dorsal*, or *direct*, spinocerebellar tract enters the cerebellum of the same side by way of the restiform body; the *ventral* enters the cerebellum by way of the branchium conjunctivum, many fibers probably crossing in the ventral commissure of the cord. See SPINAL CORD, *Illust.*

spi'node (spī'nōd), *n.* [L. *spina* thorn + *nodus* knot.] *Math.* A cusp or stationary point; — disting. from *crunode* and *acnode*. *Obs.*

spi'noid (-noid), *adj.* [See -OID.] Spinelike.

spi'no·ol'i·var'y, *adj.* *Anat.* Connecting the spinal cord with the olivary body.

spino-olivary tract. See SPINAL CORD, *Illust.*

spi'nose (spī'nōs; spĭ·nōs'), *adj.* [L. *spinosus*, fr. *spina* thorn.] Full of spines; armed with spines. — **spi'nose·ly,** *adv.* — **spi'nose·ness,** *n.*

-spi'nose. A combining form of *spinose*, as in bi*spinose*.

spi·nos'i·ty (spī·nŏs'ĭ·tĭ), *n.* [LL. *spinositas.*] Spinose or spinous quality or state; thorniness; figuratively, a pointed or cutting remark; a rough bristling nature; also, a thorny part or thing.

spi·no'so- (spī·nō'sō-). A combining form from Latin *spinosus*, denoting *spinose, spinosely*, as in **spi·no'so·den'tate, spi·no'so·den·tic'u·late, spi·no'so·tu·ber'cu·lar, spi·no'so·tu·ber'cu·late.**

spi'nous (spī'nŭs), *adj.* [Cf. L. *spinosus.*] Having the form of a spine or thorn; spinelike; also, spinose; spiny; figuratively, thorny; unpleasant to handle; rough and difficult. — **spi'nous·ness,** *n.*

COMBINATIONS are:

spinous-branched	spinous-leaved	spinous-tailed
spinous-finned	spinous-pointed	spinous-tipped
spinous-foliaged	spinous-serrate	spinous-toothed

spinous process. *Anat. & Zool.* Specif.: **a** The median spinelike or platelike dorsal process of the neural arch of a vertebra; a neural spine. **b** A sharp posterior prolongation on each greater wing of the sphenoid bone. **c** A process on the head of the tibia between the articular surfaces for the condyles of the femur. **d** A spine. See ILIUM, 1.

Spi·no'zism (spĭ·nō'zĭz'm), *n.* The philosophy of Benedictus (or Baruch) de Spinoza (1632–77), born at Amsterdam of Jewish parents. Spinoza taught that all reality is One Substance, God, of which thought and extension (or mind and physical reality) are two aspects or attributes. There are an infinite number of such attributes, but these two are the only ones capable of being apprehended by the human mind. Particular things and particular ideas or states of mind are modes or determinations of these attributes. All such temporal existences are rigidly connected together in the One Substance; hence, all that happens happens of necessity. Human bondage to the passions and particular desires is due to that ignorance which fails to apprehend this inevitability. Human freedom, or salvation, is to be won through seeing things "under the aspect of eternity," that is, through understanding and acquiescing in this necessity; this contemplative peace is called the "intellectual love of God." Spinoza's philosophy is developed in mathematical fashion, that is, in imitation of the rigorous deduction characteristic of Euclid's geometry.

Spi·no'zist (-zĭst), *n.* An adherent of Spinozism.

Spin'o·zis'tic (spĭn'ō·zĭs'tĭk), *adj.* Pert. to Spinoza or Spinozism; resembling, or characteristic of, Spinozism.

spin'ster (spĭn'stĕr), *n.* [ME., fr. *spin* + *-ster.*] **1.** A woman who spins, or whose occupation is to spin.

2. A man who spins. *Obs.* *Shak.*

3. Formerly, an addition or title (equivalent, as late as the 23d year of Elizabeth's reign, to the Latin *generosa*) given to unmarried women of the gentle classes from a viscount's daughter down, and often retained by them on their marriage, esp. when the husband was not of the gentry; now, an unmarried or single woman, *spinster* being often still used in this sense in legal proceedings as a title or addition. The use of the term as implying gentility had fallen out of fashion in the time of Chief Justice Coke, who declared that if a gentlewoman were named spinster in any original writ, appeal, etc., she might abate it, as being entitled to the addition *generosa*. Its use as applied to married women in legal proceedings survived later in America than in England.

4. Hence, popularly, an unmarried woman, somewhat advanced in years; an old maid.

5. A woman of evil life and character; — so called from being forced to spin in a house of correction. *Obs.*

spin·ste'ri·al (spĭn·stēr'ĭ·ăl), *adj.* Resembling a spinster; of the nature of a spinster; spinsterish.

spin'ster·ish (spĭn'stĕr·ĭsh), *adj.* Like a spinster; having the nature of a spinster; spinsterial. "She devoted herself to admiring the *spinsterish* Miss Villets." *Sinclair Lewis.* — **spin'ster·ish·ly,** *adv.*

spin'ster·ly (-lĭ), *adv.* In the manner of a spinster. See -LY. — *adj.* Spinsterish; having the quality or nature of a spinster.

spin'ster·ous (-ŭs), *adj.* Spinsterish; spinsterly.

spin'stress (spĭn'strĕs; -strĭs; 119), *n.* **a** A woman who spins. **b** A spinster.

spin'stry (-strĭ), *n.* Occupation or product of spinning. *Obs.*

spin'text' (spĭn'tĕkst'), *n.* A prolix preacher.

spin·thar'i·scope (spĭn·thär'ĭ·skōp), *n.* [Gr. *spintharis* spark + *-scope.*] A small instrument containing a minute particle of a radium compound mounted in front of a fluorescent screen and viewed with magnifying lenses. The tiny flashes produced by the continual bombardment of the screen by the alpha rays are thus rendered visible. — **spin·thar'i·scop'ic** (-skŏp'ĭk), *adj.*

spin'ther·ism (spĭn'thĕr·ĭz'm), *n.* [NL. *spintherismus*, fr. Gr. *spinthēr* a spark.] A subjective sensation as of sparks before the eyes.

spin·tur'nix (spĭn·tûr'nĭks), *n.* [L.] A kind of unsightly bird. *Obs.* *Cowley.*

spin'u·late (spĭn'ū·lāt; spī'nū-), **spin'u·lat'ed** (-lāt'ĕd; -ĭd; 119), *adj.* Spinulose.

spin'u·la'tion (-lā'shŭn), *n.* An armature of spines or spinules.

spi'nule (spī'nūl; spĭn'ūl), *n.* [L. *spinula*, dim. of *spina* a spine; cf. F. *spinule.*] A small or minute spine.

spin'u·les'cent (spĭn'ū·lĕs'ĕnt; -'nt; spīn'ū-), *adj.* *Bot.* Having small spines; somewhat spiny.

spinuli-. A combining form from Latin *spinula*, spinule, as in **spin'u·lif'er·ous** (spĭn'ū·lĭf'ĕr·ŭs; spī'nū-), **spin'u·li·form'.** See -FEROUS; -FORM.

Spin'u·lo'sa (spĭn'ū·lō'sȧ; spī'nū-), *n. pl.* [NL. See SPINULOSE.] *Zool.* A cosmopolitan order of starfishes, lacking conspicuous marginal plates and stalked pedicellariae. Many occur only in the great depths of the sea.

spin'u·lose (spĭn'ū·lōs; spī'nū-), *adj.* [NL. *spinulosus.*] Covered with small spines. — **spin'u·lose·ly,** *adv.*

spinulose shield fern. See FERN, *Table.*

spin'u·lo'so- (spĭn'ū·lō'sō-; spī'nū-). A combining form, with adverbial force, for *spinulose*, as in **spin'u·lo'so·cil'i·ate** (-sĭl'ĭ·āt), spinulosely ciliate, **spin'u·lo'so·den'tate, spin'u·lo'so·den·tic'u·late, spin'u·lo'so·gran'u·late, spin'u·lo'so·ser'rate.**

spin'u·lous (spĭn'ū·lŭs; spī'nū-), *adj.* Spinulose.

spin'y (spīn'ĭ), *adj.*; SPIN'I·ER (-ĭ·ĕr); SPIN'I·EST. [From SPINE.] **1.** Covered with spines; bearing several or many spines; thorny; prickly.

2. Abounding with difficulties or annoyances; thorny.

The *spiny* deserts of scholastic philosophy. *Bp. Warburton.*

3. Like a spine in shape; slender and pointed; spindling.

COMBINATIONS are:

spiny-backed	spiny-haired	spiny-ribbed
spiny-coated	spiny-leaved	spiny-tailed
spiny-crested	spiny-legged	spiny-tipped
spiny-footed	spiny-margined	spiny-toothed
spiny-fruited	spiny-pointed	

spiny amaranth. A common weed (*Amaranthus spinosus*) having the stem armed with stipular spines.

spiny anteater. An echidna.

spiny bur. = SHEEP BUR **a**.

spiny clothur *or* **cocklebur.** A European cocklebur (*Xanthium spinosum*) naturalized everywhere as a weed in waste grounds. It has 3-branched spines at the axils of the leaves.

spiny dogfish. See DOGFISH, 1.

spiny eel. Any of several strikingly colored, eel-shaped, fresh-water fishes of Africa and the East Indies, having a long slender snout, and with the anterior dorsal fin consisting of free spines.

spiny elm caterpillar. The larva of the mourning cloak (butterfly).

spin'y-finned' (spĭn'ĭ·fĭnd'; 66), *adj.* *Zool.* Having fins with some spiny rays; — said, specif., of the Acanthopterygii. Opposed to *soft-finned.*

spiny lobster. See LOBSTER, 1.

spiny rat. **a** Any of numerous South and Central American octodont rodents of the genera *Echimys*, *Loncheres*, and *Proechimys*, in which the fur is mixed with heavy flattened spines. **b** Any of numerous pouched rodents of the genus *Heteromys* having spiny or bristly pelage, found from Texas to South America.

spiny ray. *Zool.* In fishes, a fin ray which is stiff, unbranched, pointed at the end, and without transverse segmentation. One or more such rays occur in the anterior part of the dorsal (or in the first dorsal when there are two), anal, and ventral fins of many fishes, and their presence in the dorsal and anal fins was in old classifications the principal character of the group Acanthopterygii. Opposed to *soft ray.*

spin'y-rayed' (66), *adj.* **a** Having spiny rays; said of some fins. **b** Having fins with one or more spiny rays; spiny-finned; — said of some fishes, esp. the Acanthopterygii.

spiny rolling grass. In Australia, a grass (*Spinifex hirsutus*) with long creeping stems, rooting freely at the joints, thus valuable as a sand binder.

spin'y-skinned' (spĭn'ĭ·skĭnd'; 66), *adj.* Having a skin covered with knobs, tubercles, or spines; as, *spiny-skinned* animals.

Spi·on'i·for'mi·a (spī·ŏn'ĭ·fôr'mĭ·ȧ), *n. pl.* [NL., fr. *Spio* type genus + L. *forma* form.] *Zool.* An extensive division of marine Annelida, including those without oral tentacles or palpi, and having the gills, when present, mostly along the sides of the body. They generally live in burrows or tubes. **Spi·on'i·dae** (spĭ·ŏn'ĭ·dē) is the typical family. — **spi'o·nid** (spī'ō·nĭd), *n.*

spi'ra·ble (spī'rȧ·b'l), *adj.* [L. *spirabilis.*] That can breathe or be breathed; respiratory; respirable. *Obs.*

spi'ra·cle (spī'rȧ·k'l; spĭr'ȧ-), *n.* [L. *spiraculum*, fr. *spirare* to breathe. See SPIRIT.] **1.** A breathing hole; an air hole; esp., a small aperture; vent.

2. Breath; spirit. *Obs.* *Cleanness.*

3. *Geol.* A steam or gas vent on the surface of a lava flow.

4. *Zool.* A breathing orifice; specif.: **a** The blowhole of a cetacean. **b** In most terrestrial arthropods, one of the stigmata or external apertures of the tracheae. In true insects they are usually small, more or less elliptical apertures, often provided with a valve and often protected by a sievelike structure, or fringe of hairs. They are placed along the sides of the thorax and abdomen. Eleven pairs is the maximum number; usually there are ten pairs but sometimes fewer. **c** One of the orifices or passages opening on the upper back part of the head of many elasmobranchs and some ganoid fishes (sturgeons, *Polypterus*) and communicating with the mouth cavity. They represent the first postoral visceral clefts of the embryo, and in the rays serve (instead of the mouth) as the chief incurrent respiratory openings. They may contain a rudimentary gill. **d** The excurrent aperture of the gill chamber of a tadpole. There are at first two apertures, but they soon unite in a canal which opens on the left side of the body or rarely on the middle of the belly.

Spiracle of Common Fly, much enlarged.

spi·rac'u·lar (spĭ·răk'ū·lĕr), *adj.* Pertaining to a spiracle.

spi·rac'u·late (-lāt), *adj.* Spiraculiferous.

spiraculi-. A combining form for **spiraculum,** as in **spi·rac'u·lif'er·ous.**

spi·rac'u·li·form'. See -FEROUS; -FORM.

spi·rac'u·lum (spĭ·răk'ū·lŭm), *n.*; *pl.* -LA (-lȧ). [L.] A spiracle.

Spi·rae'a (spī·rē'ȧ), *n.* [L., fr. Gr. *speiraira*, fr. *speira* a coil. See 1st SPIRE.] *Bot.* **a** A large genus of shrubs (family Rosaceae), natives of temperate regions, with small perfect white or pink flowers in dense racemes, corymbs, cymes, or panicles. The five pistils alternate with the persistent calyx lobes and ripen into follicles dehiscent along one suture. *S. latifolia*, meadowsweet, and *S. tomentosa*, hardhack, are American species. Many exotic species, as *S. hypericifolia*, *S. prunifolia* (the bridal wreath), etc., are cultivated. **b** [*not cap.*] Also **spi·re'a.** Any shrub of this genus; also, any of several similar plants of common cultivation, as *Astilbe japonica*, often forced by florists for Easter blooming.

1 Spiraea (*S. latifolia*); 2 Flower.

---

spin'na·ret. Var. of SPINNERET. **spin'nel.** Scot. & N. of Eng. var. of SPINDLE. [NERET, 2.] **spin'ner·ette'.** Var. of SPINNERET. **spin'ny,** *adj.* [Cf. SPINY, *adj.*] Thin and long; slender. *Obs.* **spin'ny.** Var. of SPINNEY. **spinose ear tick.** See EAR TICK. **Spi·no'sism, Spi·no'sist,** etc. Vars. of SPINOZISM, etc.

spinotectal tract. See SPINAL CORD, *Illust.* [CORD, *Illust.*] **spinothalamic tract.** See SPINAL. **spin'ster·dom,** *n.* See -DOM. **spin'ster·hood,** *n.* See -HOOD.

spin'ster·ism, *n.* See -ISM. **spin'ster·like',** *adj.* See -LIKE. **spin'ster·ship,** *n.* See -SHIP. **spin'try** (spĭn'trĭ), *n.* [L. *sp(h)intria.*] = SODOMITE **a**. *Obs.*

spinulo-. = SPINULOSO-. **spi'on,** *n.* [F. *espion.*] A spy. *Obs.* **Spi·on' Kop'** (spē·ŏn'kŏp'). See *Ladysmith*, under BATTLE, *Table.*

spir-. = 1st SPIRO-. **spir.** † SPIRE, SPUR, SPAR, SPEER, *v.*, to ask. ‖**spi·ra'cu·la** (spĭ·răk'ū·lȧ), *n.*, *pl.* of SPIRACULUM.

spi'ral (spī'răl), *adj.* [ML. *spiralis.* See 1st SPIRE.] **1.** Winding, curving, coiling, or circling round a center or pole and more or less gradually receding from (or approaching) it; as, the *spiral* curve of a watch spring.
2. Helical, like the thread of a screw.
3. Of, pertaining to, or knitted by, a spiral machine.
4. Rising to a sharp point; tapering, like the spire of a building.
5. *Bot.* **a** = ALTERNATE, *adj.*, 4. **b** = ACYCLIC **a**.
6. *Geom.* Of or pertaining to a spiral; like a spiral
☞ COMBINATIONS (all adjectives) are:

spiral-coated	spiral-horned	spiral-spring
spiral-grooved	spiral-pointed	spiral-vane

spi'ral, *n.* [From SPIRAL, *adj.*] **1.** *Geom.* **a** The path (generally plane) of a point that moves round an axis while continuously receding from (or approaching) it. **b** A helix.
2. Anything that has a spiral form, as a piece of coiled wire, a winding staircase, etc.; also, a single turn or coil in a spiral object.
3. *Amer. Football.* A kick or pass in which the ball rotates on its long axis while moving through the air.
4. *Astron.* A spiral nebula.
5. *Aviation.* A flight in a spiral path: a spiral flight.
6. *Railroads.* **a** A form of easement curve in which the change of degree of curve is uniform throughout its length. **b** A loop built where a line ascends a steep slope for the purpose of gaining distance in order not to exceed the ruling grade.

Spiral, 1 a.

spi'ral, *v. t.*; SPI'RALED (spī'răld) or SPI'RALLED; SPI'RALING or SPI'RAL-LING. To form into a spiral; to turn or twist spirally. — *v. i.* To go, rise or fall, or move in a spiral course; specif., *Aviation,* to cause an airplane to follow a spiral path in ascending or (more often) descending.
spiral axis. *Arch.* The axis of a twisted column drawn spirally in order to trace the circumvolutions without.
spiral balance. See BALANCE, *n.*, 1 **c**.
spiral bandage. See BANDAGE, *n.*, 1, *Illust.*
spiral battery. A voltaic cell in which the sheet zinc and copper electrodes with cloth between are rolled into a close spiral.
spiral bevel gear. *Mach.* See BEVEL GEAR.
spiral bit. See 1st BIT, 9, *Illust.*
spiral conveyer. *Mach.* A screw conveyer. See CONVEYER, *n.*, 2 **a**.
spiral duct. = SPIRAL VESSEL.
spi'raled (spī'răld), *adj.* Having spirals; of spiral form.
spiral ganglion. = GANGLION SPIRALE.
spiral gear *or* **gearing.** = SCREW GEAR *or* GEARING.
spiral grain. = CROSS GRAIN.
spiral head. *Mach.* An index head whose spindle may be connected by gearing to the feed screw of a milling machine table, for the purpose of cutting spirals.
spi·ral'i·form (spĭ·răl'ĭ·fôrm), *adj.* Having the form of a spiral.
spiral instability. See STABILITY, *n.*, 7.
spi'ral·ism (spī'răl·ĭz'm), *n.* Specif., *Plant Pathol.*, the growth of a normally straight stem to form either an open or a pronounced spiral.
spi·ral'i·ty (spĭ·răl'ĭ·tĭ), *n.* Quality or state of being spiral; amount of spiral curve.
spi'ral·ize (spī'răl·īz), *v. t.* To make spiral; to wind, coil, twist, or cut in a spiral. — **spi'ral·i·za'tion** (-ĭ·zā'shŭn; -ĭ·zā'-), *n.*
spiral line. *Anat.* A rough line on the upper part of the femur formed in part by the anterior intertrochanteric line. It marks the attachment of the iliofemoral ligament and upper part of the vastus medialis.
spi'ral·ly (spī'răl·ĭ), *adv.* In a spiral manner or course.
spiral milling. *Mach.* The process of milling in which the work is given simultaneously a rotary motion and an endwise motion, as in milling spiral gears.
spiral nebula. *Astron.* One of a large class of celestial structures exhibiting spiral form in their whorls and general configuration, now regarded as other milky ways, of stellar constitution; — called, more properly, *spirals.* See NEBULA, 1; ISLAND UNIVERSE.
• **spi'ral–neb'u·la hy·poth'e·sis.** *Cosmog.* The hypothesis that the stellar universe has in the main evolved from spiral nebulae, made up of discrete particles whose positions and motions were dependent upon their velocities and their mutual gravitation; the planetesimal hypothesis of Chamberlin and Moulton.
spiral of Archimedes. *Math.* = ARCHIMEDEAN SPIRAL.

Spiral of Archimedes.

spi'ral·oid (spī'răl·oid), *adj.* Somewhat spiral in shape or appearance.
spiral organ. = ORGAN OF CORTI.
spiral reverse bandage. See BANDAGE, *n.*, 1, *Illust.*
spiral shell end mill. See MILLING CUTTER.
spiral spring. A spring consisting of a wire coiled in a flat spiral, or in a helix.
spiral stairs. Stairs which are circular in plan and consist entirely of winders or wedge-shaped steps. The steps of a spiral stairway may be supported by the central newel only as in the case of steel, cast iron, or reinforced concrete stairs; by the central newel and a surrounding outside wall as in the case of stone, reinforced concrete, or wooden stairs; or by the surrounding outside wall and by the front edge of each step resting along the back edge of the step below as in the case of open newel stairs of stone. Reinforced concrete spiral stairs may be constructed with no support other than the spiral stair slab itself projecting upward from the floor slab on which it rests and to which it is anchored.
spi'ral·tail' (spī'răl·tāl'), *n.* King bird of paradise. See BIRD OF PARADISE, 1 **a**.
spiral valve. *Zool.* In the large intestine of fishes of the more primitive groups (elasmobranchs, ganoids, dipnoans), a continuous spiral ridge of mucous membrane which makes a number of complete turns, increasing the surface for absorption and retarding the passage of food. In the lampreys it also exists in a simple form.
spiral vessel. *Bot.* A trachea, or vessel, having the walls spirally thickened.
spiral wheel. = SCREW WHEEL.
spi'ran (spī'răn), *n.* [*spiro-* + 2d *-an.*] *Chem.* A spiro compound. See 1st SPIRO-, 2.
spi'rant (spī'rănt), *n.* [L. *spirans, -antis,* pres. part. of *spirare* to breathe. See SPIRIT.] *Phonet.* A consonant uttered with decided friction of the breath against some part of the oral passage; a fricative; as, *f, s, sh.* Cf. FRICATIVE, *adj.*, 1. Some writers include under *spirant* all the continuants; others, all except the nasals, *m, n, ng*; others further exclude the liquids *r, l,* and the semivowels *w, y*; still others limit the name to *f, v, th* (thin), *th* (this), and the sounds of German *ch.*
spi'rant (spī'rănt), *adj.* Of, pertaining to, or of the nature of, a spirant.
Spi·ran'thes (spĭ·răn'thēz), *n.* [NL., fr. *spir-* + *-anthes.*] *Bot.* A large, widely distributed genus of terrestrial orchids, with slender, often twisted spikes of white irregular flowers; the lady's-tresses. Syns. *Ibidium, Gyrostachys.*
spi·ran'thy (spĭ·răn'thĭ), *n.* [*spir-* + *-anthy.*] *Bot.* Displacement by spiral twisting of the parts of a flower. — **spi·ran'thic** (-thĭk), *adj.*
spi'rant·ize (spī'răn·tīz), *v. t.* To make spirant.

ASPIRE, CONSPIRE, ESPRIT, EXPIRE, INSPIRE, PERSPIRE, RESPIRATION, SPIRANT, SPRITE, SUSPIRE.] **1.** The breath of life; life, or the life principle, conceived as a kind of breath or vapor animating the body, or, in man, mediating between body and soul. To Plato it was the second division of the tripartite soul of man, intermediate between the soul of the belly which rules the merely vital functions and the rational soul seated in the head. The Galenic notion, accepted in the physiology of the Middle Ages, was that the spirit in the body existed in three kinds or degrees: (1) The ***natural spirit,*** a vapor rising from the blood and having its seat in the liver, was considered the principle of the "natural" functions of nutrition, growth, and generation. (2) The ***vital spirit,*** transformed from the natural spirit, in the heart, by mixture with the air of respiration, had the "vital" functions, conveying heat and life through the arteries to the whole body. (3) The ***animal spirit,*** converted in the brain from the vital spirit, included the rational principle, and had the "animal" functions of distributing the power of motion and feeling through the nerves. See ANIMAL, *adj.*, 1.
2. The life principle viewed as the "breath" or gift of deity; hence, the agent of vital and conscious functions in man; the soul. *Spirit* (Heb. *nephesh,* usually translated "soul" in the Bible, Gr. *pneuma,* Lat. *spiritus*) and *soul* are used sometimes as synonyms, sometimes as naming different elements in man's immaterial nature. In former use, *spirit* often denoted (as in def. 1) the vital principle of the body, as something inferior to *soul.* In current use *spirit* denotes a disembodied soul or (as in def. 5) an immaterial being which never had a body. Thus we speak of "*spirits* of the dead," "*spirit* return," the "land" or "realm of *spirits.*" See SOUL, *n.*, 1; GHOST, *n.*, 3.
I am thy father's *spirit*;
Doomed for a certain time to walk the night. *Shak.*
Then shall the dust return to the earth as it was, and the *spirit* shall return unto God who gave it. *Eccl.* xii. 7.
Spirit is a substance wherein thinking, knowing, doubting, and a power of moving, do subsist. *Locke.*
3. [*often cap.*] In the abstract, life or consciousness viewed as an independent type of existence; as, idealists maintain that the essential nature of the universe is *spirit,* pantheists that *spirit* pervades the universe. In this sense *spirit* denotes a quality or being similar to man's psychical or vital nature, conceived as a characteristic of nature or of deity. Thus, in Hebrew, *ruakh,* usually translated "spirit" in the Bible, denotes the divine breath independent of as well as in the body, and *nephesh,* "soul, spirit," denotes only the embodied breath. *Spirit* is also used to translate such terms (often rendered *mind*) as the Greek *nous* (see NOUS, 1), Latin *mens,* German *Geist,* esp. in connection with idealistic theories. See IDEALISM, 1.
4. [*cap.,* often with *the.*] One manifestation of the divine nature; one of the persons of the Trinity; the Holy Spirit.
5. Any supernatural being; an apparition; a specter; also, sometimes, a sprite; elf; esp., such a supernatural being conceived of as able to enter into and possess a person.

splice (splīs), *n.* **1.** A joining of two cords, ropes, cables, or the like, or of two parts of the same rope by interweaving the strands, esp. so that the resulting joint is approximately of the same size as the original rope. In a ***short splice*** (fig. 1) each strand of each rope is carried over the adjacent strand and tucked under the second and so on. In the ***eye splice*** (fig. 2) the end part of a rope is bent into a loop and then spliced into the standing part with a short splice.

Various Splices. Fig. 1. Short Splice. *a* Strands of each Rope unlaid and in place for tucking; *b* First Strand tucked; *c* Completed Splice. Fig. 2. Eye Splice. *a* First and second Strands tucked; *b* (Back View of *a*) Third Strand tucked; *c* Completed Splice. Fig. 3. Cut Splice. Fig. 4. Long Splice (the starting position is the same as for the Short Splice — Fig. 1 *a* — except that the Strands are unlaid for a longer distance). *a* After one Strand of each Rope has been unlaid and replaced by a Strand of the other Rope; *b* Strands knotted. A Long Splice is finished by dividing each Strand, cutting off part and tucking the rest as in a Short Splice.

In a ***cut splice*** (fig. 3) the strands of each of two ropes are spliced into the standing part of the other rope. In a ***horseshoe splice*** (***D splice***) the two ends of one rope are spliced into the body of another rope leaving a loop between. In all of these splices the resulting joint is somewhat larger than the original rope. The ***long splice*** (fig. 4) is made by unlaying one strand of each rope, replacing it by a strand of the other rope, and then fastening them by knots, etc., the resulting joint being no larger than the original rope. A ***chain splice*** is used to join rope to chain, three strands of the rope are unlaid and two only are passed through the link in the end of the chain, the third strand is unlaid for some distance and one of the two strands laid in its place, the other strand being tucked as in an eye splice.
2. A joining of the ends of spars, timbers, rails, etc., by lapping the ends or applying a piece lapping both ends, and by binding, bolting, or otherwise making fast; also, the ends so lapped and fastened, or a piece so used.

spong (spŏng), *n.* [Origin uncert.] A long piece or strip of land. *Obs. exc. Dial. Eng.*

sponge (spŭnj; 140), *n.* [OF. *esponge* (F. *éponge*), fr. L. *spongia,* fr. Gr. *spongia, spongos.* See FUNGUS; cf. SPUNK.] **1. a** The elastic porous mass of interlacing horny fibers which forms the internal skeleton of certain marine animals of low organization belonging to the phylum Porifera, esp. those of *Euspongia, Hippospongia, Spongia,* and allies of warm or tropical seas. Sponges have great power of absorbing water, becoming soft when wet without losing their toughness. **b** The entire animal producing this skeleton, or any allied member of the phylum Porifera. The sponges are a large group, mostly marine, but a few inhabit fresh water. Except in the larval stage they are permanently attached, growing in a plant-like fashion into masses which vary much in size, shape, color, and consistency in the different members of the group. Their classification is usually based on the material of the skeleton, which may be entirely horny (composed, however, not of true horn, but of *spongin*), as in the commercial sponges, but generally the spongin is supplemented or replaced by siliceous spicules. Others have a calcareous skeleton, while in a few a skeleton is wanting. During life the interstices of the skeleton are filled with cells and pierced with a system of canals and small cavities opening on the surface by numerous incurrent orifices or pores, and one or many larger excurrent orifices (*oscula*). A current of water bearing with it the food (minute organisms, particles of organic matter, etc.) is maintained by collared, flagellated cells lining the cavities or canals. Reproduction occurs asexually in several ways, and sexually by means of egg and sperm cells which form a free-swimming larva.

Sponge (one of the *Myxospongiae*). *A* Vertical Section of a small portion; *a,* a Amphiblastula or Cavities lined with Flagellated Cells; *i* Incurrent Opening; *b* Excurrent Canal; *e* Egg. *B* Partial Section of an Ampulla, showing Flagellated Cells. *C* A single Flagellated Cell, more enlarged. *f* Flagellum; *v* Collar; *n* Nucleus; *c* Contractile Vacuole.

2. A piece of the above substance, moistened and used in various ways, as to dampen clothes before pressing, to erase chalk marks on a blackboard or pencil marks on a slate, to scatter water over the body in bathing, etc.; also, the use of the above substance in any of these ways; act of sponging.
3. Short for SPONGE BATH.

A cold *sponge* is invariably efficacious. *Gibbs.*

4. Figuratively: **a** One who lives upon others; a persistently idle or lazy dependent; a parasite; a sponger. *Now Colloq.*

I will do anything . . . ere I'll be married to a *sponge.* *Shak.*

b One that absorbs or takes in anything freely, as a sponge does water; specif., *Slang,* a hard drinker; a drunkard. **c** Also, one from whom something, as money, may be squeezed or pressed. **d** One who erases or wipes the slate clean; one which effaces all marks or records. **e** A process or method of canceling or wiping off indebtedness without making payment.

3. Produced without being planted, or without human labor; native; indigenous; as, a *spontaneous* growth of wood.

Syn. — SPONTANEOUS, VOLUNTARY, AUTOMATIC. SPONTANEOUS emphasizes the idea of an inner impulse or energy, acting without external stimulus; the word may apply to either animate or inanimate objects; VOLUNTARY always implies the power of choice; as here compared (cf. VOLUNTARY) it lays stress on the absence of external compulsion; as, a *spontaneous* burst of applause; the *voluntary* admission of an error; "He had a natural sympathy with everything that was free, and *spontaneous,* and self-acting" (*Jowett*); "If the English were in a paradise of *spontaneous* productions, they would continue to dig and plow" (*Sydney Smith*); "Our *voluntary* service he requires, not our necessitated" (*Milton*); "*voluntary* exile" (*Shak.*). *Voluntary* (in the sense of "subject to the will") and *spontaneous* are sometimes contrasted; as, "The sovereign *voluntary* path to cheerfulness, if our *spontaneous* cheerfulness be lost, is . . . to act and speak as if cheerfulness were already there" (*W. James*). That which is AUTOMATIC (like that which is *spontaneous*) is self-acting; but *automatic* (unlike *spontaneous*) implies an activity which is merely mechanical; as, "thoughts and phrases that rise *automatically* when the mind has prepared itself to receive them" (*Galton*); "An *automatic* action that fulfils a forgotten intention" (*G. Eliot*).

Ant. — Forced, involuntary, strained, labored.

spoon'y, spoon'ey, *n.*; *pl.* SPOONIES, SPOONEYS (-īz). One who is silly, esp. in showing affection. *Slang.*

I was a lackadaisical young *spooney.* *Dickens.*

spoor (spōōr; 199), *n.* [D. *spoor*; akin to AS., ON., & OHG. *spor*, G. *spur*, and E. SPUR.] A track, trace, or trail; esp., the trail of a wild animal.

spoor, *v. i. & t.*; SPOORED (spōōrd); SPOOR'ING. To follow, or track by, a spoor or trail.

spoor'er (spōōr'ĕr), *n.* One who spoors.

spoorn, *n. Folklore.* A kind of evil specter or hobgoblin. *Obs.*

-spora. [NL.] *Bot.* A combining form from Greek *spora*, seed, denoting *plants having a* (specified) *sporal characteristic*, as in Peronos*pora*, Pteros*pora*.

spo-rab'o-la (spō-răb'ō-lȧ), *n.* [NL., fr. Gr. *spora* a seed + *ballein* to throw.] The trajectory of a falling spore, as from a mushroom.

spo-ra'ceous (spō-rā'shŭs), *adj.* Pertaining to spores.

spor'a-des (spōr'ȧ-dēz), *n. pl.* [NL. See SPORADIC.] *Astron.* Sparsile stars.

spo-ra'di-al (spō-rā'dĭ-ȧl), *adj.* Sporadic. *Rare.*

spo-rad'ic (spō-răd'ĭk), *adj.* Also, *Rare*, **spo-rad'i-cal** (-ĭ-kȧl). [ML. *sporadicus*, fr. Gr. *sporadikos* scattered, fr. *sporas*, *-ados*, scattered; akin to Gr. *sporein* to sow seed. Cf. SPORE.] Occurring occasionally, singly, or apart from other things of the same kind, or in scattered instances; separate; single; isolated; as, a *sporadic* case of disease; a *sporadic* individual of a species. — **spo-rad'i-cal-ly,** *adv.* — **spo-rad'i-cal-ness,** *n.* — **spo'ra-dic'i-ty** (spō'rȧ-dĭs'ĭ-tĭ), *n.* — **spo'ra-dism** (spō'rȧ-dĭz'm; 181), *n.*

sporadic cholera. A disease somewhat resembling Asiatic cholera, but originating where it occurs, and rarely becoming epidemic; specif., cholera morbus.

sporadic disease. *Med.* A disease which occurs in single and scattered cases. See ENDEMIC, *adj.*, 3.

spo'ra-do-sid'er-ite (spō'rȧ-dō-sĭd'ĕr-īt), *n.* [Gr. *sporas*, *-ados*, scattered + *siderite.*] The commonest form of meteorite, almost entirely crystalline in structure, and containing olivine, chromite, and other minerals with disseminated grains of nickel iron.

spor'al (spōr'ȧl; 181), *adj.* Pert. to, or resembling, spores.

spo-range' (spō-rănj'), *n. Bot.* A sporangium.

-spo-range'. A combining form of *sporange*, less used than *-sporangium*, as in mega*sporange*, zoo*sporange*.

spo-ran'gi-al (spō-răn'jĭ-ȧl), *adj. Bot.* Of or pertaining to a sporangium; made up of sporangia.

spo'ran-gid'i-um (spō'răn-jĭd'ĭ-ŭm), *n.* [NL., dim. of *sporangium.*] *Obs. Bot.* **a** Columella of a moss. **b** A sporangium.

spo'ran-gif'er-ous (spō'răn-jĭf'ĕr-ŭs), *adj.* [*sporangium* + *-ferous.*] *Bot.* Bearing sporangia.

spo-ran'gi-form (spō-răn'jĭ-fôrm), *adj. Bot.* Having the form of a sporangium.

spo-ran'gi-oid (-oid), *adj.* [*sporangium* + *-oid.*] Sporangiform.

spo-ran'gi-ole (-ōl), *n.* [Dim. fr. *sporangium.*] A sporangiolum.

spo'ran-gi'o-lum (spō'răn-jĭ'ō-lŭm), *n.*; *pl.* -OLA (-lȧ). [NL.] *Bot.* **a** In fungi of the family Mucoraceae, a small, few-spored sporangium, occurring along with larger sporangia, containing numerous spores. **b** A peridiolum.

spo-ran'gi-o-phore' (spō-răn'jĭ-ō-fôr'; 181), *n.* [*sporangium* + *-phore.*] A stalk or receptacle bearing sporangia.

spo-ran'gi-o-spore' (-spōr'; 181), *n. Bot.* A spore developed in a sporangium.

spo-ran'gite (spō-răn'jĭt), *n.* [*sporangium* + 1st *-ite*, 5.] *Paleontol.* The spore case of any fossil plant.

Spo'ran-gi'tes (spō'răn-jĭ'tēz), *n.* [NL. See SPORANGITE.] *Paleontol.* A genus of fossil organisms that, apparently, represent spores or spore cases of plants of the genera *Lepidodendron* and *Calamites* or related Paleozoic plants.

spo-ran'gi-um (spō-răn'jĭ-ŭm), *n.*; *pl.* -GIA (-ȧ). [NL., fr. Gr. *sporos* a sowing, seed + *angeion* receptacle.] *Bot.* A spore case; specif., the sac or receptacle within which asexual spores are produced. In bacteria and certain algae and fungi the sporangium is often a single cell (mother cell) giving rise endogenously to one or a few spores. In bryophytes there are no true sporangia (see SPOROGONIUM, THECA). In ferns and their allies the sporangia are more complex, and contain numerous spores developed from a primitive sporogenous tissue (archespore) and nourished by a special layer of cells (tapetum). Discharge of the spores is aided by the elastic annulus (which see). In seed plants and heterosporous ferns the sporangia are of two kinds. See MICROSPORANGIUM, MEGASPORANGIUM, also FERN, *Illust.*; cf. GAMETANGIUM, GONIDANGIUM.

-spo-ran'gi-um. [NL.] *Bot.* A combining form of *sporangium*, as in andro*sporangium*, carpo*sporangium*. Derivative adjectives are usually formed in *-sporangiate*, as in eu*sporangiate*, lepto*sporangiate*.

spo-ra'tion (spō-rā'shŭn), *n.* Sporulation.

spore (spōr; 181), *n.* [NL. *spora*, fr. Gr. *spora* a sowing, seed; akin to Gr. *speirein* to sow. Cf. SPERM.] *Biol.* Any of various small or minute primitive reproductive bodies (or resistant resting cells), typically unicellular, produced by plants (orig. one of the dustlike asexual reproductive bodies of fungi, ferns, etc.) and some protozoans, developed either asexually or through the union of two sex cells, or gametes (which see). It was formerly supposed that the spores originally so called were analogous to the seeds of the higher plants; but it is now known that morphologically a spore is a nucleated mass of protoplasm with or without a cell wall, sometimes motile by means of flagella (see ZOOSPORE), and capable of growth into a new individual either independently (asexual spore) or through union with another similar or dissimilar spore (sexual spore). A seed is a complex structure containing a resting embryo which has developed from the union of two sexual spores. See SEED, 9; ZYGOTE. In algae and fungi the many types of asexual spores are distinguished by special names, as *ascospore*, *tetraspore*, *basidiospore*, *carpospore*, *chlamydospore*, *conidium*, etc. In many pteridophytes and all seed plants the asexual spores are of two kinds, microspores and megaspores (see these terms). In protozoans the process of spore formation is an asexual one, and typically consists in the division of the cell contents (often after encystment of the cell) into many minute cells (spores) which are afterward liberated to swim away or become scattered. Less often the cell forms but one spore. Both in plants and animals spore formation often provides the organism with a means of surviving unfavorable seasons or extremes of temperature, the spores then being surrounded with a tough investing wall and possessing great tenacity of life. This is the case with the endospores of many bacteria, and often greatly increases the difficulty of sterilization.

spore, *v. i. Bot.* To form or develop spores, as a plant.

-spore. *Biol.* A combining form of the noun *spore*, denoting: **a** *A spore having a* (specified) *characteristic* or *source*, as in chlamydo*spore*, zoo*spore*. **b** = SPORIUM, as in endo*spore* (sense **a**), exo*spore* (sense **a**).

☞ The meanings of the following can be understood from the definitions of the first elements:

agamospore	**macrospore**	**spermatospore**
basidiospore	**microspore**	**trophospore**
conidiospore	**parthenospore**	
gymnospore	**pycnidiospore**	

spore. Var. of SPUR. *Obs.*

spore ball. *Bot.* A multilocular body, becoming free like a spore, in which each cell is capable of germination (cf. SPONGOSPORA) or in which only part of the cells germinate (cf. UROCYSTIS).

spore case. *Bot.* A case containing spores; sporangium.

spore cell. A spore.

spored (spōrd; 181), *adj.* Having spores.

-spored. = -SPOROUS, as in poly*spored*.

spore'form'er (spōr'fôr'mĕr), *n.* A plant that forms spores. — **spore'form'ing,** *n.* & *adj.*

spore fruit. *Bot.* Any specialized structure which produces spores, as an ascocarp; a fruit body.

spore'ling (spōr'lĭng), *n.* [*spore* + 1st *-ling.*] *Bot.* A young sporophyte.

spore mother cell. *Bot.* In sporangiferous plants, the mother cell of a spore. These cells are the product of the final division of the archespore; each develops a group of four spores called a *tetrad*.

spore print. A deposit of spores of a fungus made by allowing the discharged spores to collect on paper or glass. In agarics the fruit gives a picture of the arrangement of the gills, or lamellae.

Spō'rer's law of zones (spū'rĕrz). *Astron.* A law expressing the latitude variation of the zones of sunspots, formulated by F. W. G. Spörer (1822–95).

spore sac. *Bot.* A spore case; as: **a** Cavity of the theca in mosses. **b** Ascus.

spori-. = SPORO- (see -I-), as in **spo'ri-cide.** See -CIDE.

-spor'ic (-spōr'ĭk). = -SPOROUS, as in carpo*sporic*.

spo'rid (spō'rĭd; 181) *n.* Sporidium.

spo'ri-desm (spō'rĭ-dĕz'm), *n.* [*spore* + Gr. *desmē* bundle.] A multicellular spore body, or chain, of independent spores.

-spo-rid'i-a (-spō-rĭd'ĭ-ȧ). [NL.] *Zool.* A combining form from *sporidium*, denoting *a group*, as an order or subclass, *of Sporozoa*, as in Neos*poridia*, Sarcos*poridia*.

spo-rid'i-al (spō-rĭd'ĭ-ȧl), *adj. Bot.* Pertaining to a sporidium.

spo'ri-dif'er-ous (spō'rĭ-dĭf'ĕr-ŭs), *adj.* [*sporidium* + *-ferous.*] Bearing sporidia.

spo-rid'i-ole (spō-rĭd'ĭ-ōl), *n.* A sporidiolum.

spo'ri-di'o-lum (spō'rĭ-dĭ'ō-lŭm), *n.* [NL., dim. of *sporidium.*] *Bot.* In the rust fungi, one of the sporidia developed by the promycelium.

spo-rid'i-um (spō-rĭd'ĭ-ŭm), *n.*; *pl.* -IA (-ȧ). [NL. dim. See SPORE.] *Bot.* A small spore, esp. one adjointed from a promycelium, as in certain smuts and rusts.

spo'rif'er-ous (spō-rĭf'ĕr-ŭs), *adj.* [*spore* + *-ferous.*] Bearing or producing spores.

spo'ri-fi-ca'tion (spō'rĭ-fĭ-kā'shŭn; 181), *n.* [*spore* + *-fication.*] Spore formation.

spo'ri-par'i-ty (-pär'ĭ-tĭ), *n.* [*spore* + L. *parere* to bring forth.] *Zool.* Reproduction by sporulation. — **spo-rip'a-rous** (spō-rĭp'ȧ-rŭs), *adj.*

-spo'ri-um (-spō'rĭ-ŭm). [NL.] *Biol.* A combining form from Greek *spora*, a seed, denoting: **a** *A coat* or *layer of a spore wall*, as in endo*sporium*, exo*sporium*. **b** *A genus of plants characterized by a* (specified) *type of spores*, as in Helminthos*porium*.

spo'ro- (spō'rō-), **spor-.** A combining form, Greek *sporo-*, *spor-*, from *spora*, a seed, meaning *spore*, as in *sporo*cyst *spor*angium, **spo'ro-gone, spo'ro-gon'ic.**

spo'ro-blast (-blăst), *n.* [*sporo-* + *-blast.*] *Zool.* In certain protozoans, a cell which divides into sporozoites.

Spo-rob'o-lus (spō-rŏb'ō-lŭs), *n.* [NL., fr. *sporo-* + root of Gr. *ballein* to cast.] *Bot.* A large and widely distributed genus of grasses having ample panicles with small one-flowered spikelets, each with three glumes. The grain separates easily, whence the name *dropseed*.

spo'ro-carp (spō'rō-kärp), *n.* [*sporo-* + *-carp.*] *Bot.* **a** In the red algae (Rhodophyceae), the multicellular body which develops from a fertilized archicarp or procarp; a cystocarp. It produces a number of asexual spores called *carpospores*. **b** In fungi, a many-celled body producing spores; specif., in ascomycetes, any ascocarp or ascus fruit. **c** In mosses, the sporogonium. **d** In heterosporous fern allies of the order Salviniales, one of the capsulelike masses of sporangia.

Sporocarp of the Red Alga (*Nemalion multifidum*). 1 Carpospores; 2 Remnant of Trichogyne. (×150)

Spo-roch'nus (spō-rŏk'nŭs), *n.* [NL., fr. *sporo-* + Gr. *chnoos* down, bloom.] *Bot.* A small genus of brown algae (order Ectocarpales), typifying a family, **Spo'roch-na'ce-ae** (spō'rŏk-nā'sē-ē), and characterized by tufts of hairlike filaments terminating some of the branches of the thallus.

spo'ro-cyst (spō'rō-sĭst), *n.* [*sporo-* + *-cyst.*] **1.** *Zool.* **a** (1) The case or cyst secreted by certain protozoans preliminary to the production of spores by sporulation. (2) A protozoan in such an encysted condition. **b** In digenetic trematode worms, a saclike stage which buds off cells from the membrane lining its internal cavity. These cells develop into embryos (*rediae*) within the cavity of the sporocyst. Cf. 1st FLUKE, 2.
2. *Bot.* A unicellular resting cell which may give rise to asexual spores, as in certain myxomycetes and algae. Cf. SPORANGIUM.
— **spo'ro-cys'tic** (-sĭs'tĭk), *adj.* — **spo'ro-cys'tid** (-tĭd), *n.*

spo'ro-cyte (-sīt), *n.* [*sporo-* + *-cyte.*] *Bot.* A spore mother cell. *Goebel.*

spo'ro-derm (-dûrm), *n.* [*sporo-* + *-derm.*] *Bot.* The wall or covering of a spore. *Obs.*

spo'ro-do'chi-um (-dō'kĭ-ŭm), *n.*; *pl.* -DOCHIA (-ȧ). [NL., fr. *sporo-* + Gr. *docheion* receptacle.] *Bot.* The erumpent, stromalike, conidial fruit characteristic of a family (Tuberculariaceae) of imperfect fungi.

spo'ro-duct (spō'rō-dŭkt), *n.* [*sporo-* + *duct.*] *Zool.* In the wall of the cyst formed by certain gregarines, minute tubes for the exit of the spores.

spo'ro-gen (-jĕn), *n.* [*sporo-* + *-gen.*] A plant which produces spores. *Obs.*

spo'ro-gen'e-sis (-jĕn'ē-sĭs), *n.* [NL., fr. *sporo-* + *-genesis.*] *Biol.* **a** Reproduction by spores. **b** Spore formation.

spo'ro-gen'ic (-jĕn'ĭk), *adj.* [*sporo-* + *-genic.*] *Biol.* Sporogenous.

spo-rog'e-nous (spō-rŏj'ē-nŭs), *adj.* [*sporo-* + *-genous.*] *Biol.* **a** Producing or developing spores; as, *sporogenous* tissue. **b** *Zool.* Reproducing by spores.

spo-rog'e-ny (spō-rŏj'ē-nĭ), *n.* Sporogenesis.

spo'ro-go'ni-um (spō'rō-gō'nĭ-ŭm; 181), *n.*; *pl.* -NIA (-ȧ). [NL. See SPORO-; -GONY.] *Bot.* The sporophyte in mosses and liverworts, typically consisting of a stalk (*seta*) bearing a capsule (*theca*) in which spores are produced. It develops from the fertilized egg in the venter of the archegonium and remains permanently attached to the gametophyte by the base of the seta (foot) which acts as an absorbing organ. In certain liverworts (Ricciales) the sporogonium is not stalked. In mosses, it is the so-called *moss fruit*. See MOSS, *Illust.* — **spo'ro-go'ni-al** (-ȧl), *adj.*

spo-rog'o-ny (spō-rŏg'ō-nĭ), *n.* [*sporo-* + *-gony.*] **a** Reproduction by spores. **b** Sometimes, specif., in Sporozoa, spore formation by a zygote by encystment and subsequent division of the cell contents, as distinct from *schizogony*.

spor'oid (spōr'oid; 181), *adj.* [*spor-* + *-oid.*] Resembling a spore.

spo-rol'o-gist (spō-rŏl'ō-jĭst), *n.* [*sporo-* + *-logist.*] A botanist who attaches importance to spores in classification.

spo'ro-my-co'sis (spō'rō-mī-kō'sĭs), *n.* [NL., fr. *sporo-* + *mycosis.*] *Med.* Infection of the body with any sporulating fungus.

spo'ront (spō'rŏnt; 181), *n.* [*spore* + Gr. *ōn*, *ontos*, pres. part., being.] *Zool.* In Sporozoa, a cell (often an oospore or zygote) which forms spores by encystment and subsequent division.

spo'ro-phore (spō'rō-fōr; 181), *n.* [*sporo-* + *-phore.*] *Bot.* A spore-bearing branch or organ; that part of the thallus of a sporophyte which develops spores. In fungi it is often conspicuous as in the mushrooms and other basidiomycetes, where it is the spore fruit. It may be a simple hyphal filament or a mass of hyphae. In ferns, mosses, and liverworts, it is practically equivalent to the sporophyte; in seed plants it is the placenta. See SPOROPHYTE; cf. GAMETOPHORE. — **spo'ro-phor'ic** (-fôr'ĭk), *adj.*

spo-roph'o-rous (spō-rŏf'ō-rŭs), *adj.* [*sporo-* + *-phorous.*] **a** Bearing spores. **b** *Bot.* Pertaining to a sporophore.

spo'ro-phyd'i-um (spō'rō-fĭd'ĭ-ŭm; 181), *n.* [NL., fr. *sporo-* + *-phydium*, used as a dim. fr. Gr. *phyas* a shoot.] *Bot.* The unfertilized oögonium in Characeae. *Rare.*

spo'ro-phyll (spō'rō-fĭl), *n.* Also **spo'ro-phyl.** [*sporo-* + *-phyll.*] *Bot.* **a** A spore-bearing leaf; a leaf more or less modified in form and structure which develops sporangia. It may resemble and perform the functions of a foliage leaf, as, in the ferns, or may be completely altered, as the spike of the adder's-tongue. In heterosporous plants the sporophylls are of two kinds, *microsporophylls* and *megasporophylls*. **b** In certain brown algae (genus *Alaria*), a small leaflike structure bearing the sporangia. — **sporoph'yl-lar'y** (spō-rŏf'ĭ-lĕr'ĭ *or, esp. Brit.*, -lĕr-ĭ), *adj.*

spo'ro-phyl'lum (-fĭl'ŭm), *n.* Sporophyll.

spo'ro-phyte (spō'rō-fīt; 181), *n.* [*sporo-* + *phyte.*] *Bot.* In plants exhibiting alternation of generations, the

individual or generation which bears asexual spores; — opposed to *gametophyte*. It is not clearly differentiated in the life cycle of the lower plants. In bryophytes it first becomes distinct, being known as the *sporogonium*. In pteridophytes it has become the conspicuous part of the plant, the gametophyte being reduced to a small thalloid body (*prothallium*); in seed plants it is the only stage visible to ordinary observation, the whole visible tree, shrub, or herb being the sporophyte. Cf. GAMETOPHYTE; see ALTERNATION OF GENERATIONS. — **spo'ro·phyt'ic** (-fĭt'ĭk), *adj.*

spo'ro·plasm (spō'rō·plăz'm), *n.* [*sporo-* + *-plasm.*] The protoplasm of a sporoblast.

spo'ro·sac (-săk), *n.* [*sporo-* + *sac.*] *Zool.* **1.** One of the simple, degenerate gonophores of certain hydroids, often little more than a gonad and never medusoid.
2. In trematodes: **a** A sporocyst. **b** A redia.

spo'ro·ste'gi·um (-stē'jĭ·ŭm), *n.* [NL., fr. *spore-* + Gr. *stegein* to cover.] *Bot.* The five-celled envelope of the nucule in Characeae.

stan'ner (stăn'ĕr), *n.* [Cf. AS. *stǣner* stony ground.] A small stone in or by a stream; a ridge of stones on the seashore; also, gravel; — chiefly *pl.* — **stan'ner·y** (-ĭ), *adj.* *Both Scot. & Dial. Eng.*
stanni-. *Chem.* A combining form from *stannum,* tin, as in **stan·nif'er·ous** (see -FEROUS); specif., *Chem.,* stannic.
stan'nic (stăn'ĭk), *adj.* [L. *stannum* tin.] *Chem.* Of, pertaining to, or containing, tin; specif., designating compounds in which tin has a valence of four, as contrasted with *stannous.*
stannic acid. *Chem.* Any of various acid substances that are regarded as hydrates of stannic oxide, SnO_2, and that yield stannic oxide when calcined. They may not be true compounds. Specif.: **a** A substance (*α-**stannic acid***) obtained as a white gelatinous precipitate by adding ammonia to a solution of stannic chloride. It dissolves in alkalies, forming salts, as Na_2SnO_3. **b** A white powder (*β-**stannic acid*** or, commonly, ***metastannic acid***) obtained by heating tin with concentrated nitric acid. It dissolves in alkalies, forming salts, as $K_2H_4Sn_4O_{13}$.
stannic chloride. A colorless, mobile liquid, $SnCl_4$, which fumes in the air, made usually by heating tin in chlorine gas. Mixed with a little water it solidifies to a soft crystalline mass of the pentahydrate, $SnCl_4.5H_2O$, called also *butter of tin* or *oxymuriate of tin.* It is used chiefly in weighting silk and as a mordant. In the World War it was used to produce smoke screens.
stannic oxide. Tin dioxide, SnO_2, occurring in cassiterite and produced artificially as a white amorphous powder. It is used in making white enamels and opaque glazes or glass, for polishing glass, etc.

stand'ard-sized', *adj.* See -SIZED.
stand'ard-wise', *adj.* See -WISE.

stanechat. Dial. var. of STONECHAT.
stang. + STANK.
stan'iel (stăn'yĕl). Var. of STANNEL.
St. Anne. See SAINT, *n.*, *Note.*

stannic sulphide. A compound, SnS_2, obtained as a yellow amorphous precipitate by treating a solution of a stannic salt with hydrogen sulphide. In crystalline form it is called *mosaic gold* (which see).

stan'nide (stăn'ĭd; -ĭd), *n.* Also **-nid.** [*stann-* + *-ide.*] *Chem.* A compound of tin with an element or radical.

stan'nite (-īt), *n.* [See STANNO-.] **1.** *Chem.* A salt of stannous hydroxide, $Sn(OH)_2$, in its capacity of weak acid. **2.** *Mineral.* A steel-gray or iron-black mineral of a metallic luster occurring in granular masses; tin pyrites. It is a compound of tin, copper, iron, and sulphur, and sometimes zinc. H., 4. Sp. gr., 4.3–4.52.

stan'no- (stăn'ō-), **stann-.** A combining form from *stannum,* denoting *relation to,* or *connection with, tin,* or indicating *tin as an ingredient,* as in *stannotype stannite.* — **stan'no** (-ō), *adj.*

stan'no-type (stăn'ō-tīp), *n.* [*stanno-* + *-type.*] **a** *Rare.* A photograph taken upon a tin plate; a tintype. **b** A modification of the woodburytype in which a gelatin intaglio, protected by a sheet of tin foil pressed into intimate contact with its surface, is used as a plate from which to print.

stan'nous (-ŭs), *adj. Chem.* Pertaining to, or containing, tin; specif., designating compounds in which tin has a valence of two, as contrasted with *stannic.*

stannous chloride. A compound, $SnCl_2$, obtained by the action of hydrogen chloride or hydrochloric acid on tin either as an anhydrous white solid (formerly called *butter of tin*) or in monoclinic crystals (*tin crystals* or *tin salt*) containing two molecules of water. The latter is used as a mordant.

stannous oxide. Tin monoxide, SnO, obtained as a black, green, or red, solid, which on heating in air burns, forming stannic oxide.

stan·nox'yl liq'uid (stăn·ŏk'sĭl). *Pharm.* A solution of stannous chloride, $SnCl_2$, in glycerol, used as a local application for boils.

stan'num (stăn'ŭm), *n.* [L., also *stagnum,* alloy of silver and lead (LL., tin), of obscure, perh. Celt. origin. Cf. TAIN.] Tin. Chemical symbol, Sn (no period).

stan'nyl (-ĭl), *n.* [*stann-* + *-yl.*] *Chem.* **a** The bivalent radical SnO. **b** The univalent radical SnH_3, of which stannane is the hydride.

‖**stan'te ma'tri·mo'ni·o** (stăn'tē mā'trĭ·mō'nĭ·ō). [L.] *Law.* While the marriage is in force.

stan'za (stăn'zȧ), *n.; pl.* -ZAS (-zȧz), -ZE (stăn'tsā). [It., a room, habitation, a stanza, i. e., a stop, fr. (assumed) VL. *stantia.* See STANCHION; cf. ESTANCIA, STANCE.] **1.** *Pros.* **a** A recurring unit of a poem consisting of a group of verses, or lines (usually not less than four), which are combined normally according to a typical scheme, having the same length, metrical structure, and (if rhymed) rhyming pattern; as, the *stanzas* of Gray's Elegy; also, a type or species of the same; as, the ballad *stanza;* the Spenserian *stanza.* Cf. STROPHE. **b** Any group of verses comprising a division of a poem; a strophe; a stave.
2. *Arch.* An apartment or division in a building; a room or chamber; as, Raphael's *Stanze* in the Vatican.
Syn. — See VERSE.

stan'zaed (stăn'zȧd), *adj.* Composed of stanzas.

stan·za'ic (stăn·zā'ĭk), *adj.* Also **stan·za'i·cal** (-ĭ·kăl). Pert. to, or consisting of, stanzas. — **stan·za'i·cal·ly,** *adv.*

stanze (stănz), *n.* A stanza. *Shak.*

stap (stăp), *n.* A stave, as of a cask or tub. *Scot. & N. of Eng.*

stap (stăp). Var. of STEP, STOP. *Obs. exc. Scot. & Dial. Eng.*

sta'pe·dec'to·my (stā'pē·dĕk'tō·mĭ), *n.* [*stapes* + *-ectomy.*] The surgical removal of the stapes.

sta·pe'di·al (stȧ·pē'dĭ·ăl), *adj.* [ML. *stapes, -edis,* stirrup.] *Anat.* Of or pertaining to the stapes.

sta·ped'i·form (stȧ·pĕd'ĭ·fôrm), *adj.* [ML. *stapes, -edis,* stirrup + *-iform.*] Shaped like the stapes, or like a stirrup.

sta·pe'di·o·ves·tib'u·lar (stȧ·pē'dĭ·ō·vĕs·tĭb'ū·lĕr), *adj.* Of or pertaining to the stapes and the vestibule of the ear.

sta·pe'di·us (stȧ·pē'dĭ·ŭs), *n.* [NL., fr. *stapes.*] *Anat. & Zool.* A small muscle of the middle ear of mammals, arising from the wall of the tympanum and inserted into the neck of the stapes. Its tendon sometimes contains a slender spine of bone. The nerve to the stapedius is a branch of the facial.

Sta·pe'li·a (stȧ·pē'lĭ·ȧ), *n.* [NL., after J. B. van *Stapel* (d. 1636), physician and botanist of Leiden.] *Bot.* **a** A large genus of African evil-smelling asclepiads, the carrion flowers, with succulent, leafless, toothed stems, like the joints of a cactus. They have oddly colored flowers, often several inches across, and, in *S. gigantea,* a foot or more across. **b** [*not cap.*] A plant of this genus.

Stapelia (*S. asteria*).

sta'pes (stā'pēz), *n.* [LL., a stirrup.] *Anat. & Zool.* **a** The innermost of the chain of ossicles of the ear of mammals; the stirrup bone. It has the form of a stirrup, the base occupying the fenestra vestibuli of the tympanum, and the head being connected with the incus. See EAR, *Illust.* **b** In many other vertebrates, the inner segment of the columella auris, or, sometimes, the entire columella.

staph'is·a'gri·a (stăf'ĭs·ā'grĭ·ȧ), *n.* [NL. See STAVESACRE.] *Pharm.* The ripe seed of the stavesacre (*Delphinium staphisagria*), used to kill head lice.

staphyl-. = STAPHYLO- (which see), as in:

staphylectomy	**staphylematoma**	**staphyloncus**
staphyledema	**staphylitis**	**staphylosis**

staph'y·le (stăf'ĭ·lē), *n.* [NL., fr. Gr. *staphylē* a bunch of grapes, also, uvula when swollen.] *Anat.* The uvula. *Rare.* — **staph'y·line** (-lĭn; -līn), — **staph'y·lin'ic** (-lĭn'ĭk), *adj. Both Rare.*

Staph'y·le'a (stăf'ĭ·lē'ȧ), *n.* [NL. earlier *Staphylodendron,* fr. Gr. *staphylē* cluster of grapes; — so named from the clustered fruit.] *Bot.* A small genus of shrubs or trees, the bladdernuts, type of the family Staphyleaceae, found in the North Temperate Zone. They have opposite compound leaves and drooping panicles of white or pink flowers, succeeded by inflated capsules.

Staph'y·le·a'ce·ae (-lē·ā'sē·ē), *n. pl.* [NL.] *Bot.* A family of plants (order Sapindales), the bladdernut family, having compound leaves, perfect regular flowers with introrse anthers, and inflated capsular fruit. The five genera are mostly in the North Temperate Zone. — **staph'y·le·a'ceous** (-shŭs), *adj.*

sta·phyl'ic (stȧ·fĭl'ĭk), *n.* Of or pert. to the alveolar arch.

Staph'y·lin'i·dae (stăf'ĭ·lĭn'ĭ·dē), *n. pl.* [NL., fr. Gr. *staphylinos* a kind of insect.] *Zool.* The family consisting of the rove beetles (which see). The type genus **Staph'y·li'nus** (-lĭ'nŭs) includes some rather large species. — **staph'y·lin'id** (-lĭn'ĭd), *adj. & n.* — **staph'y·li·nid'e·ous** (-lĭ·nĭd'ē·ŭs), *adj.*

Staph'y·li·noi'de·a (-lĭ·noi'dē·ȧ), *n. pl.* [NL. See -OIDEA.] *Zool.* A superfamily of beetles including the Staphylinidae and several related families.

sta·phyl'i·on (stȧ·fĭl'ĭ·ŏn), *n.* [NL., fr. Gr. *staphylion,* dim. of *staphylē.* See STAPHYLE.] *Craniol.* The median point of the hinder edge of the hard palate.

staph'y·lo- (stăf'ĭ·lō-), **staphyl-.** A combining form, Greek *staphylo-, staphyl-,* from *staphylē,* meaning *bunch of grapes,* used to denote: **a** *Uvula,* as in *Staphylococcus, staphyloma,* and the following:

staphylodialysis	**staphyloplasty**	**staphyloschisis**
staphyloedema	**staphyloptosis**	**staphylotome**
staphyloplastic	**staphyloptosis**	

b *Staphylococcic,* as in:

staphyloangina	**staphylohemia**	**staphylomycosis**
staphylodermatitis	**staphylolysin**	**staphylotoxin**

Staph'y·lo·coc'cus (stăf'ĭ·lō·kŏk'ŭs), *n.* [NL., fr. *staphylo-* + *coccus.*] *Bacteriol.* **a** A genus of Gram-positive bacteria of the family Coccaceae, which often form grape-like clusters and occur also singly or in pairs, rarely in packets, and which produce orange to white pigment. They cause hemolysis on blood agar and are usually parasites on the skin and mucous membranes. *S. aureus* (syn. *Micrococcus pyogenes aureus*), producing yellow-brown pigment, is one of the commonest parasitic bacteria and the usual agent causing acute suppurative inflammations, as boils, abscesses, etc. *S. albus* is similar but produces white pigment. **b** [*not cap.; pl.* -CI (-sī).] Any coccus of this genus or, broadly, of this type. — **staph'y·lo·coc'cal** (-ăl), *adj.* — **staph'y·lo·coc'cic** (-kŏk'sĭk), *adj.*

staph'y·lo'ma (-lō'mȧ), *n.* [LL., fr. Gr. *staphylōma,* fr. *staphylē* a bunch of grapes.] *Med.* A protrusion of the cornea or sclera of the eye. — **staph'y·lo·mat'ic** (-lō·măt'ĭk), *adj.* — **-lom'a·tous** (-lŏm'ȧ·tŭs; -lō'mȧ·tŭs), *adj.*

staph'y·lor'rha·phy, staph'y·lor'a·phy (-lŏr'ȧ·fĭ), *n.* [*staphylo-* + *-rrhaphy, -raphy;* cf. F. *staphylorraphie.*] *Surg.* The plastic operation of uniting a cleft palate. — **staph'y·lor·rhaph'ic, staph'y·lo·raph'ic** (-lō·răf'ĭk), *adj.*

staph'y·lot'o·my (-lŏt'ō·mĭ), *n.* [*staphylo-* + *-tomy.*] *Surg.* **a** The surgical removal of a staphyloma. **b** The cutting or removal of the uvula.

sta'ple (stā'p'l), *n.* [AS. *stapol* post, pillar, step; akin to MD. *stapel,* a support, column, stake, foundation, pile, mart, emporium, ON. *stöpull* post, tower, and to E. STEP. Cf. ÉTAPE.] **1.** A post; a pillar; column; a supporting frame, as of a bed. *Obs.*
2. A loop of iron, or a bar or wire, bent and formed with two points to be driven into wood, etc., to hold a hook, pin, or the like; also, a similarly shaped piece of thin wire, driven through papers, etc., and clinched to bind them.
3. *Founding.* = CHAPLET, 4.
4. *Mining.* **a** A shaft, smaller and shorter than the principal one, joining different levels. **b** *Eng.* A small pit.
5. *Shipbuilding.* An angle iron worked around a joint, as of a bulkhead and a beam, to insure watertightness.
☞ COMBINATIONS are: **sta'ple-fash'ion, sta'ple-head'ed, sta'ple-shaped'.**

sta'ple (stā'p'l), *v. t.* To secure by a staple or staples.

sta'ple, *n.* [OF. *estaple,* fr. MD. *stapel.* See 1st STAPLE.]
1. A settled mart; an emporium; a city or town to which merchants brought commodities for sale or exportation in bulk; a place for wholesale traffic. In England, formerly, the king's *staple* was established in certain ports or towns, and certain goods could not be exported unless brought there to be rated and charged with the duty. The chief of these *staple* commodities were wool, skins, and leather. The law merchant as administered in the courts of the staple, or ***staple courts,*** was sometimes called the ***law of the staple,*** and under it aliens were tried by a jury of aliens. Cf. MERCHANT OF THE STAPLE. *Hist.*
2. Hence, place of supply; source; also, storehouse; depot.
Whitehall naturally became the chief *staple* of news. *Macaulay.*
3. The principal commodity of traffic in a market; a chief commodity or production of a place; as, wheat, maize, and cotton, are great *staples* of the United States.
4. The principal constituent in anything; chief item; as, the affairs of their neighbors formed the *staple* of their conversation.
5. Unmanufactured material; raw material; also, stock of raw material or of merchandise; quantity on hand.
6. **a** A fiber of raw wool, cotton, flax, and the like, in its natural state, or when carded or combed; the average or comparative length, fineness, condition, of any kind, lot, or, esp., grade, of such fibers; as, mohair *staple* is five to six inches; tow is flax with short *staple.* **b** A lock of wool before or after shearing.
7. A deposit of decomposed vegetation covering a rock stratum.
8. A district granted to an abbey. *Obs.*

sta'ple, *adj.* **1.** Pertaining to, or being a market or staple for, commodities; as, a *staple* town. *Now Rare.*
2. Established in commerce; occupying the markets; settled; as, a *staple* trade.
3. Fit to be sold; marketable. *Rare.* *Swift.*
4. Regularly produced or made in large quantities; belonging to wholesale traffic; hence, principal; chief.
Wool, the great *staple* commodity of England. *Hallam.*

sta'ple (stā'p'l), *v. t.;* STA'PLED (-p'ld); STA'PLING (-plĭng). To sort according to its staple; as, to *staple* cotton; to set up a market for. *Obs.* — *v. i.* To establish a staple, or market. *Obs.*

sta'pled (stā'p'ld), *adj.* Having or yielding a staple. See 3d STAPLE, 6.

staple fiber. A rayon yarn as distinguished from a rayon filament.

staple fish. = GREEN FISH. *Obs.*

staple fur. A fur from which the hairs are removed from the skin for manufacture of felt; — disting. from *fancy fur.*

staple punch. A punch for making two holes simultaneously to receive the points of a staple.

sta'pler (stā'plĕr), *n.* **1.** A dealer in staple goods.
2. One employed to assort wool according to its staple.
3. A machine that binds papers together with wire staples.
4. A workman who adjusts staples (see 1st STAPLE, 2); also, one who staples bristles in brushes.

staple right. A right of forcing any passing vessel either to pay duty or to sell its cargo in the market place, — orig. possessed by towns in the Netherlands, later introduced into the colony of New Netherland (New York).

sta'pling (stā'plĭng), *n. Shipbuilding.* A staple; also, the process of fitting staples.

star (stär), *n.* [ME., *sterre,* fr. AS. *steorra;* akin to OFris. *stera,* OS. *sterro,* D., *ster,* OHG. *sterno, sterro,* G. *stern,* ON. *stjarna,* Sw. *stjerna,* Dan. *stierne,* Goth. *stairno,* Bret. & Corn. *steren,* L. *stella,* Gr. *astēr, astron,* Skr. *stṛbhis,* instrumental pl. Cf. ASTER, ASTEROID, ASTRAL, ASTRONOMY, CONSTELLATION, DISASTER, STELLAR, STERLING.] **1.** Any of the luminous bodies seen in the heavens; specif., *Astron.,* any self-luminous celestial body, exclusive of comets, meteors, and nebulae; — as distinguished from the much smaller bodies, known as planets, that shine by reflected light. Astronomically, the best and nearest example of a star is the sun, which is of average brightness, size, and probable age, though there are many of smaller diameters, and a few, like Betelgeuse, which are believed to be 100 or more times as large. Next to the sun, the nearest star is Alpha (α) Centauri, in the southern heavens, at a distance of four and one third light-years, or about twenty-five trillion miles. The number of stars in our Milky Way is variously estimated at from two billion to forty billion or more; and each of the numerous other milky ways may have as many. About 100 stars have names, given by ancient Greek or medieval astronomers. Many others of the brighter stars visible to the naked eye are designated, according to the system instituted by Bayer (1572?–1625), by a Greek or Roman letter or a numeral, followed by the Latin genitive of the constellation name, the letters or numerals corresponding roughly to the order of brightness within the constellation, as Sirius — α Canis Majoris. Many fainter stars are known only by the numbers given them in one of the catalogues of stars, as Porter 352 (see J. G. Porter, in *Biog.*). Variable stars are designated by one or more capital letters, followed by the constellation genitive, as UV Aurigae. Stars are classified in various ways according to their qualities or characteristics. In absolute luminosity, or amount of energy emitted, stars range roughly from dwarf stars emitting 1/10,000 the sun's light to giant stars 1,000 times as bright as the sun, the average luminosity being for dwarfs 1/100 that of the sun and for giants 100 times that of the sun. With respect to their apparent luminosity, they are classified on a decimal magnitude scale (see MAGNITUDE, 3), the faintest stars photographed being of at least the twenty-second magnitude but only those brighter than the sixth magnitude being visible to the naked eye. With respect to the constitution of their surface layers, they were formerly roughly classified, first by the Italian astronomer Secchi (whence the name ***Secchi's types***), as blue, white, yellow, and red, stars, a method now superseded by a more accurate classification into spectral types. See DRAPER CATALOGUE, SPECTRAL TYPE. They are further classified as *variable stars, binary,* or *double, stars, nebulous stars,* etc. The apparent points of stars are due to scintillation arising from inequalities of the earth's atmosphere.
2. The polestar; the North Star. *Obs.*
3. A conventional figure having five or more points, taken as representing a star; anything likened to, or suggestive of, a star or such a starlike figure; as, the chef formed white *stars* of sugar paste on top of the cake.
4. Specif.: **a** An ornament, often star-shaped, worn on the breast as a badge of honor, authority, or rank, or one of the insignia of an order. **b** In the World War, an emblem representing a person in the military service. See SERVICE FLAG. **c** A radiated mark in writing or printing; an asterisk [thus, *]; — used as a reference to a note, to fill a blank where something is omitted, etc. **d** A white or light-colored spot on the forehead of an animal, as a horse. **e** Short for STARFISH.
5. A person of brilliant and attractive qualities; the chief personage or attraction, as at a social or political gathering; hence, one who stands out pre-eminently among his fellows for his success in their common activities; as, a football, baseball, or tennis, *star;* a *star* in the classroom; a *star* in the railroad business.
6. A first offender; a convict serving a prison sentence for the first time; — from the custom of fixing a star on the prison garb of such person. *Eng.*
7. Any hummingbird of the genus *Calothorax* or an allied genus, as *C. lucifer* (the Lucifer hummingbird).
8. **a** *Astrol. Usually pl.* A planet or a configuration of the planets regarded as influencing one's destiny or fortune. **b** Hence, destiny; fortune; — esp. in phrases; as, to thank or bless his *stars.*
Blesses his *stars,* and thinks it luxury. *Addison.*
9. *Elec.* The figure produced by joining the coils or circuits of a polyphase apparatus or system at a common point, forming a Y in a three-phase system, a + in a four-phase system, etc. See STAR CONNECTION, STAR WINDING.
10. *Fireworks.* A small mass of composition used in rockets, mines, etc., which burns with a starlike effect, in any of several colors.
11. *Mach.* = STAR WHEEL.
12. *Metalworking.* A bright spot or flaw in the surface of steel. It is the end of a pipe which has not been quite cut away.
13. *Pool.* In English pool, the privilege, open to the first player who loses his three "lives," of purchasing at the price of the original stake as many additional lives as the lowest number held by any other player.
14. *Theater & Motion Pictures.* The principal member of a company, usually playing the chief roles.
☞ COMBINATIONS are:

star capsicum. An ornamental Brazilian shrub (*Solanum capsicastrum*) resembling the Jerusalem cherry.
star catalogue. *Astron.* A list of stars giving their positions for a given epoch, their magnitudes, and sometimes other data.
starch (stärch), *n.* [ME. *starche, sterche,* fr. *sterchen* to starch, fr. AS. *stercan* to stiffen, fr. *stearc* stiff; cf. G. *stärke* strength, starch. See STARK.] **1.** A white, odorless, tasteless, granular or powdery, complex carbohydrate, $(C_6H_{10}O_5)_x$, widely disseminated among plants, esp. in seeds, bulbs, and tubers. It is an important constituent of food, and is used in making commercial glucose, for stiffening linen, in making paste, etc. It is formed in the plant by photosynthetic activity (see PHOTOSYNTHESIS) and is always to be found as minute grains in the chloroplasts when the plant is exposed to light. It is deposited by the leucoplasts in large granules of organized structure, which serve as reserve food. In the United States, corn (maize) is the chief commercial source; in Europe, the potato. Starch is insoluble in cold water and other common solvents, but when heated with water the granules burst and a viscous liquid (*starch paste*) is formed which becomes solid on cooling. By continued boiling a modification known as *soluble starch* (*amylodextrin*) is formed. Starch is converted into dextrin by heating, and into dextrin, maltose, and finally dextrose, by heating with dilute acids. Malt diastase converts it chiefly into dextrin and maltose. Starch gives a characteristic blue color with iodine.
2. A stiff, formal manner; formality; stiffness.
3. Energy; vim; strength and activity. *Slang, U. S.*
☞ COMBINATIONS are:
starch-digesting, *adj.* **starchmaking** **starch-sized** **starchmaker** **starch-producing,** *adj.* **starchworks**

starch (stärch), *v. t.;* STARCHED (stärcht); STARCH'ING.
1. To stiffen with or as if with starch.
2. To make formal, precise, or conventional; to stiffen.

starch, *adj.* [From STARCH, *n.*] **a** *Rare.* Stiff; precise; rigid. **b** *Obs.* Stark; strong.
Star Chamber. [Appar. from the *stars* with which the ceiling of the room where it sat was decorated.] *Eng. Hist.* An ancient high court exercising wide civil and criminal jurisdiction, which sat without the intervention of a jury. It consisted of the King's Privy Council, or of certain members of it, sitting as a court only, with the addition of certain judges. Its broad jurisdiction was based on encroachments of the crown, esp. under the Tudors. It could proceed on mere rumor or examine witnesses; it could apply torture. It was abolished by the Long Parliament in 1641 (16 *Chas.* I, c. 10). Hence, often, any secret oppressive or irresponsible tribunal. — **star'-cham'ber** (66), *adj.*
star chart. *Astron.* A chart showing the positions of the stars in a region of the sky.
starch blue. The color smalt.
starch'board' (stärch'bōrd'; 181), *n.* A shallow wooden tray used as a container for the powdered starch in which molds or impressions are made for certain candies.
starch cellulose. *Chem.* = AMYLOPECTIN.
starch corn. Spelt.
star check. = STAR SHAKE.
starch'er, *n.* **1.** One who or that which starches; specif., a worker who starches by hand or machine; also, a starchman.
2. Something stiffened with starch, as a collar, neckcloth, shirt front, etc.
starch'flow'er (stärch'flou'ĕr), *n.* The cuckoopint.
starch gum. See DEXTRIN.
starch hyacinth. The grape hyacinth. Its flowers have the odor of boiled starch.
star chickweed. A large-flowered chickweed (*Alsine pubera*) of the southeastern United States.
starch layer. *Bot.* = ENDODERMIS.
starch'man (stärch'măn), *n.;* *pl.* -MEN (-mĕn). In candy factories, a worker in the starch room.
starch paste. See STARCH, *n.,* 1.
starch room. *Candy Mfg.* A room in which starch is used or applied to candies. Cf. STARCHBOARD.
starch'root' (stärch'rōōt'; 200), *n.* The starchwort.
starch sheath. *Bot.* = ENDODERMIS.
starch sirup. = GLUCOSE, 2.
starch star. In certain Characeae, a star-shaped tuberlike body on the lower part of the axis, serving as a means of vegetative propagation.

starched (stärcht), *past tense & past part.* of STARCH. — **starch'-ed·ly** (stär'chĕd·lĭ; -chĭd·lĭ), *adv.* — **starch'ed·ness** (stär'chĕd·nĕs, -chĭd·nĭs), *n.* **starch'i·ness,** *n.* See -NESS. **starch'i·ly,** *adv.* of STARCHY. **starch'less,** *adj.* See -LESS. **starch'like',** *adj.* See -LIKE. **starch'ly,** *adv.* of STARCH. **starch'ness,** *n.* See -NESS. **starcht.** Starched. *Ref. Sp.*

starch tree. *Ecology.* A hardwood tree, usually deciduous, that retains most of its starch, without transformation to fat, during winter. See FAT TREE.

starch'wort' (stärch'wûrt'), *n.* The cuckoopint, the tubers of which yield a fine starch.

starch'y (stär'chĭ), *adj.;* STARCH'I-ER; STARCH'I-EST. Consisting of starch; resembling starch or something starched; hence, stiff; precise; formal.

New England and all her *starchy* immortals. *Stuart Sherman.*

star cloud. **a** *Astron.* Any luminous area in the sky which can be resolved, with powerful telescopes, into a great number of constituent stars. **b** *pl.* Dark clouds of obscuring matter and dark nebulae that abound in space; as, the remote *star clouds* in Sagittarius.

star cluster. = CLUSTER, *n.*, 4.

star colors. *Astron.* The colors of stars by which they were formerly classified. See SPECTRAL TYPE.

star connection. *Elec.* A method of connecting polyphase circuits in which one end of each phase line is connected to a common neutral point, called the **star point**. The star point may be connected to the earth, as a protective device against lightning, or it may be connected to a wire to which all the other neutral points of the system are connected. A *Y connection* is a star connection for a three-phase circuit. Cf. DELTA CONNECTION. — **star'-con·nect'ed,** *adj.*

states'mon'ger (stāts'mŭng'gĕr), *n.* = STATEMONGER.

state'-wide' (66), *adj.* Extending throughout the length and breadth of a state; including all parts of a state.

stat'ic (stăt'ĭk), *adj.* [NL. *staticus*, fr. Gr. *statikos* causing to stand, skilled in weighing, fr. *histanai* to cause to stand, to weigh; cf. F. *statique*. See STAND; cf. STAGE.] **1.** Acting by mere weight without motion; having to do with the pressure exerted by mere mass at rest.
2. Pertaining to bodies or forces at rest or in equilibrium.
3. Pertaining to passive, as distinguished from active, elements, or to pure qualities or quantities apart from their mutual operation.
4. Figuratively, resting; quiescent; not moving, active, or exerting force or influence of any kind; stable.
5. *Econ.* **a** Dealing with absolute quantities of goods or money, such as capital, rather than with rates of movement from hand to hand, such as income. **b** Less correctly, but oftener, dealing with problems as they present themselves in a stable state of society.
6. *Elec.* Of, pertaining to, designating, or producing, stationary charges of electricity, as by rubbing unlike bodies together; as, a *static* machine.
7. *Psychol.* Pertaining to or designating the labyrinthine sense.
8. *Radio.* Of, pertaining to, or caused by, static. See STATIC, *n.*

-stat'ic (-stăt'ĭk). A combining form of *static*, as in dynamo*static*, eu*static*; — distinguished from *-static* in adjectives corresponding to nouns ending in *-stasis*, *-stat*, or *-statics*, as in meno*static*, rheo*static*, geo*static*.

stat'ic (stăt'ĭk), *n.* *Radio.* **a** = ATMOSPHERICS. **b** A type of atmospheric disturbances resulting from accumulation of electric charges on or near the antenna, as from snowflakes.

stat'i·cal (-ĭ-kăl), *adj.* **a** Static. **b** Of or pertaining to statics, esp. social statics.

statical electricity. See ELECTRICITY, *n.*, 2.

statical friction. Starting friction. See FRICTION, *n.*, 4.

stat'i·cal·ly, *adv.* of STATIC, STATICAL.

statical stability. *Naval Arch.* The moment of force by which a vessel endeavors to return to an upright position after being inclined.

static ataxia. *Med.* Nervous disorder marked by inability to stand steady with the legs in a fixed position.

static balance. A state of balance of a rotating body obtained by coincidence between its center of mass and axis of rotation, so that the body is in neutral equilibrium under the action of static forces; standing balance.

static balancer. *Elec.* = BALANCER SET **b**.

static ceiling. *Aeronautics.* The altitude in standard atmosphere, at which an aerostat is in static equilibrium after removal of all dischargeable weights. Cf. CEILING, 4.

static condenser. *Elec.* = CONDENSER, 2 **b**.

static converter. A converter the parts of which are stationary; a static transformer.

Stat'i·ce (stăt'ĭ-sē), *n.* [L., a kind of astringent herb, fr. Gr. *statikē*. See 1st STATIC.] *Bot.* **a** A genus of tufted, acaulescent herbs (family Plumbaginaceae), found in north temperate regions. They have narrow leaves, and long scapes bearing heads of pink, purple, or white flowers. *S. armeria* is the thrift, or sea pink. **b** Syn. of LIMONIUM, 2 **a**.

static electricity. Statical electricity. See ELECTRICITY, *n.*, 2.

static equilibrium. See EQUILIBRIUM, 1.

static field. = ELECTROSTATIC FIELD.

static friction. = STARTING FRICTION. See FRICTION, *n.*, 4.

static head. *Hydraulics.* The height of a column of water at rest which would produce a given pressure.

static hysteresis. *Magnetism.* Hysteresis in which the magnetization of iron has different values for increasing and for decreasing magnetizing forces, irrespective of any time lag. Cf. VISCOUS HYSTERESIS.

static induction. *Elec.* Electrostatic induction. See INDUCTION, 6.

static interrupter. = LIGHTNING ARRESTER **b**.

static metamorphism. See METAMORPHISM, 2.

static moment. The product of a force into its lever arm. See MOMENT OF A FORCE.

static no delivery. The condition (of outlet completely closed) in which a centrifugal fan will produce maximum air pressure at any given speed. *Abbr.* S. N. D.

static oceanography. See OCEANOGRAPHY.

stat'ics (stăt'ĭks), *n.* [Cf. F. *statique*, Gr. *statikē* the art of weighing, fr. *statikos*. See STATIC; cf. -ICS.] **1.** That branch of mechanics which treats of the equilibrium of forces, or relates to bodies as held in equilibrium by the forces acting on them; — distinguished from *dynamics*. See MECHANICS, -ICS.
2. *Sociol.* = SOCIAL STATICS.

-stat'ics. A combining form of *statics* (sense 1), as in:

aerostatics	**graphostatics**	**rheostatics**
biostatics	**gyrostatics**	**stereostatics**
electrostatics	**hydrostatics**	**thermostatics**
geostatics	**psychostatics**	

static sensation. *Psychol.* A sensation of the labyrinthine sense.

static stability. The moment of the force with which a floating body, or a body mounted with freedom of rotation about an axis, when displaced from its position of equilibrium tends to return to the same. See STABILITY, 7.

static torque. *Elec.* = STARTING TORQUE. See TORQUE, *n.*, 2 **a**.

static transformer. *Elec.* A transformer having no moving parts. See TRANSFORMER.

static tube. *Aeronautics.* A tube used to indicate static pressure, as distinct from impact pressure, in an air stream. It is usually a closed tube, having perforations in its side, placed parallel to the stream, with its forward end conical, and fitted with a branch tube so as to provide for a connection with a manometer. See PRESSURE NOZZLE.

sta'tion (stā'shŭn), *n.* [ME. *stacion*, fr. OF. *stacion*, *estacion* (F. *station*), fr. L. *statio*, fr. *stare*, *statum*, to stand. See STAND.] **1.** Act or manner of standing; attitude or pose in standing; posture. *Rare.* *Shak.*
2. A state of standing or rest; equilibrium. *Obs.*
3. A halt; specif., in the medieval drama, a place at which one scene in a series of mystery plays was performed.
4. The spot or place where anything stands, esp. where a person or thing habitually stands, comes to a stand, or is appointed to remain for a time; as, the *station* of a sentinel; the *station* of a fire engine; a police *station*; a *station* of a machine tool (**sta'tion-type' ma·chine' tools**), where the work is subjected to a machining operation, after which the supporting table is moved so that the work comes to the next *station*, where it is subjected to a different operation while another part is being subjected to an operation at the *station* left behind (time being saved by the elimination of resetting operations).
5. Specif.: **a** A regular stopping place in a stage, omnibus, or railroad route, for the convenience of passengers, taking in fuel, moving freight, etc.; also, the building or buildings connected with such a stopping place; a depot. **b** In Australasia, a sheep run or cattle run, with its buildings; also, the homestead and buildings belonging to such a run. **c** A place or region to which a government ship or fleet is assigned for duty. **d** In India, the place where the British military or civil officers in a district reside; also, the entire European population of such a place.
6. Post assigned; sphere of duty or occupation.
7. Situation; position; location; as, to take up one's *station* near the front.
8. Social standing or condition of life; state; rank.
9. *Archaeol.* See TYPE STATION.
10. *Astron.* = STATIONARY POINT.
11. *Biol.* **a** The region where a plant or animal lives; the most characteristic portion of its range; habitat; restrictedly, the exact spot at which a given species or specimen is found or collected. Cf. HABITAT. **b** An institution for studying living organisms in their natural surroundings; as, a marine biological *station*.
12. *Eccl.* **a** More fully *station day*. In the early church and in the Eastern Church, the fast of Wednesday and of Friday, in memory of the condemnation of Christ by the council, and of his passion. **b** *R.C.Ch.* Orig., a church in which the procession of the clergy halted on stated days to say stated prayers; hence, a church in the city of Rome appointed to have the office performed in it daily in Lent, on the ember days, and on the solemn feasts. **c** One of the places at which ecclesiastical processions or pilgrims pause to perform an act of devotion, as the tomb of a martyr, or some similarly consecrated spot. **d** *R.C.Ch.* A church in which indulgences were granted on certain days. **e** One of the stations of the cross (which see). **f** *Ir.* A priest's stay with a parishioner to confess the neighbors. **g** *Meth. Ch.* A single church as a settled pastor's sole charge; — opposed to a *circuit*, ridden by a circuit rider (see CIRCUIT RIDER).
13. *Mining.* An enlargement in a shaft or gallery, used as a landing, or passing place, or for the accommodation of a pump, tank, etc. See MINE, *Illust.*
14. *Poultry.* The ideal pose, symmetrical appearance, etc., of a domestic fowl, esp. in the game breeds, including height and reach.
15. *Radio.* **a** A complete assemblage of equipment including antenna, transmitting or receiving set, and signal-making or reproducing device. **b** The place, as a room, in which a transmitting or receiving station is located.
16. *Surveying.* The spot at which an instrument is planted or observations are made.

Syn. — Place, position; dignity, rank. STATION, DEPOT. The use of DEPOT as a synonym for (railroad) STATION is contrary to the best usage. See HABITAT.

sta'tion (stā'shŭn), *v. t.*; -TIONED (-shŭnd); -TION·ING. To appoint or assign to a post, place, office, or the like; as, to *station* troops at the right; to *station* a sentinel. — *v. i.* To take up a position; to post oneself.

station agent. An agent, as of a railroad, on duty at a station, or depot.

sta'tion·al (stā'shŭn·ăl), *adj.* [L. *stationalis*.] Of or pertaining to a station.

sta'tion·ar'y (-ĕr'ĭ *or, esp. Brit.*, -ē-rĭ), *adj.* [L. *stationarius* belonging to a post or station. See STATION; cf. STATIONER.] **1.** Fixed in a certain station, place, course, manner of thinking, or the like; not moving or appearing to move; stable; fixed.

> Charles Wesley, who is a more *stationary* man. *Southey.*

2. Not changing state or condition; neither improving nor getting worse; unchanging, either for good or bad.
— **sta'tion·ar'i·ly** (-ĭ-lĭ), *adv.* — **sta'tion·ar'i·ness**, *n.*

sta'tion·ar'y, *n.*; *pl.* -IES (-ĭz). One who or that which is stationary or tends to remain in one place, condition, etc.

stationary air. *Physiol.* The air which under ordinary circumstances does not leave the lungs in respiration.

stationary contact (of two algebraic surfaces). *Math.* Contact in which the curve of intersection of the two surfaces has a cusp at the point of contact.

stationary curve. *Math.* A curve along an arc of which the integral of a given function of the co-ordinates and their derivatives with respect to the independent variable has a stationary value.

stationary engine. A steam engine permanently placed; specif., a factory engine.

stationary engineering. See ENGINEERING, *n.*, 1. — **stationary engineer.**

stationary integral. *Math.* An integral along a curve, or over a surface, whose first variation is zero.

stationary plane (of an algebraic surface). *Math.* A tangent plane at a parabolic point of the surface.

stationary point. *Astron.* That point in a planet's apparent path among the stars where for a brief time it seems to be motionless.

stationary point (of a plane algebraic curve). *Math.* A cusp.

stationary ruling (of a ruled surface). *Math.* A double ruling such that at each of its points the two tangent planes to the ruled surface coincide.

stationary state. *Physics.* See ENERGY LEVEL.

stationary states. *Physics.* In the Bohr theory, a state of motion of the electrons in which the atom exists without radiating energy.

stationary tangent. *Math.* See INFLECTION, *n.*, 5.

stationary transformer. *Elec.* See TRANSFORMER.

stationary vibration. *Physics.* The type of vibration, as in a piano string, in which there are nodes, or points of no motion, and in which the medium between the nodes vibrates. Such motion may be regarded as the superposition of two trains of waves, of the same frequency and amplitude, traveling in the medium in opposite directions.

stationary wave. *Physics.* = STATIONARY VIBRATION.

station day. See STATION, *n.*, 12 **a**.

sta'tion·er (stā'shŭn·ĕr), *n.* [ME. *stacyonere* bookseller, fr. ML. *stationarius*. See STATIONARY, *adj.*] **1.** A bookseller or publisher; — formerly so called from his occupying a *station* in the market place or elsewhere.
2. One who sells paper, pens, inkstands, pencils, blank books, and other articles used in writing.

station error. The difference between the geodetic and the astronomical latitude or longitude of a place. It is caused by a local deviation in the direction of gravity.

Sta'tion·ers' Hall (stā'shŭn·ĕrz). The hall of the guild of stationers (i.e., booksellers or publishers) of London, now near Ludgate Hill. This guild for nearly three hundred years regulated the publication of all books in England. From 1842 to 1911, under the copyright law, registration at Stationers' Hall, although not compulsory, was necessary before taking proceedings in respect of infringement of copyright.

sta'tion·er'y (stā'shŭn·ĕr'ĭ *or, esp. Brit.*, -ē-rĭ), *n.* Also, *Now Obs.*, **sta'tion·ar'y** (-ĕr'ĭ; -ē-rĭ). The articles usually sold by stationers, as paper, pens, ink, pencils, blank books.

sta'tion·er'y, *adj.* Also, *Now Obs.*, **sta'tion·ar'y**. Belonging to, or sold by, a stationer.

station hospital. See MILITARY HOSPITAL.

station house. A house at a post or station; specif.: **a** A police station. **b** A railroad station.

station hut. = HUT, *n.*, 2. *Australia.*

station jack. A kind of pudding containing salt beef. *Australia.*

station keeping. *Nav.* The maintaining of a ship in her proper position in relation to other ships of the formation.

sta'tion·man (stā'shŭn·măn), *n.* *Steel Mfg.* A workman who operates the controls at a rolling mill.

sta'tion·mas'ter (-măs'tĕr), *n.* On railroads and metropolitan street-car lines, an employee responsible for the operation of a station.

station point. See PERSPECTIVE, *n.*, 2.

station pointer. *Surv. & Navig.* An instrument having three arms, the two outer ones adjustable and the inner fixed at the zero of a circle, used for locating on a chart the position of a place from which the angles subtended by three distant objects, whose positions are known, have been observed. See THREE-POINT PROBLEM.

station pole, rod, *or* staff. *Surv.* A rod for marking stations; a range pole or a leveling rod.

station selector. *Radio.* The element of a receiving set which is used to tune in the signal from any station.

stations of the cross [*often cap.*] *Eccl.* A series, usually fourteen, of representations (images or pictures) in a church or, sometimes, on roads leading to some church or shrine, of the successive stages of Christ's passion. In the Roman Catholic, Anglican, and some other churches, each representation has a particular office to be said at it. See WAY OF THE CROSS.

stat'o·blast (stăt'ō·blăst), *n.* [1st *stato-* + *-blast*.] *Zool.* **a** In many fresh-water Bryozoa, a bud or germ developed in the body, in a chitinous envelope, and generally serving to preserve the species in winter, bursting and developing in spring. **b** In certain sponges, a somewhat analogous internal bud; a gemmule.

Statoblast of a Bryozoan (*Cristatella mucedo*). *a* Side View; *b* Profile. Much enlarged.

stat'o·cyst (stăt'ō·sĭst), *n.* [1st *stato-* + *-cyst*.] **1.** A cellular cyst containing one or more statoliths.
2. *Zool.* An otocyst regarded as an organ of equilibration and orientation.

stat'o·lith (-lĭth), *n.* [1st *stato-* + *-lith*.] *Zool.* The calcareous body in a statocyst. — **stat'o·lith'ic** (-lĭth'ĭk), *adj.*

sta·tom'e·ter (stȧ·tŏm'ē·tĕr), *n.* [1st *stato-* + *-meter*.] *Med.* An apparatus for measuring the degree of exophthalmos.

sta'tor (stā'tĕr), *n.* [NL., fr. L. *stare* to stand.] *Mach.* A stationary part in or about which another part (the rotor) revolves, esp. when both are large; as: **a** *Elec.* The stationary member of an electrical machine, as of an induction motor. Cf. ALTERNATOR. **b** *Steam Turbine.* The case enclosing a turbine wheel; the body of stationary blades or nozzles. Cf. ROTOR, 1 **b**. — **sta'tor**, *adj.*

Sta'tor (stā'tôr), *n.* [L.] *Rom. Relig.* An epithet of Jupiter, probably originally meaning stayer, establisher. It was sometimes interpreted as meaning one who stays an army in flight.

stat'o·re·cep'tor (stăt'ō·rē·sĕp'tĕr), *n.* [1st *stato-* + *receptor*.] *Zool.* A sense organ for the reception of stimuli governing equilibration and orientation in space.

stat'o·rhab (stăt'ō·răb), *n.* [1st *stato-* + Gr. *rhabdos* rod.] *Zool.* In certain Trachomedusae, a short tentacular process supporting the statolith.

stat'o·scope (stăt'ō·skōp), *n.* [1st *stato-* + *-scope*.] **1.** *Physics.* A sensitive form of aneroid barometer for recording small changes in atmospheric pressure.

stat'far'ad (stăt'fär'ăd), *n.* See STAT-.	**stath'mos** (stăth'mŏs), *n.*; *pl.* -MOI (-moi). [Gr.] See MEASURE, *Table.*	**stat'hold'er.** † STADHOLDER. **stat'ic-proof'**, *adj.* See -PROOF. **stationary.** † STATIONERY.	**sta'tiond.** Stationed. *Ref. Sp.* **Sta·ti'ra** (stȧ·tī'rȧ), *n.* See ROXANA AND STATIRA.	**stat'i·scope** (stăt'ĭ·skōp), *n.* Erroneous for STATOSCOPE. **statistical graph.** = *frequency curve* under FREQUENCY. **statistical mechanics.** See MECHANICS, 1.

2. An instrument for registering the rise and fall of an aircraft; — also erroneously spelled *statiscope*.

stat'o-spore (stăt'ō-spōr; 181), *n.* [1st *stato-* + *-spore*.] *Bot.* A resting spore. *Rare.*

stat'u-a-rism (stăt'ū-ā-rĭz'm), *n.* Predilection for sculpture. *H. Walpole.* — **stat'u-a-rist** (-rĭst), *n. Rare.*

stat'u-ar'y (stăt'ū-ĕr'ĭ *or, esp. Brit.,* -ēr-ĭ), *n.; pl.* -ARIES (-ĭz). [L. *statuarius,* n., fr. *statuarius,* adj., of or belonging to statues, fr. *statua* statue; cf. F. *statuaire.* See STATUE.] 1. One who practices the art of making statues.

See STAND; CONSTITUTE, DESTITUTE, INSTITUTE, PROSTITUTE, RESTITUTION, SUBSTITUTE.] 1. An authoritative utterance, as of the deity; a divine decree. *Obs.*

2. Something laid down or declared as fixed or established; hence: a A law enacted by, or by the authority of, the supreme legislative branch of a government, esp. of a representative government; the written will of the legislature expressed with all the requisite forms of legislation; — often used in distinction from the *common,* or *unwritten, law* (see COMMON LAW b). Cf. EDICT, 1; DECREE, 3; ORDINANCE, *n.,* 3, *Note;* CONSTITUTION, 6, etc. In works on international law and in the Roman law, *statute* is sometimes used as embracing all laws imposed by competent authority, these being divided into ***statutes real,*** applying to immovables; ***statutes personal,*** to movables; and ***statutes mixed,*** to both classes of property. In England Parliament may give its acts full force and validity as statutes without the assent of the crown, though in practice all statutes are promulgated by the crown; but in republican forms of government the acts of the legislature generally require the assent of the chief executive, as the President, in the United States, for a Federal statute, or the governor of a State for a State statute (cf. VETO). At the common law a statute took effect by relation back to the first day of the session at which it was enacted, but the act of 33 Geo. III, c. 13 provided that acts should, unless otherwise provided, take effect from the date of the royal assent. In the United States, generally, an act takes effect from the date of the final act necessary to its enactment, unless, as is usual, the statute itself fixes the time of its taking effect. Cf. EX POST FACTO LAW. Formerly in England all statutes were originated by a petition presenting measures to the king for his granting. Now, except private bills in English law, statutes are originally expressed, both in English and American law, in the form of a bill which is presented to the legislature for enactment and passed for the assent of the king or executive. b An act of a corporation or of its founder intended as a permanent rule or law; as, the *statutes* of a university.

3. An annual assemblage of farming servants at a fair where they are hired;—called also *statute fair.* Cf. 1st MOP, 3. *Eng.*

Stat'ute de Do'nis Con·di'ti·o·nal'i·bus (dē dō'nĭs kŏn·dĭsh'ĭ·ō·năl'ĭ·bŭs) *or, usually,* **Statute de Donis.** [L., *de donis conditionalibus* concerning conditional gifts.] *Law.* The act of 13 Edw. I, c. 1 (1285), often called *Statute of Westminster II,* procured to be passed by the nobility to put an end to the construction of conditional fees which enabled the donee of the fee (by aliening upon performance of the condition) to defeat the limitation. The statute provided that the will of the donor should be observed according to the form of the gift, taking away the power of absolute alienation, and providing that upon failure of the issue to whom the estate was limited the estate should revert to the donor or his heirs. This resulted in the modern fee tail, and the great estates built up by it.

Stat'ute de Re·li'gi·o'sis (dē rē·lĭj'ĭ·ō'sĭs). See STATUTES OF MORTMAIN.

statutes of mortmain. Any of various English statutes restricting alienation of land in mortmain, that is, to a corporation, orig. an ecclesiastical corporation, such as the ***Stat'ute de Re·li'gi·o'sis*** (dē rē·lĭj'ĭ·ō'sĭs) (7 Edw. I, 1279), which forbade all alienations in mortmain, the act of 13 Edw. I, c. 32 (1285), forbidding such alienation by common recovery (which had been used to evade the prior one), the act of 15 Rich. II, c. 5 (1391), forbidding alienation to the use of an ecclesiastical corporation except under the royal license, the act of 9 Geo. II, c. 36 (1736), declaring wills for charitable purposes void except under certain conditions, and various other statutes of later years. The main original purpose of these statutes was to preserve to the lords the feudal rights of relief, wardship, marriage, and escheat, which conveyance in mortmain took away; that of the later statutes is to prevent undue accumulation of wealth in the hands of corporations. All the mortmain acts were repealed by the Mortmain and Charitable Uses Act of 51 & 52 Vict. c. 42 (1888), which consolidates the provisions of, and repeals, the earlier acts.

steam engine. **1.** An engine driven or worked by steam; often, specif., a locomotive. Certain crude steam engines are described by Hero of Alexandria (2d century B.C.). The first commercially successful steam engine, that of Thomas Savery, dates only from 1698. This water-pumping engine, with hand-worked valves, operated much like the pulsometer. It was an ***atmospheric engine***, or one in which the steam was used to obtain by condensation a partial vacuum, into which the atmospheric pressure pushed the water up through a suction pipe. This water was displaced by steam, and the operation repeated. Newcomen (about 1711) and others improved on this by introducing a solid piston to separate the water and steam, and subsequently by making the machine automatic. The next improvements of note were by James Watt, who in his patent of 1769 declared that: (1) The cylinder must be kept as hot as the steam that enters it; (2) the steam from the cylinder must be condensed in a separate vessel (the condenser), which must be kept clear of air and water by a pump; (3) the expansive force of the steam must be utilized (see EXPANSION, *n.*, 5). Watt's principles practically govern present steam-engine practice. His first engine was a ***single-acting*** beam pumping engine. He later invented the ***double-acting*** engine and effected many other improvements, and his assistant Murdoch introduced the slide valve. The first practical locomotive to run on rails was designed (1804) by the British engineer Richard Trevithick, but the perfecting and developing of the locomotive steam engine was the work of George Stephenson. The application of the steam engine to passenger boats was made by Robert Fulton (1807) in America, and by Henry Bell (1812) in Great Britain. The common ***reciprocating steam engine*** of today consists essentially of a piston driven in a closed cylinder by steam at a pressure initially much greater than that of the atmosphere. The piston is

connected rigidly by a piston rod to a crosshead (except in the trunk engine), the reciprocating motion of which is usually converted into rotary motion by a connecting rod, crankpin, crank, and crankshaft. The steam distribution is effected by a slide valve or other automatic valve or valves, and is usually regulated by a link motion or some other form of valve gear. In the ***rotary engine***, a piston, vane, or the like, is constrained to move in a circular path, thus obviating the necessity for a connecting rod and a crank. See also TURBINE. Steam engines are broadly classified as: ***condensing engines***, in which the steam, after exhausting from the cylinder, is condensed in a separate condenser (see CONDENSER, 2 e), thus largely obviating back pressure due to atmospheric pressure, and, incidentally, saving most of the water; ***noncondensing engines***, in which the steam is exhausted directly into the air. For further classification see ENGINE, *n.*, 5. Cf. INTERNAL-COMBUSTION ENGINE.

steam'er, *v. i.* To go or voyage by steamer.

steamer chair. A deck chair.

steamer duck. A large sea duck (*Tachyeres cinereus*), of Patagonia, Tierra del Fuego, and the Falkland Islands, which, when full-grown, is incapable of flight, but swims with a peculiar action suggesting a side-wheel steamboat.

steamer trunk. A trunk suitable for use in a stateroom of a steamer; esp., a shallow trunk that may be stowed beneath a berth.

steam fire engine. A unit of fire apparatus consisting of a steam boiler, engine, and pump, on wheels.

steam fit. A steam-tight fit.

steam fitter. A workman who installs or repairs steam pipes and their fittings, etc. — **steam fitting.**

steam frigate. See FRIGATE.

steam gas. Highly superheated steam.

steam gauge. A pressure gauge for steam.

steam gun. A contrivance from which projectiles may be thrown by elastic force of steam.

steam hammer. A power forging hammer worked directly by steam; esp., a hammer guided vertically and operated by a vertical steam cylinder located directly over an anvil. It was invented by Nasmyth in 1839, and, although since considerably modified, is still often called the *Nasmyth hammer.* In all steam hammers, the hammer is raised by the pressure of steam admitted below the piston. In some hammers (*steam drop hammers*), the hammer drops of its own weight; in others, the force of the blow is increased by the expansion of steam admitted above the piston, and maybe lessened by retaining some of the steam below the piston to act as a cushion. — **steam'-ham'mer,** *adj.*

steam point. *Mining.* See POINT, *n.*, 34.

steam port. *Mach.* A port for steam, esp. for live steam. See LINK MOTION, 1, *Illust.*

steam pump. A pump driven by steam, or directly by a steam engine; commonly, a combined steam engine and pump with the piston rod and pump plunger directly coupled.

steam ram. A steam pump for deep wells, resembling the pulsometer in action.

steam road. A railroad for steam locomotives.

steam'-roll', **steam'-roll'er,** *v. t.* To crush with a steam roller or overcome by superior or ruthless force. *Colloq.*

steam roller. A steam-driven road roller; figuratively, *Colloq.*, a power or force that ruthlessly or arbitrarily overcomes opposition. — **steam'-roll'er,** *adj.*

steam room. **a** A steam-heated room as that used in a Turkish bath. **b** In a steam boiler, the space above the water level.

steam'ship' (stēm'shĭp'), *n.* A ship or seagoing vessel propelled by the power of steam; a steamer.

stean'ing, steen'ing, *n.* **1.** A lining of stone, brick, or the like, as for a well.
2. *Dial. Eng.* a Paving or metal for a road. **b** A paved ford over a stream.

ste'a·rate (stē'ā·rāt), *n. Chem.* A salt or ester of stearic acid.

ste·ar'ic (stē·ăr'ĭk; stēr'ĭk), *adj.* [F. *stéarique.*] *Chem.* Pertaining to, obtained from, or like, stearin or tallow.

stearic acid. *Chem.* A white crystalline fatty acid, $CH_3\cdot(CH_2)_{16}CO_2H$, obtained by saponification of tallow or other hard fats containing stearin; octadecanoic acid. It melts to an oily liquid at 69.3° C. (156.7° F.). It is used chiefly for making candles, usually with the addition of paraffin. Commercial stearic acid (stearine) is commonly a mixture of stearic and palmitic acids.

ste·ar'i·form (stē·ăr'ĭ·fôrm), *adj.* [*stearin* + *-form.*] Resembling stearin, or hard fat.

ste'a·rin (stē'ā·rĭn; stēr'ĭn), *n.* Also, in senses 2 & 3, **ste'a·rine** (-rĭn; -rēn). [F. *stéarine,* fr. Gr. *stear* tallow, suet. See STONE.] **1.** *Chem.* Any of the esters of glycerol and stearic acid; specif., glyceryl tristearate, $C_3H_5(C_{18}H_{35}O_2)_3$, a white crystalline solid found in many animal and vegetable fats, esp. the hard fats, as tallow; — called also *tristearin.* On saponification it yields one molecule of glycerol and three of stearic acid or its salts.
2. The solid portion of any fat; — distinguished from *olein.*
3. *Com.* Stearic acid; — in this sense usually *stearine.*

-ste'a·rin. A combining form of *stearin,* as in petro*stearin.*

ste'a·ro- (stē'ā·rō-), **stear-.** A combining form from Greek *stear,* tallow, suet, as in *stear*rhea; — used in *Chem.* for *stearic, stearin.*

ste'a·ro·lac'tone (stē'ā·rō·lăk'tōn), *n. Chem.* A crystalline compound, $C_{18}H_{34}O_3$, the lactone of a hydroxy derivative of stearic acid. It is one of the products of the action of sulphuric acid on oleic acid.

ste'a·rol'ic ac'id (-rōl'ĭk; -rō'lĭk). [*stearic* + *oleic* + *-ic.*] *Chem.* A colorless crystalline acid, $C_{18}H_{36}O_3$, of the acetylene series, isologous with stearic acid, and obtained indirectly from oleic acid.

ste'a·rone (stē'ā·rōn), *n. Chem.* A white crystalline ketone, $(C_{17}H_{35})_2CO$, obtained by heating stearic acid with phosphorus pentoxide and in other ways.

ste'a·rop'tene (-rŏp'tēn), *n.* [*stearic* + *elaeoptene.*] *Chem.* The part of an essential oil separated as a solid on cooling or long standing; — contrasted with *elaeoptene.*

ste'ar·rhe'a, -rhoe'a (stē'ăr·rē'ā), *n.* [NL., fr. *stear-* + *-rhea.*] *Med.* Seborrhea.

ste'a·ryl (stē'ā·rĭl), *n.* The univalent radical, $C_{17}H_{35}CO$, of stearic acid. Cf. BENZOYL.

ste'a·tite (-tīt), *n.* [L. *steatitis,* fr. Gr. *stear, steatos,* fat, tallow.] *Mineral.* A massive variety of talc, of a grayish-green or brown color; — called also *soapstone.* It forms extensive beds, and is quarried for use with electrical apparatus, for switchboards, hearths, coarse utensils, the linings of sinks, etc. — **ste'a·tit'ic** (-tĭt'ĭk), *adj.*

ste'a·tit'ic (-tĭt'ĭk), *n.* A porcelain of, or supposedly of, steatite.

ste'a·to- (stē'ā·tō-), **steat-.** A combining form, Greek *steato-, steat-,* from *stear, steatos,* meaning *fat, tallow,* as in *steato*lysis, *steato*sis.

ste·at'o·cele (stē·ăt'ō·sēl; stē'ā·tō-), *n.* [*steato-* + *-cele.*] *Med.* A scrotal swelling consisting of fat.

ste'a·tog'e·nous (stē'ā·tŏj'ē·nŭs), *adj.* [*steato-* + *-genous.*] Producing fat; causing steatosis.

ste'a·tol'y·sis (-tŏl'ĭ·sĭs), *n.* [NL., fr. *steato-* + *-lysis.*] *Chem.* Conversion of neutral fats into glycerol and free fatty acids. — **ste'a·to·lyt'ic** (-tō·lĭt'ĭk), *adj.*

ste'a·to'ma (-tō'mā), *n.; pl.* -TOMATA (-mā·tā), -TOMAS (-māz) [NL., fr. Gr. *steatōma,* fr. *steatoun* to turn into suet, fr. *stear, -atos,* suet.] *Med.* **a** A sebaceous cyst. **b** A lipoma. — **ste'a·tom'a·tous** (-tŏm'ā·tŭs; -tō'mā·tŭs), *adj.*

ste'a·to·path'ic (-tō·păth'ĭk), *adj.* [See STEATO-; PATHIC.] Of or pertaining to disorders of the sebaceous glands.

ste'a·to·py'gi·a (-pī'jĭ·ā; -pĭj'ĭ·ā), *n.* Also **ste'a·top'y·gy** (-tŏp'ĭ·jĭ). [NL., fr. *steato-* + *-pygia.*] *Anthropol.* An excessive development of fat on the buttocks, esp. of females. Among living races it is most common among the Hottentots and some Negro peoples. — **ste'a·to·pyg'ic** (-pĭj'ĭk), *adj.* — **ste'a·to·py'gous** (-pī'gŭs).

Ste'a·tor'nis (-tôr'nĭs), *n.* [NL., fr. *steat-* + *-ornis.*] A genus consisting of the guacharo. It constitutes the family **Ste'a·tor·nith'i·dae** (-tôr·nĭth'ĭ·dē) and the suborder **Ste'a·tor'ni·thes** (-tôr'nĭ·thēz; -tôr·nī'thēz), of the Caprimulgiformes.

ste'a·tor·rhe'a, -rhoe'a (-tō·rē'ā), *n.* [NL., fr. *steato-* + *-rhea.*] *Med.* Diarrhea marked by fat in the stools.

ste'a·to'sis (-tō'sĭs), *n.; pl.* -TOSES (-tō'sēz). [NL. See STEATO-; -OSIS.] *Med.* **a** Abnormal formation of fat; fatty degeneration. **b** Disordered function of sebaceous glands. **c** Adiposity.

stech (stĕk), *v. t. & i.* *Chiefly Scot.* **a** To cram; gorge. **b** To puff; pant; groan. **c** To stink. — *n.* Gormandizing.

stech'a·dos (stĕk'ā·dŏs), *n.* [MF. See STICKADORE.] The French lavender.

steck'ling, stech'ling (stĕk'lĭng), *n.* [G. *steckling.*] A slip or cutting; also, a transplanted seedling; specif., a small late-planted sugar beet used for seed production.

steed (stēd), *n.* [ME. *stede,* fr. AS. *stēda* a studhorse, war horse; akin to AS. *stōd* a stud of breeding steeds, G. *stute* a mare. See STUD OF horses.] **1.** A horse, esp. a spirited horse for state or war. *Literary.*
2. *Chiefly Humorous.* **a** A horse of no mettle or distinction; a nag. **b** Anything, esp. a bicycle or other vehicle, ridden astride.

steed (stēd). Var. of STEAD. *Obs. exc. Dial.*

steek (stēk; stāk), *v. i. & t.* [ME. *steken;* akin to STICK, *v.*] **1.** To pierce; prick. *Obs. exc. Dial. Eng.*
2. To stitch; sew. *Scot. & N. of Eng.*
3. *Chiefly Scot. & N. of Eng.* **a** To shut; close; imprison. **b** To fasten; bar. **c** To put; set; fix. **d** To stop.

steek, *n.* **1.** *Chiefly Scot.* A stitch; as: **a** A loop in knitting. **b** Thread. **c** Of clothing, a garment; figuratively, a bit or piece. **d** A pain, esp. in the side. **e** Pace; — also in the *pl.*
2. A strike (of workmen). *N. of Eng.*

steel (stēl), *n.* [AS. *stēl, stēli, staeli, stȳle;* akin to OS. *stehli,* D. *staal,* G. *stahl,* OHG. *stahal,* Icel. *stāl,* Dan. *staal,* Sw. *stål.*] **1.** A commercial form of iron containing carbon in any amount up to about 1.7 per cent as an essential alloying constituent, and malleable when under suitable conditions. It is distinguished from *cast iron* by its malleability and lower carbon content. Low-carbon steel is distinguished from wrought iron by its freedom from slag and by its method of manufacture. Steel is now almost entirely produced by refining molten pig iron, the bath remaining completely molten throughout the process. The variety of steel is designated by the name of the process, as *Bessemer steel, electric steel,* etc. Steel was originally produced by absorption of carbon into solid iron at an elevated temperature, and when so made is called *blister steel. Crucible steel* (called also *crucible cast steel*) is made by remelting wrought iron or blister steel in crucibles, with addition of the desired amount of carbon. The presence of carbon renders steel harder than pure iron, and the larger the amount of carbon the greater the hardness. For commercial purposes steel is often classified in three grades of hardness: low-carbon (roughly less than 0.25 per cent carbon), called *mild* or *soft steel;* medium-carbon (roughly 0.25 to 0.60 per cent), called *medium steel;* and high-carbon (roughly more than 0.60 per cent), called *hard steel.* An increase of hardness is accompanied by increase of tensile strength and, in general, of brittleness; brittleness, however, can be largely overcome by tempering. All steels except low-carbon ones are characterized by the ability to be further hardened by sudden cooling from above a certain temperature (see CRITICAL POINT). Besides carbon, steel may contain varying amounts of other elements; when one or more other elements have been incorporated in the steel for the purpose of modifying its properties, it is called an *alloy steel.*
2. Steel as a material for manufactured articles; also, articles characteristically of steel; also, the steel part of an article. Cf. COLD STEEL.
3. Armor of, or as of, steel.
4. An instrument or implement of, or characteristically of, steel; as: **a** A weapon, esp. one for thrusting or cutting, as a sword or dagger. **b** An instrument (usually a fluted, round rod with a handle) for sharpening knives. **c** A piece of steel for striking sparks from flint. **d** *U. S. & Can.* = 4th RAIL, 3 **a**; hence, a railroad. **e** *Dial.* A flatiron. **f** A strip of steel used for stiffening, as in corsets.
5. Steellike quality; hardness; rigor; coldness; durability; reliability; also, something or someone resembling steel in one or more characteristics.
6. Market quotation for shares in a steel company; as, *steel* has risen a point; also, *pl.,* the quotations for companies in general which are in the steel manufacturing business; as, *steels* and coppers were strong. *Colloq.*
7. The color steel gray.
8. *Med.* A chalybeate medicine.
9. *Mining.* = DRILL STEEL.

6. Figuratively, a foremost position; the prow.

Wolsey sat at the *stem* more than twenty years. *Fuller.*

7. *Bot.* Any axis which develops buds and shoots in place of roots. In this sense *stem* includes all the subterranean root-like modifications which are commonly called *roots* (as the rhizome, bulb, corm, etc.), but which produce leaves and buds. Stems are further distinguished by their giving rise to outgrowths at certain definite points called *nodes,* instead of at scattered intervals. The apex of the stem is the **growing point,** and is never covered by a cap. The stem is not clearly differentiated in plants below pteridophytes, though it may be closely simulated by certain modifications of the thallus. See THALLUS; 4th ROOT, 1; CORMOPHYTE.

Stem, 1. *A* Part of Transverse Section of an Internode in the Stem of Indian Corn. 1 Fundamental Tissue; 2, 2 Vascular Bundles; 3 Pericycle; 4 Primary Cortex. *B* Part of Transverse Section of Stem of Dutchman's-pipe (*Aristolochia*). 1 Epidermis; 2 Primary Cortex; 3 Starch Sheath; 4, 4 Pericycle, with shaded external layer of Sclerenchyma; 5, 5 Phloem, and 6, 6 Xylem, portions of Vascular Bundle; 7 Cambium; 8 Medulla. All tissues lying within the starch constitute the Central Cylinder. *C* Part of a Four-year-old Stem of Pine. 1, 1 Annual Rings; 2 Medulla; 3 Bast; 4 Bark; 5, 5 Medullary Rays.

9. *Music.* The short perpendicular line extending upward on the right or downward on the left from the head of a note according as the note is above or below the middle line of the staff. Two voice parts written on the same staff may be distinguished by the direction of their stems, even when they cross or use the same note, as in the *Illust.*

10. *Ore Dressing.* One of the heavy vertical rods in a stamp battery to which the tappet and boss are attached.

11. *Philol.* **a** That part of an inflected word which remains unchanged (except by phonetic changes or variations; cf. UMLAUT) throughout a given inflection; theme; base. The *stem* is sometimes identical with the root, but is usually de-

rived from it with some formative suffix. Thus the root *duc* serves as the stem of Latin *dux* (ducs), *ducis*, leader, and is developed with suffixes into *ducere*, to lead, *ductor*, leader, *ductus*, act of leading, *ductilis*, ductile. **b** *Obs.* An original word, serving as a basis for the formation of derivative words by the addition of suffixes, etc.

12. *Skiing.* Act or instance of stemming.

ISOKONTAE); — equiv. to *Oedogoniales.*
steph'a·nome (stĕf'ȧ·nōm), *n.* [*stephano-* + Gr. *nemein* to distribute.] An instrument for measuring the angular dimensions of fogbows, halos, etc.
steph'a·nos (stĕf'ȧ·nŏs), *n.* [Gr., crown; akin to Gr. *stephein* to encircle.] *Gr. Antiq.* **a** A headdress like the stephane, but of uniform width, often seen in works of art. **b** A wreath presented to the winner in a public contest; a wreath of honor for distinguished public service.
Steph'a·no'tis (-nō'tĭs), *n.* [NL., fr. Gr. *stephanōtis* fit for a crown, fr. *stephanos* crown.] **1.** *Bot.* **a** A genus of Old World, tropical, woody vines (family Asclepiadaceae) with fragrant white flowers, the corolla of which has a cylindrical, dilated tube and spreading limb. *S. floribunda* is a favorite greenhouse plant. **b** [*not cap.*] A plant or flower of this genus.
2. [*not cap.*] A perfume said to be prepared from the flowers of *Stephanotis floribunda.*
Steph'a·nu'rus (stĕf'ȧ·nū'rŭs), *n.* [NL. See STEPHANO-; -URUS.] *Zool.* A genus of parasitic roundworms (Nematoda), including *S. dentatus,* the *lardworm* or kidney worm, and occurs in pigs in America, Australia, Germany, etc.
Ste'phen (stē'vĕn), *n.* [L. *Stephanus,* fr. Gr. *Stephanos.*] **1.** Literally, crown; — masculine proper name. L. *Stephanus* (stĕf'ȧ·nŭs); F. *Étienne* (ȧ'tyĕn'); It. *Stefano* (stȧ'fȧ·nō); Sp. *Estevan, Esteban* (ĕs·tȧ'vän; 98); Pg. *Estevão* (ĕsh'tȧ·voun'); G. *Stephan* (shtĕf'ăn). — Dim. *Steve* (stēv), *Stevie* (stēv'ĭ), *Steenie* (stēn'ĭ) (*Chiefly Scot.*).
2. The first Christian martyr, accused of blasphemy and stoned to death. *Acts* vii. 58.
Ste'phen, Master. A country gull in Ben Jonson's *Every Man in his Humor.*
step'-in', *adj.* Put on by being stepped into, as certain types of women's undergarments, pumplike shoes, etc. — **step'-in',** *n.*
step joint. A joint used in fastening together the ends of two rails of different height and section.
step'lad'der (stĕp'lăd'ĕr), *n.* A portable set of steps, esp. one with flat, comparatively broad steps in place of rungs and with a frame hinged to the back for steadying.
step'-log' (stĕp'lŏg'; 185), *n. Anthropol.* A primitive ladder made by cutting notches or steps along the side of a log.
step'min'nie (stĕp'mĭn'ĭ), *n.* Stepmother. *Scot.*
step'moth'er (-mŭth'ĕr), *n.* [AS. *stēopmōder.*] **1.** The wife of one's father by a subsequent marriage.
2. a *Eng.* The wild pansy. **b** *Now Dial.* A hangnail.
step'moth'er·ly (stĕp'mŭth'ĕr·lĭ), *adj.* Of, pert. to, or befitting, a stepmother; hence, proverbially, unmotherly; harsh; severe. — **step'moth'er·li·ness** (-lĭ·nĕs; -nĭs; 119), *n.*
step'-off', *n.* A stepping off; specif., an abrupt dropping off or shelving of a shore line into deep water; also, a place where such a dropping off occurs.
step'o·ny (stĕp'ō·nĭ), *n.* [Perh. fr. *Stepney,* London.] A sweet summer beverage made from raisins and lemons, in vogue in London in the 17th century. *Obs.*
step'par'ent (stĕp'pär'ĕnt), *n.* A stepfather or stepmother, that is, one related by a remarriage only. See STEP-.
steppe (stĕp), *n.* [Russ. *step';* cf. F. & G. *steppe.*] **1.** One of the vast tracts in southeastern Europe and in Asia generally level and without forests.

stepe. † STEEP, *adj.;* STEP.
Steph'a·nas (stĕf'ȧ·nȧs), *n. Bib.*
Steph'a·no·con'tae. Var. of STEPHANOKONTAE.
Ste'phen·son's link mo'tion (stē'vĕn·sŭnz). [After George *Stephenson,* Eng. engineer.] See LINK MOTION, 1. — **Stephenson link.**
Ste'phens' whip'poor·will' (stē'vĕnz). [After Frank *Stephens* (b. 1849), Am. ornithologist.] See WHIPPOORWILL.
step'less, *adj.* See -LESS.
step'like', *adj.* See -LIKE.
step'moth'er·hood, *n.* See -HOOD.
step'moth'er·less, *adj.* See -LESS.
step'moth'er's·bless'ing. = STEPMOTHER, 2 **b.**

2. Hence, any large tract of arid land characterized by xerophilous vegetation and found mostly in regions of extreme temperature range and loess soil; steppeland.

steppe cat. The manul.

stepped (stĕpt), *adj.* Having a step or steps, or a series of steplike parts; arranged or constructed in steps; also, altered or regulated by steps.

stepped footing. *Arch.* A footing in which the desired width is secured by a series of steps in about the proportion of one unit of horizontal dimension to two units of vertical dimension.

stepped gable. *Arch.* A gable which diminishes in width by corbiesteps. Cf. CORBIESTEP, *Illust.*

stepped gauge. = STEP GAUGE.

stepped gear wheel. *Mach.* A gear wheel with two or more complete circular sets of teeth arranged adjacently on the same rim so that the corresponding teeth in the various sets form a series of steps. This admits of large teeth with the smooth-running qualities of small pitch.

stepped, stept, *or* **step in age** *or* **years.** Advanced in age or years; old. *Obs.*

steppe disease. = RINDERPEST.

stepped key. *Locksmithing.* = BIT KEY.

stepped pulley. A cone pulley with steps. See CONE PULLEY, *Illust.*

stepped rack. *Mach.* A rack made to mesh with a stepped gear.

stepped reamer. *Mach.* See REAMER, *n.*, 1.

stepped screw. A kind of interrupted screw (which see) the divisions of whose surface are stepped.

steppe murrain. See RINDERPEST.

step'per (stĕp'ĕr), *n.* One who or that which steps; as, a quick *stepper;* specif.: **a** A high-spirited horse. "The ring of a *stepper's* hoofs." *Edith Wharton.* **b** *Colloq.* A dancer, esp. a step dancer.

steppe rue. = AFRICAN RUE.

step'ping (stĕp'ĭng), *n.* **1.** Act of one who steps; *Colloq.*, dancing.

2. a Lumber suitable for steps; hence, wood members especially formed for use in constructing step treads. **b** An export grade of yellow pine and fir.

step'ping-off' place. The outbound end of a transportation line; hence, *Jocular,* any end from which one steps off into unknown territory. *Colloq., U. S.*

step'ping-out', *adj.* Worn when stepping out; as, *stepping-out* clothes.

stepping pace. A variation of the pace of a horse, characterized by little side motion and a somewhat broken cadence. See PACE, 4.

step'ping-stone' (stĕp'ĭng-stōn'), *n.* **1.** A stone projecting above the surface of water or mud, on which to step in walking.

2. Hence, a means of progress or advancement.

3. A horse block.

Step Pyramid. A step-shaped structure at Saqqara near Memphis, the oldest Egyptian pyramid, built by Zoser, first king of the IIId dynasty.

step rail. A flat rail with a raised outer tread for flanged car wheels.

step rate. A rate which changes, decreases or increases, by regular gradations, as in life insurance a premium rate which increases or decreases each year. See RATE, 7 & 11.

step'sis'ter (stĕp'sĭs'tĕr), *n.* A daughter of one's stepfather or stepmother by a former marriage. See STEP-.

step socket. A socket for a locked-wire rope, having a series of gripping blocks of graduated bores to hold the layers. See SOCKET, *Illust.*

step'son' (stĕp'sŭn'), *n.* [AS. *stēopsunu.*] A son of one's husband or wife by a former marriage. See STEP-.

step'stone' (-stōn'), *n.* **a** A stone laid before an outside door as a step. **b** = STEPPINGSTONE.

step tap. *Mach.* A screw-thread tap made in steps such that each step cuts the thread a little deeper than the preceding step.

step terrace. A stepped terrace on the runs of which farming is done.

step'-up', *adj.* That steps up, or increases, advances, etc., in steps; as, a *step-up* transformer (see TRANSFORMER, 3); a *step-up* gear, that increases a velocity ratio; a *step-up* lease, under which rent is increased at specified intervals and by specified amounts up to a given maximum.

step ward. The ward of a lock or key nearest to the pin.

step'way' (stĕp'wā'), *n.* A flight or set of steps.

step wheel. = STEPPED GEAR WHEEL.

-ster (-stĕr). [ME., fr. AS, *-estre, -istre;* akin to MD. *-ster.*] A suffix denoting orig. *the female agent,* esp. *one who does something with skill* or *as an occupation,* as in song*ster*, spin*ster* (orig., a woman who spins). Such formations came later to be regarded as masculine, some of them giving rise to new feminines in *-stress*, as in seam*stress* (from older seam*ster*), song*stress*. In the modern period the suffix, which was attached only to the present stem of verbs, is joined esp. to nouns (road*ster*, gang*ster*) and, rarely, adjectives (young*ster*, old*ster*), the notion of agency tending to be lost and the suffix having often a depreciatory sense (as in dab*ster*, rhyme*ster*). Cf. -ER, -IST.

☞ COMBINATIONS ARE:

dabster	**oldster**	**songster**	**trickster**
gamester	**punster**	**spinster**	**webster**
huckster	**rhymester**	**tapster**	**youngster**
jokester	**seamster**	**tipster**	

ste·ra'di·an (stĕ·rā'dĭ·ăn), *n.* [Gr. *stereos* solid + L. *radius* radius + *-an.*] *Math.* A unit of measure of solid angles. It is the solid angle subtended at the center of the sphere by a portion of the surface whose area is equal to the square of the radius of the sphere.

ster'co·lin (stûr'kō·lĭn), *n.* [L. *stercus* dung + *oleum* oil.] *Biochem.* Coprosterol.

ster'co·ra'ceous (stûr'kō·rā'shŭs), *adj.* [L. *stercus, -oris,* dung.] Of or pertaining to dung or feces; partaking of the nature of, or containing, dung.

ster'co·ral (stûr'kō·răl), *adj.* [L. *stercus, -oris,* dung.] Of, pertaining to, containing, or produced by, feces; stercoraceous; also, living in or feeding on dung.

stercoral ulcer. *Med.* An ulcer, usually of the colon or rectum, produced by the pressure of hard feces.

Ster'co·ra·nist (stûr'kō·rā·nĭst), *n.* Also **Ster'co·rar'i·an** (-răr'ĭ·ăn). [ML. *stercoranista,* fr. L. *stercus, -oris,* dung.] [Also *not cap.*] *Eccl. Hist.* One who holds that the consecrated elements in the Eucharist undergo natural processes of digestion, etc.; — a nickname. — **Ster'co·ra·nism** (-rā·nĭz'm), *n.*

Ster'co·ra·ri'i·dae (stûr'kō·rā·rī'ĭ·dē), *n. pl.* [NL., fr. L. *stercorarius* pertaining to dung + *-idae.*] *Zool.* The family of long-winged sea birds (suborder Lari) consisting of the jaegers and skuas, sometimes ranked as a subfamily, **Ster'co·ra'ri·i'nae** (-rā'rĭ·ĭ'nē), of the Laridae. **Ster'co·ra'ri·us** (-rā'rĭ·ŭs) is the type genus.

ster'co·rar'i·ous (-răr'ĭ·ŭs), *adj.* Stercoral. *Rare.*

ster'co·rar'y (stûr'kō·rĕr'ĭ *or, esp. Brit.,* -rĕr·ĭ), *n.*; *pl.* -IES (-Iz). [ML. *stercorarium,* fr. L. *stercorarius* belonging to dung.] A place, prop. covered, for containing dung. — *adj.* Stercoral.

ster'co·rate (-rāt), *v. t.* To manure; dung. *Now Rare.*

ster'co·ra'tion (-rā'shŭn), *n.* [L. *stercoratio,* fr. *stercorare* to dung.] Manuring; manure; ordure. *Now Rare.*

ster'co·re'mi·a, *or* **-rae'mi·a** (-rē'mĭ·ä), *n.* [NL., fr. L. *stercus, -oris,* dung + *-emia.*] A morbid state resulting from the absorption of fecal matter into the blood.

ster'co·ric'o·lous (stûr'kō·rĭk'ō·lŭs), *adj.* [L. *stercus, -oris,* dung + *-colous.*] Living in dung.

ster'co·rite (stûr'kō·rīt), *n.* [L. *stercus, -oris,* dung + E. *-ite.*] *Mineral.* Native microcosmic salt, $HNaNH_4PO_4 \cdot 4H_2O$, occurring in guano.

ster'co·rol (stûr'kō·rōl; -rŏl), *n.* Also **-rin** (-rĭn). [L. *stercus, -oris,* dung.] Coprosterol.

ster'co·rus (-rŭs), *adj.* Stercoral.

ster·cov'o·rous (stĕr·kŏv'ō·rŭs), *adj.* [L. *stercus, -oris,* dung + *-vorous.*] *Zool.* Scatophagous, as certain insects.

Ster·cu'li·a (stĕr·kū'lĭ·ä), *n.* [NL., fr. L. *Sterculius,* the deity that presided over manuring, fr. *stercus* dung; — in allusion to their fetid odor.] *Bot.* A large genus of tropical trees, typifying the Sterculiaceae, having small, paniculate, unisexual flowers containing fifteen anthers and an ovary with five cells becoming distinct carpels in fruit. The bark of many species is valued for cordage, mats, etc. Some yield a gum resembling tragacanth. The seeds are often edible. See KURRAJONG, BOTTLE TREE **a.**

Ster·cu'li·a'ce·ae (-ā'sē·ē), *n. pl.* [NL.] *Bot.* A family of herbs, shrubs, or trees (order Malvales), the chocolate family, distinguished mainly by the numerous monadelphous stamens and 2-celled anthers. There are 50 genera, including *Sterculia, Theobroma* (chocolate), *Cola* (kola nut), *Assonia,* etc., and over 750 species, natives of warm regions. — **ster·cu'li·a'ceous** (-shŭs), *adj.*

ster·cu'li·ad (stĕr·kū'lĭ·ăd), *n. Bot.* A plant of the family Sterculiaceae.

stere (stĕr; *F.* stâr), *n.* [F. *stère,* fr. Gr. *stereos* solid.] A cubic meter; — used also in combinations; as, decas*tere.* See METRIC SYSTEM; MEASURE, *Table.*

ster'e-. = STEREO-.

ster'e·ag·no'sis (stĕr'ē·ăg·nō'sĭs; stĕr'ē-), *n.* [NL., fr. *stere-* + *a-* not + Gr. *gnōsis* knowledge.] Astereognosis.

Ster'el·min'tha (stĕr'ĕl·mĭn'thä), *n. pl.* [NL., fr. *stere-* + Gr. *helminsh* a worm.] *Zool.* A group consisting of flatworms having no alimentary tract. — **ster'el·min'thic** (-thĭk), *adj.* — **ster'el·min'thous** (-thŭs), *adj.*

ster'e·o- (stĕr'ē·ō-; stĕr'ē·ō-), **ster'e-.** [See STARE.] A combining form, Greek *stereo-, stere-,* from *stereos,* solid, meaning *solid, a solid body,* as in *stereo*bate, *stereo*picton; specif.: **a** *Stereoscopic,* as in:

stereocamera	**stereophotomicrography**
stereophantascope	**stereophysics**
stereophotogrammetry	**stereopicture**
stereophotograph	**stereoradiograph**
stereophotographic	**stereoradiography**

b *Chem.* In three dimensions in space; spatial; as in *stereo*chemistry.

ster'e·o (stĕr'ē·ō; stĕr'ē·ō), *adj.* **a** Short for STEREOSCOPIC, STEREOTYPED. **b** *Chem.* = STEREO- **b.**

ster'e·o (stĕr'ē·ō; stĕr'ē·ō), *n.*; *pl.* STEREOS (-ōz). Short for STEREOTYPE.

ster'e·o, *v. t.*; STER'E·OED; STER'E·O'ING. Short for STEREOTYPE.

ster'e·o·bate (-ō·bāt), *n.* [L. *stereobata,* fr. Gr. *stereos* solid + *batēs* that treads or covers (akin to *basis* base); cf. F. *stéréobate.* See STEREO-; BASE, *n.* Cf. STYLOBATE.] *Arch.* A substructure or basement of masonry as visible above the ground level. — **ster'e·o·bat'ic** (-băt'ĭk), *adj.*

ster'e·o·blas'tu·la (-blăs'tū·lä), *n.* [NL.] *Embryol.* A blastula without a cavity.

ster'e·o·cam·pim'e·ter (-kăm·pĭm'ē·tĕr), *n.* A stereoscopic campimeter.

ster'e·o·chem'is·try (-kĕm'ĭs·trĭ), *n.* [*stereo-* + *chemistry.*] That branch of chemistry which has to do with the arrangement of atoms and molecules in space. — **ster'e·o·chem'ic** (-kĕm'ĭk), **ster'e·o·chem'i·cal** (-ĭ·kăl), *adj.* — **ster'e·o·chem'i·cal·ly,** *adv.*

ster'e·o·chro·mat'ic (-krō·măt'ĭk), *adj.* Stereochromic. — **ster'e·o·chro·mat'i·cal·ly,** *adv.*

ster'e·o·chrome' (stĕr'ē·ō·krōm'; stĕr'ē·ō-), *n.* Stereochromic picture.

ster'e·o·chro'my (stĕr'ē·ō·krō'mĭ; stĕr'ē-), *n.* [*stereo-* + *-chromy.*] A process of mural painting in which the pigment is fixed by a series of reactions between the lime, fluosilicic acid, and water glass. — **ster'e·o·chro'mic** (-krō'mĭk), *adj.* — **ste're·o·chro'mi·cal·ly** (-mĭ·kăl·ĭ), *adv.*

ster'e·o·com'pa·ra'tor (-kŏm'pä·rā'tĕr; -kŏm·păr'ä·tĕr), *n.* [NL. See COMPARATOR.] *Physics.* A special form of stereoscope used in making topographic measurements by the accurate comparison of stereoscopic photographs taken with an instrument having very great distance between the objectives, or used in astronomy, esp., formerly, to detect small motions and changes by stereoscopic examination of two photographs of the same celestial area taken at different times. Cf. BLINK MICROSCOPE.

ster'e·o·e·lec'tric (-ē·lĕk'trĭk), *adj.* [*stereo-* + *electric.*] Of or pert. to generation of electricity by means of solid bodies alone.

ster'e·o·flu'or·os'co·py (-flōō'ôr·ŏs'kō·pĭ), *n.* Stereoscopic fluoroscopy. — **ster'e·o·flu'or·o·scop'ic** (-ō·skŏp'ĭk), *adj.*

ster'e·o·gas'tru·la (-găs'trōō·lä), *n.* [NL.] *Embryol.* A gastrula with no cavity.

ster'e·og·no'sis (stĕr'ē·ŏg·nō'sĭs; stĕr'ē-), *n.* [NL., fr. *stereo-* + *-gnosis.*] Perception of the form, weight, etc., of a solid body by handling and lifting it. — **ster'e·og·nos'tic** (-nŏs'tĭk), *adj.*

ster'e·o·go'ni·om'e·ter (-gō'nĭ·ŏm'ē·tĕr), *n.* A stereoscopic goniometer.

ster'e·o·gram' (stĕr'ē·ō·grăm'; stĕr'ē-), *n.* [*stereo-* + *-gram.*] A diagram or picture representing objects with an impression of solidity or relief; also, a stereograph; specif., a stereoroentgenogram.

ster'e·o·graph' (stĕr'ē·ō·grăf'; stĕr'ē-; 83), *n.* [*stereo-* + *graph.*] **1.** Any picture, or pair of pictures, prepared for the stereoscope.

2. *Anthropol.* An instrument used in tracing the profiles of skulls. See STEREOGRAPHY.

ster'e·o·graph'. *v. t. & i.* To prepare, as a picture, for stereoscopic exhibition. — **ster'e·og'ra·pher** (-ŏg'rä·fĕr), *n.*

ster'e·o·graph'ic (-grăf'ĭk), *adj.* Also **ster'e·o·graph'i·cal** (-ĭ·kăl). Made or done according to stereography; as, a *stereographic* chart. — **ster'e·o·graph'i·cal·ly,** *adv.*

stereographic projection. *Geom.* A projection of a sphere surface from a point of the surface on a plane perpendicular to the diameter through the point.

ster'e·og'ra·phy (stĕr'ē·ŏg'rä·fĭ; stĕr'ē-), *n.* [*stereo-* + *-graphy;* cf. F. *stéréographie.*] Art of delineating the forms of solid bodies on a plane; a branch of solid geometry, showing the construction of all solids that are regularly defined. By cutting a suitable material in the forms as shown in the cut, folding them along the lines indicated, and joining their edges, the five regular solids may be formed.

Stereography. *a* Tetrahedron; *b* Hexahedron or Cube; *c* Octahedron; *d* Dodecahedron; *e* Icosahedron.

ster'e·o·i'so·mer (-ō·ĭ'sō·mĕr), *n.* *Chem.* Any one of the isomers in a case of stereoisomerism.

ster'e·o·i'so·mer'ic (-ĭ'sō·mĕr'ĭk), **ster'e·o·i'so·mer'i·cal** (-ĭ·kăl), *adj.* *Chem.* Of, pertaining to, or exhibiting, stereoisomerism.

ster'e·o·i·som'er·ism (-ĭ·sŏm'ĕr·ĭz'm), *n.* [*stereo-* **b** + *isomerism.*] *Chem.* Isomerism depending on arrangement of atoms in space. See ISOMERIC, 1.

ster'e·o·ma'trix (-mā'trĭks), *n.* **A** matrix used in stereotyping.

ster'e·ome (stĕr'ē·ōm; stĕr'ē·ōm), *n.* Also **ster'e·om.** [Gr. *stereōma* solid body, fr. *stereos* solid.] *Bot.* Mechanical or strengthening tissue in plants, such as the thick-walled wood cells, sclerenchyma, etc. Cf. MESTOME.

ster'e·om'e·ter (-ŏm'ē·tĕr), *n.* [*stereo-* + *-meter.*] *Physics.* **a** A volumenometer. **b** An X-ray apparatus, based on the principle of stereoscopic vision, for determining the position of a fractured bone or the like.

ster'e·om'e·try (-ŏm'ē·trĭ), *n.* [*stereo-* + *-metry;* cf. F. *stéréométrie.*] Art of determining the volumes and other metrical elements of solid figures; — distinguished from *planimetry.* — **ster'e·o·met'ric** (-ō·mĕt'rĭk), **ster'e·o·met'ri·cal** (-rĭ·kăl), *adj.* — **ster'e·o·met'ri·cal·ly,** *adv.*

ster'e·o·mi·crom'e·ter (-mĭ·krŏm'ē·tĕr), *n.* [*stereo-* + *micrometer.*] An apparatus for attaching to a telescope to measure small angles in the field of view by noting the projection on squares seen with the other (naked) eye.

ster'e·o·mon'o·scope (-mŏn'ō·skōp), *n.* [*stereo-* + *mono-* + *-scope.*] An instrument with two eyes, by which a single picture, presenting an appearance of relief, is projected upon a screen of ground glass.

ster'e·o·neu'ral (-nū'răl), *adj.* *Zool.* Having the central nervous system without a cavity.

ster'e·o·pla'ni·graph (-plā'nĭ·grăf; -plä'nĭ-), *n.* *Physics.* An instrument for making topographic maps from observations made with the stereocomparator.

ster'e·o·plan'u·la (-plăn'ū·lä), *n.* [NL.] *Embryol.* A planula with no cavity.

ster'e·o·plasm (stĕr'ē·ō·plăz'm; stĕr'ē-), *n.* [*stereo-* + *-plasm.*] **a** *Biol.* The solid part of cell protoplasm. Cf. HYGROPLASM. **b** A secondary deposit of calcareous matter between the septa of certain corals. — **ster'e·o·plas'mic** (-plăz'mĭk), *adj.*

ster'e·op'sis (stĕr'ē·ŏp'sĭs; stĕr'ē-), *n.* [NL., fr. *stere-* + *-opsis.*] Stereoscopic vision.

ster'e·op'ti·con (stĕr'ē·ŏp'tĭ·kŏn; stĕr'ē-; 277), *n.* [NL. See STEREO-; OPTIC.] A highly developed form of the magic lantern, using chiefly photographic pictures and an intense light, and often made double so as to produce dissolving views. — **ster'e·op·ti'cian** (-ŏp·tĭsh'ăn), *n.*

Ster'e·or'ni·thes (-ôr'nĭ·thēz; -ôr·nĭ'thēz), *n. pl.* [NL., fr. *stereo-* + Gr. *ornis,* pl. *ornithes,* bird.] *Paleontol.* An order of Miocene Patagonian birds of uncertain affinities. They were very large and probably ratite. Most species are included in the Phororhacidae. — **ster'e·or·nith'ic** (-ôr·nĭth'ĭk), *adj.*

ster'e·o·scope' (stĕr'ē·ō·skōp'; stĕr'ē-), *n.* [*stereo-* + *-scope.*] An optical instrument with two eyeglasses, for assisting the observer to combine the images of two pictures taken for the purpose from points of view a little way apart, and thus to get the effect of solidity or depth; cf. BINOCULAR VISION. In the *reflecting stereoscope* the rays from the two pictures are turned into the proper direction for stereoscopic vision by two plane mirrors set at an angle with each other, and between the pictures. In the *lenticular stereoscope,* the form in general use, the eyeglasses are semilenses (as *l, l'* in fig. 2), or marginal portions of the same convex lens, set with their edges toward each other, so that they deflect the rays coming from corresponding points (*p, p'*) in the two pictures so as to strike the eyes (*e, e'*) as if coming direct from the point (*P*), where the two pictures are seen apparently as one.

1 Lenticular Stereoscope. 2 Diagram showing its action.

ster'e·o·scop'ic (-skŏp'ĭk), **ster'e·o·scop'i·cal** (-ĭ·kăl), *adj.* **1.** Of or pertaining to stereoscopy or the stereoscope; characteristic of or adapted to the stereoscope.

2. Characterized by stereoscopy; as, *stereoscopic* vision. — **ster'e·o·scop'i·cal·ly,** *adv.*

stereoscopic camera. A camera for taking pictures for the stereoscope. It usually has twin lenses.

ster'e·os'co·pism (stĕr'ē·ŏs'kō·pĭz'm; stĕr'ē-; stĕr'ē·ō·skō'pĭz'm; stĕr'ē-), *n.* Stereoscopic effect.

ster'e·os'co·pist (-pĭst), *n.* A specialist in stereoscopy.

ster'e·os'co·py (-ŏs'kō·pĭ; -ō·skō'pĭ), *n.* **1.** The science which deals with stereoscopic effects and methods by which they are produced.

2. Vision or the seeing of objects as in three dimensions.

ster'e·o·spon'dy·lous (stĕr'ē·ō·spŏn'dĭ·lŭs; stĕr'ē-), *adj.* [See STEREO-; SPONDYLO-.] *Zool. & Paleontol.* a Designating, or having, vertebrae whose component elements

steppe'land' (stĕp'lănd'), *n.* = STEPPE, 2.

step'sire', *n.* = STEPFATHER.

stept (stĕpt), *past tense & past part.* of STEEP. *Obs. exc. Dial.*

stept. Archaic or poetic past tense or past part. of STEP, *v.*

step'wise', *adv.* See -WISE.

ster. + STAR, STEER, STIR.

ster'a·cle (stĕr'ä·k'l), *n.* [Perh. fr. *stare,* after *spectacle* or *miracle.*] A spectacle; a performance. *Obs.*

sterap. + STIRRUP.

ster'co·bi'lin (stûr'kō·bī'lĭn), *n.* [L. *stercus* dung + E. *bilin.*] *Biochem.* = UROBILIN.

ster'co·phag'ic (-făj'ĭk), **ster·coph'a·gous** (stĕr·kŏf'ä·gŭs), *adj.* = SCATOPHAGOUS.

ster'co·ras'mi·a. Var. of STERCOREMIA.

ster·co're·an, -re·ous, *adj.* = STERCORAL.

Ster·co'ri·an·ism (stĕr·kō'rĭ·ăn·ĭz'm; 181), *n.* = STERCORANISM.

Ster'co·rist (stûr'kō·rĭst), *n.* = STERCORANIST.

ster'co·ry, *n.* Dung. *Obs.*

stere. + STAR, STEER, STIR.

stereo formula, *or* **ster'e·o·for'mu·la,** *n.* *Chem.* = SPACE FORMULA. See FORMULA, 5.

ster'e·o·i·som'er·ide (stĕr'ē·ō·ĭ·sŏm'ĕr·īd; -īd; stĕr'ē-), *n.* = STEREOISOMER.

ster'e·o·mer, ster'e·o·mer'ic (-ō·mĕr'ĭk), -i·cal, **ster'e·om'er·ism** (-ŏm'ĕr·ĭz'm). = STEREOISOMER, etc. [See FORMULA, 5.]

stereometric formula. *Chem.* = STEREO-FORMULA.

ster'e·o·plas'ma (stĕr'ē·ō·plăz'mä; stĕr'ē-), *n.* = STEREOPLASM.

are fused into a single piece, as in most vertebrates; — opposed to *temnospondylous*. **b** Of or pertaining to certain large stegocephalian amphibians which are so characterized and which constitute a suborder, **Ster'e·o·spon'dy·li** (-lī).

ster'e·o·stat'ic (stĕr'ē-ō-stăt'ĭk; stē̆r'ē-), *adj.* [*stereo-* + *static.*] Geostatic.

ster'e·o·stat'ics (-ĭks), *n. Physics.* The statics of solids.

ster'e·o·tax'is (-tăk'sĭs), *n.* [NL., fr. *stereo-* + *-taxis.*] *Biol.* A taxis in which contact, esp. with a solid body, is the directive factor; thigmotaxis. — **ster'e·o·tac'tic** (-tăk'tĭk), *adj.* — **ster'e·o·tac'ti·cal·ly** (-tĭ·kăl·ĭ), *adv.*

ster'e·o·te·lem'e·ter (-tē-lĕm'ē-tĕr), *n.* **a** = STEREOCOMPARATOR. **b** A telesteroscope with a scale attached, used esp. as a range finder.

ster'e·ot'o·my (-ŏt'ō-mĭ), *n.* [F. *stéréotomie.* See STEREO-; -TOMY.] The science or art of cutting solids, as into arches; esp., the art of stonecutting. — **ster'e·o·tom'ic** (-ō-tŏm'ĭk), **ster'e·o·tom'i·cal** (-ĭ·kăl), *adj.* — **ster'e·ot'o·mist** (-ŏt'ō-mĭst), *n.*

ster'e·ot'ro·pism (-ŏt'rō-pĭz'm), *n.* [*stereo-* + *-tropism.*] *Biol.* **a** A tropism in which contact, esp. with a solid or a rigid surface, is the orienting factor. **b** Sometimes, less exactly, thigmotaxis. Cf. HAPTOTROPISM. — **ster'e·o·trop'ic** (-ō-trŏp'ĭk), *adj.*

ster'e·o·type' (stĕr'ē-ō-tīp'; stē̆r'ē-; 277), *n.* [F. *stéréotype,* adj. See STEREO-; -TYPE.] **1.** *Print.* **a** A plate made by taking a mold or matrix of a printing surface in plaster of Paris, paper pulp, or the like, and making from this a cast in type metal, commonly with more than the usual percentage of lead. Stereotypes are now comparatively little used except for newspaper work, in which the paper-pulp process (see FLONG) is generally used. Books are now usually electrotyped, the surface of an electrotype being more durable. Stereotypes used for magazine or book printing are nickel-plated to increase their durability. **b** Stereotypy.
2. Hence, anything repeated or reproduced without variation; anything conforming to a fixed or general pattern and undistinguished by individual marks, as if produced from a stereotype.

ster'e·o·type', *v. t.;* -TYPED' (-tīpt'); -TYP'ING (-tīp'ĭng). [F. *stéréotyper.*] **1.** To prepare for printing in stereotype; to make stereotype plates of, as a book.
2. Hence, to fix in lasting form; to make permanent; also, to repeat without variation; to backney.

ster'e·o·typed' (-tīpt'), *adj.* Produced, or as if produced, from a stereotype; repeated mechanically or without variation; mechanical; lacking originality or individuality.

ster'e·o·typ'er (-tīp'ĕr), *n.* One who stereotypes.

ster'e·o·typ'er·y (-ĭ), *n.; pl.* -ERIES (-ĭz). **1.** Stereotypy.
2. A stereotype foundry.

ster'e·o·typ'ic (-tĭp'ĭk), *adj.* Also **ster'e·o·typ'i·cal** (-ĭ·kăl). Of or pertaining to stereotyping or to stereotypy.

ster'e·o·typ'ing (stĕr'ē-ō-tīp'ĭng; stē̆r'ē-), *n.* The making of or printing from stereotype plates; stereotypy.

ster'e·o·typ'ist (stĕr'ē-ō-tīp'ĭst; stē̆r'ē-; -ŏt'ĭ·pĭst), *n.* A stereotyper.

ster'e·o·ty·pog'ra·phy (-tĭ·pŏg'rā-fĭ), *n.* Act or art of printing from stereotype plates. — **ster'e·o·ty·pog'ra·pher** (-fĕr), *n.*

ster'e·o·typ'y (stĕr'ē-ō-tīp'ĭ; stē̆r'ē-; -ŏt'ĭ·pĭ), *n.* **1.** The art or process of making or of printing from stereotype plates.
2. Frequent, almost mechanical repetition of the same posture, movement, or form of speech, as in the mannerisms of dementia praecox.

-ste·re'sis (-stē-rē'sĭs). [NL.] *Surg.* A combining form from Greek *steresis,* deprivation, denoting *removal of a* (specified) *part,* as in glosso*steresis,* metro*steresis.*

Ste're·um (stē'rē-ŭm), *n.* [NL., fr. Gr. *steros* solid, firm.] *Bot.* A genus of fungi (family Thelephoraceae) having the sporophores resupinate or shelving and the basidial surface smooth. *S. purpureum* causes silverleaf.

ster'hy·drau'lic (stĕr'hī-drô'lĭk), *adj.* [F. *stérhydraulique.* See STEREO-; HYDRAULIC.] Pertaining to or designating a kind of hydraulic press producing pressure or motion by the introduction of a solid substance (as a screw, a rod, or a rope wound on a roller) into a cylinder previously filled with a liquid; resembling such a press in action or principle.

ster'ic (stĕr'ĭk; stē̆r'ĭk), **ster'i·cal** (-ĭ·kăl), *adj.* [*stereo-* + *-ic* (cf. def. of STEREOCHEMISTRY).] *Chem.* Relating to the arrangement of atoms in space; spatial. — **ster'i·cal·ly,** *adv.*

steric hindrance. *Chem.* Hindrance (of chemical action) ascribed to the arrangement of atoms in a molecule.

ster'ide (stĕr'īd; -ĭd), *n.* Also **ster'id.** [*sterol* + *-ide.*] *Biochem.* Any simple lipide that is an ester of a sterol.

ste·rig'ma (stē-rĭg'mā), *n.; pl.* STERIGMATA (-tā). [NL., fr. Gr. *stērigma* a support, fr. *stērizein* to prop.] *Bot.* **a** One of the slender stalks at the top of the basidium in certain fungi, from the tips of which the basidiospores are abstricted. **b** Any stalk or filament from which conidia or spermatia are abjointed. — **ster'ig·mat'ic** (stĕr'ĭg·măt'ĭk), *adj.*

ster'ile (stĕr'ĭl *or, esp. Brit.,* stē̆r'īl), *adj.* [L. *sterilis;* akin to Gr. *stereos* stiff, solid, *steiros* barren, *steira* a cow that has not calved, Skr. *starī,* Goth. *stairo,* fem., barren and to E. STARE.] **1.** Barren; unfruitful; not fertile.
2. Unproductive of vegetation; as, *sterile* land; also, yielding little or no crop; as, a *sterile* year.
3. Figuratively, barren of ideas or feeling; as, a *sterile* author.
4. Incapable of, or unfitted for, reproduction.
5. Ineffective; useless; doing no useful service; as, *sterile* gold in a safe deposit box; *sterile* reserves.
6. *Bacteriol.* Free from living microorganisms, as bacteria, or their viable spores; as, a *sterile* fluid. Cf. STERILIZE.
7. *Bot.* **a** Incapable of bearing, or characterized by lack of, fruit or spores; as, a *sterile* plant, fungus, hypha; unable to germinate; as, a *sterile* seed, spore. **b** Bearing only stamens, or entirely neutral; as, a *sterile* flower. **c** Without sori; as, a *sterile* frond. Cf. FERTILE, 6.
8. *Mil.* Barren of military power.
— **ster'ile·ly,** *adv.* — **ster'ile·ness,** *n. Rare.*

ste·ril'i·ty (stē-rĭl'ĭ·tĭ), *n.; pl.* -TIES (-tĭz). [L. *sterilitas.*] Quality or condition of being sterile.

ster'i·li·za'tion (stĕr'ĭ·lĭ·zā'shŭn; -lī-zā'shŭn), *n.* Act or process of sterilizing; also, state of being sterile or condition of being sterilized; specif., the act or process of killing all living cells, esp. microorganisms or the germ cells of higher plants and animals. ***Fractional,*** or ***intermittent, sterilization*** is the process of heating on successive days, allowing time between for the resistant spores to germinate into less resistant vegetative cells, which will be killed at the next heating. Cf. PASTEURIZATION.

ster'i·lize (stĕr'ĭ·līz), *v. t.;* -LIZED (-līzd); -LIZ'ING (-līz'ĭng). Also **ster'i·lise.** To make sterile, barren, or unproductive; specif.: **a** To impoverish, as land; to exhaust of fertility. **b** To deprive of the power of reproducing, specif. by surgical removal or inhibition of function of the reproductive organs; to render incapable of germination or fecundation. **c** Figuratively, to make barren of ideas, feelings, etc.; also, to render powerless, ineffectual, or useless, as by inhibiting normal productive functions; as, to *sterilize* gold.
The *sterilizing* influences of universal mechanization. *Wm. McDougall.*
d *Bacteriol.* To free from living microorganisms, as by physical or chemical agents. Cf. PASTEURIZE. **e** *Mil.* To render barren or unproductive of military power.

Syn. — STERILIZE, DISINFECT. The *sterilizing* of a medium implies complete destruction of all germs in it; to *disinfect* is merely to destroy the infectious microorganisms, although the process may also involve *sterilization.* A physician *sterilizes* his instruments; he *disinfects* a sick room.

Ant. — Fertilize, fecundate, impregnate; infect.

ster'i·liz'er (stĕr'ĭ·līz'ĕr), *n.* **1.** One who or that which sterilizes anything.
2. Any apparatus for sterilizing by the agency of boiling water, steam, or dry heat. See AUTOCLAVE.

ster'in (stĕr'ĭn), *n.* [From *cholesterin.*] *Chem.* = STEROL; — used also in combination, as in copro*sterin.*

ster'let (stŭr'lĕt; -lĭt), *n.* [Russ. *sterlyad';* cf. F. & G. *sterlet.*] A small sturgeon (*Acipenser ruthenus*) found in the Caspian Sea and its rivers, and highly esteemed for its flavor. The finest caviar is made from its roe.

Sterlet. 1/8
